Subject: FW: Coordination of efforts for Initial Flint Water Assessment Teams
Attachments: Flint Residential Outreach Graphic 4Feb2016 Final.pdf

Capt. Kelenske and Lt. High,

Please see the confirmation below regarding the plan for MDHHS staff to accompany DEQ's **Initial Assessment Teams** for homes testing high in lead and copper. Currently, one MDHHS staff is on the ground in Flint to go on visits today, 21 MDHHS staff are being trained in Lansing today for future home visits, and only 1 MDHHS staff member has been requested to go to Flint tomorrow, although additional are available if needed.

Observation – Confusion appears to have been caused by the multiple DEQ teams that are visiting homes, in conjunction with the attached schematic that leaves much for interpretation as to the timing of team visits. These Initial Assessment Teams should not be confused with the Site Sentinel Monitoring Teams. There are 10 Site Sentinel Monitoring Teams going out to visit homes starting tomorrow, that will not include MDHHS staff. These team efforts are not being combined due to the timeframe necessary for the each Site Sentinel Monitoring Team visit, and the impact of that on the 48hr. notification requirement for all homes testing high in lead or copper mandated by the Governor.

I hope this information is helpful. Please let me know if you have any questions.

Jennifer Lixey Terrill

Subject: Coordination of efforts for Initial Flint Water Assessment Teams

Scott,

Thank you very much for the informative discussion about the types of teams that DEQ is sending to assist the Flint residents. I want to verify our discussion. When DEQ sends their "site sentinel monitoring teams" to homes, DHHS will NOT include a team member due to the type of work and length of each visit. When DEQ sends their "initial assessment team" for lead &/or copper, DHHS will send a health representative to assist with health questions of the residents. This protocol will demonstrate coordination of effort and sensitivity of the resident's needs. The CHECC is coordinating the health representatives and will assist you with your health team members. It is important to have as much advance notice of team deployment as possible. Currently, we will plan on one health representative per day unless notified otherwise. We stand ready to increase numbers to meet DEQ's needs.

Sincerely,

Jacqueline S. Scott, D.V.M., Ph.D.

American Red Cross and United Way Play Crucial Role Coordinating Volunteer Efforts in Flint

FOR IMMEDIATE RELEASE
February 9, 2016
Release #: 32

FLINT, Mich. – Since early January, over 2,000 volunteers have volunteered their time to assist Flint residents during the water emergency. Volunteers are coordinated through the Volunteer Reception Center, operated jointly by the American Red Cross and United Way of Genesee County. These volunteers have performed numerous tasks throughout the community from delivering water resources door-to-door to assembling water test kits.

"We have had volunteers of all ages from all different backgrounds come forward to help," stated Sarah Lewan, community volunteer manager. "We have processed more than 200 groups of varying sizes, including corporate groups, social groups and concerned citizens."

Volunteers are utilized at a variety of community organizations to provide assistance with water distribution, warehousing, data entry and assembly of water test kits. The volunteers give whatever time they can, whether it is a couple of hours or availability for several days.

There are opportunities for additional groups and individuals to volunteer. To learn more or sign-up to volunteer, visit www.flintvolunteer.com.
The State of Michigan continues to coordinate response efforts in partnership with the City of Flint, Genesee County and local community organizations.

Additional information about water response efforts is available at www.michigan.gov/flintwater, by calling United Way's 211 or visiting www.helpforflint.com.

###

NOTE: ALL MEDIA INQUIRIES ARE BEING HANDLED BY THE JOINT INFORMATION CENTER AT 888-EMD-TODAY (888-363-8632). FOR FLINT WATER EMERGENCY DONATION INFORMATION, GO TO www.helpforflint.com.

Subject: Talking points for Congressional Call
Attachments: LegCongCall_Kelenske_Feb9.docx

Captain Kelenske,

Attached are talking points you can use on tomorrow's Congressional/Legislative conference call. It was mentioned you want to provide a total number of homes visited during the briefing. I'm not exactly sure what figure you had in mind, whether it is total number of occupied residences or a percentage of homes with filters, etc. so I put something in there, but left that bullet point highlighted. I also saw the note not to use the numbers in the attachments.

So you are aware, I have asked both DHHS and DEQ to have representatives prepared to give a briefing on the call; however, it sounds like they will both have reps on the call for questions, but do not plan to give a proactive report.

Please advise if you need anything further.

Subject: Daily Summary
Attachments: Weekly Events 02082016.xlsx; GovReport - 02082016.pdf; 2015-10-01 City of Flint Water Contamination-Shortage SitRep 34 2016-02-08.pdf

Capt. Kelenske,

Attached is today's daily summary of events. The Sit Rep has been reviewed by Peter Manning and there are no maps for today. GIS will update the lead and copper maps first thing in the morning.

Update 2/8/16 – 35th Day (34th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Ensure adequate quantities of supplies to support operations.
- Continue door to door/Flint Water Response Teams (FWRTs), ARC only.
- Prepare appeal on denial of Category B under the Presidential Emergency Declaration.
- Shift Water Response Teams operations to a targeted effort to provide filters into homes where data shows filters have not been provided.
- Work on plan for Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery - recovery plan/transition of PODs.

Status on Governor's request letter to the President:

- Appeal denial received on the Major Disaster Declaration. Nothing more can be done on this.
- Denial of Individual Household Program and Category B under the Emergency Declaration received January 22, 2016. We have 30 days to appeal and EMHSD staff is gathering information for the appeal.

Attached:

1. Governor's Report for 2/8/2016.
2. Sit Rep #34.
3. Weekly Events List.

Key items for tomorrow to note are:

- Team Priority Scheduled Tomorrow: Active Water Subscribers without filters marked vacant
- 10 American Red Cross Teams scheduled for Tuesday, February 9
- Congressional and Legislative Call, 2:30 PM

Items to Note

- JIC Drafted a news release about the team visiting homes with high copper levels. Release is routing through for final approvals before dissemination this evening.
- SEOC Logistics had a conference call with Seventh Day Adventists on agreement and staffing.
- SEOC Planning developed a new Incident Action Plan for Operation Period from 2/9-2/16/2016.
- Requested monetary donation information from United Way and Community Foundation of Greater Flint.
- GIS develop an online application for Governor Snyder to view maps.

Unified Coordination Group (UCG):

- No updates.

Local EOC

- Establishing objectives and IAP for next operational period, 02/08/2016 – 02/12/2016.

- Awaiting additional information regarding companion animals with potential lead and chlorine poisoning from MDARD.
- Establishing plans for Elevated Copper Initial Assessment Task Force starting 02/08/2016 and follow-up outreach to homes with water lead levels over 150 ppb starting 02/10/2016.
- Aligning resources and supplies for Elevated Copper Initial Assessment Task Force and follow-up outreach to homes with water lead levels over 150 ppb.
- Analyzing locations of faith-based organizations and churches for integration into long-term recovery plans.

Capt. Kelenske,

Below is the summary of today's events. The Sit Rep has been reviewed by Peter Manning.

Update 2/7/16 – 34th Day (33rd Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Ensure adequate quantities of supplies to support operations.
- Continue door to door/Flint Water Response Teams (FWRTs), ARC only.
- Prepare appeal on denial of Category B under the Presidential Emergency Declaration.
- Shift Water Response Teams operations to a targeted effort to provide filters into homes where data shows filters have not been provided.
- Work on plan for Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery - recovery plan/transition of PODs.

Status on Governor's request letter to the President:

- Appeal denial received on the Major Disaster Declaration. Nothing more can be done on this.
- Denial of Individual Household Program and Category B under the Emergency Declaration received January 22, 2016. We have 30 days to appeal and EMHSD staff is gathering information for the appeal.

Attached:

1. Daily Summary of Data.
2. Sit Rep #33.
3. Maps: Residential Water Sampling Results – Lead and Copper

Key items for tomorrow to note are:

- 10 American Red Cross Teams scheduled for Monday, February 8, 2016.
- The Kroger warehouse will be operational on Monday, February 8, 2016 and managed by MDOC.

Items to Note

- 10 ARC Flint Water Response Teams to the field today. Priority for the weekend is homes that did not have contacts during previous sweeps.
- State VAL is working on the Category B and Individuals and Households appeal.
- There continues to be a concern that EPA refuses to work with the state teams in addressing the high lead level homes.

- Genesee County EM expressed concerns about lead poisoning in service/companion animals. MDARD has initiated contact with their partners to address this concern.
- 28 addresses have copper testing that exceeds the "action level" (1,300 ppb). DHHS is currently working on messaging regarding this issue, and DEQ is discussing filtering options.

Unified Coordination Group (UCG):

- Task Forces Health & Medical: working on creating a flow chart for visual of testing results.
- EPA conducted 11 filter grabs yesterday, and will be doing 2 today. This includes up to 33 samples per grab. A grab would be considered a location/residence. They are also following up on the AmeriCorps volunteers (2) that have rashes.

Local EOC

- Establishing objectives and IAP for next operational period, 02/08/2016 – 02/12/2016.
- Awaiting additional information regarding companion animals with potential lead and chlorine poisoning from MDARD.
- Establishing plans for Elevated Copper Initial Assessment Task Force starting 02/08/2016 and follow-up outreach to homes with water lead levels over 150 ppb starting 02/10/2016.
- Aligning resources and supplies for Elevated Copper Initial Assessment Task Force and follow-up outreach to homes with water lead levels over 150 ppb.
- Analyzing locations of faith-based organizations and churches for integration into long-term recovery plans.

State Encourages Food Establishments to take Advantage of Free Water Safety Inspections
Local and State Leaders Showcase Water Assessments Done at Flint Food Establishments

FOR IMMEDIATE RELEASE
February 5, 2016
Release #: 31

Flint, Mich. – In an effort to support Flint food-based businesses, Lt. Gov. Brian Calley, along with local and state food regulators and business development officials, provided a behind-the-scenes look at how the Michigan Department of Agriculture and Rural Development (MDARD) and Genesee County Health Department are working with local food establishments to conduct water assessments and ensure food safety precautions are in place.

"Flint has hundreds of restaurants, retail food markets and food processors committed to serving its residents safely," Calley said. "These establishments can now receive free assessments from MDARD and the Genesee County Health Department to ensure food safety precautions are in place."

"In response to this emergency and the need to assess lead levels in water being used at Flint food establishments, MDARD has mobilized 14 food inspectors, working full-time to conduct risk-based compliance assessments and verify adherence to current water source requirements," said MDARD Director Jamie Clover Adams. "MDARD inspectors are assisting the Genesee County Health Department in conducting the sampling and inspections, allowing the health department to focus its efforts on checking other priority facilities in its jurisdiction, including childcare facilities."

Food establishments must take extra precautions to protect food safety during the Flint water emergency. These precautions include having the water tested by an accredited laboratory to prove it is safe to use; installing approved water filters, as needed; flushing unfiltered faucets and hard-plumbed equipment on a daily basis; or using commercially bottled water for all cooking, cleaning/washing and drinking.

"Flint's restaurants and other food establishments are demonstrating they are taking the necessary precautions to reduce potential food safety risks associated with Flint water," said Mark Valacak, Health Officer, Genesee County Health Department. "Safe food preparation and handling is the cornerstone of any food business's success, and we are dedicated to working cooperatively with MDARD and the food service establishments we regulate to ensure the safety of our food supply."

The State of Michigan is covering the cost of water sample testing for food establishments on the City of Flint water supply.

"The restaurants, bars, cafes and other food businesses, like the Flint Farmers' Market, in Flint are the backbone of the city's culture and economic success, and help define who we are as a community," said George Wilkinson, Group Vice President, Flint & Genesee Chamber of Commerce. "Whether a relative new-comer or a well-established dining institution, we need to do whatever we can to support Flint food businesses and ensure their success."

Flint has a total of 633 licensed food businesses, including restaurants, food processors and retail grocery stores. Assessments have been prioritized according to risk, with those in known high-lead areas taking first priority, and by request from food establishments. Food businesses who have not yet had an assessment or free water sample testing can call MDARD's Call Center at 800-292-3939 to schedule an appointment.

As of Feb. 4, MDARD has completed approximately 225 initial assessments of food businesses and has begun doing follow-up assessments. If the businesses are taking the required precautions, they are determined to be in compliance with state and federal food regulations. A list of food businesses determined to be in compliance with current water use regulations is available at www.michigan.gov/flintwater. The list is updated regularly.

Flint food businesses not included on the list are not necessarily out of compliance with Michigan food regulations. Some businesses have not yet received a compliance assessment from food inspectors.

Initial water samples taken at the facilities were "first-draw" samples, taken when the water had not been in use for at least six hours. If first-draw samples showed any lead levels, follow-up samples are being taken. MDARD will continue to work with businesses to make sure they are in compliance with water use requirements and assist them in getting water test sample results below detectable levels.

For more information, or to schedule a food establishment water assessment, contact MDARD at 800-292-3939.

Capt.

Here is what I have developed for the process for non-state employees to be reimbursed for costs related to FWICC. I need to find an Admin to fix the formatting and will do that as soon as someone arrives. I have also attached the State of Michigan travel guidelines; using state funds we need to adhere to the state rules.

If you have questions or would like additional information, please let me know.

Thanks,
Penny

STATE OF MICHIGAN
JOINT INFORMATION CENTER

NEWS RELEASE

FOR IMMEDIATE RELEASE
February 4, 2016
Release #: 30

State Partners with MSU Student Athletes to Help with Flint Recycling and Water Distribution Efforts

New Recycling Site Open Friday from Noon to 4 p.m.

Flint, Mich. – Student athletes from Michigan State University are partnering with Schupan Recycling, Republic Services and the Michigan Community Service Commission (MCSC) to help with recycling and water distribution efforts in Flint on Friday, Feb. 5, including collection of empty water bottles and distribution of recycling bags and bins.

"We are excited to have students from MSU volunteer their time to help the residents of Flint," said Ginna Holmes, executive director of the MCSC. "The state is thankful to Schupan and Republic for stepping up to help recycle all the water bottles. We're also looking forward to engaging other volunteers in the future to assist with these recycling efforts."

Recycling collection and water distribution will take place Friday from Noon to 4 p.m. in the parking lot of the Northwest Shopping Center, 2629 West Pierson Road, Flint, MI 48504 (corner of Clio Road and W. Pierson Road).

Residents are asked to bring their empty water bottles to this location. Schupan Recycling will be collecting the bottles to process for turning into new products.

Residents also will be able to pick up a blue recycling bin from Republic Services.

Media is invited.

Edible Flint Works to Address Water Emergency through Urban Gardening
Urban Agriculture Organization Makes a Positive Impact in Flint Communities

FOR IMMEDIATE RELEASE
February 4, 2016
Release #: 29

Flint, Mich. – Since 2009, Edible Flint has been working with individuals and institutional partners to support Flint residents in growing and accessing healthy food in order to reconnect with the land and each other. As a part of their continuing outreach to Flint's residents, Edible Flint is gearing up to ensure a bumper crop of lead fighting vegetables and address concerns over urban gardening in Flint.

Edible Flint supports more than 300 community and individual gardens in the city through its Garden Starters program. This program provides gardening classes, technical expertise, resources and supplies. In response to the recent Flint water emergency, the organization has plans to expand their programs as they prepare for the upcoming gardening season.

Not only are they looking to support additional food gardeners through their Garden Starters program, they are currently reviewing the selection of seeds and transplants being distributed this year to ensure vegetables that fight lead exposure are included. In addition, Edible Flint, which tests approximately 50 new gardens each year, will be increasing the number soil tests (including lead screening) for Flint's food gardens. They also intend to provide hose filters for garden irrigation for program participants.

"Edible Flint is committed to supporting Flint residents by providing access to resources to grow nutritious fresh food," said Terry McLean, Michigan State University Extension (MSUE) Educator, and Edible Flint Leadership Board Member. "Through our urban gardening program we hope to provide a catalyst for recovery and community engagement."

McLean added, Edible Flint has been working with MSUE partners to reassure gardeners of the safety of eating and growing vegetables grown in Flint's community gardens.

For more information on Edible Flint, visit http://www.edibleflint.org.

Michigan National Guard Continue Efforts at Water Resource Sites

FOR IMMEDIATE RELEASE
February 2, 2016
Release #: 27

FLINT, Mich. Approximately 70 Michigan National Guard Soldiers continue to assist with the distribution of bottled water, water filters, replacement cartridges and water testing kits at the water resource sites located at five of the city's fires stations.

As part of the distribution process, residents seeking water filters and replacement cartridges are asked to share their address. This data is being collected and mapped in real-time to assist with long-term recovery and help water response teams know where to focus their door-to-door efforts.

It is important to note that photo identification is not required and no resident will be denied resources.

Learn more about the Michigan National Guards efforts by viewing this video.

Flint residents can pick up water test kits, water filters, filter cartridges, and cases of bottled water. Also, residents can return filled water test kits at any one of the five water resource sites. Samples will only be accepted by using the official water testing kits provided at the water resource sites and by the water response teams.

The water resource sites remain open daily from 9 a.m. to 9 p.m. and are located at:

Fire Station #1 (also a water bottle and filter cartridge recycling site)
310 East 5th St.

Fire Station #3
1525 Martin Luther King Ave.

Fire Station #5 (also a water bottle and filter cartridge recycling site)
3402 Western Road

Fire Station #6
716 West Pierson Road

Fire Station #8 (also a water bottle and filter cartridge recycling site)
202 East Atherton Road

All water filters distributed at the water resource sites are certified by NSF International for lead reduction. Individuals wishing to verify that a specific filter is NSF-certified can do so via the NSF website.

The State of Michigan continues to coordinate response efforts in partnership with the city of Flint, Genesee County and local community organizations.

Additional information is available at www.michigan.gov/flintwater, by visiting www.helpforflint.com or by calling 211.

Subject: Talking Points for tomorrow
Attachments: LegCongCall_Kelenske_Feb2.docx

Hi Capt.,

Attached are talking points for tomorrow's Congressional Legislative Conference call at 2:30 p.m. From the state, it will be you and Dr. Wells giving updates. Due to Director Craegh being in DC, DEQ will not report out. I'm not sure who from the feds is confirmed to give an update.

We may get an updated agenda from FEMA tomorrow. Insp. Matt Bolger will be the JIC Manager for the next two days.

Please let him know if you need anything.

DEQ and EPA Continue Interagency Cooperation Discussions on Flint Water

FOR IMMEDIATE RELEASE
February 1, 2016
Release #: 26

FLINT, Mich. – Michigan Department of Environmental Quality Director Keith Creagh met today with Interim Regional Administrator Robert Kaplan from the U.S. Environmental Protection Agency as part of ongoing interagency cooperation to address the Flint water crisis. The EPA and DEQ have met regularly since a state of emergency was declared in Flint in early January.

"These conversations with the EPA are a critical part of our shared response to the emergency in Flint," said Creagh. "We know that moving forward will require all levels of government – along with partners in the business and nonprofit communities and the community of Flint – to work together with the sense of urgency this crisis demands."

Creagh and the EPA regional administrator have weekly phone calls. In addition, program staff from the DEQ and EPA remain in daily contact to coordinate response. At today's meeting, Creagh and Kaplan along with technical staff from both agencies discussed working together to maximize the data that is being collected to make sure the agencies are closely aligned in their work.

The DEQ is also working in conjunction with the EPA to plan and review the 200 sentinel test sites, enabling both entities to capture the information needed across the entire spectrum of data so we have a better overall analysis of the distribution system.

"We want to have systems and structures in place that will lead us to better conclusions for the people of Flint," Creagh said. "We appreciate the partnership with EPA and other government and non-government agencies."

The discussion included a five-part strategy the DEQ implemented to establish a baseline of data to determine when the water in Flint is safe to drink.

The strategy includes:

- Residential water testing: At-home water testing done by residents is key in guiding experts to areas of concern.

- School testing: Michigan DEQ in collaboration with the Michigan Department of Licensing and Regulatory Affairs (LARA) has tested all 13 public schools in the city and continues to test non-public schools, children's centers and senior centers. The state will retest the public schools once it has completed replacing water fixtures. Fixture replacement has begun at Freeman School, which will be retested after water flushing happens within the next week.
- Food service/restaurant provider testing: Michigan DEQ is working in collaboration with the Michigan Department of Agriculture and Rural Development (MDARD) to test establishments and ensure they are using water filters, flushing water systems properly and using the correct food and water standards.
- Blood level testing: Michigan DEQ is working in conjunction with the Michigan Department of Health and Human Services (MDHHS) to ensure that residents with high blood lead levels have their water tested for lead. Homes with high water lead levels are provided additional services by MDHHS and the Genesee County Health Department to ensure residents' exposure to lead is minimized.
- Flint water distribution system testing: Michigan DEQ and the City of Flint are working to monitor and test the quality of the water as it travels throughout the city's water distribution system. Additionally, sentinel sites are being established to set a baseline for data collection. Sentinel sites are homes that will be used as representative samples to determine the effectiveness of corrosion controls in reducing lead levels.

"Our ongoing conversations with the EPA will help us solidify this plan so we can have confidence in the outcomes," Creagh said.

Water resource sites remain open daily from 9 a.m. to 9 p.m. and can be found at the five city fire stations. For locations, go to www.michigan.gov/flintwater. Additional information is available at www.michigan.gov/flintwater, or by calling United Way 211.

Subject: Proposal to Reduce POD Hours
Attachments: POD 5-7 and 7-9 comparison.docx

Capt.,

In an effort to better support the PODs, the warehouse and EOC staff, as well as provide more accurate and timely numbers, I would like to request we reduce the hours of the PODs from 9 a.m. to 9 p.m. to 9 a.m. to 7 p.m. Currently, there is a decent decrease in distribution between 7 p.m. and 9 p.m. and we do not anticipate any issues with this reduction. Attached are some burn rate numbers for the last few days at the PODs between 5-7 p.m. and 7-9 p.

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	02/09/2016 08:00:00
Operational Period End:	02/16/2016 08:00:00
Situation Report No.	40
SEOC Status:	Full
SEOC Hours of Operation Begin:	02/14/2016 08:00:00
SEOC Hours of Operation End:	02/14/2016 20:00:00

Executive Summary

SEOC Update:
Accomplished today (February 14, 2016):

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Resources.
- Public information control.

Logistics:
- Fielded resource requests.
- Facilitated distribution team calls.
- Still working on getting the supplies and equipment needed for the second warehouse
- Working with Flint Public Schools, donations management and Walmart to find a location for their donated water.

JIC:
- Added Recycling information to the carousel on www.michigan.gov/flintwater.
- Added a link on www.michigan.gov/flintwater to the Attorney General's Consumer Advisory about scams targeting Flint residents.
- Tweeted a reminder about scams from EMHSD twitter account.
- Requested field PIO to arrange media interviews on Tuesday with local reporters regarding scams.
- Requested that information about recycling and scams be included in daily Flint Water Response email sent by the Governor's Office; both items were included in the message that went out at 11 a.m. today.

Recovery Branch:
o Attended Local Brief, SEOC State Agency Briefing Meetings, Distribution Process Meetings.
o Reviewed and commented on ICS 204 Forms Obj. 1 and 6 in preparation of meeting tomorrow.
o Team Priority Visited Today: Visited the 83 addresses of City of Flint Residents where there was no valid record of having been contacted. Continued with Rapid Response.
o Team Priority Scheduled Tomorrow: Continue Water Distribution and Rapid Response.
o 5 American Red Cross Teams scheduled for Monday, February 15, 2016.

o Total homes visited:
- 24,215 (round 3 total).
- 1,046 (today).

o Water cases (liters calculated by multiplying # of cases x 12):
- 164,856 liters or 13,738 cases (round 3 total).
- 10,212 liters or 851 cases (today).

o Replacement cartridges:
- 5,484 (round 3 total).
- 319 (today).

o Faucet filters:
- 7,821 (round 3 total).
- 69 (today).

Planning Section:
- Published Sit Rep #40.
- Submitted daily Governor's report.
- Participated in daily calls and meetings with UCG, state agencies and distribution process.
- Updated position procedures.
- Situation Unit continued work on appeal letter.
- Started updating IAP information for planning day tomorrow.

Operations Section:
- Met with State agency EMCs to determine progress with their current IAP objectives.
- Participated in the Unified Coordination Group briefing.
- Facilitated the State Agency briefing conference calls.
- Participated in the Distribution Process meeting.

- Warehouse Numbers as of 1800:

- Water (liters):
- 677,953 liters or 61,230 cases.
- Filters (faucet):
- 47,132.
- Replacement cartridges:
- 375,514.
- Test Kits (prepped):
- 28,674.

- PODs (Number as of 1700 2/14):
- Water (cases):
- 25,854 liters or 2,132 cases.
- Filters (faucet):
- 80.
- Replacement Cartridges:
- 181.
- Test kits:
- 50.

Finance Section:
- Created Category B Cost Assessment spreadsheet for appeal.
- Entered potential Category B Costs in spreadsheet.
- Work on updating the spending plan.

GIS Branch Updates:
- EM Power Map created & cross referenced if they were visited.
- Created individual area maps containing homes that are still not contacted.
- Water sampling map with test results for Lead & Copper with data from 12/13
- Validated field team location.
- Parcel pairing.
- Daily JIC map.

DTMB:
- Continue to provide DTMB management with daily updates and resource requests received.
- Providing Polycom phone to DEQ ECC.
- Modifying parking access to Flint ramp per SEOC request.

DHHS-CH (weekly):
- The CHECC remains activated at a Level 2, and continue to staff the hotline Monday through Friday to answer any lead health-related questions referred by 2-1-1 in support of the GCHD. The CHECC continues to provide representation to the UCG to facilitate communication with federal partners.
- GIS provided MDHHS with the map and follow up of additional addresses of medically dependent individuals in the 48502 zip code as requested yesterday.
- The CHECC has been in contact with the GCHD EPC and they are discussing the potential need for additional nurse case manager support from federal partners. The current federally supplied nurse case managers will be leaving Flint this week.

DEQ:
- Deployed Sentinel water sampling collection crews and continued data collection and monitoring.
- Continued assembling data for EPA Emergency Administrative Order and second EPA request.
- Reviewed incident objectives to reflect Director's priorities for upcoming week.
- Sentinel Team results (2/11/16 to 2/13/16): As of 5:02 pm today, 249 of 402 homes were visited.

Unified Coordination Group (UCG):
One sequential testing team is set up to do outreach at 40 residences, along with eight filter grabs.
- Health and Medical Task Force will be meeting with the US Behavioral Health for a team meeting, to integrate with the Flint Recovery Group. They will also begin setting up for the incoming team with nurse case managers who are arriving today.
- UGC Public and External Affairs: Surgeon General will be arriving tomorrow for a two day visit.
- American Red Cross had a 3:00 pm meeting to review the ARC Recovery Framework, and to identify the federal representatives who will be on the recovery groups.
- The UCG advised they will work on getting info graphics to make the website less confusing.

Local EOC:
- Sentinel outreach campaign statistics:
- 402 homes were initially contacted for the program.
- 241 households have agreed to be sentinel monitoring points for long-term water testing.
- Identified 10 lead service lines.
- 17 households declined to participate.
- *Developed SitRep #34.*
- Fulfilled special site visit requests from Governor's Office through Elevated Lead and Copper Initial Assessment Task Force.
- Coordinating scheduling of blood lead level testing clinics in support of goal to test all children under the age of six by April 1.

Injuries:
- MDEQ worker fell in the driveway of a residence during work as part of the MDEQ sentinel monitoring program task force. No injury reported *and incident was documented on an ICS 214.*
- Non-Incident related: One person from the EPA was admitted to the hospital.

Incident Response/Recovery Priorities/Objectives

(Objectives are in order of priority with original objective number attached)
12. Develop and implement a comprehensive long term recovery and transition plan.
11. Ensure accurate tracking and accounting of all donations.
5. Continue to maintain adequate staffing to support operational requirements.

10. Collaborate with local and volunteer agency partners to solidify the Flint Water Operations Plan.
9. Enhance situational awareness and common operating picture of all activities.
8. Maintain coordination between partner agencies and organizations to include FEMA IMAT, FWICC, and the US Department of Health and Human Services Unified Coordination Group (UGC).
3. Improve and maintain the public information strategy and process.
6. Develop an overview of possible assistance programs.
4. Develop a long term public health and services plan.
7. Gather, analyze, and disseminate GIS data to develop products for future planning.
1. Ensure all households within impacted community have required resources and are included in DEQ water sampling plan.
2. Ensure accurate tracking and accounting of all commodities.

Damage Assessment Summary

Joint Information Center / Public Information Officer

Tasks accomplished:
- Added Recycling information to the carousel on www.michigan.gov/flintwater
- Added a link on www.michigan.gov/flintwater to the Attorney General's Consumer Advisory about scams targeting Flint residents
- Tweeted a reminder about scams from EMHSD twitter account
- Requested field PIO to arrange media interviews on Tuesday with local reporters regarding scams
- Requested that information about recycling and scams be included in daily Flint Water Response email sent by the Governor's Office; both items were included in the message that went out at 11 a.m. today

Agriculture and Rural Development (MDARD)

MDARD has no activities to report for 2/14/16.

American Red Cross (ARC)

The American Red Cross deployed 5 teams on Sunday, 2/14/16: 2 rapid response teams in partnership with AmeriCorps NCCC and 3 mobile teams.

The Volunteer Reception Center is operating today from 9am to 5pm, and the plan is for those hours to continue daily, Monday through Sunday.

101 new event-based volunteers were processed through the VRC. This total is comprised of 42 individuals and 59 people from four groups, the Environmental Council, Hilary for Michigan, Flint Derby and ELGA (a credit union). All 101 participated in today's relief efforts.

The VRC is finished with water test kit assembly for the time being. Consequently, it is focusing on putting together water bottle recycling kits. 44 boxes were filled with recycling kits today.

Community Health (MDCH)

The CHECC remains activated at a Level 2, and continues to staff the hotline Monday through Friday to answer any lead health-related questions referred by 2-1-1 in support of the GCHD. The CHECC continues to provide representation to the UCG to facilitate communication with federal partners.

GIS provided MDHHS with the map and follow up of additional addresses of medically dependent individuals in the 48502 zip code as requested yesterday. Information was provided to the Operations Chief. It does not appear that additional follow up will be required.

The CHECC has been in contact with the GCHD EPC and they are discussing the potential need for additional nurse case manager support from federal partners. The current federally supplied nurse case managers will be leaving Flint this week. A decision is anticipated in the next couple of days.

Corrections (MDOC)

Warehouse 2 is fully functioning and has been receiving loose, non-pallet water donations.

MDOC continues to keep trucks dedicated to delivering to individual POD's and covering Rapid Responses for PODs that get to a critical level. PODs remained well supplied throughout day and will continue to be well supplied moving forward.

We are continuing to work with Finance and MDOC assets to capture total employee payroll information and expenditures.

MDOC continue to staff the SEOC from 0800-2000, 7 days/week. Mike Farmer and Bridget Spencer are managing the Recovery Branch of the SEOC

67 test kits were delivered from Flint to Lansing today. 67 were residential. No MDARD.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities today:

- Deployed Sentinel water sampling collection crews and continued data collection and monitoring.
- Continued assembling data for EPA Emergency Administrative Order and second EPA request.
- Reviewed incident objectives to reflect Director's priorities for upcoming week.
- Sentinel Team results (2/11/16 to 2/13/16): As of 5:02 pm today, 249 of 402 homes were visited.

Licensing and Regulatory Affairs (LARA)

Participated in briefings and updated the LARA Executive Team

LARA continues to monitor DEQ's test results for Health Care, Child Care, Adult Foster Care, HHS and MDE facilities and Schools.

LARA continuing efforts to plan and schedule faucet replacements for Flint schools. LARA is working with MDOC to track and store incoming material at the warehouse.

Translation services for various documents continue to be provided as needed.

Ongoing discussion regarding coverage of state regulated facilities and elimination of duplication of effort.

Military and Veterans Affairs (DMVA)

Commanders Situation Report (SITREP)

1. DTG: 1413002016

2. UNIT: Points of Distribution (PODs), TF FLINT (1-125 IN)

3. POC: 1LT Roland, John G. Cell: (Email: john.g.roland2.mil@mail.mil

4. PRESENT LOCATION: Genesee County Local EOC, 1101 Beach St., Flint, MI, 48502

5. SITUATION OVERVIEW: 1-125 IN has Soldiers deployed to the Flint Water Crisis in support of Distribution Operations at the Points of Distributions (PODs). Daily operations consist of receiving, tracking, and issuing out water, filters, replacement filters, and water test kits.

6. OWN SITUATION DISPOSITION /STATUS: Currently 1-125 IN has ! Soldiers on ground supporting the mission.

7. OPERATIONS: Operations for the next 24 hours are to sustain water/filter distributions throughout the 5 designated fire stations and track all distribution incoming and outgoing through the PODs.

a. Signs have been printed off for the POD Buildings. Requesting approval to get the signs laminated from the purchasing office.

1.) TF Flint OIC, 2LT Benke, is actively seeking approval from Dana and/or Kim at the purchasing office for laminating.

b. Soldiers are preparing for the unit change at the PODs.

1.) 1-125 IN will be replaced within the next 72 hours.

8. PERSONNEL: Soldiers are currently assigned to the POD operations. Soldiers are assigned in ' eams at Fire Stations 1, 3, 5, 6 and 8.

9. INTELLIGENCE / FORCE PROTECTION: Water boil advisory has been lifted.

10. LOGISTICS: In support of TF Flint

a. Schupon has placed an order for more instruction cards attached to recycle bags.

b. Recycling trailers will need to be emptied this week. Working with POD NCOICs IOT determine an estimated time for a trailer exchange.

11. COMMUNICATIONS: No communications issues at this time.

P: RRF cell phones alternate for WRTs.
A: Personal cell phone
C: 800 MHz radios issued to PODs and WRTs.
E: Runner

12. NARRATIVE: N/A

13. COMMANDER'S EVALUATION:
• AAR and operational notes are being consolidated into SOP's to send to JOC to assist in updating the All Hazards Plan.
• An operational handoff packet including SOP's, POC's, POD sector sketches, hand-receipts, and other operational notes is being built to assist the incoming unit. When the incoming OIC has been selected, I would like to establish communications with them in regards to the aforementioned items before they report to Flint.
• OUT (last 24 hours)
Bottled water-2435 Water (Gallons)-3369 Lead Testing Kits-96
Pitcher (23 cup)-0 Brita Faucet Filter-16 Brita Replacement Cartridge-71
Pur Filter-87 Pur Replacement Filter-230

National Weather Service (NWS)

NWS Detroit providing morning SEOC brief and Activity Log posts. Jim Maczko from NWS Grand Rapids will be the contact point for any changes in NWS Support and will also continue to update the Sit Rep Executive Summary as needed.

Participation in afternoon SEOC briefings is planned only if significant changes in the forecast occur.

Natural Resources (MDNR)

MDNR LED continues to support its QOL partners with staffing at the SEOC.

Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging (VAAA) continues to receive phone calls from concerned seniors in Flint and continues to make referrals to the Genesee Co. EOC for water and filter follow-up.

VAAA's local Nursing Home Ombudsman continues to monitor Flint area Nursing Homes to ensure residents have access to safe water.

Contact info for VAAA Executive Director is:
Kathryn C. Boles
President, CEO
Valley Area Agency on Aging
225 E. Fifth Street, Suite 200
Flint, MI 48502
(810) 239-7671
(810) 239-8869 fax

State Police (MSP)

The MSP position within the SEOC will be staffed at MSP Operations at HQ. All e-mails to MSP-EOC-MDSP@michigan.gov are being forwarded to the Operations Lt. The phone number for the on duty Operations Lieutenant is 517-241-8000

Technology, Management and Budget (MDTMB)

Continue to provide DTMB management with daily updates and resource requests received.

Providing Polycom phone to DEQ ECC

Modifying parking access to Flint ramp per SEOC request

Transportation (MDOT)

Continuing to maintain situational awareness and responding to issues regarding equipment and road conditions.

Team Transport Vehicle Driver	5	5		2/15/16	8:00 am
iPads	5	5		2/15/16	8:00 am
Hand Warmers	50	50		2/15/16	8:00 am
Distribution Kit	500	500		2/15/16	8:00 am

Execution:

Key Locations

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Team Assignment – Target Areas

Team Priority – Visit remaining (56 addresses of listed 83) City of Flint Addresses that receive City Water and continue to classify as a No Contact.

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail, unless specifically directed otherwise by the SEOC. It is possible the iPads will not be used due to cold temperatures.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail, unless specifically directed otherwise by the SEOC. It is likely the iPads will not be used due to the extreme cold temperatures.

SEOC Report for February 14, 2016
Full Days Since Emergency Declaration: 40

Items to Note

• There is a decrease in number of total residential parcels and total residential active water subscribers. Seven parcels were originally classified as residential parcels and were found to be right-of-way or easements. The data has been updated to remove those seven properties.
• National Guard mission has been extended through 3/16/2016.
• SEOC Logistics is working with Flint Schools to identify alternative locations to store water. Additionally, Logistics is continuing to fulfill resource requests for Warehouse #2, based on the Memorandum of Agreement with the Seventh Day Adventist.
• Recovery Branch is working to outline the transition between National Civilian Community Corp (NCCC) and Southern Baptists for the Flint Water Response Teams. NCCC will complete their volunteer mission on 2/15/2016 and Southern Baptists will begin their mission on 2/16/16. ARC will return their iPads to the local EOC for the Southern Baptists teams to use for data collection.

Key Locations

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Team Assignment – Target Areas

Team Priority – Visit (83) City of Flint Addresses that receive City Water and continue to classify as a No Contact. List of addresses sorted by Map Section and corresponding Maps are attached.

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail, unless specifically directed otherwise by the SEOC. It is likely the iPads will not be used due to the extreme cold temperatures.

STATE OF MICHIGAN
JOINT INFORMATION CENTER

NEWS RELEASE

FOR IMMEDIATE RELEASE
February 12, 2016
Release #: 37

Boil Water Advisory Lifted by City of Flint

No Bacteria Identified

FLINT, Mich. – With the Feb. 9 water main break repaired and successful back-to-back bacteria tests completed, the city of Flint lifted its boil water advisory today.

Affected residents no longer need to boil their filtered water because testing did not reveal any bacteria during or after the repair of the water main break. The boil water advisory was issued as a precautionary measure because the loss of pressure in the water distribution system can make the system vulnerable to bacterial contamination.

Previously installed water filters are still safe to use given the absence of bacteria, but residents are reminded to check their water filter indicator and replace the filter cartridge, if needed. Individuals should follow the water filter manufacturer replacement instructions.

Residents are reminded to continue use of filtered water for drinking, food preparation, brushing teeth and pets. Unfiltered water may be used for bathing and cleaning. Pregnant woman and children under 6 years of age should continue to drink only bottled water.

The U.S. Environmental Protection Agency and Michigan Department of Environmental Quality both encourage residents and businesses to flush their water for between two to five minutes through all taps every day. This will assist with flushing their individual pipes as well as rescaling the water system as a whole. This should be done first thing in the morning after the water system has been stagnant for several hours.

To prolong the life of their filter, this daily flushing should be done with the filter turned in the off position. Once the system has been flushed for two to five minutes, the filter should be turned back on for all cooking and drinking.

Residents are also reminded to clean the aerator on every household faucet every week.

Free water filter cartridges, water filters, bottled water and water testing kits are available at water resource sites that remain open daily from 9 a.m. to 9 p.m. and are located at:

Fire Station #1 (also a water bottle recycling site)
310 East 5th St.

MORE

Fire Station #3
1525 Martin Luther King Ave.

Fire Station #5 (also a water bottle recycling site)
3402 Western Road.

Fire Station #6
716 West Pierson Road.

Fire Station #8 (also a water bottle recycling site)
202 East Atherton Road.

All water filters distributed by the State of Michigan are certified by NSF International for lead reduction. Individuals wishing to verify that a specific filter is NSF-certified can do so via the NSF website.

The State of Michigan continues to coordinate response efforts in partnership with the city of Flint, Genesee County and local community organizations.

Additional information is available at www.michigan.gov/flintwater, by calling 211 or visiting www.helpforflint.com.

Flint Water

Day	Date	Event
	October 1 Thursday	• Genesee County Health Department declares a Public Health Emergency
	December 15 Tuesday	• City of Flint declares a local State of Emergency.
	January 4 Monday	• Local State of Emergency declared by Genesee County along with request for a Governor's Declaration. • Genesee County EOC activated.
1	January 5 Tuesday	• Governor Snyder issues Declaration of Emergency for the City of Flint and the County of Genesee (end of day). • SEOC is activated and will be staffed 0800-1700 beginning January 6. • FEMA Region V contacted to provide update (Watch Desk and State Director call with FEMA Region V Administrator).
2	January 6 Wednesday	• SEOC Staffed (M-F 0800 to 1700), SEOC State Director has call with FEMA Region V, Deputy Administrator, to request LNOs. • Contacted local EM, advised him of 0830 daily call and initiate contact. • JIC established at 4000 Collins Rd, Lansing, MI. • Briefing held with SMEs Dr. Wells and George Krisztian. • 1400 media round table at Collins Road with Capt. Kelenske and Dr. Wells
3	January 7 Thursday	• FEMA LNOs arrive in the evening and have discussion with State Director (via phone). • Initial damage assessment submitted to EMHSD by local jurisdictions (evening). Infrastructure replacement costs only. Information provided to the local EOC on the best methods of identifying health and non-structural impacts for the damage assessment process. • Deployed two EMHSD personnel to the local EOC to assist with command and control.
4	January 8 Friday	• FEMA LNOs arrive at SEOC 0800. • SEOC State Director orders SEOC to stay open 7 days a week, 0800 – 2000 until incident is stabilized. • Media is driving a message of what the state is doing versus locals. • Held first legislative/congressional conference call. • JIC has been co-located in the City of Flint. • Originally we were advised we had 80-90 PODS from the local EM. Identified those as party stores, etc.

		Received confirmation of the 8 POD locations but there is confusion in the SEOC as to what the local EOC has coordinated. Five fire stations have been dedicated to be PODs (from the Mayor). Logistics for these locations is being worked on by the SEOC and EOC. • Finalizing 9 church locations to distribute 2000 filters (200 each) plus water. • State personnel deployed to (3) assist with incident management functions at the local EOC (not public information)
5	January 9 Saturday	• Third FEMA LNO in SEOC. • 5 PODs open 0900-1600. Staffed by ARC. • Ten state personnel in the local EOC to ensure command and control at the local level. • Working on "one team" messaging. • The County EOC has no support from the City of Flint, liaison is necessary for smooth operations and to serve residents.
6	January 10 Sunday	• 9 Churches provided filters and water for Sunday distribution. ARC assisting. • 5 PODs open 0900-2100 until further notice. • Freeman Elementary School pilot project initiated. • State agencies working to translate materials into multiple languages.
7	January 11 Monday	• *Working to identify warehouse for our use.* • Media event held at a POD. • Media event held at the Genesee County Office Building. • Some supply issues arose due to the hard time keeping up with the large demand for water. • Working to finalize logistics plan and get the plan in place.
8	January 12 Tuesday	• Focus is on receiving, storing, and increasing quantities of supplies; fine tuning logistics, increasing door to door team; increase collaboration and messaging of collaboration with local agencies. • Four state WRTs plus the Sheriff's Department teams...App developed and used in the field. • EO activating the National Guard. Mission is to replace ARC volunteers in PODs. • Governor requested FEMA to identify a POC for non-Stafford Act resources (Federal agencies acting under their own authority). Approved by FEMA Region V Administrator and LNO Zuelke identified. He will be a liaison to the FWIACC. • 7,824 cases of water arrived (109 pallets) • Ordered 19,152 cases to arrive 1/13 (109 Pallets), 1/3 going to GCCARD and rest going to warehouse • 12,768 cased to arrive daily beginning 1/14 (177 pallets a day). • PSA video pushed out by the Governor's office.

9	January 13 Wednesday	• Planning for increase in teams. • Draft request for a Presidential Declaration of a Major Disaster and an Emergency sent review. • 5 WRTs in field. • Flint Mass Transportation Authority adding PODs to route. • NG deployed personnel to PODS.
10	January 14 Thursday	• Request for Presidential declarations submitted to FEMA. • Current number of citizens who are willing to be sample sites is 114. • Senator Ananich visits SEOC. • Secured 80,000 square foot warehouse. • Email to state employees for volunteer opportunity. • Deployed 8 WRTs. • NG deployed __ total personnel to PODs.
11	January 15 Friday	• LG visits local and state EOC. • Short session on managing stress held in SEOC. • 10 state/local and 5 ARC WRTs deployed. • Standing requirements for JIC information created. • 7,474 homes visited by FWRTs. • 18,576 cases of water distributed to date; 45,916 filters; 165,382 filter cartridges; 3,217 test kits.
12	January 16 Saturday	• Received Emergency Declaration – limited to Direct Federal Assistance. FCO David Samaniego on site. • Major Disaster Declaration Denied. • Deployed . state/local teams and 10 ARC teams. • LG visited local EOC and discussed local EOC operations. • DEQ sampling kits are being received at PODs now. • 20,876 cases distributed; 47,935 filters; 167,401 filter cartridges; 3,322 test kits. • 11,324 homes visited by WRTs to date • 3,850 homes visited
13	January 17 Sunday	• Deployed 11 state/local WRTs and 10 ARC FWRTs. • 4,963 homes visited • Website attacks of Michigan.gov, city of Flint, and Flint township website occur. • Conference call with legislative and congressional representatives. • 16,353 homes visited by WRTs to date. • 27,195 cases of water distributed to date; 50,432 filters; 168,605 cartridges; 4,861 test kits. • Supplies provided to ~14 churches

14	January 18 Monday	• Jesse Jackson in Flint. • Deployed 12 state/local and 10 ARC FWRT. • Resource request sent for MIANG assistance to deliver water, filters, test kits, and replacement filters to residents. • Community Health Emergency Coordination Center was notified that the Center for Disease Control Agency for Toxic Substances & Disease Registry will have a team of 3-5 people coming to Michigan. This team is coming to provide technical assistance as part of their regular mission. • Governor approved the use of the National Guard for the Door to Door Operations in Flint. National Guard personnel arriving on Wednesday (1-20-16). • Media availability event at the Volunteer Reception Center. • Faith based organizations continue to assist with distributing resources. • 5,040 homes visited. • 21,299 home visited to date by FWRT. • 37, 313 cases of water distributed to date; 53,713 filters; 169,520 cartridges; 7,379 test kits.
15	January 19 Tuesday	• White House press release identified the Department of Health and Human Services (DHHS) as the lead for the federal government response to the public health crisis in Flint. HHS will have staff in Michigan in the next few days. • National Guard in-processed Soldiers to augment points of distribution operations. • Deployed state/local and 10 ARC FWRT. • Flint video is now on available on Comcast On-Demand. • 2,809 homes visited. • 24,108 to date by FWRT • 77,794 cases of water distributed to date; 69,730 filters; 184,457 cartridges; 16,671 test kits.
16	January 20 Wednesday	• Legislative and Congressional Conference Call. • JIC held a media advisory and news release at 1100 about the Michigan National Guard's increase in support and change in mission. • Governor appeals denial of federal major disaster declaration for Flint. • Dr. Nicole Lurie, Assistant Secretary for Preparedness and Response, US DHHS has arrived. • Deployed National Guard/state/local teams and 10 ARC FWRT. • 3,395 homes visited. • 27,503 homes visited to date by FWRT. • 90,377 cases of water distributed to date; 73,229 filters; 185,852 cartridges; 19,866 test kits.

17	January 21 Thursday	• Deployed1 ł National Guard/state/local and 10 ARC FWRT • 6,416 homes visited. • 6,416homes visited by FWRT, phase II. • 105,091 cases of water distributed to date; 79,571 filters; 189,428 cartridges; 21,625 test kits. • Dr. Lurie the US DHHS ASPR at the CHECC and SEOC to explain the US DHHS transition.
18	January 22 Friday	• Deployed National Guard/state/local and 15 ARC FWRT. • National Guard is working to deploy 3 cyber personnel to assist at the Michigan Cyber Command Center (MC3). • 6,166 homes visited. • 12,582 homes visited by FWRT, phase II. • 121,404 cases of water distributed to date; 82,687 filters; 191,704 cartridges; 23,415 test kits.
19	January 23 Saturday	• Deployed : National Guard/state/local and 40 ARC FWRT. • 14,118 homes visited. • 21,291 homes visited by FWRT, phase II. • 153,005 cases of water distributed to date; 84,505 filters; 195,264 cartridges; 24,866 test kits.
20	January 24 Sunday	• Deployed 1 National Guard/state/local and 19 ARC FWRT. • DEQ confirmed that a multidisciplinary team will be revising the process for home lead level test results being reported to the household. Letters are being revised to reflect one way of reporting the lead levels and actions to be taken. • Beginning Monday 1/25/2016 at 0730 the MDOC will be assuming management duties at the Warehouse. • MDNR and MSP GIS are working to map known lead service lines based off of geographical locations and zip codes. • MIARNG has Soldiers and Airmen deployed to the Flint Water Crisis in support of Distribution Operations at the Points of Distributions (PODs). • 11,243 homes visited. • 37,943 homes visited by FWRT, phase II. • 164,991 cases of water distributed to date; 91,763 filters; 197,775 cartridges; 28,763 test kits.
21	January 25 Monday	• Held a media availability at Flint Fire Station No. 8 to provide an update on the activities and mission of the water response teams. Maj. Gen. Gregory Vadnais, Spl/F/Lt. Dave Kaiser, Genesee County Sheriff's Office and the American Red Cross participated in the event. • JIC coordinated with FEMA to arrange a Congressional/Legislative briefing for tomorrow afternoon. • MDHHS leadership and CHECC staff met with federal partners from SAMHSA and CDC/HHS today to discuss technical assistance and federal activities.

		• National Guard demobilized canvassing teams. Soldiers are currently assigned to the POD operations and cyber mission. • Deployed 11 ARC FWRT. • 2,596 homes visited by ARC as part of the targeted canvassing mission. • 176,118 cases of water distributed to date; 93,048 filters; 198,552 cartridges; 29,320 test kits.
22	January 26 Tuesday	• Operations for the Flint Water Response Teams has shifted to a targeted effort to get filters into homes that we show have not been contacted. • Governor Snyder signed Executive Order 2016-3 transferring the ethnic commissions – the Hispanic/Latino Commission of Michigan (HLC), the Michigan Asian Pacific American Affairs Commission (MAPAAC), and the Commission on Middle Eastern American Affairs (CMEAA) - from MDCR to the Department of Licensing and Regulatory Affairs (LARA). • Michigan's HHS Regional Coordinator will serve as the Federal Health Coordinating Officer (FHCO) within a Unified Coordination Group (UCG) that will be operational this week in an effort to streamline information and coordinate federal activities. • Legislative and Congressional Call with FEMA. • NAACP meeting at U of M Flint. • Deployed 10 ARC FWRT. • 1,350 homes visited by ARC. • 3,946 homes visited to date for targeted canvassing mission. • 186,309 cases of water distributed to date; 94,301 filters; 199,489 cartridges; 29,841 test kits.
23	January 27 Wednesday	• Senate Appropriations Committee meeting. • Press conference at the University of Michigan-Flint's Northbank Center to provide an update about current actions and next steps to address about Flint water. • MDHHS CHECC staff met with the HHS State Coordinator Officer (SCO) regarding what HHS resources will be sent to Michigan, to include a nine person team. The team will consist of the following individuals: Mental Health staff, Sanitarian, Health Educator, Nurse, Nurse Manager, Behavioral Health staff, Risk Communication Developer, and Data Support. • Donations Management team and several branches of State and FEMA met regarding donation and volunteer management, will be meeting weekly. • Deployed 10 ARC FWRT. • 1,020 homes visited by ARC. • 4,966 homes visited to date for targeted canvassing mission. • 196,456 cases of water distributed to date; 95,417 filters; 200,654 cartridges; 30,255 test kits.

24	January 28 Thursday	• Media advisory and coordinated a press conference about recycling with Lt. Gov. Brian Calley at 1200 at Fire Station #1. • Community Partnership meeting, local, state, and FEMA representatives attended. • MDHHS is collective historical blood lead data is being obtained and an accurate display that is clear and understandable is in development. • Deployed 10 ARC FWRT. • 1,768 homes visited by ARC. • 6,734 homes visited to date for targeted canvassing mission. • 207,055 cases of water distributed to date; 97,342 filters; 201,848 cartridges; 30,801 test kits.
25	January 29 Friday	• Began working on SBA loan application. • Deployed 10 ARC FWRTs. • 924 homes visited by ARC. • 7,658 homes visited to date for targeted canvassing mission. • 216,605 cases of water distributed to date; 98, 641 filters; 202,566 cartridges; 31,111 test kits.
26	January 30 Saturday	• Deployed 10 ARC FWRTs. • 1,368 homes visited by ARC teams today. • 9,026 homes visited to date in targeted canvassing mission. • 227,188 cases of water distributed to date; 99,969 filters; 203,932 cartridges; 31,512 test kits.
27	January 31 Sunday	• Deployed 10 ARC FWRTs • 551* homes visited by ARC teams today (number low due to issue with iPads these additional homes will be added to the numbers tomorrow). • 9,577 homes visited to date in targeted canvassing mission. • 234,490 cases of water distributed to date; 100,593 filters; 204,736 cartridges; 32,093 test kits.
28	February 01 Monday	• EMHSD Liaison participated in the Incident Action Plan development for the Unified Coordination Group. • Recovery Branch coordinated meeting with Michigan Community Service Commission (MCSC), Local EOC, and ARC regarding volunteer coordination and reporting. • Deployed 10 ARC FWRT • 1,135 homes were visited by ARC yesterday. Data was not included in daily report. • 1,164 homes visited by ARC teams today. • 11,876 homes visited to date in targeted canvassing mission. • 244,933 cases of water distributed to date; 101,911 filters; 205,820 cartridges; 33,561 test kits.
29	February 02 Tuesday	• Deployed 10 targeted ARC FWRTs. • State VAL, Recovery Branch, and local, state and, federal partners met today to work on finalizing the long

		term transition and recovery plan. • 530* homes visited by ARC teams today (number low due to issue with iPads these additional homes will be added to the numbers tomorrow). • 12,406 homes visited by FWRT to date in targeted canvassing mission • 3,065,484 liters or 255,475 cases of water distributed to date; 102,498 filters; 206,642 cartridges; 33,243 test kits(numbers down from previous day due to 432 test kits at POD being returned to warehouse due to missing instructions).
30	February 3 Wednesday	• Deployed 10 targeted ARC FWRT. • JIC assisted with Governor Snyder's 10:45 p.m. media availability at the Flint and Genesee County Chamber of Commerce. The governor will ask the Michigan Legislature to approve a $30 million water consumption credit plan for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink. • Strategized with the U.S. Department of Health and Human Services and Environmental Protection Agency on how to better coordinate public information. • 3,158,508 Liters or 263,209 cases of water distributed to date; 103,004 Filters; 207,413 cartridges; test kits 33,750.
31	February 4 Thursday	• Deployed 10 targeted ARC FWRTs. • 1,127 homes visited by ARC teams today. • 14,338 homes visited by FWRT to date in targeted canvassing mission. • 3,264,204 Liters or 272,017 cases of water distributed to date; 103,402 Filters; 208,576 cartridges; test kits 34,456.
32	February 5 Friday	• Deployed 10 targeted ARC FWRTs. • 1,189 homes visited by ARC teams today. • 15,527 homes visited by FWRT to date in targeted canvassing mission. • 3,372,228 Liters or 281,019 cases of water distributed to date; 103,886 Filters; 209,439 cartridges; test kits 34,829. • The Small Business Administration approved a declaration for economic injury disaster loans.
33	February 6 Saturday	• Deployed 10 targeted ARC FWRTs. • 1,034 homes visited by ARC teams today. • 16,561homes visited by FWRT to date in targeted canvassing mission. • 3,459,864 Liters or 288,322 cases of water distributed to date; 104,088 Filters; 210,092 cartridges; test kits 35,254
34	February 7	• 10 ARC Flint Water Response Teams to the field today.

	Sunday	• 28 addresses have copper testing that exceeds the "action level" (1,300 ppb). DHHS is currently working on messaging regarding this issue, and DEQ is discussing filtering options. • State VAL is working on the Category B and Individuals and Households appeal. • 1,121 homes visited by ARC teams today. • 17,682 homes visited by FWRT to date in targeted canvassing mission. • 352,570,708 Liters or 293,809 cases of water distributed to date; 104,256 Filters; 210,596 cartridges; test kits 35,499
35	February 8 Monday	• 10 ARC Flint Water Response Teams to the field today. • Local EOC Establishing plans for Elevated Copper Initial Assessment Task Force starting 02/08/2016 and follow-up outreach to homes with water lead levels over 150 ppb starting 02/10/2016. • Warehouse #2 on Pierson Rd. established. • 847 homes visited by ARC teams today. • 18,529 homes visited by FWRT to date in targeted canvassing mission. • 3,591,276 Liters or 299,273cases of water distributed to date; 104,500 Filters; 211,255 cartridges; test kits 35,756

STATE OF MICHIGAN
JOINT INFORMATION CENTER

NEWS RELEASE

FOR IMMEDIATE RELEASE
February 8, 2016
Release #: 32

State Team Visiting Homes with Elevated Copper Levels

Flint, Mich. – Beginning today, the State of Michigan has launched a team to visit homes in Flint who have tested with elevated levels of copper. Out of the more than 6,000 samples tested, 27 have tested at greater than 1,300 parts per billion (ppb), which is the U.S. Environmental Protection Agency (EPA) copper action level.

"Unlike lead, there is a safe level of copper, and everyone comes into contact with it every day because copper is essential for good health," said Dr. Eden Wells, chief medical executive with the MDHHS. "For homes with elevated copper levels, we are working to ensure that families are aware of additional steps they may need to take in order to reduce their exposure to copper."

As part of this team, representatives from the Michigan Departments of Environmental Quality (DEQ) and Health and Human Services (MDHHS), along with licensed plumbers, will visit homes to:

- Conduct assessments and plumbing inspections
- Address health questions and provide guidance
- Take additional water samples and clean sink aerators
- Provide bottled water, water filters and water test kits

"This effort is important because it allows us to see more accurate information on what is happening in specific households, which will help to identify any areas of concern and allow us to efficiently mitigate them," said Keith Creagh, Director of Michigan Department of Environmental Quality.

For select homes with elevated copper levels, individuals are being instructed to use bottled water for eating and drinking. The filters being distributed by the State of Michigan are not rated to remove copper, but additional testing is being conducted to determine the impact of filters on removing copper.

MORE

The U.S. Department of Agriculture has set the recommended daily allowance for copper at 900 micrograms of copper per day (µg/day) for people older than eight years old. Ingesting high levels of copper can cause nausea, vomiting and diarrhea. Tests to measure copper levels in the body are not usually available at a doctor's office because they require special equipment, but the doctor can send samples to a specialty laboratory.

The best way to lower the level of copper in your drinking water is to let the water run for at least 15 seconds first thing in the morning before drinking or using it. This reduces the levels of copper in tap water dramatically.

Water testing kits, along with bottled water and NSF-certified water filters, are available free of charge at water resource sites throughout the city.

Additional information is available at www.michigan.gov/flintwater, by calling United Way 211 or visiting www.helpforflint.com.

Flint Water Emergency Response
Talking Points for Capt. Chris Kelenske
Congressional & Legislative Briefing 2/9/16

NOT INTENDED TO BE DISSEMINATED TO THE MEDIA OR PUBLIC IN THIS FORMAT

High-level Messages

- From an operational standpoint, our primary mission continues to be ensuring all Flint residents have access to safe water and are aware of the information and free resources available to them, which include bottled water, water filters, replacement cartridges, and water test kits.

- The health and safety of Flint residents remains a top priority. It is essential that all Flint residents have the water in their homes tested as soon as possible.

- Until we know the water from the tap is safe, it is recommended that vulnerable populations drink bottled water, this includes children under six and pregnant or nursing women.

- Residents are also encouraged to clean the aerators on their faucets to lessen lead sediment. Instructions for how to do this can be found on our website at www.michigan.gov/flintwater.

- Free water testing kits are available at all five fire station water resource sites. Water samples can also be returned to these fire stations for testing.

- Anyone who is unable to get to a fire station to pick up a free testing kit should call United Way 2-1-1 for assistance.

- Door-to-door delivery efforts by water response teams comprised of volunteers continue, but are increasingly targeted to ensure we are reaching every home.

- As of today, these efforts have resulted in 87.8 percent of City of Flint water customers having a water filter. That leaves approximately 12 percent or 3,323 customers whose filter status in unknown. Efforts to reach these homes continue in earnest.

- We also continue to operate five water resource sites at fire stations, staffed by Michigan National Guard soldiers, daily from 9 a.m. to 9 p.m. to provide free bottled water, filters, replacement cartridges, and water testing kits.

- Since January 9, using both door-to-door water response teams and water resource sites at the city's fire stations, we have distributed a total of 299,273 cases of water; 104,500 water filters; and 35,756 water testing kits.

- On February 5, the Small Business Administration approved the Governor's request for low-interest disaster loans for businesses in Genesee County and the city of Flint.

- The approval provides access to federal Economic Injury Disaster Loans, which are working capital loans to small businesses, small agricultural cooperatives, small businesses engaged in aquaculture and most private, non-profit organizations that meet their ordinary and necessary financial obligations that cannot be met as a direct result of the disaster.

- Business owners will have until Nov. 7, 2016, to apply. More information and criteria for SBA disaster loans is available at www.sba.gov/disaster. Eligible Flint business owners can apply online.

- Lastly, due to the continued outpouring of support from persons and organizations wishing to donate bottled water, the state has secured a second warehouse. This warehouse can accept bottled water that is not on pallets, filling a critical need, as many water drives are not palletized.

    - The water donation guidelines on www.michigan.gov/flintwater and www.helpforflint.com have been updated to reflect this new option. To schedule a dock time for a delivery, call 517-420-3984 or email flintwarehouse2@michigan.gov.

INFORMATION – IF ASKED...

State Funding

- To date, the state has allocated $37.3 million in emergency funding for Flint.
- Last week, the Governor proposed and the Senate has approved an additional $30 million the city could use to help relieve Flint residents of a portion of their water bill. The $30 million recommendation must now be approved by the House before it going into effect.
- Tomorrow in his FY17 budget recommendation, it is expected the Governor will outline long-term funding efforts to aide in Flint's recovery.

Jobs for Flint Residents

- On Monday, Governor Snyder announced a new partnership between the state and Flint area organizations - Orchards Children's Services and Flint YMCA's Safe Places Program – that will hire and train 50 Flint residents this month to help conduct water tests for their fellow community member across the city.
- The partnership is part of a comprehensive effort to help ensure Flint families benefit from both short-term and long-term opportunities created by relief efforts.
    - More residents will be hired as more work is identified.

Chronology

- October 1, 2015: Public Health Emergency Declaration issued
- December 14, 2015: State of Emergency declared by City of Flint.
- January 4, 2016: Genesee County Board of Commissioners declared a local emergency
    - Genesee County also requested a Governor's Declaration of Emergency with the local declaration.
- January 5, 2015: Governor declared State of Emergency
    - State Emergency Operations Center activated in Lansing to coordinate state response
    - Joint Information Center (JIC) activated on January 6, 2016 in Lansing; moved to Flint on January 11, 2016
- January 9, 2016: Water resource sites established at fire stations. 9 a.m. to 4 p.m. on January 9, 2016 but 9 a.m. – 9 p.m. starting January 10, 2016.
- January 12, 2016: Water resource teams began going door-to-door (4 teams)
- January 12, 2016: Governor Snyder issued an Executive Order activating the Michigan National Guard
- January 14, 2016: Governor requested Presidential declaration of emergency and expedited major disaster for Genesee County
- January 16, 2016: President Obama approved the Governor's request for a federal emergency in Flint.
    - Denied request for major disaster
- January 20, 2016: Governor Snyder submitted an appeal to President Barack Obama following the denial of a major disaster declaration.
- January 22, 2016: President Obama denied Governor Snyder's appeal for a federal disaster declaration to aid Flint.
- January 28, 2016: Gov. Rick Snyder today issued a proclamation calling for an extension to the emergency declaration in the city of Flint and Genesee County until April 14, 2016.
- February 5, 2016: SBA approved the Governor's request to make available Economic Injury Disaster Loans for small businesses, small agricultural cooperatives, small businesses engaged in aquaculture and most private, non-profit organizations.

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	02/02/2016 08:00:00
Operational Period End:	02/09/2016 08:00:00
Situation Report No.	34
SEOC Status:	Full
SEOC Hours of Operation Begin:	02/08/2016 08:00:00
SEOC Hours of Operation End:	02/08/2016 20:00:00

Executive Summary

SEOC Update:
Accomplished today (February 8, 2016):

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Resources.
- Public information control.

Logistics:
- Fielded resource requests.
- Fielded Rapid Response requests.
- Fielded Governor's office request.
- Facilitated distribution team calls.
- Working with local EOC to find a suitable space for SBA.
- Conference call with Adventists on agreement and staffing.
- Coordinated pallet use for Warehouse #2.

JIC:
- Worked with FEMA to coordinate a 2:30 p.m. legislative and congressional conference call for Tuesday, Feb. 9, 2016.
- Had a visit from Governor Snyder and Richard Baird. Spent approximately 20 minutes discussing the role of the JIC and what we are hearing and doing.
- Drafted a news release about the team visiting homes with high copper levels. Release is routing through for final approvals before dissemination this evening.
- Drafted a news release about the American Red Cross playing a crucial role coordinating volunteer efforts during the Flint water emergency. Sent to ARC for review and approval prior to dissemination.

Recovery Branch:
- Attended Local Brief, SEOC State Agency Briefing Meetings, Distribution Process Meetings, and Tactics Meeting
- Updated ICS 204 Forms (Obj. 1 and Obj. 6)
- Drafted Proposed Changes Plan for WRTs – submitted to Ops Chief to take up to Command
- Working on compiling one Access and Functional Needs list for long-term planning efforts
- Team Priority Visited Today: Active Water Subscribers without filters marked vacant
- Team Priority Scheduled Tomorrow: Active Water Subscribers without filters marked vacant
- 10 American Red Cross Teams scheduled for Tuesday, February 9
- Data is for 2/8/16 as of 5:00 pm:

o Total homes visited:
- 18,529 (round 3 total).
- 847 (today).

o Water cases (liters calculated by multiplying # of cases x 12):
- 128,592 liters or 10,715 cases (round 3 total).
- 4,980 liters or 415 cases (today).

o Replacement cartridges:
- 3,950 (round 3 total).
- 306 (today).

o Faucet filters:
- 7,283 (round 3 total).
- 98 (today).

Planning Section:
- Developed IAP #9.
- Published Sit Rep #34.
- Worked to develop new standard data reporting.

Operations Section:
- Operations assisted the state agencies and the local EOC in requests from the Governor's office from constituents.
- Operations participated in the following briefings:
- Unified Command Objectives meeting
- Local Agency briefing

- Command/General Staff/SEOC briefing
- Distribution Process meeting
- Tactics meeting
- Planning Meeting/SEOC
- Planning Meeting/SEOC
- Warehouse Numbers as of 1800:

❑ Water (liters):
- 582,536 liters or 48,544 cases.

❑ Filters (faucet):
- 49,520.

❑ Replacement cartridges:
- 378,140.

❑ Test Kits (prepped):
- 18,886.
- PODs (1700 2/7 – 1600 2/8):

❑ Water (cases):
- 60,588 liters or 5,049 cases.

❑ Filters (faucet):
- 148.

❑ Replacement Cartridges:
- 353.

❑ Test kits:
- 143.

Finance Section:
- Updated spending plan with actual costs.
- Updated State Cost Share - RRF information.
- Continue to identify organizations receiving monetary donations.
- Requested monetary donation information from United Way and Community Foundation of Greater Flint.

GIS Branch Updates:
- Develop an online application for Governor Snyder to view maps.
- Build orthophoto from video collected by the Trooper 2 helicopter.
- Compile lists of customers that have not received water filters for planning.
- Calculate number of homes visited by Flint Water Resource Teams for planning.
- Build data set to calculate how many times each parcel has been visited in the City of Flint.

DTMB:
- Continue to provide DTMB management with daily updates and resource requests received.
- Obtained equipment and supplies for the SBA Disaster Loan Outreach Center and 2629 Clio Road second warehouse.

DHHS-CH:
- The CHECC remains active at a Level 2, and continues to staff the hotline to answer any lead health-related questions referred by 2-1-1 in support of the GCHD.
- Two letters addressed to the USDA have been signed by the MDHHS Director asking that they reconsider their decision to deny Michigan's request for exemptions which would allow for nutrition supplemental funding and for an increase in the availability and access to the WIC program in order to offer blood lead testing and services to children up to the age of 10 years old. These two letters were sent by the CHECC to the UCG today.
- Working with the DEQ to resolve confusion with local partners regarding teams visiting homes with high lead and/or copper levels reported, and the need for MDHHS staff to support the teams conducting home visits in order to provide health education and encourage blood lead testing. The CHECC is working to identify MDHHS staff that is available to accompany those teams, as needed.
- Received word that the DHHS ASPR, Dr. Nicole Lurie, will be visiting Michigan on Thursday.

DEQ:
- Worked to obtain contact information for residents to implement the Sentinel Sampling plan.
- Tracked Department of Corrections pickup and delivery of 246 residential water samples and 15 MDARD samples to DEQ lab.
- Began visits to residences with high copper results from water samples.
- Organized tasks and made assignments for gathering data for the response to Congressional Committee of Energy and Commerce.
- Updated tracking sheet of requested data by Congressional Committee of Energy and Commerce.
- Reviewed upcoming deadlines from EPA Order tracking spreadsheet.

State Voluntary Agency Liaison (VAL):
- Developed ICS 204 form for Objective 12 on long term recovery.

Unified Coordination Group (UCG):
- No updates.

Local EOC:
- Worked with UA 370 to compile data on services rendered and infrastructure assessment.
- Worked with VAAA, 211, and the Radio Room to change the reporting process to alleviate duplicate efforts.
- Spoke with Director Paul Wallace, Genesee County Animal Control, regarding lead and copper questions coming from the public.
- Worked with Genesee County Comptroller to provide requested information on expenditures made on behalf of Genesee County for the current state of emergency.
- Evaluated Community Centers for possible future use as new PODs.
- Work with SEOC on office space for SBA.
- Local EOC Liaison Officer evaluated community centers for possible future use as new PODs.
- Genesee County Health Department is working on lead testing outreach plans and with MDHHS on the investigation of skin rashes.
- National Guard is developing an AAR and operational notes are being consolidated into SOPs to send to JOC to assist in updating the All Hazards Plan. An operational handoff packet including SOP's, POC's, POD sector sketches, hand-receipts, and other operational notes is being built to assist the incoming unit.

Incident Response/Recovery Priorities/Objectives

(Objectives are in order of priority with original objective number attached)

12. Develop and implement a comprehensive long term recovery and transition plan.
11. Ensure accurate tracking and accounting of all donations.
5. Continue to maintain adequate staffing to support operational requirements.
10. Collaborate with local and volunteer agency partners to solidify the Flint Water Operations Plan.
9. Enhance situational awareness and common operating picture of all activities.
8. Maintain coordination between partner agencies and organizations to include FEMA IMAT, FWICC, and the US Department of Health and Human Services Unified Coordination Group (UGC).
3. Improve and maintain the public information strategy and process.
6. Develop an overview of possible assistance programs.
4. Develop a long term public health and services plan.
7. Gather, analyze, and disseminate GIS data to develop products for future planning.
1. Ensure all households within impacted community have required resources and are included in DEQ water sampling plan.
2. Ensure accurate tracking and accounting of all commodities.

Emergency Declarations

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Feb. 8.

State agencies at the JIC included the Michigan State Police, Michigan National Guard, and Departments of Agriculture and Rural Development, Environmental Quality, Health and Human Services, and Natural Resources. The Genesee County Sheriff's Office and the American Red Cross were also present.

Tasks accomplished:
- Media hotline staff answered less than a dozen emails and phone calls, ranging from lead in animals to water donations and questions about water testing at the Genesee County Jail. Media inquiries were significantly down compared to previous days.
- Created a morning and afternoon media monitoring report.
- Updated and revised our internal talking points to better organize information.
- Continued routing public information materials for approval, including a fact sheet from EPA and facts sheets about lead in animals and pets.
- Continued to post information on the www.michigan.gov/flintwater website, especially facts sheets and fliers in Spanish, Arabic and other languages.
- Worked with FEMA to coordinate a 2:30 p.m. legislative and congressional conference call for Tuesday, Feb. 9, 2016.
- Created a tracking sheet to manage the number of foreign language documents for distribution.
- Had a visit from Governor Snyder and Richard Baird. Spent approximately 20 minutes discussing the role of the JIC and what we are hearing and doing.
- Drafted a news release about the team visiting homes with high copper levels. Release is routing through for final approvals before dissemination this evening.
- Drafted a news release about the American Red Cross playing a crucial role coordinating volunteer efforts during the Flint water emergency. Sent to ARC for review and approval prior to dissemination.

Agriculture and Rural Development (MDARD)

MDARD's field activities for 2/8/16 included:
- 19 assessments conducted (11 initial, 6 follow-up and 2 second follow-up)
- 18 water samples collected (12 first draw samples and 6 routine samples)
- 6 water sample requests/appointments were scheduled

As of 2/5/16, MDARD has completed initial water assessments at all food businesses in the high risk area and has conducted a total of 426 assessments (380 initial/ 46 follow-up). The compliance rate is 77%. 169 water samples have been collected and 131 are currently scheduled. MDARD has been receiving questions about how to find the list of food businesses that are in compliance mentioned in a 2/5/16 press release. The list is at: http://www.michigan.gov/flintwater/0,6092,7-345-75251_75382---,00.html

MDARD attended the USDA – Natural Resources Conservation Services (NRCS) press conference in Flint today. The Flint-Genesee County High Tunnel Initiative is a partnership led by USDA NRCS to promote healthy, locally-produced food through the use of high tunnels. NRCS is providing $300,000 in financial and technical assistance to help local growers purchase and operate high tunnels. Applications are due to Flint NRCS by May 18th.

MDARD will be meeting later this week with the Land Bank to discuss the Clean and Green program and obtain a list of community garden information to supplement the data already provided to MDARD by Edible Flint.

MDARD continues to respond to questions on service and companion animals. Informational documents for the public and veterinarians are in the final review stages.

American Red Cross (ARC)

The American Red Cross deployed 10 Water Response Teams on Monday, 2/8/16, to attempt contact at those residences where no one had yet answered the door.

The Volunteer Reception Center (VRC) was in operation today, from 9am to 5pm. The VRC will be operating from 9-5 again on Monday.

Civil Rights (MDCR)

Continue to review activities to provide support and assistance to assigned Human Services branch and other SEOC entities. Maintaining media awareness regarding situation and community activities. Maintain awareness of projects, events, and material going out. Advise if any of these may not be clear to or include those who may have communication or logistic barriers. Reassigned Donations Management Task to MDHHS.

Community Health (MDCH)

The CHECC remains active at a Level 2, and continues to staff the hotline to answer any lead health-related questions referred by 2-1-1 in support of the GCHD. The CHECC continues to work with federal partners in the UCG on prioritized requests for assistance.

Two letters addressed to the USDA have been signed by the MDHHS Director asking that they reconsider their decision to deny Michigan's request for exemptions which would allow for nutrition supplemental funding and for an increase in the availability and

access to the WIC program in order to offer blood lead testing and services to children up to the age of 10 years old. These two letters were sent by the CHECC to the UCG today.

Working with the DEQ to resolve confusion with local partners regarding teams visiting homes with high lead and/or copper levels reported, and the need for MDHHS staff to support the teams conducting home visits in order to provide health education and encourage blood lead testing. ATSDR staff are working with MDHHS Environmental Health staff on copper informational materials for messaging purposes. The CHECC is working to identify MDHHS staff that are available to accompany those teams, as needed.

Received word that the DHHS ASPR, Dr. Nicole Lurie, will be visiting Michigan on Thursday. The details of her visit are unknown at this time.

Corrections (MDOC)

MDOC continued operations at both warehouses with warehouse 2 opening as scheduled. All PODs were well supplied during the entire operational period.

MDOC continues to keep trucks dedicated to delivering to individual PODs and have Rapid Responses ready for any POD that gets to a critical level of supplies.

246 water samples were collected and 15 MDARD samples and delivered to the DEQ Lab in Lansing for a total of 261 samples delivered.

MDOC had 18 employees and two SAI work crew (10 trainees total) on the ground in Flint today.

In an effort to reduce overtime costs we are working on completing a critical staff review. All dedicated resources will be reviewed to determine if it is feasible to reduce staffing in lieu of volunteers wherever possible.

We are working with Finance and MDOC assets to capture total employee payroll information and expenditures.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities today:

Worked to obtain contact information for residents to implement the Sentinel Sampling plan.

Tracked Department of Corrections pickup and delivery of 246 residential water samples and 15 MDARD samples to DEQ lab.

Began visits to residences with high copper results from water samples.

Organized tasks and made assignments for gathering data for the response to Congressional Committee of Energy and Commerce.

Updated tracking sheet of requested data by Congressional Committee of Energy and Commerce.

Reviewed upcoming deadlines from EPA Order tracking spreadsheet.

Human Services (MDHS)

Looking into filtration system for a child care institute, possibly through donation.

Passing on resource request for staff to assist with donation management mission.

Training provided to donation management staff and staff from our Health side who are helping with donation activities.

Daily update conference call with MDHHS Budget & Field Operations.

Participated in all Branch Director planning day activities.

Licensing and Regulatory Affairs (LARA)

Participated in briefings and updated the LARA Executive Team
LARA continues to monitor DEQ's test results for Health Care, Child Care, Adult Foster Care, HHS and MDE facilities and Schools.
Volunteer plumber will participate in copper testing teams on Monday, February 8.
Translation services for various documents continue to be provided as needed.
Ongoing discussion regarding coverage of state regulated facilities and elimination of duplication of effort.

Military and Veterans Affairs (DMVA)

Commanders Situation Report (SITREP)

1. DTG: 0813002016

2. UNIT: Points of Distribution (PODs), TF FLINT (1-125 IN)

3. POC:Ssg Gazzeny, Darryl L. Cell: (Email: armyinfantry31@yahoo.com

4. PRESENT LOCATION: Genesee County Local EOC, 1101 Beach St., Flint, MI, 48502

5. SITUATION OVERVIEW: 1-125 IN has Soldiers deployed to the Flint Water Crisis in support of Distribution Operations at the Points of Distributions (PODs).Daily operations consist of receiving, tracking, and issuing out water, filters, replacement filters, and water test kits.

6. OWN SITUATION DISPOSITION /STATUS: Currently 1-125 IN has Soldiers on ground supporting the mission.

7. OPERATIONS: Operations for the next 24 hours are to sustain water/filter distributions throughout the 5 designated fire stations and track all distribution incoming and outgoing through the PODs.

a. POD 5 has two generator lighting units from MDOT. All PODs now have sufficient lighting.

1. Fuel cans and the utilization of station 6 city fuel pump has been requested through SEOC.

b. Signs have been printed off for the POD Buildings. Requesting approval to get the signs laminated from the purchasing office.

1.) TF Flint OIC, 2LT Benke, will be seeking approval from CPT Bowles and Dana and/or Kim at the purchasing office for laminating.

8. PERSONNEL: Soldiers are currently assigned to the POD operations.... Soldiers are assigned in five teams at Fire Stations 1, 3, 5, 6 and 8.

9. *INTELLIGENCE / FORCE PROTECTION: No Force Protection intelligence at this time.*

10. LOGISTICS: In support of TF Flint

a. Pamphlets are at the POD locations to distribute to flint residents on knowledge about water filters and extra precautionary measures they can take.

11. COMMUNICATIONS: No communications issues at this time.

P: RRF cell phones alternate for WRTs.
A: Personal cell phone
C: 800 MHz radios issued to PODs and WRTs.
E: Runner

12. NARRATIVE: N/A

13. COMMANDER'S EVALUATION:
• AAR and operational notes are being consolidated into SOP's to send to JOC to assist in updating the All Hazards Plan.
• An operational handoff packet including SOP's, POC's, POD sector sketches, hand-receipts, and other operational notes is being built to assist the incoming unit.
• OUT (last 24 hours)
Bottled water-5407 Water (Gallons)-0 Lead Testing Kits-73
Pitcher (23 cup)-0 Brita Faucet Filter-72 Brita Replacement Cartridge-113
Pur Filter-28 Pur Replacement Filter-120

National Weather Service (NWS)

NWS Detroit providing morning SEOC brief and Activity Log posts. Jim Maczko from NWS Grand Rapids will be the contact point for any changes in NWS Support and will also continue to update the Sit Rep Executive Summary as needed.

Participation in afternoon SEOC briefings is planned only if significant changes in the forecast occur.

Natural Resources (MDNR)

MDNR LED continues to support its QOL partners with staffing at the SEOC.

Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging (VAAA) continues to receive phone calls from concerned seniors in Flint and continues to make referrals to the Genesee Co. EOC for water and filter follow-up.

VAAA's local Nursing Home Ombudsman continues to monitor Flint area Nursing Homes to ensure residents have access to safe water.

Contact info for VAAA Executive Director is:
Kathryn C. Boles
President, CEO
Valley Area Agency on Aging
225 E. Fifth Street, Suite 200
Flint, MI 48502
(810) 239-7671
(810) 239-8869 fax

State Police (MSP)

DEQ contacted MSP reference providing telephone numbers for approx. 400 residences in Flint for Sentinel site sampling efforts. DEQ was advised MSP is unable to provide information.
****Valencia Jones - SEOC OPS Public Safety MSP - jonesv4@michigan.gov at 14:58:30 on 2/8/2016****

The MSP position within the SEOC will be staffed at MSP Operations at HQ. All e-mails to MSP-EOC-MDSP@michigan.gov are being forwarded to the Operations Lt. The phone number for the on duty Operations Lieutenant is 517-241-8000.

Technology, Management and Budget (*MDTMB*)

Continue to provide DTMB management with daily updates and resource requests received.

Obtained equipment and supplies for the SBA Disaster Loan Outreach Center and 2629 Clio Road second warehouse.

Transportation (MDOT)

Providing staff to Pierson Rd. warehouse.

Providing 2 portable light tower generators to Fire Station #5 on Western Rd.

Providing traffic measures at Fire Station #6 on Pierson Rd. and Fire Station #3 on Martin Luther King Blvd:
-4 (3' x 5') standard signs (2 each site)
-100 grabber traffic cones (narrow reflective cones) (50 each site).

Continuing to maintain situational awareness and responding to issues regarding equipment and road conditions.

STATE OF MICHIGAN
JOINT INFORMATION CENTER

NEWS RELEASE

FOR IMMEDIATE RELEASE
February 8, 2016
Release #: 32

State Team Visiting Homes with Elevated Copper Levels

Flint, Mich. – Beginning today, the State of Michigan has launched a team to visit homes in Flint who have tested with elevated levels of copper. Out of the more than 6,000 samples tested, 27 have tested at greater than 1,300 parts per billion (ppb), which is the U.S. Environmental Protection Agency (EPA) copper action level.

"Unlike lead, there is a safe level of copper, and everyone comes into contact with it every day because copper is essential for good health," said Dr. Eden Wells, chief medical executive with the MDHHS. "For homes with elevated copper levels, we are working to ensure that families are aware of additional steps they may need to take in order to reduce their exposure to copper."

As part of this team, representatives from the Michigan Departments of Environmental Quality (DEQ) and Health and Human Services (MDHHS), along with licensed plumbers, will visit homes to:

- Conduct assessments and plumbing inspections
- Address health questions and provide guidance
- Take additional water samples and clean sink aerators
- Provide bottled water, water filters and water test kits

"This effort is important because it allows us to see more accurate information on what is happening in specific households, which will help to identify any areas of concern and allow us to efficiently mitigate them," said Keith Creagh, Director of Michigan Department of Environmental Quality.

For select homes with elevated copper levels, individuals are being instructed to use bottled water for eating and drinking. The filters being distributed by the State of Michigan are not rated to remove copper, but additional testing is being conducted to determine the impact of filters on removing copper.

MORE

The U.S. Department of Agriculture has set the recommended daily allowance for copper at 900 micrograms of copper per day (µg/day) for people older than eight years old. Ingesting high levels of copper can cause nausea, vomiting and diarrhea. Tests to measure copper levels in the body are not usually available at a doctor's office because they require special equipment, but the doctor can send samples to a specialty laboratory.

The best way to lower the level of copper in your drinking water is to let the water run for at least 15 seconds first thing in the morning before drinking or using it. This reduces the levels of copper in tap water dramatically.

Water testing kits, along with bottled water and NSF-certified water filters, are available free of charge at water resource sites throughout the city.

Additional information is available at www.michigan.gov/flintwater, by calling United Way 211 or visiting www.helpforflint.com.

###

NOTE: ALL MEDIA INQUIRIES ARE BEING HANDLED BY THE JOINT INFORMATION CENTER AT 888-EMD-TODAY (888-363-8632). FOR FLINT WATER EMERGENCY DONATION INFORMATION, GO TO www.helpforflint.com.

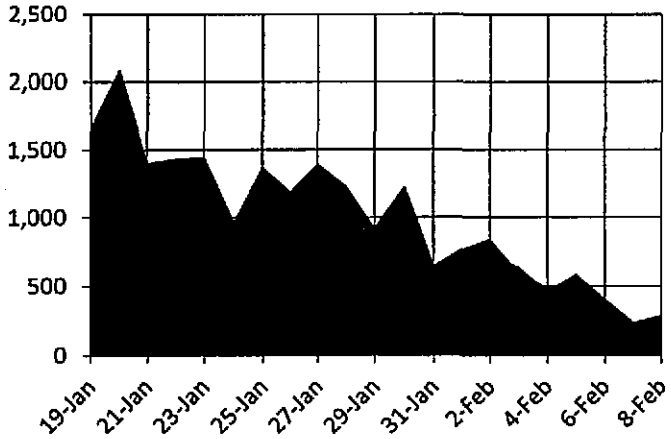
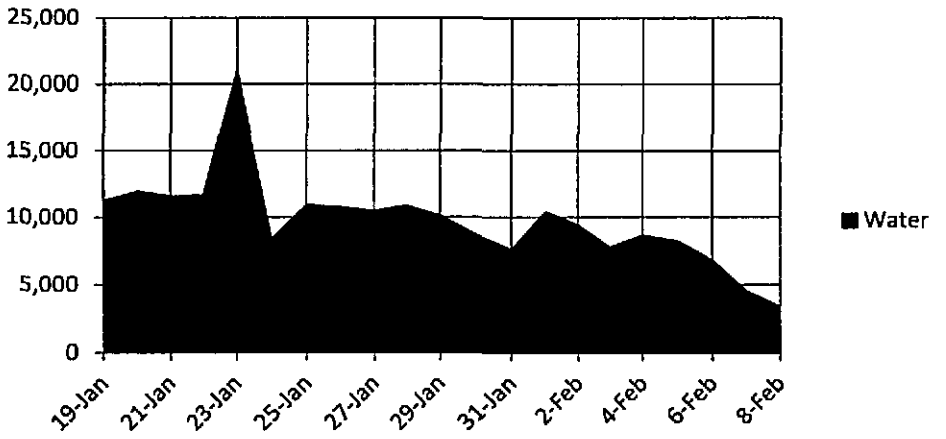
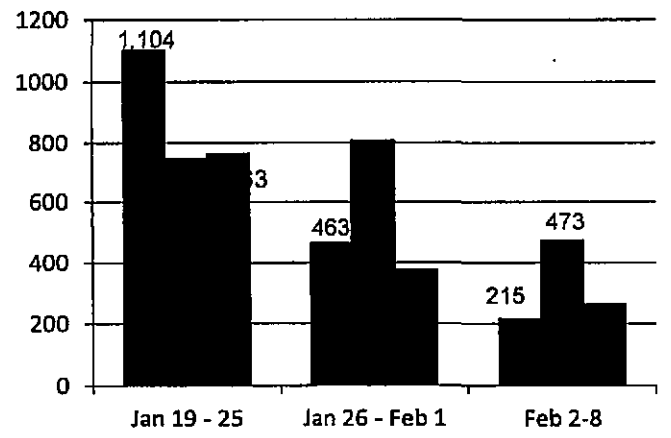
Weekly Report on Distribution

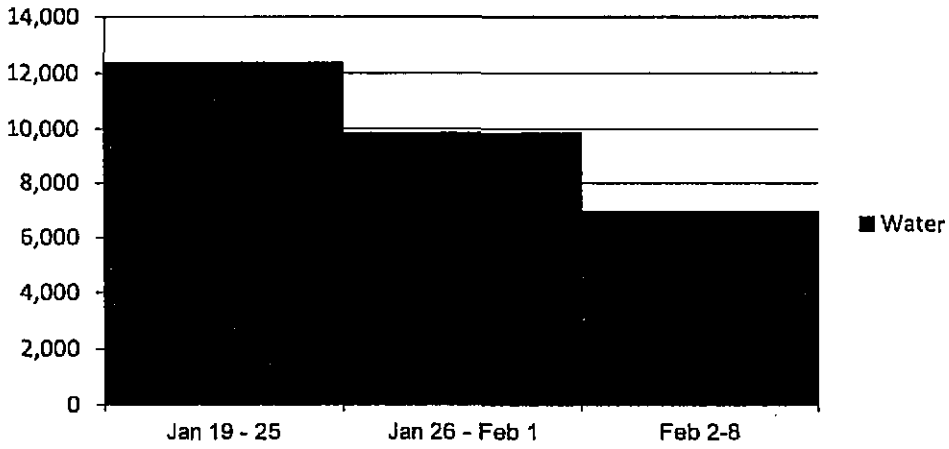
Burn Rate





Average Burn Rate by Week





The incident action planning process is built on the following phases:

1. Understand the situation
2. Establish incident objectives
3. Develop the plan
4. Prepare and disseminate the plan
5. Execute, evaluate, and revise the plan

The product of this process, a well-conceived, complete IAP facilitates successful incident operations and provides a basis for evaluating performance in achieving incident objectives. The IAP identifies incident objectives and provides essential information regarding incident organization, resource allocation, work assignments, safety, and weather.

What is the IAP?
The IAP is a written plan that defines the incident objectives and reflects the tactics necessary to manage an incident during an operational period.

The Operational Period
An operational period is the period of time scheduled for executing a given set of operational actions as specified in the IAP. The length of the operational period, typically 12 to 24 hours at the beginning of incident requiring extensive response efforts, is established during Phase 1 and subsequently reviewed and adjusted throughout the life cycle of the incident as operations require. When operations are focused primarily on recovery programs, operational periods are typically a week or longer.

Collection
Information collection is based on established essential elements of information (EEIs) and critical information requirements (CIRs).
• EEIs are important and standard information items that incident managers need in order to make timely and informed decisions. EEIs also provide context and contribute to analysis. EEIs are included in situation reports.
• CIRs are particular elements of information specifically requested by incident leaders. These items are of such importance that leaders are notified immediately when the Planning Section receives updates on a CIR item.

Establishing Initial Incident Priorities

When senior officials establish priorities for the incident, a recommended approach is to articulate priorities based on the core capabilities described in the National Preparedness Goal (see Table 1). The core capabilities provide a standard list of the essential activities for preventing, protecting, mitigating, responding, and recovering. Framing incident priorities in terms of the core capabilities improves understanding through consistent titles, ensures that all the mission areas are considered, and helps to keep priorities focused strategically on desired outcomes.

Federal, State, tribal, and local deliberate plans may identify or suggest incident response priorities.

Clear initial priorities are important to establishing unity of effort early in the incident response process. When the members of the team clearly understand the intent behind instructions, they are equipped to

act decisively and make better decisions. While many things vie for attention, especially in the immediate aftermath of a disaster, not everything can be a priority. The axiom that if everything is a priority, then nothing is a priority clearly applies to incident management.

Prevention	Protection	Mitigation	Response	Recovery
Planning

The incident action planning process fosters teamwork by promoting communication, cooperation, and coordination. All team members support and participate in team development, and the UCG provides the leadership to ensure success.

Good Incident Objectives:

- Are concise and stated in the form of a command
- Begin with an action verb (but not "continue" or "maintain")
- Provide "actionable guidance" for the Operations Section
- Address incident operations not administrative and internal support activities

Guidance Element	Description	Developer	Examples
Priorities	Define the intent of leaders, in general terms, with regard to the most important things that must be accomplished. They are generally expressed in terms of the core capabilities defined in the National Preparedness Goal.	Initially established by the competent authorities, e.g., Governor, FEMA Administrator, FEMA Regional Administrator; subsequently reviewed and adjusted throughout the life cycle of an incident by the Unified Coordination Group	Mass Search and Rescue
Objectives	Define what must be accomplished to achieve the priorities and based on best knowledge of the current situation and the resources available	Unified Coordination Group	Locate any remaining trapped survivors in affected areas in Memphis by October 1.
Strategies	Carefully devised plans of action to achieve one or more objectives. Strategies describe what actions and resources are required in working to achieve the specific objective.	Operations Section Chief	Deploy FEMA USAR teams, EMAC search and rescue assets from Kentucky and Indiana, and Canadian search and rescue teams to work in a unified operation under the tactical control of Memphis Fire Services.
Tactics/ Tasks	Define how specific actions will be performed to achieve a planned outcome. Tactics specify who, what, where, and when in describing the deployment and direction of resources for implementing strategies to achieve incident objectives. Tactics/tasks/ work assignments are initially recorded on Operational Planning Worksheet (FEMA-ICSForm 215) and subsequently reflected on the Assignment Lists (FEMA-ICS Form 204) and included in the IAP for the given operational period.	Operations Section Chief	California Task Force-3 will report to Memphis Fire Station 19 at the corner of Chelsea and Boxwood Street at 0600 [*of the operational period*] with all equipment and support personnel to deploy and operate under the direction of Memphis Fire Services until 1800. Specific direction for the team will be provided by Memphis Fire Service officials.

UCG Develops and Update Objectives

The UCG may meet before the C&GS meeting to review and, if necessary, revise incident priorities and determine the incident objectives for the next operational period. This meeting is often conducted informally and frequently includes the OSC and PSC.

The expected results of this meeting are:

- A common understanding among the UCG of the incident's issues and the key requirements of the response and recovery,
- Agreement regarding incident priorities and objectives for the next operational period,
- Recognition of constraints and limitations affecting accomplishment of incident objectives, and
- Operational guidance (for accomplishing incident objectives) that accounts for and mitigates identified limitations.

The work product from this meeting is a documented list of incident objectives.

Strategies

Strategies are ways to achieve incident objectives. Strategies may be developed during all phases of an operation and by all elements involved in the operation and are not restricted to specific, short or long-term operational periods. Strategies describe what actions and resources are required to achieve specific objectives and are distinct from tactics, which address the conduct of specific operations. A strategy describes how things work; tactics describe what must be done. For example:

• Strategy: *Establish a mix of fixed and mobile disaster recovery centers (DRC) to provide easy access to FEMA programs for survivors at the following locations:* [list of locations follow]
• Tactics: *Identify when, where, and the type of DRC to be established.*

Strategy Development Tips
OSCs often hold an informal meeting with Operations Section staff members, who have operations planning responsibilities, to develop the operations strategies and to:

- o Solicit broad input
- o Ensure that staff understand and agree on the strategies developed
- o Adjust strategies in consultation with branch directors and group supervisors

Good strategies:
• Are feasible, practical, suitable, and likely to achieve the desired outcome
• Meet acceptable safety norms
• Are cost effective
• Reflect sound environmental practices
• Consider political implications
• Address core capabilities

Determining Tactics
Tactics define specific actions to be performed to achieve a planned outcome. Tactics specify who, what, where, and when for implementing strategies to achieve incident objectives. Tactics describe the deployment and direction of resources, based on the strategy to accomplish the incident objectives. Once the strategies have been developed, the operational planners identified in Table 4 are generally responsible for developing the tactics to implement the strategies taking into account constraints, limitations, and other considerations. Examples of considerations for determining resource requirements include what resources are available for the next operational period and whether any road closures or hazardous conditions may affect tactical implementation. Once the kind, type, and qualification of available resources are known and any constraints or limitations are identified, the tactical plan can be developed.

The following activities are used to develop the tactical plan:

1. Determine what has to be done to implement a strategy and what method(s) are likely to achieve success.
2. Develop a list of resources (personnel, teams, equipment, supplies, facilities) that are required.
3. Provide a list of resources available (this is done by the Resource Unit).
4. Compare the resources *required* with resources *available* and discuss the findings with the OSC prior to the operations tactics meeting.
5. Draft the tactical plan based on this analysis.

Secondary Priority – N/A

Map Support
Maps have been provided to coordinate with the new Follow-up Visits Contact Address List.

Sample Script for Team Members:
We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail, unless specifically directed otherwise by the SEOC.
2. For apartment complexes, use the paper forms to record the contacts you make with residents. For reporting purposes, please report the names of the complex and the number of units per complex that the teams made contact with to the SEOC.

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	02/02/2016 08:00:00
Operational Period End:	02/09/2016 08:00:00
Situation Report No.	33
SEOC Status:	Full
SEOC Hours of Operation Begin:	02/07/2016 08:00:00
SEOC Hours of Operation End:	02/07/2016 20:00:00

Executive Summary

SEOC Update:
Accomplished today (February 7, 2016):

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Resources.
- Public information control.

Logistics:
- Fielded resource requests.
- Fielded Rapid Response requests.
- Fielded Governor's office request.
- Facilitated distribution team calls.
- Coordinating with SBA for office space in Warehouse #2.
- Still working on getting the supplies and equipment needed to make the second warehouse functional.
- Requested security for Warehouse #2.
- *Updated Donations Guidelines to include Warehouse #2.*
- Updated 204's to include Warehouse #2.

JIC:
- Continued media and social media monitoring.
- Added Pierson Road Warehouse on the Donation Guidelines document on the website.
- Shared yesterday's numbers on social media.

Recovery Branch:
- Attended Local Brief, SEOC State Agency Briefing Meetings, and Distribution Process Meetings.
- Worked with GIS to obtain a list of active water subscribers without filters who were marked as vacant in the field.
- Working on compiling one Access and Functional Needs list for long-term planning efforts.
- Team Priority Visited Today: Zero Contacts from Previous Sweeps List.
- Team Priority for Tomorrow: Active Water Subscribers without filters marked vacant.
- 10 American Red Cross teams scheduled for Monday, February 8.

- Data is for 2/7/16 as of 5:00 pm:
o Total homes visited:
❑ 17,682 (round 3 total).
❑ 1,121 (today).
o Water cases (liters calculated by multiplying # of cases x 12):
❑ 124,032 liters or 10,336 cases (round 3 total).
❑ 8,124 liters or 677 cases (today).
o Replacement cartridges:
❑ 3,644 (round 3 total).
❑ 312 (today).
o Faucet filters:
❑ 7,185 (round 3 total).
❑ 92 (today).

Planning Section:
- Published Sit Rep # 33.
- Updated water projections to included long term donated water.
- *Participated in daily meetings, local EOC, state agency briefing, and distribution process meeting.*

Operations Section:
- Address high copper test results - filters issued will not address copper and lead both.
- DEQ & DHHS indicate there are no major concerns with higher copper levels, everyone needs a certain amount of copper intake daily.
- Address request for LE for 10 State high lead home teams.
- Address MDARD activities in regard to testing pets.
- Additional information will be put out through the JIC.
- Advise of problem with EPA not coordinating with state team for high lead level.

•
Warehouse Numbers as of 1800:
❑ Water (liters):
• 593,210 liters or 49,434 cases.
❑ Filters (faucet):
• 50,096.
❑ Replacement cartridges:
• 379,562.
❑ Test Kits (prepped):
• 18,504.
• PODs (1700 2/6 – 1600 2/7):
❑ Water (cases):
• 54,492 liters or 4,541cases.
❑ Filters (faucet):
• 76.
❑ Replacement Cartridges:
• 192.
❑ Test kits:
• 65.

Finance Section:
• Begin updates to cost reports for upcoming week submittal.
• Notice to EMHSD staff concerning additional DCDS coding requested by State Budget Office for hours relating to City of Flint Emergency.
• Review FEMA RRF report for current costs and state cost match.
• Notice to Financial Unit regarding additional coding to be entered on any and all bills paid in relation to City of Flint Emergency.

GIS Branch Updates:
• Water Sampling Update Maps.
• MDARD Food Establishment Maps by Team Assignment Area.
• Worked Water Pressure Lines Digitization.
• Editing the field team data/POD data to put points inside respective polygons.
• JIC and Parcel Pairing Map.

DTMB:
• Continue to provide DTMB management with daily updates and resource requests received.
• Looking to secure office space for SBA Disaster Loan Outreach Center within the City of Flint.

DHHS-CH:
• The CHECC remains active at a Level 2, and continues to staff the hotline to answer any lead health-related questions referred by 2-1-1 in support of the GCHD.
• A team from the CDC arrived yesterday to work with MDHHS Bureau of Epidemiology.
• Inquired with the CHECC regarding GCHD participating in home visits for residences for which test results were greater than 150 PPB.
• DEQ provided SEOC with a list of the homes visited and it appeared that only the home that was listed included a visit by GCHD staff. The CHECC will be contacting the GCHD on Sunday to verify with the local Environmental Health POC, who is off today.

DEQ:
• Participation in Unified Coordination Group.
• Developed detail task list for SEOC DEQ desk.
• 223 samples received at the laboratory.

State Voluntary Agency Liaison (VAL):
• Working with State Agencies to determine if a need exists for their activities on the ground in Flint that could benefit from the potential local hire program.

Unified Coordination Group (UCG):
• Task Forces Health & Medical: working on creating a flow chart for visual of testing results.
• EPA conducted 11 filter grabs yesterday, and will be doing 2 today. This includes up to 33 samples per grab. A grab would be considered a location/residence. They are also following up on the AmeriCorps volunteers (2) that have rashes.

Local EOC:
• Establishing objectives and IAP for next operational period, 02/08/2016 – 02/12/2016.
• Awaiting additional information regarding companion animals with potential lead and chlorine poisoning from MDARD.
• Establishing plans for Elevated Copper Initial Assessment Task Force starting 02/08/2016 and follow-up outreach to homes with water lead levels over 150 ppb starting 02/10/2016.
• Aligning resources and supplies for Elevated Copper Initial Assessment Task Force and follow-up outreach to homes with water lead levels over 150 ppb.
• Analyzing locations of faith-based organizations and churches for integration into long-term recovery plans.

Injuries:
• February 2, 2016, a FEMA staff person injured his knee while picking up a small package. The staff person did not realize the extent of his injuries until today. He received a medical assessment at the Flint Hospital; an incident report will follow his assessment.
• On February 5, 2016, a Sergeant with the MDOC assigned to work at the Bell Warehouse was injured. The Sgt. was transported to Fire Station #6 to meet with an on-site ambulance and was transported to Hurley Medical Center. The Sgt. was evaluated, treated, and then released to report to a hospital closer to his home.

Incident Response/Recovery Priorities/Objectives

(Objectives are in order of priority with original objective number attached)

11. Ensure accurate tracking and accounting of all donations.
5. Continue to maintain adequate staffing to support operational requirements.
10. Collaborate with local and volunteer agency partners to solidify the Flint Water Operations Plan.
9. Enhance situational awareness and common operating picture of all activities.

8. Maintain coordination between partner agencies and organizations to include FEMA IMAT, FWICC, and the US Department of Health and Human Services Unified Coordination Group (UGC).
3. Improve and maintain the public information strategy and process.
6. Develop an overview of possible assistance programs.
4. Develop a long term public health and services plan.
7. Gather, analyze, and disseminate GIS data to develop products for future planning.
1. Ensure all households within impacted community have required resources and are included in DEQ water sampling plan.
2. Ensure accurate tracking and accounting of all commodities.

Emergency Declarations

Local Declarations

Jurisdiction(s): Date/Time:

Genesee County, Public Health Emergency, 10/01/2015
City of Flint, Declaration of State of Emergency, 12/15/2015

Damage Assessment Summary

Agriculture and Rural Development (MDARD)

MDARD issues for Sun. Feb 7
A new map with updated information has been developed for MDARD by SEOC-GIS, and will be used for additional follow up with food related businesses this week.
Concerns are being expressed about lead poisoning in service/companion animals since those might tend to be more with the *functional needs population, who may be unable to afford blood testing of their animal. SEOC-OPS has requested information* that could be put out publically that may be an offer of assistance, if needed, for those concerned. That information could be provided to 211 who could then assist in getting them the appropriate and available help. MDARD will connect with their partners including MSU College of Veterinary Medicine and others on this issue and report back to OPS.

American Red Cross (ARC)

The American Red Cross deployed 10 Water Response Teams on Sunday, 2/7/16, to attempt contact at those residences where no one had yet answered the door.

The Volunteer Reception Center (VRC) was in operation today, from 9am to 5pm. The VRC will be operating from 9-5 again on Monday.

No water test kits were assembled Saturday or Sunday. We anticipate that production will resume on Monday.

Civil Rights (MDCR)

Continue to review activities to provide support and assistance to assigned Human Services branch and other SEOC entities. *Maintaining media awareness regarding situation and community activities.*

Community Health (MDCH)

The CHECC remains active at a Level 2, and continues to staff the hotline to answer any lead health-related questions referred by 2-1-1 in support of the GCHD.

Coordinated with the CHECC to send MDHHS staff to the Genesee County EOC this upcoming week to accompany the DEQ teams that are conducting home visits for those residences that water tested above 150 PPB of lead. In addition, DEQ and MDHHS staff will be making initial visits to the homes on Monday and Tuesday that have tested above the 1300 PPB level for copper. DEQ has requested one health staff member per team going out each day, and the goal is to send 1 team on Monday, 1 team on Tuesday, and 10 teams on Wednesday.

Held afternoon conference call with CHECC leadership to discuss activities and updates. The CHECC continues to work diligently to strategize and develop a plan for a blood lead testing campaign for all children.

Confirmed that Ginna Holmes will be providing training to MDHHS staff in the CHECC that will be assisting her with donation management. Pam Strobel has offered to attend as well and provide access and instructions to use the new Donations board in MICIMS. Pam will also ensure that donations management is aligned with SEOC logistics.

Confirmed with the CHECC and the SEOC Operations Branch that Barbara Reynolds from CDC is no longer in Michigan but may return in the near future. If she returns and is available to provide training to state officials in the Governor's office and MDEQ staff, then that request will be considered and coordinated through the JIC (per the direction of SEOC Operations).

Requested that DEQ include the GCHD Environmental Health representative, who is in the GC LEOC today, in planning discussions regarding protocol development for elevated copper levels identified in water samples.

Participated on the Local EOC Call at the request of SEOC Operations Chief. Locals expressed concern over the 31 locations that have tested with copper levels above the EPA standard (1300 PPB). The LEOC requested that MDHHS and DEQ work with the JIC *to enhance messaging on this topic. Held a conference call with the CHECC executive group to discuss this request.* copper information was located by the CDC ATSDR, and ATSDR was requested by the CHECC to assist with health messaging to the public. The MDHHS PIO will be coordinating with the JIC, DEQ and MDHHS on to accomplish this.

Corrections (MDOC)

MDOC continued operations at both warehouses and all PODs were well supplied during the entire operational period.

MDOC continue to keep trucks dedicated to delivering to individual PODs and have Rapid Responses ready for any POD that gets to a critical level of supplies.

143 water samples were collected and delivered to the DEQ Lab in Lansing.

MDOC had 14 employees and one SAI work crew (6 trainees total) on the ground in Flint today.

In an effort to reduce overtime costs we are working on completing a critical staff review. All dedicated resources will be reviewed to determine if it is feasible to reduce staffing in lieu of volunteers wherever possible.

We are working with Finance and MDOC assets to capture total employee payroll information and expenditures.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities today:

□ Research of copper reduction certified filtration systems. 31 homes with elevated copper results >1300ppb. Local EOC will coordinate contacting residents; provide bottled water and health information, retest and develop plans for reverse osmosis filtration installation.
□

□ 143 samples were received at the laboratory

- Continued work on closing communication and administrative gaps.
- Produced tracking sheet for the request by U.S. Congressional Committee of Energy and Commerce.
- Reviewed upcoming deadlines from EPA Order tracking spreadsheet.
- Organization Chart was updated.
- Updated incident objectives to reflect activities for the upcoming week.

Human Services (MDHS)

Looking into filtration system for a child care institute, possibly through donation.

Passing on resource request for staff to assist with donation management mission.

Continue to review activities to provide support and assistance to Human Services branch and other SEOC entities.

Licensing and Regulatory Affairs (LARA)

Participated in briefings and updated the LARA Executive Team
LARA continues to monitor DEQ's test results for Health Care, Child Care, Adult Foster Care, HHS and MDE facilities and Schools.
Review and finalization of Contract with plumbers via Plumbers and Pipefitters Local 370. Volunteer plumber will participate in copper testing teams on Monday, February 8.
Clarification of response outreach needs for Child Care, Adult Foster Care and other facilities was provided.
Translation services for various documents continue to be provided as needed.

Military and Veterans Affairs (DMVA)

Commanders Situation Report (SITREP)

1. DTG: 0713002016

2. UNIT: Points of Distribution (PODs), TF FLINT (1-125 IN)

3. POC:Ssg Gazzeny, Darryl L. Cell. Email: armyinfantry31@yahoo.com

4. PRESENT LOCATION: Genesee County Local EOC, 1101 Beach St., Flint, MI, 48502

5. SITUATION OVERVIEW: 1-125 IN has) Soldiers deployed to the Flint Water Crisis in support of Distribution Operations at the Points of Distributions (PODs).Daily operations consist of receiving, tracking, and issuing out water, filters, replacement filters, and water test kits.

6. OWN SITUATION DISPOSITION /STATUS: Currently 1-125 IN has Soldiers on ground supporting the mission.

7. OPERATIONS: Operations for the next 24 hours are to sustain water/filter distributions throughout the 5 designated fire stations and track all distribution incoming and outgoing through the PODs.

a. Traffic signs are in place at all stations. Flint City Engineering with the aid of National Guard Soldiers, have placed signs in accordance with city code.

b. POD 5 has two generator lighting units from MDOT. All PODs now have sufficient lighting.

1. Fuel cans and fuel card have been requested through SEOC. Alternate methods may
be considered.

c. Signs have been printed off for the POD Buildings. Requesting approval to get the signs laminated from the purchasing office.

1.) TF Flint OIC, 2LT Benke, will be seeking approval from CPT Bowles and Dana and/or Kim at the purchasing office for laminating.

d. Last 24hrs operation.

8. PERSONNEL:) Soldiers are currently assigned to the POD operations.) Soldiers are assigned in 1 teams at Fire Stations 1, 3, 5, 6 and 8.

9. INTELLIGENCE / FORCE PROTECTION: No Force Protection Intelligence at this time.

10. LOGISTICS: In support of TF Flint

a. In support of recycle project sponsored by Schupon, the special purpose recycle bags have now been incorporated into POD operations and being distributed.

b. Hotel issues have been resolved.

11. COMMUNICATIONS: No communications issues at this time.

P: RRF cell phones alternate for WRTs.
A: Personal cell phone
C: 800 MHz radios issued to PODs and WRTs.
E: Runner

12. NARRATIVE: N/A

13. COMMANDER'S EVALUATION:
• AAR and operational notes are being consolidated into SOP's to send to JOC to assist in updating the All Hazards Plan.
• An operational handoff packet including SOP's, POC's, POD sector sketches, hand-receipts, and other operational notes is being built to assist the incoming unit.
• OUT (last 24 hours)
Bottled water-6834 Water (Gallons)-78 Lead Testing Kits-264
Pitcher (23 cup)-0 Brita Faucet Filter-100 Brita Replacement Cartridge-161
Pur Filter-36 Pur Replacement Filter-255

National Weather Service (NWS)

NWS Detroit providing morning SEOC brief and Activity Log posts. Jim Maczko from NWS Grand Rapids will be the contact point for any changes in NWS Support and will also continue to update the Sit Rep Executive Summary as needed.

Participation in afternoon SEOC briefings is planned only if significant changes in the forecast occur.

Natural Resources (MDNR)

MDNR LED continues to support its QOL partners with staffing at the SEOC.

Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging (VAAA) continues to receive phone calls from concerned seniors in Flint and continues to make referrals to the Genesee Co. EOC for water and filter follow-up.

VAAA's local Nursing Home Ombudsman continues to monitor Flint area Nursing Homes to ensure residents have access to safe water.

Contact info for VAAA Executive Director is:
Kathryn C. Boles
President, CEO
Valley Area Agency on Aging
225 E. Fifth Street, Suite 200
Flint, MI 48502
(810) 239-7671
(810) 239-8869 fax

State Police (MSP)

The MSP position within the SEOC will be staffed at MSP Operations at HQ. All e-mails to MSP-EOC-MDSP@michigan.gov are being forwarded to the Operations Lt. The phone number for the on duty Operations Lieutenant is 517-241-8000

Technology, Management and Budget (MDTMB)

Continue to provide DTMB management with daily updates and resource requests received.

Looking to secure office space for SBA Disaster Loan Outreach Center within the City of Flint.

Transportation (MDOT)

Providing 2 portable light tower generators to Fire Station #5 on Western Rd.

Facilitated with the City of Flint Public Works to deploy signs and barricades at Fire Station #1, #5, and #8 to assist with traffic flow through parking lots.

Providing traffic measures at Fire Station #6 on Pierson Rd. and Fire Station #3 on Martin Luther King Blvd:
-4 (3' x 5') standard signs fabricated and set up to replace 4 portable changeable message boards (2 each site)
-100 grabber traffic cones (narrow reflective cones) (50 each site).

Continuing to maintain situational awareness and responding to issues regarding equipment and road conditions.

Subject: Request for Extension of Appeal Period for FEMA-3375-EM-MI

Attached is the State of Michigan's request for an extension of the appeal period for the denial of the Individual and Households Program (IHP) and emergency protective measures (Category B) under the Public Assistance program for FEMA-3375-EM-MI. Please let me know if anything further is needed.

STATE OF MICHIGAN
DEPARTMENT OF STATE POLICE
LANSING

RICK SNYDER
GOVERNOR

COL. KRISTE KIBBEY ETUE
DIRECTOR

February 19, 2016

Elizabeth A. Zimmerman
Associate Administrator
Office of Response and Recovery
Federal Emergency Management Agency
500 C Street SW
Washington, DC 20472

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Ms. Zimmerman:

Under the provisions of 44 C.F.R. § 206.46(d), I hereby request an extension until March 22, 2016 to submit an appeal for the denial of the Individual and Households Program (IHP), as well as emergency protective measures (Category B) under the Public Assistance program for FEMA-3375-EM-MI. Pursuant to 44 C.F.R. § 206.46(d), I am submitting this written request for an extension within 30 days of the date of denial received on January 22, 2016.

As support of this extension request, I offer the following information:

The State of Michigan has requested documentation from the City of Flint to support our appeal, but to date, the city has not been able to supply this information. On February 12, 2016, Mayor Weaver terminated employment of the city administrator, police chief, and fire chief which is significantly complicating the ability of the city to provide information requested by our office.

Submittal of disaster related costs without the City of Flint's data will eliminate a major component of the basis for our appeal. This time extension is necessary due to the inability of the city to compile the information needed to support our appeal within the given time frame.

At this juncture, two days remain of the 30-day window to request an appeal as specified in 44 C.F.R. § 206.46. Therefore, it is necessary to request an extension to allow the State of Michigan the time necessary to properly develop the appeal for the denial of the IHP, as well as emergency protective measures (Category B) under the Public Assistance program for FEMA-3375-EM-MI. An extension of 30 days, until March 22, 2016, will allow the City of Flint to assemble information and the State of Michigan to conduct the required analysis to develop the appeal request.

Sincerely,

Anthony P. Katarsky, Assistant Commander
Governor's Authorized Representative
Emergency Management and Homeland Security Division

500 C Street SW
Washington, DC 20472

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Ms. Zimmerman:

Under the provisions of 44 C.F.R. § 206.46(d), I hereby request an extension until March 6, 2016 to submit an appeal for the denial of the Individual and Households Program (IHP), as well as emergency protective measures (Category B) under the Public Assistance program for FEMA-3375-EM-MI. Pursuant to 44 C.F.R. § 206.46(d), I am submitting this written request for an extension within 30 days of the date of denial received on January 22, 2016.

As support of this extension request, I offer the following information:

The State of Michigan has requested documentation from the City of Flint to support our appeal, but to date, the city has not been able to supply this information. On February 12, 2016, Mayor Weaver terminated employment of the city administrator, police chief, and fire chief which is significantly complicating the ability of the city to provide information requested by our office.

Submittal of disaster related costs without the City of Flint's data will eliminate a major component of the basis for our appeal. This time extension is necessary due to the inability of the city to compile the information needed to support our appeal within the given time frame.

At this juncture, two days remain of the 30-day window to request an appeal as specified in 44 C.F.R. § 206.46. Therefore, it is necessary to request an extension to allow the State of Michigan the time necessary to properly develop the appeal for the denial of the IHP, as well as emergency protective measures (Category B) under the Public Assistance program for FEMA-3375-EM-MI. An extension of 30 days, until March 22, 2016, will allow the City of Flint to assemble information and the State of Michigan to conduct the required analysis to develop the appeal request.

Sincerely,

Anthony P. Katarsky, Assistant Commander
Governor's Authorized Representative
Emergency Management and Homeland Security Division

STATE OF MICHIGAN
DEPARTMENT OF STATE POLICE
LANSING

RICK SNYDER
GOVERNOR

COL. KRISTE KIBBEY ETUE
DIRECTOR

February 19, 2016

Elizabeth A. Zimmerman
Associate Administrator
Office of Response and Recovery
Federal Emergency Management Agency
500 C Street SW
Washington, DC 20472

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Ms. Zimmerman:

Under the provisions of 44 C.F.R. § 206.46(d), I hereby request an extension until March 6, 2016 to submit an appeal for the denial of the Individual and Households Program (IHP), as well as emergency protective measures (Category B) under the Public Assistance program for FEMA-3375-EM-MI. Pursuant to 44 C.F.R. § 206.46(d), I am submitting this written request for an extension within 30 days of the date of denial received on January 22, 2016.

As support of this extension request, I offer the following information:

The State of Michigan has requested documentation from the City of Flint to support our appeal, but to date, the city has not been able to supply this information. On February 12, 2016, Mayor Weaver terminated employment of the city administrator, police chief, and fire chief which is significantly complicating the ability of the city to provide information requested by our office.

Submittal of disaster related costs without the City of Flint's data will eliminate a major component of the basis for our appeal. This time extension is necessary due to the inability of the city to compile the information needed to support our appeal within the given time frame.

At this juncture, two days remain of the 30-day window to request an appeal as specified in 44 C.F.R. § 206.46. Therefore, it is necessary to request an extension to allow the State of Michigan the time necessary to properly develop the appeal for the denial of the IHP, as well as emergency protective measures (Category B) under the Public Assistance program for FEMA-3375-EM-MI. An extension of 30 days, until March 22, 2016, will allow the City of Flint to assemble information and the State of Michigan to conduct the required analysis to develop the appeal request.

Sincerely,

Anthony P. Katarsky, Assistant Commander
Governor's Authorized Representative

FEMA Region V Morning Brief
DATE: 02/19/2016

REGION V RESPONSE STATUS:

- **RRCC:** Watch / Steady State
- **IMAT:** Blue
  - Alpha: deployed to Lansing, Michigan in support of MI-3375-EM
  - Bravo: deployed to Flint, Michigan in support of HHS UCG
  - Charlie: Collateral IMAT
- **LNO:** Cornelius Miller

REGION V SEOC STATUS:

- **Illinois:** Normal Operations
- **Indiana:** Normal Operations
- **Michigan:** Full Activation (Flint Water Emergency)
- **Minnesota:** Normal Operations
- **Ohio:** Normal Operations
- **Wisconsin:** Normal Operations

NATIONAL TERRORISM ADVISORY SYSTEM (DHS): Bulletin (12/16/2015 – 06/16/2016)

NOTEWORTHY EVENTS: Nothing significant to report.

SIGNIFICANT WEATHER (NWS, SPC):

- **Today.** A strong low pressure system will continue to move southward and eastward across the Upper Midwest and Great Lakes this morning, bringing light snow and light freezing rain to parts of Minnesota, Wisconsin, and Michigan. As temperatures warm later today, weak thunderstorms are possible in these areas as well. No severe weather is expected.
  - A Freezing Rain Advisory is in effect for parts of northeastern Minnesota until 0900 CST this morning. Light snow and light freezing rain are possible, making travel difficult. No significant accumulations are expected.
  - Winter Weather Advisories are in effect for parts of eastern Upper Michigan and northern Lower Michigan until 1100 CST this morning. Light snow and light freezing rain are possible, making travel difficult. No significant accumulations are expected.
  - Wind Advisories have been issued for most of the Region from 0900 CST this morning until 2100 CST tonight. Winds up to 40 mph with gusts up to 60 mph are possible, downing trees and power lines and causing minor damage to homes or other structures. No widespread power outages are expected.
- **Extended Outlook.** Temperatures will continue to warm through the weekend. More low pressure will move eastward across the Central Plains and Middle-Mississippi Valley tomorrow, bringing the possibility of isolated thunderstorms to southwestern Illinois tomorrow afternoon, and to southern Illinois and southern Indiana on Sunday. No severe weather is expected.

HYDROLOGIC CONDITIONS (AHPS): Flood Warnings remain in effect along the Kaskaskia River in Illinois. No significant impacts have been reported and none are expected.

FIRE CONDITIONS (SPC): Nothing significant to report.

REGION V DISASTER SUMMARY:

- **Declaration Requests:** None.
- **PDA Summary:** None.
- **Disaster Declarations:** FEMA-3375-EM provides emergency assistance for water, water filters, water filter cartridges, water test kits and other necessary related items for a period of no more than 90 days for Genesee County.

TRAINING EVENTS:

- **Feb 29-Mar 1:** REP Core Concepts Course (RCCC); Manitowoc, WI
- **Mar 1-2:** L-276 Benefit Cost Analysis, Indianapolis, IN
- **Mar 2-4:** REP Plan Review Course (RPPR); Manitowoc, WI
- **Mar 3-4:** L-214 Hazard Mitigation Assistance Implementation & Closeout
- **Mar 21-24:** REP Exercise Evaluator Course (REEC); Madison, WI
- **Mar 25:** REP Exercise Controller Course (RECC); Madison, WI
- **Apr 4-7:** L580 Emergency Management Framework for Tribal Governments; Leech Lake Band of Ojibwe, MN
- **Apr 18-21:** REP Exercise Evaluator Course (REEC); Springfield, IL
- **Apr 22:** REP Exercise Controller Course (RECC); Springfield, IL
- **May 3-5:** L207 Introduction to Hazard Mitigation Field Operations; Chicago, IL

EXERCISE EVENTS:

- **Mar 3:** Indiana Cyber (Power Disruption) TTX; Camp Atterbury, IN
- **Mar 16:** FEB COOP Devolution FSE; Cincinnati, OH
- **Mar 30:** RV/RII Devolution TTX (Phase II); Chicago/New York (via VTC)
- **Apr 6:** Braidwood REP; IL
- **Apr 18:** FEB COOP Reconstitution TTX; Chicago, IL
- **Apr 20:** NSSE RNC SL TTX; Cleveland, OH
- **Apr 26:** Palisades REP; MI
- **Apr 27:** America's Preparathon

Very Respectfully,

Chad Jones

Subject: Data report

Governor,

Attached is the daily report. (Note, the last page is just a sample layout for the sentinel site water test results when they come in.)

A couple of items of interest from today:

1) Ben and I met with DHHS, DEQ, and SEOCGIS today to discuss your spreadsheet. The tentative protocol is that DHHS will transmit its updated, de-duplicated data to the SEOC weekly, while DEQ will submit its data in real time to the SEOC using the GIS collector app. SEOCGIS will merge the data as it comes in and map it. DEQ is updating the collector app that it is using for the sentinel sites to include your additional fields and my hope is that we can test the integration next week when DHHS submits its first round of EBL investigation data to the SEOC.

2) Ben and I test drove the web-based GIS application today and it is very cool. For Monday, I have asked SEOCGIS to give you an overview of the application and the data you can access through it. As I write this, I have the sentinel site map application open on my iPad with a live ticker showing me the number of new participating locations visited today (115) and new lead service lines found (6). If I click any icon on the map, it pulls up a report of the site visit, complete with pictures of the pipes. Takes about 6-10 seconds between when a field team clicks submit on their iPad and when the map location and report show up on the screen.

I don't know if you've had a chance to try out the mobile app version that Ben sent a link to last week. It's pretty neat, but the web-based version adds dashboard capability, which makes it a much more useful tool.

NATIONAL TERRORISM ADVISORY SYSTEM (DHS): Bulletin (12/16/2015 – 06/16/2016)

NOTEWORTHY EVENTS: Nothing significant to report

SIGNIFICANT WEATHER (NWS, SPC): Winter weather will continue across the northern portions of the Region through Friday morning. High winds will continue throughout Friday evening. Saturday and Sunday, no severe weather or significant precipitation is forecast. Based on current forecasts, the following watches and warnings are in effect within the Region:

- A Winter Weather Advisory has been issued for parts of northeastern Minnesota, northern Wisconsin, and northern Michigan and the Upper Peninsula until 0600-1100 CST tomorrow morning. Light snow and light freezing rain are possible, making travel difficult. No significant accumulations are expected.
- Wind Advisories are in effect from 0300 CST, Friday until 1700-1800 CST, Friday across southern Minnesota, central and southern Wisconsin, Illinois, Indiana, southwestern Michigan, and northwestern Ohio. Wind gusts of 40-50 mph are likely; impacts to travel and minor straight line wind damage are primary risks.
- Freezing Rain Advisory is in effect for northwestern Minnesota until 0900 CST; accumulation up to 0.1 inches is possible

HYDROLOGIC CONDITIONS (AHPS): Flood Warnings remain in effect along the Kaskaskia River in southern Illinois due to recent rain and snowfall; no significant impacts have been reported and none are expected.

FIRE CONDITIONS (SPC): Nothing significant to report

REGION V DISASTER SUMMARY:

REGIONAL WEATHER & IMPACTS

Wind advisory Friday for central Indiana
(WTHR)
Indianapolis, IN: It's no surprise to see Central Indiana and the Indianapolis metro area placed in a Wind Advisory from 7am to 7pm Friday. We've been advertising a windy day and we're still expecting wind gusts to peak in the 45 to near 50mph range. Please use caution if driving a high-profile vehicle and take note your garbage can may not be where you left it. That wind comes from a warm direction and delivers the unseasonably mild air you see out in the Central Plains. While we won't hit 70 degrees, temperatures should hit 60 degrees or higher for the first time since February 3rd. Saturday still looks like the pick-of-the-week with equally warm highs in the low to mid 60s with much less wind. Model guidance continues to hint an area of showers to move across parts of the area during the first part of Sunday. The rain chance combined with the passage of a cool front warrants much lower highs Sunday in the low to mid 50s. Seasonably cool air awaits us next week with highs near 40 and lows eventually dropping back into the 20s.

PUBLIC HEALTH & SAFETY

City crews to deliver bottled water to some Detroit residents after water main break
(Associated Press)
Detroit, MI: Bottled water will be delivered to some residents in a southwest Detroit neighborhood following a water main break that has flooded several streets. City officials say Thursday that the 30-inch main broke about 10 p.m. Wednesday on Buchanan Street. About 40 homes have been left without water. Great Lakes Water Authority and Detroit Water and Sewerage Department crews have isolated the break which is expected to be repaired as early as Friday morning. Officials say it could take several days before the repaired line is flushed and treated and the water is deemed safe for the public to use. A water quality test will be done before service is restored.

Elevated lead levels found at Howell's Northwest Elementary School
(WXYZ)
Detroit, MI: The Howell school district says they have received test results that show elevated lead levels in an elementary school. The test results are from Northwest Elementary School. Test results at Southeast, Southwest and Challenger elementary schools all came back within safe limits. Test results from 7 other buildings remain outstanding. They are expected to have results on those facilities soon. Because of the elevated results, the district is placing portable water coolers at Northwest. A second round of tests has also been ordered and will be conducted on Friday, February 19. "We are taking the elevated levels at Northwest very seriously. We will be conducting a second more extensive round of testing with representatives from the City of Howell and their experts and have asked that the test results be expedited. The second round of testing will either verify the test results or disprove them," said Howel Public Schools Superintendent Erin MacGregor in a news release. "If the second round of testing shows that we do indeed have elevated levels, we will immediately begin working to identify and correct the problem. The water coolers will remain in place until we receive test results that are within safe levels." A letter has been sent to all Howell parents about the testing, which was put in place because of the news surrounding the Flint water crisis.

US ends enhanced airport screening for Ebola

(Associated Foreign Press)
National: The United States announced Thursday it will end enhanced screening of passengers for potential Ebola virus infection from West Africa after an epidemic that killed more than 11,000 people. On Friday, Guinea will be removed "from the list of nations affected by Ebola for which travelers are subject to enhanced US visa and port-of-entry screening," said the US Centers for Disease Control and Prevention. "Guinea will be the last of the affected countries in West Africa to be removed from enhanced entry screening measures." The change means that travelers from Guinea -- as well as Liberia and Sierra Leone -- will be able to enter the United States through any available port of entry, instead of being routed to one of five specially selected airports. "Travelers departing Guinea will remain subject to outbound screening measures, and the United States will continue to support Guinea's Ebola prevention and detection measures, including at its primary international airport in Conakry," said the CDC. "Travelers from Guinea, Liberia, and Sierra Leone are still encouraged to watch their health for 21 days after leaving one of these countries and to contact their local health departments or seek healthcare if they develop symptoms consistent with Ebola." Guinea was declared free of Ebola by the World Health Organization on December 29, 2015.

Mumps case confirmed at IUPUI
(WRTV)
Indianapolis, IN: A case of the mumps has been confirmed on the IUPUI campus. According to a letter sent to students and faculty, IUPUI has been working closely with the Marion County Health Department and the student to identify and notify anyone with whom the student may have been in close contact with. The letter says if a person has not been contacted, there is no medical reason to believe they are at risk for potential exposure. In the past few weeks, students have also tested positive for mumps at Butler and IU Bloomington.

HAZMAT

Middletown chemical leak detained, investigation underway
(WLWT)
Middletown, OH: Middletown police said a chemical leak at Pilot Chemical has been contained and the shelter in place has been lifted. Pilot Chemical, located at 3436 Yankee Road, called in a sulfur trioxide leak at 11:12 a.m. on Thursday, Middletown Fire Chief Paul Lolli said. Lolli described SO3 as a "corrosive and toxic chemical" and said, "If it gets onto skin, it could cause some serious medical problems." The facility said a truck was transporting 3,500-4,000 gallons of the liquid when an unknown amount leaked out. According to Lolli, the liquid, which turns to gas when it exits the tank, created a small plume prompting the department to issue a shelter in place for nearby residents. Amanda Elementary School, located 1 mile from the facility, was told by the fire department to have staff and children stay in place. Parents were told they could pick up their kids. Concerned parents rushed to the school to make sure their children were safe. Some parents were frantic after they heard about the spill. They didn't want to take any chances and decided to pull their children out of school.

EMERGENCY MANAGEMENT

GPS allows for better, faster tsunami warnings
(HSNW)
National: Existing GPS instruments at monitoring stations worldwide could be used to increase the speed and accuracy of tsunami warnings, according to a new study published in Geophysical Research Letters, a journal of the American Geophysical Union. Real-time Global Positioning System (GPS) measurements can be used to show how major earthquakes displace the ocean floor, cutting tsunami warning times by nearly twenty minutes and potentially reducing harm to coastal communities, according to the study's authors. The AGU reports that current tsunami warning systems use seismometers, instruments that measure how the earth shakes during an earthquake, to pinpoint the epicenter, magnitude, and depth of an earthquake. Since the strength of a tsunami is not always directly related to the magnitude of the quake producing it, the additional information that real-time GPS data can quickly and accurately provide on the earthquake's source is important. As an earthquake increases in size, above 7.5 to 8 MW, its recorded magnitude becomes less reliable: seismometers closest to high-magnitude quakes often inaccurately record their size. Generating an accurate tsunami warning requires that warning agencies wait for the earthquake's energy waves to reach earthquake monitoring stations farther away to generate an accurate model of the earthquake and resulting tsunami: a delay of up to 20 to 30 minutes after the first record of the earthquake, Melgar said.

Flint is poised to receive more state and federal assistance to deal with its lead-contaminated water crisis
(Associated Press)
Lansing, MI: State and federal officials acted to send more help to Flint to deal with its lead-contamination crisis, as the Michigan House approved $30 million on Thursday to help pay residents' water bills and Gov. Rick Snyder announced a $2 million grant to help the city replace some of its pipes. The federal government is giving $500,000 to two health centers that are treating and testing Flint residents exposed to the lead-tainted water. That aid comes as a new congressional report by the nonpartisan Congressional Research Service said the Environmental Protection Agency waited too long to take enforcement action after learning of elevated lead levels in Flint's tap water. The EPA says it urged a quicker state and local response. Snyder, who has apologized for his administration's role in the lead contamination, credited lawmakers for working to get funding to the city quickly. Snyder also announced that the $2 million to help Flint replace some of its lead pipes should happen within the next 30 days. The governor said the pipe project will start with priority lead lines, with the help of estimates from the Lansing Board of Water and Light, which has replaced much of Lansing's lead piping in the past. The new funding would pay for pipe replacement in several hundred homes, but the Flint City Council and the city's chief financial officer still have to take action to receive the grant funding.

Governor,

Attached is the daily report. (Note, the last page is just a sample layout for the sentinel site water test results when they come in.)

A couple of items of interest from today:

1) Ben and I met with DHHS, DEQ, and SEOCGIS today to discuss your spreadsheet. The tentative protocol is that DHHS will transmit its updated, de-duplicated data to the SEOC weekly, while DEQ will submit its data in real time to the SEOC using the GIS collector app. SEOCGIS will merge the data as it comes in and map it. DEQ is updating the collector app that it is using for the sentinel sites to include your additional fields and my hope is that we can test the integration next week when DHHS submits its first round of EBL investigation data to the SEOC.

2) Ben and I test drove the web-based GIS application today and it is very cool. For Monday, I have asked SEOCGIS to give you an overview of the application and the data you can access through it. As I write this, I have the sentinel site map application open on my iPad with a live ticker showing me the number of new participating locations visited today (115) and new lead service lines found (6). If I click any icon on the map, it pulls up a report of the site visit, complete with pictures of the pipes. Takes about 6-10 seconds between when a field team clicks submit on their iPad and when the map location and report show up on the screen.

I don't know if you've had a chance to try out the mobile app version that Ben sent a link to last week. It's pretty neat, but the web-based version adds dashboard capability, which makes it a much more useful tool.

SEOC Report for: February 18, 2016
Full Days Since Emergency Declaration: 44

Items to Note

- US Department of Health and Human Services will be visiting Fire Station #5 POD today.
- MDEQ has initiated the lead of 15 sentinel monitoring field support teams today which are targeting the identification of lead service lines.
- American Red Cross Teams will be visiting the final three mobile home parks today and 34 identified homes.

SEOC Report for: February 18, 2016

Full Days Since Emergency Declaration: 44

Items to Note

- US Department of Health and Human Services will be visiting Fire Station #5 POD today.
- MDEQ has initiated the lead of 15 sentinel monitoring field support teams today which are targeting the identification of lead service lines.
- American Red Cross Teams will be visiting the final three mobile home parks today and 34 identified homes.

FEMA REGION V EVENING SITUATIONAL AWARENESS REPORT (ESAR)
DATE: 02/18/2016

REGION V RESPONSE STATUS:

- **RRCC:** Watch / Steady State
- **IMAT:** Blue
  - Alpha: Deployed to Lansing, Michigan in support of MI-3375-EM
  - Bravo: Deployed to Flint, Michigan in support of HHS UCG
  - Collateral IMAT: Charlie
- **LNO:** Cornelius Miller

REGION V SEOC STATUS:

- **Illinois:** Normal Operations
- **Indiana:** Normal Operations
- **Michigan:** Full Activation (Flint Water Emergency)
- **Minnesota:** Normal Operations
- **Ohio:** Normal Operations
- **Wisconsin:** Normal Operations

NATIONAL TERRORISM ADVISORY SYSTEM (DHS): Bulletin (12/16/2015 – 06/16/2016)

NOTEWORTHY EVENTS: Nothing significant to report

SIGNIFICANT WEATHER (NWS):

- **Tonight:** Snow and rain is forecast to continue overnight for southern and eastern Ohio. Light freezing rain is also possible across larger parts of northern Minnesota, northern Wisconsin, and most of Michigan. Although most areas should see less than 0.10 inch, parts of northeastern Lower Michigan could see up to 0.25 inch. No significant impacts are expected. Based on current forecasts, the following watches and warnings are in effect within the Region:
  - A Winter Weather Advisory has been issued for parts of northeastern Minnesota, northern Wisconsin, and northern Michigan and the Upper Peninsula until 0600-1100 CST tomorrow morning. Light snow and light freezing rain are possible, making travel difficult. No significant accumulations are expected.
  - Wind Advisories are in effect from 0300 CST, Friday until 1700-1800 CST, Friday across southern Minnesota, central and southern Wisconsin, Illinois, Indiana, southwestern Michigan, and northwestern Ohio. Wind gusts of 40-50 mph are likely; impacts to travel and minor straight line wind damage are primary risks.
- ***Looking Ahead:*** *Winter weather will continue across the northern portions of the Region through Friday morning.* High winds will continue throughout Friday evening. Saturday, no severe weather or significant precipitation is forecast.

HYDROLOGIC CONDITIONS (AHPS): Flood Warnings remain in effect along the Kaskaskia River in southern Illinois due to recent rain and snowfall; no significant impacts have been reported and none are expected.

FIRE CONDITIONS (SPC): Nothing significant to report

REGION V DISASTER SUMMARY:

- **Declaration Requests:** None

- **PDA Summary:** None
- **Disaster Declarations:** FEMA-3375-EM provides emergency assistance for water, water filters, water replacement cartridges, water test kits, and other necessary related items for a period of no more than 90 days for Genesee County.

Subject:	Re: Summary for 7:30 Briefing

Based on looking at the numbers below. Virtually all of the remaining needed sites must have LSL to get to the needed 60. Also, getting to 60 LSL doesn't not leave any margin for possible non participation in the future. It is hard to understand why we are having this issue if we have 5000 addresses that are supposed to have LSLs. On your spreadsheets, do you identify what sites are LSLs?

Thanks
Rick

> **SENTINEL A GROUP TEST RESULTS**
>
> Attached is the data for the first Flint Sentinel Sites (group A). There are a total of 174 samples. There are two tabs on the spreadsheet. The first tab sorts the data by lead concentration and the second tab sorts the data by zip code and then by lead concentration. Please note that we will have a couple more strays coming in but this is everything from the first slug of samples.

The data breaks down as Follows:

FOR LEAD:
174 Total Samples
154 Samples were at or below 15 PPB (88.5%)
20 Samples were > 15 PPB (11.5%)
5 Samples were greater than 100 PPB
1 sample was at 1,485 PPB

FOR COPPER:
There was only one Sample that exceeded 1,300 PPB (1.3 mg/L)

All 6 locations that were > 100 ppb had visits today. 1 requested a return visit on Saturday, 1 declined entry & the other 3 were contacted for a home visit / inspection.

SENTINEL ACTIVITY TO DATE FOR BOTH GROUP A & GROUP B:

Our 16 sentinel teams (3 members each; DEQ, plumber, community member) were working until 6PM this evening. In essence they had about ½ day based upon some logistical challenges this morning (vehicles) as well as startup training for the new team members.

Sentinel Group A (efforts from Feb. 10th – 14th):
241 residents agreed to participate. Ten (10) residences with lead service lines were confirmed in this initial effort.

Sentinel B (began today, as of 6pm, 2/18/16):
115 residents have agreed to participate. Six (6) residences with lead service lines were confirmed.

SUMMARY OF COMBINED SENTINEL GROUPS TO DATE:

356 residents enrolled
16 lead service lines identified

17 teams will be working tomorrow, Saturday & Sunday to reach our targets of 402 & 60. We're looking to be on the same sample collection schedule of Mondays & Tuesdays weekly, alternating between the first and second round.

An additional piece of information I'll summarize in a separate email (including Nat) has to do with our home visit efforts to date; we're still compiling that information from paper collection forms, spreadsheets & logs to ensure that we've contacted every house > 100 ppb. Tomorrow we're looking to start up a mobile collector for any home visit made regardless of a sentinel site or high ppb home visit.

Subject: Daily Summary
Attachments: 20160218_Residents_Sampled_Results-Copper.pdf; 20160218_Residents_Sampled_Results-Lead.pdf; 2015-10-01 City of Flint Water Contamination-Shortage SitRep 44 2016-02-18.pdf

Capt. Kelenske,

Below is a summary of events for today. Peter Manning has reviewed the Sit Rep. The Operations Section Chief (F/Lt Covey) reviewed and approved also.

Update 2/18/16 – 45th Day (44th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Ensure adequate quantities of supplies to support operations.
- Continue door to door/Flint Water Response Teams (FWRTs), ARC only.
- Prepare appeal on denial of Category B under the Presidential Emergency Declaration.
- Shift Water Response Teams operations to a targeted effort to provide filters into homes where data shows filters have not been provided.
- Work on plan for Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery - recovery plan/transition of PODs.

Status on Governor's request letter to the President:

- Appeal denial received on the Major Disaster Declaration. Nothing more can be done on this.
- Denial of Individual Household Program and Category B under the Emergency Declaration received January 22, 2016. We have 30 days to appeal and EMHSD staff is gathering information for the appeal.

Attached:

1. Sit Rep #44.
2. Maps: Residential Water Sampling Results for lead and copper.

Key items for tomorrow to note are:

- Team Priority Scheduled Tomorrow: Begin visiting the 1,300 Access & Functional Needs addresses to distribute 3-5 cases of water and replacement cartridges.
- 5 American Red Cross Teams scheduled for Friday, February 19, 2016.

Items to Note

- US Department of Health and Human Services visited Fire Station #5 POD today. Per Lt. Roach the visit went very well.
- MDEQ has initiated the lead of 15 sentinel monitoring field support teams today which are targeting the identification of lead service lines.
- American Red Cross Teams visited the final three mobile home parks today and 34 identified homes.

- United States Secretary of Health and Human Services Secretary Sylvia M. Burwell announced that $500,000 in funding will be provided to Hamilton Community Health Network, Inc. (HCHN) and Genesee Health System (GHS).
- MDHHS-CH Forwarded a request for a licensed medical professional, who has knowledge of lead, legionella, rashes, and other water health related concerns to be stationed at GCHD-EH division to assist with communicating MDEQ water results and health risks.

Unified Coordination Group (UCG):

- EPA canvassing team distributed EPA factsheets at 50 different locations throughout Flint and made contacts with parties interested in having EPA provide updates at their organizational meetings.
- CDC Epi Team continued to utilize a geocode database to assist the state with analysis of BLLs in children.
- *UCG Daily Sit Rep available in MI CIMS.*

Local EOC:

- National Guard completing transition to new unit on 02/18/2016.
- US Secretary of Health and Human Services Burwell visited Fire Station 5 POD and met with local stakeholders. LOFR attended site visit to brief on emergency response activities and answer questions.
- IC briefed University of Michigan All Hazards Team on emergency response activities, covering items such as volunteer management, communications strategies, etc.
- IC responded to FOIA request by MSU Law Clinic regarding distribution and usage of water by inmates in jail.
- Coordinating local volunteer needs for CDC outreach teams.
- 16 teams with MDEQ personnel out in the field support sentinel monitoring program and identification of lead service lines.
- Elevated Lead and Copper Initial Assessment Task Force out in the field, making contact at households reporting elevated lead and copper levels.
- Southern Baptist Disaster Relief out in the field with five teams for distribution of supplies to affected populations with access and functional needs.

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	02/16/2016 08:00:00
Operational Period End:	02/23/2016 08:00:00
Situation Report No.	44
SEOC Status:	Full
SEOC Hours of Operation Begin:	02/18/2016 08:00:00
SEOC Hours of Operation End:	02/18/2016 20:00:00

Executive Summary

SEOC Update:
Accomplished today (February 18, 2016):

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Resources.
- Public information control.

Logistics:
- Fielded resource requests.
- Fielded Rapid Response requests.
- Fielded Governor's office request.
- Facilitated distribution team calls.
- Worked on potential donated warehouse opportunities.
- Long term recovery plan.

JIC:
- Continued routing public information materials for approval, including updated information on recycling, testing your water, and keeping kids safe. Received and posted additional translated materials to www.michigan.gov/flintwater.
- Capt. Kelenske gave an in-person interview with Steve Carmody of Michigan Public Radio.
- JIC staff assisted with a Governor Snyder press avail at the Flint State Office Building.
- Received and uploaded videos in American Sign Language and additional translated materials on www.michigan.gov/flintwater. Issued a news release about the availability of these materials.

Recovery Branch:
- Attended UCG Brief, SEOC State Agency Briefing Meetings, Distribution Process Meetings.
- Team Priority Visited Today: 5 teams in the field – Mobile Home Parks and list of addresses showing as having no contact.
- Team Priority Scheduled Tomorrow: Begin visiting the 1,300 Access & Functional Needs addresses to distribute 3-5 cases of water and replacement cartridges.
- 5 American Red Cross Teams scheduled for Friday, February 19, 2016.

o Total homes visited:
- 26,724 (round 3 total)*
- 854 (today).

o Water cases (liters calculated by multiplying # of cases x 12):
- 192,576 liters or 16,048 cases (round 3 total)*
- 7,608 liters or 634 cases (today).

o Faucet filters:
- 7,917 (round 3 total)*
- 80 (today).

o Replacement cartridges:
- 7,123 (round 3 total)*
- 378 (today).

o Water Test Kits:
- 3,051 (round 3 total)*
- 150 (today)

*Totals updated to reflect newest information.

Planning Section:
- Developed and approved Sit Rep #44.
- Updated burn rates and projection costs, per request.
- Updated Flint Water Timeline.
- Participated in daily UCG, state agency, and distribution process meetings.
- Developed daily Governor's Report.

Operations Section:
- Participated in Unified Coordination Group briefing.
- Facilitated SEOC Agency briefings.
- Participated in Distribution Process meeting.

• Worked on situation report and press release review.
• Warehouse Numbers as of 1800:
❑ Water (liters):
• 754,553 liters or 62,879 cases.
❑ Filters (faucet):
• 68,006.
❑ Replacement cartridges:
• 427,808.
❑ Test Kits (prepped):
• 34,932.
• PODs (Number as of 1700 2/17):
❑ Water (cases):
• 55,860 liters or 4,655 cases.
❑ Filters (faucet):
• 98.
❑ Replacement Cartridges:
• 368.
❑ Test kits:
• 194.

Finance Section:
• Review state agency costs reports submitted for the weekly status update.
• Identify additional lodging in Flint that can be direct billed to MSP for JIC and EOC staff working in Flint.
• Review agenda and reporting template for SBO meeting at MSP HQ on Friday.

GIS Branch Updates:
• Meeting with MDHHS, MDEQ, and Governor's Representative to discuss coordination of data.
• Updated Water Test Results dataset and created new maps.
• Working to fulfill FOIA request.
• Parcel Pairing.
•Added Sentinel Site Data to Governor's Web Map in ArcGIS Online
• Updated map of Access and Functional Needs Individuals for Recovery Unit
• GIS coordination call with Unified Coordination Group

DTMB:
• Continue to provide DTMB management SEOC updates.

DHHS-CH:
• Forwarded a request for a licensed medical professional, who has knowledge of lead, legionella, rashes, and other water health related concerns to be stationed at GCHD-EH division to assist with communicating MDEQ water results and health risks.
• Received information regarding a request for a webinar series, similar to the webinars currently being provided on Wednesdays to healthcare providers, be offered for Genesee County Intermediate School District (GCISD) personnel that is tailored to educators in Flint.
• Requested that the CHECC provide the SEOC with a CDC point of contact for the Commissioner of the Hispanic Latino Commission to reach out to for information on lead and lead poisoning, at the request of the Department of Civil Rights SEOC representative.
• Received information from the CHECC and UCG regarding the funding announcement given this afternoon by DHHS. This information was provided to the State Director and SEOC Operations Chief. Secretary Sylvia M. Burwell announced that $500,000 in funding will be provided to Hamilton Community Health Network, Inc. (HCHN) and Genesee Health System (GHS).

DEQ:
• Continued documenting compliance with EPA Emergency Administrative Order and second EPA request.
• Secured vehicles and equipment for the Sentinel Sampling 2 crews.
• A collector App was developed by DNR GIS today to be utilized by the High Lead/Copper Teams for real time data collection in the SEOC.
• Provided information on a high lead-content test result from a Flint residence to the Governor's Office and Director by the 1pm press conference.
• Began planning for next phase of testing and data collections.

Unified Coordination Group (UCG):
• EPA canvassing team distributed EPA factsheets at 50 different locations throughout Flint and made contacts with parties interested in having EPA provide updates at their organizational meetings.
• *CDC Epi Team continued to utilize a geocode database to assist the state with analysis of BLLs in children.*
• UCG Daily Sit Rep available in MI CIMS.

Local EOC:
• National Guard completing transition to new unit on 02/18/2016.
• US Secretary of Health and Human Services Burwell visited Fire Station 5 POD and met with local stakeholders. LOFR attended site visit to brief on emergency response activities and answer questions.
• IC briefed University of Michigan All Hazards Team on emergency response activities, covering items such as volunteer management, communications strategies, etc.
• IC responded to FOIA request by MSU Law Clinic regarding distribution and usage of water by inmates in jail.
• Coordinating local volunteer needs for CDC outreach teams.
• 16 teams with MDEQ personnel out in the field support sentinel monitoring program and identification of lead service lines.
• *Elevated Lead and Copper Initial Assessment Task Force out in the field, making contact at households reporting elevated lead and copper levels.*
• Southern Baptist Disaster Relief out in the field with five teams for distribution of supplies to affected populations with access and functional needs.

Injuries:
• None reported today.

Incident Response/Recovery Priorities/Objectives

(Objectives are in order of priority with original objective number attached)

1. Ensure all households within impacted community have required resources and are included in DEQ water sampling plan.
12. Approve and begin implementation of a comprehensive long term recovery and transition plan.
11. Ensure accurate tracking and accounting of all donations and expenditures.
2. Ensure accurate tracking and accounting of all commodities.
3. Continue to improve and maintain public information processes and strategies with all partner agencies.
8. Maintain coordination between partner agencies and organizations to include FEMA IMAT, FWICC, and the US Department of Health and Human Services Unified Coordination Group (UGC).
9. Continue to enhance situational awareness and common operating picture of all activities.
7. Gather, analyze, and disseminate GIS data to develop products for future planning.

Agency Summaries

Joint Information Center / Public Information Officer

Flint Joint Information Center Daily Update

February 18, 2016

Situation Report

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Feb. 18.

State agencies at the JIC included the Michigan State Police, Michigan National Guard, Michigan Departments of Environmental Quality, Agriculture and Rural Development, Health and Human Services and Transportation. The Genesee County Sheriff and American Red Cross were also present.

Tasks accomplished:
- Called local Flint schools to inquire about meetings and community events.
- Media hotline staff answered fewer than 10 emails and phone calls that ranged from media inquiries about Flint water to groups looking to send machines to help with pipe issues.
- Created a media monitoring report and looked for misinformation; found none.
- Issued a news release about a recycling event on Saturday with MSU student athletes.
- Issued a news release about Michigan.gov/flintwater hosting key information in American Sign Language and four other languages.
- Continued routing public information materials for approval, including updated information on recycling, testing your water, and keeping kids safe. Received and posted additional translated materials to www.michigan.gov/flintwater.
- Received and uploaded videos in American Sign Language and additional translated materials on www.michigan.gov/flintwater. Issued a news release about the availability of these materials.
- Drafted social media posts for approval and distribution.
- Continued printing emails from JICNews and JICManager email accounts for submitting to FOI staff.
- Updated the Daily JIC Activities log to catalog actions completed for the day and planned products and events for the week.
- Capt. Kelenske gave an in-person interview with Steve Carmody of Michigan Public Radio.
- JIC staff assisted with a Governor Snyder press avail at the Flint State Office Building.

Agriculture and Rural Development (MDARD)

As of 10:00 on 2-18-16:
- 26 water assessments were completed
- 26 In-Use samples were collected.
- 2 sampling appointments have been scheduled.
- No new results

As of 1600, 2-18-16:

We are preparing to rotate out staff with six replacement food inspectors and 2 sanitarians from Genesee County Health Department. Training will start on Monday, February, 22, 2016

Staff spoke with the Genesee County Land Bank about garden projects on their properties and provided them with links to MSUE bulletins

An updated pet health document was provided to the JIC for approval. This clarifies that pets in homes with greater than 150 ppb lead in water should be provided with bottled water. Once approval is received these documents can be distributed.

American Red Cross (ARC)

The American Red Cross deployed 5 Water Response Teams on Thursday, 2/18/16. We plan to deploy 5 teams tomorrow as well.

The Volunteer Reception Center (VRC) was operating today from 9am to 5pm, and the plan is for those hours to continue daily, through Sunday. 76 event-based volunteers (EVB) were processed through the VRC by 4 pm today. 73 EVBs were placed on projects today.

46 boxes of bottle recycling kits were assembled today (4,600 kits).

Civil Rights (MDCR)

Continue to monitor media and state agency activities for issues impacting underrepresented, at-risk, and populations with barriers to services and information. Facilitated contact between Commissioner with Hispanic Latino Commission with questions on lead and lead poisoning and MDCH/CDC point of contact. Notified staff as to community groups active in recovery.

Community Health (MDCH)

The CHECC remains activated at a Level 2, and continues to staff the hotline Monday through Friday to answer any lead health-related questions referred by 2-1-1 in support of the GCHD. The CHECC continues to provide representation to the UCG to facilitate communication with federal partners.

Forwarded a request for a licensed medical professional, who has knowledge of lead, legionella, rashes, and other water health related concerns to be stationed at GCHD-EH division to assist with communicating MDEQ water results and health risks. The request is currently being routed by SEOC Logistics through donations management personnel in order to determine if any offers for the donation of personnel/volunteers can be identified to fulfill this request. The request was also forwarded by the CHECC to the UCG for assistance.

Received information regarding a request for a webinar series, similar to the webinars currently being provided on Wednesdays to healthcare providers, be offered for Genesee County Intermediate School District (GCISD) personnel that is tailored to educators in Flint. This request was forwarded to the SEOC MDE EMC to coordinate with the CHECC as appropriate.

Requested that the CHECC provide the SEOC with a CDC point of contact for the Commissioner of the Hispanic Latino Commission to reach out to for information on lead and lead poisoning, at the request of the Department of Civil Rights SEOC representative. This connect was made between the Commissioner and the DHHS Liaison Officer in the CHECC. The DHHS LNO will work with the CDC representatives in the UCG to communicate with the Commissioner as requested.

Received information from the CHECC and UCG regarding the funding announcement given this afternoon by DHHS. This information was provided to the State Director and SEOC Operations Chief. Secretary Sylvia M. Burwell announced that $500,000 in funding will be provided to Hamilton Community Health Network, Inc. (HCHN) and Genesee Health System (GHS). Each entity will each receive $250,000 in emergency supplemental funding to hire additional personnel and provide more lead testing, treatment, outreach, and education to meet the increased need for health services in the Flint community. The funds will come in as a "One Time Supplemental Grant," with no match/no repayment options.

The DHHS ASPR released Site Specific Guidance for blood lead level testing and follow-up care for children exposed to lead. This document has been posted to MICIMS in the MDCH Activity Log.

Continue to work with the JIC, LARA, CHECC, and the SEOC PIO to ensure that the translated flyer for pregnant women are processed for approval and that the English and Spanish versions are ready to be printed and sent to the GCHD.

Corrections (MDOC)

Warehouse 2 was fully operational today. The 7th Day Adventists were on site to job shadow.MDOT is dedicating 2 employees to the effort. DTMB continues to dedicate 2 trucks with drivers.

A box truck operated by MDOC staff was involved in a minor vehicle accident in the parking lot of POD #3. A van struck the side of the box truck. There was minor damage to the box truck and the van's front end was damaged. No injuries or violations were issued. A Police report was completed by Flint PD. We also had a box truck operated by MDOC staff back into the overhang of POD #3. No damage to the vehicle, police report completed by Flint PD.

The permanent replacement battery was delivered today for the forklift at Warehouse 2.
To following safety concerns at are still in process at Warehouse 1:
-Security staff to restrict access (In process)
-Floor tape designating machine and pedestrian areas (Tape arrived today and will be placed on the floor by the weekend)

MDOC continues to keep trucks dedicated to delivering to individual POD's and covering Rapid Responses for PODs that get to a critical level. PODs remained well supplied throughout day and will continue to be well supplied moving forward.

We have been assigned assess and prepare a permanent staffing structure and equipment analyses for all warehouse operations.

MDOC continue to staff the SEOC from 0800-2000, 7 days/week. Mike Farmer and Bridget Spencer are managing the Recovery Branch of the SEOC

306 DEQ and 12 were MDARD test kits were delivered from Flint to Lansing today.

Education (MDE)

MDE staff and Genesee ISD business and program staff met on Flint Emergency Fund reporting requirements.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities today:

- Continued documenting compliance with EPA Emergency Administrative Order and second EPA request.
- A collector App was developed by DNR GIS to be utilized by the High Lead/Copper Teams for real time data collection in the SEOC. Display currently operational.
- Began planning for next phase of testing and data collections.

Licensing and Regulatory Affairs (LARA)

Participated in briefings and updated the LARA Executive Team.

LARA continues to monitor DEQ's test results for Health Care, Child Care, Adult Foster Care, HHS and MDE facilities and Schools.

Faucet Project information is being prepared for the affected facilities. LARA continuing efforts to plan and schedule faucet replacements for Flint facilities. LARA is working with MDOC to track and store incoming material at the warehouse.

Translation services for various documents continue to be provided as needed - these include Spanish, Arabic, Mandarin, Hmong and American Sign Language. Ongoing discussion regarding coverage of state regulated facilities and elimination of duplication of effort with state agencies. Arrangements in progress for assistance to various ethnic communities to provide services.

Military and Veterans Affairs (DMVA)

Commanders Situation Report (SITREP)

1. DTG: 1811152016

2. UNIT: Points of Distribution (PODs), TF FLINT (1-125 IN)

3. POC: Capt Bechtel, Jennifer E. Email: ng.mi.flint.eoc@gmail.com

4. PRESENT LOCATION: Genesee County Local EOC, 1101 Beach St., Flint, MI, 48502

Flint Water Response Team Plan
Friday, 02.19.16 FINAL

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
HH	Household
LEOC	Local Emergency Operations Center

Key Leaders

ARC OIC	Daniel Wirth	daniel.wirth@redcross.org

Plan

Agency	Team Types	Mission
ARC	5 Type V	500 HH

Resource Status

ARC

Team Type & Quantity	**Type:** Type V **Quantity:** 5 (5 ERV + 5 Trucks)				
Resource	**Required**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	5	5		2/19/16	8:00 pm
ARC ERV	5	5		2/19/16	8:00 pm
ARC ERV Driver	5	5		2/19/16	8:00 pm
Team Member	15-20	15-20		2/19/16	8:00 pm
Team Transport Vehicle for 2-4 Team Members	5	5		2/19/16	8:00 pm
Team Transport Vehicle Driver	5	5		2/19/16	8:00 pm
iPads	5	5		2/19/16	8:00 pm
Hand Warmers	50	50		2/19/16	8:00 pm
Distribution Kit	500	500		2/19/16	8:00 pm

Execution:

Key Locations

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Team Assignment – Target Areas

Team Priority – ARC Teams will begin visiting the identified 1,300 (approximate number) Access & Functional Needs addresses as a follow-up visit to determine the individual need for further visits. Each address will be provided 3-5 cases of water, depending on individual's request of need, and replacement cartridges if needed.

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail, unless specifically directed otherwise by the SEOC.
2. If iPads are not being utilized or are not available for team use, Street Data Entry Sheets will be completed in the field and entered by ARC volunteers for data accountability.

> **Subject: Summary for 7:30 Briefing**

Keith,

Feel free to give me a call on any of these details:

SENTINEL A GROUP TEST RESULTS

Attached is the data for the first Flint Sentinel Sites (group A). There are a total of 174 samples. There are two tabs on the spreadsheet. The first tab sorts the data by lead concentration and the second tab sorts the data by zip code and then by lead concentration. Please note that we will have a couple more strays coming in but this is everything from the first slug of samples.

The data breaks down as Follows:

FOR LEAD:

174 Total Samples

154 Samples were at or below 15 PPB (88.5%)

20 Samples were > 15 PPB (11.5%)

5 Samples were greater than 100 PPB

1 sample was at 1,485 PPB

FOR COPPER:

There was only one Sample that exceeded 1,300 PPB (1.3 mg/L)

All 6 locations that were > 100 ppb had visits today. 1 requested a return visit on Saturday, 1 declined entry & the other 3 were contacted for a home visit / inspection.

SENTINEL ACTIVITY TO DATE FOR BOTH GROUP A & GROUP B:

Our 16 sentinel teams (3 members each; DEQ, plumber, community member) were working until 6PM this evening. In essence they had about ½ day based upon some logistical

challenges this morning (vehicles) as well as startup training for the new team members.

Sentinel Group A (efforts from Feb. 10th – 14th):

241 residents agreed to participate. Ten (10) residences with lead service lines were confirmed in this initial effort.

Sentinel B (began today, as of 6pm, 2/18/16):

115 residents have agreed to participate. Six (6) residences with lead service lines were confirmed.

SUMMARY OF COMBINED SENTINEL GROUPS TO DATE:

356 residents enrolled

16 lead service lines identified

17 teams will be working tomorrow, Saturday & Sunday to reach our targets of 402 & 60. We're looking to be on the same sample collection schedule of Mondays & Tuesdays weekly, alternating between the first and second round.

An additional piece of information I'll summarize in a separate email (including Nat) has to do with our home visit efforts to date; we're still compiling that information from paper collection forms, spreadsheets & logs to ensure that we've contacted every house > 100 ppb. Tomorrow we're looking to start up a mobile collector for any home visit made regardless of a sentinel site or high ppb home visit.

Attachments: march route.jpg

FYI: Details on tomorrows march
Gabe

All information that we have is basically outlined in this article:

http://www.mlive.com/news/flint/index.ssf/2016/02/details_on_national_march_with.html

The march is definitely happening tomorrow, as there was some confusion today with a stage being built on the Water plant property without the City's permission, which subsequently had to be taken down again.

Traffic being shut down between Metropolitan Baptist Tabernacle and the Water plant will impact the supply route between the warehouse and Fire Station 5 POD, if Dort Hwy is the primary supply route (traffic shut down at Dort/Stewart).
The Water plant is also in proximity to Fire Station 6, so that POD might be indirectly impacted (however, supply between Clio Rd warehouse and the POD would not be an issue).

On the last tele town hall Rep Neely gave us an area of homes not contacted. We went to the area and the homes were abandoned....see below email chain.

Sweeney followed up but can you confirm with him or the jic to see if anyone followed up with Rep Neeley. Also, if the Rep has addresses we can double check them.

Kevin,

Below is the status of the 5 addresses you provided.

-The Property was marked as abandoned on 1/16/16. . If the resident is claiming no contact, we will put them on the RRT list.

St- Parcel is marked as unvisited. We will put it on the RRT list

St-This is not listed within the City's Parcel Database. If the resident is claiming no contact, we will put them on the RRT list.

· Parcel is marked as unvisited. We will put it on the RRT list

This parcel was marked as abandoned on 1/17/16. . If the resident is claiming no contact, we will put them on the RRT list.

Thank you so much for bringing this to our attention. We will move forward with these and hope to have them visited as soon as possible.

Thanks,

Alex

Alex-

As we discussed, based on the streets given to us in the below email chain, our GIS folks checked their records and found 5 residences that have not been confirmed to have been "touched" by any of our voluteers. The addresses they show needing contact are as follows:

Can you check to see what you have in your records? If in fact no one has been to these residences can you send a Rapid Response Team (RRT) to them?

Thanks

Dan-

We were just looking for those four streets that were given to us on the Legislative Briefing Conference Call. The streets we wrote down were Mackin, Chevrolet, Balling and McClelland. We can only find two streets that match in the city, Chevrolet and Mackin. These streets are near the elementary school but not the high school (as mentioned on the call)

Can you put me in touch with the person that made the statements on the call reference these streets so I can track down more information to better help us identify the houses we need to get to?

Thank you

SEOC Report for: February 18, 2016
Full Days Since Emergency Declaration: 44

Items to Note

- US Department of Health and Human Services will be visiting Fire Station #5 POD today.
- MDEQ has initiated the lead of 15 sentinel monitoring field support teams today which are targeting the identification of lead service lines.
- American Red Cross Teams will be visiting the final three mobile home parks today and 34 identified homes.

RE: Status of Sentinel site establishment effort

Original Sentinel Effort:
"241 residents agreed to participate. Ten (10) residences with lead service lines were confirmed in this initial effort."

Sentinel B (ongoing, as of 6pm, 2/18/16):
115 residents have agreed to participate. Six (6) residences with lead service lines were confirmed. Forty-three (43) additional contacts were made where the resident asked the team to return at another time.

*****

Summary for entirety of the Sentinel effort to-date:

356 residents enrolled
16 lead service lines identified

On the last tele town hall Rep Neely gave us an area of homes not contacted. We went to the area and the homes were abandoned....see below email chain.

Sweeney followed up but can you confirm with him or the jic to see if anyone followed up with Rep Neeley. Also, if the Rep has addresses we can double check them.

Kevin,

Below is the status of the 5 addresses you provided.

-The Property was marked as abandoned on 1/16/16. . If the resident is claiming no contact, we will put them on the RRT list.

t- Parcel is marked as unvisited. We will put it on the RRT list

-This is not listed within the City's Parcel Database. If the resident is claiming no contact, we will put them on the RRT list.

t- Parcel is marked as unvisited. We will put it on the RRT list

rcel was marked as abandoned on 1/17/16. . If the resident is claiming no contact, we will put them on the RRT list.

Thank you so much for bringing this to our attention. We will move forward with these and hope to have them visited as soon as possible.

Thanks,

Alex

Alex-

As we discussed, based on the streets given to us in the below email chain, our GIS folks checked their records and found 5 residences that have not been confirmed to have been "touched" by any of our voluteers. The addresses they show needing contact are as follows:

Can you check to see what you have in your records? If in fact no one has been to these residences can you send a Rapid Response Team (RRT) to them?

Thanks
Kevin S.

Dan-

We were just looking for those four streets that were given to us on the Legislative Briefing Conference Call. The streets we wrote down were Mackin, Chevrolet, Balling and McClelland. We can only find two streets that match in the city, Chevrolet and Mackin. These streets are near the elementary school but not the high school (as mentioned on the call)

Can you put me in touch with the person that made the statements on the call reference these streets so I can track down more information to better help us identify the houses we need to get to?

Thank you
Kevin Sweeney

Thanks Chris. Looks good with the exception of HMGP request. HMGP is only available for a major disaster declaration. See 42 U.S.C. 5170c(a), and CFR 44 206.432(b).

Regards, Sam

FLINT DONATIONS

Region pitches in to help Flint
By Edwin Bierschenk nwitimes.com, 2/13/2016
http://www.nwitimes.com/news/local/lake/crown-point/region-pitches-in-to-help-flint/article_02b39f41-a4c8-5615-9179-ae3fa39fffb2.html
Thousands of cases of bottled water were being loaded Saturday outside the offices of the Urban League of Northwest Indiana as Region residents joined others around the nation to help residents of Flint, Michigan.

FLINT CRISIS RESPONSE

Amid water crisis, it's about working together for Flint
By Dr. Nicole Lurie, MLive.com, 2/13/2016, 8:55 a.m.
http://www.mlive.com/opinion/index.ssf/2016/02/how_washington_is_helping_flin.html
Three weeks ago, President Obama asked me to head the federal response to the water crisis in Flint. Since then, I have spent time in the city talking with community members, government officials and technical experts about the situation. Understandably, residents are worried, confused and angry; people want a solution they can count on so they so they can drink a glass of water without worrying about it. As part of the fix, they also want to be sure that their kids go forward with the best shot they can have at a healthy life. So do I.

Local organization asks for call to action in Flint's water crisis
By Amanda Emery, MLive.com 2/13/2016, 8 p.m.
http://www.mlive.com/news/flint/index.ssf/2016/02/local_organization_asks_for_ca.html
A local organization held a community action gathering Saturday asking for a call to action in Flint's water crisis. The group called Flint Rising held the community action gathering on Saturday, Feb. 13 at St. Michael's Catholic Church near downtown Flint. Flint resident and community activist Desiree Duell was one of the speakers during Saturday's meeting. Flint's water crisis is a long-term problem, Duell said, and she is hoping the meeting would spark others to want to get involved. Duell spoke to a room full of about 60 people about the demands the organization is making. The three demands are:

- Fix what you broke: Fully repay residents for what they've spent on water bills during the past two years, and immediately end charging for poisonous water.

- Start digging now: Immediately replace 100 percent of underground lead pipes with non-toxic pipes, up to and including pipes running into homes and businesses.
- Save lives: Provide systematic, door-to-door free health screenings (blood tests, physical exams) to every Flint resident immediately, and set up mobile health clinics to treat the effects of lead exposure.

Sentinel teams monitoring water in 400 Flint homes
By Rebecca Williams, Michigan Radio/MLive.com, 2/13/2016
http://michiganradio.org/post/sentinel-teams-monitoring-water-400-flint-homes
Teams of plumbers, employees with the Michigan Department of Environmental Quality, and Flint residents have started visiting 400 homes in Flint this week. The state of Michigan calls these homes "sentinel sites." The state says 156 of these homes are known to have lead service lines. Other homes are places where kids have tested high for lead in their blood.

Mobile doctor's office to help lead-exposed kids in Flint
By Rebecca Williams, Michigan Radio/MLive.com, 2/13/2016
http://michiganradio.org/post/mobile-doctors-office-help-lead-exposed-kids-flint
Kids in Flint will soon get checkups from a doctor's office on wheels. The 40-foot long blue RV is a new initiative from Hurley Children's Hospital to help kids who have been exposed to lead. Senator Debbie Stabenow, D-MI, was in Flint on Friday to announce the arrival of the clinic. "We're talking about being able to make sure children get testing, get information about what to do in terms of nutrition, getting their regular doctor visits; any specialty care they need for themselves as well as their families," she says.

State DEQ didn't take Flint water concerns seriously
By Kristen Jordan Shamus, Detroit Free Press, 02/14/2016
http://www.freep.com/story/news/local/michigan/2016/02/13/state-deq-flint-water-concerns/80332954/
Miguel Del Toral knew that without corrosion-control chemicals, the Flint River water would begin to eat away at old, lead-laden pipes and household fixtures, potentially poisoning an entire city. But Del Toral, a U.S. Environmental Protection Agency regulation manager, was shut down in April 2015 when he began to challenge the Michigan Department of Environmental Quality, newly released e-mails show. The MDEQ stonewalled Del Toral in the same way the agency appears to have put off others who questioned its oversight of the water system in Flint — all the while prolonging the amount of exposure residents had to the toxic heavy metal.

Email says shift to Flint River made too quickly
By Associated Press, 2/13/2016
http://michiganradio.org/post/email-says-shift-flint-river-made-too-quickly
A newly released email shows that shortly before Flint began drawing its drinking water from the Flint River, an official with the city water plant feared things were moving too quickly.

Michigan governor, EPA to testify at House panel on Flint
By Matt Kinsler, MyTechbitc.com, 2/13/2016
http://www.mytechbits.com/michigan-governor-epa-to-testify-at-house-panel-on-flint/981204786/
It is beyond belief that the House Committee on Oversight and Government Reform, chaired by U.S. Rep. Jason Chaffetz (R., Utah) initially declined to call Governor Snyder or any of his key aides to testify – including Dan Wyant, the now-fired and disgraced former head of Michigan's Department of Environmental Quality. Snyder said in a statement he asked for the opportunity to testify about how local, state and federal governments have failed Flint.

LOCAL ECONOMY
Poisoned water makes some Flint lives even more difficult
By John Carlisle, Detroit Free Press, 2/13/2016
http://www.freep.com/story/news/columnists/john-carlisle/2016/02/13/flint-family-poisoned-by-poverty-and-toxic-water/79423502/

Like a lot of Flint, where 40% of its nearly 100,000 residents live in poverty, the Gaines household is poor in money, poor in health, poor in circumstances. Bringing poisoned water into the mix made already tough lives even more difficult. And it's hard to find the line where the poverty ends and the poisoning begins. The bad water has made thousands of poor people like them sick. It's cost them more of their scarce money. It forces them to spend far too much time worrying about something as basic to life as getting safe water. And with nowhere to move and no money to do so, the Gaines family is trapped at ground zero of the water crisis.

Flint's problems didn't start with water
By Nancy Kaffer, Detroit Free Press, 2/13/2016
http://www.freep.com/story/opinion/columnists/nancy-kaffer/2016/02/13/flint-water-foreclosure/80235900/
A third of the property in the city of Flint is vacant. That's according to the Genesee County Land Bank, the organization charged with pushing back against the encroaching wave of blight that touches nearly every neighborhood in this struggling city — of 56,000 parcels in Flint, about 20,000 are empty or blighted. And it's going to get worse. How much worse, no one can say. But there's little doubt in the minds of Doug Weiland, executive director of the land bank, and Genesee County Treasurer Deb Cherry, that because of Flint's ongoing water crisis, more people will stop paying their property taxes in the years ahead.

NATIONWIDE PROBLEM

Flint just one example of need to upgrade water supply
By Bernie Sanders and Erin Brockovich, Detroit Free Press guest writers, 2/13/2016, 10:47 p.m.
http://www.freep.com/story/opinion/contributors/2016/02/13/flint-water-supply/80262902/
Flint is a wake-up call to the fragile nature of our public water supply, but unfortunately, Flint is not alone.

Flint: Could it happen here?
By Jeff Tittel, Burlington County Times, 2/14/2016, 6 a.m.
http://www.burlingtoncountytimes.com/opinion/guest/flint-could-it-happen-here/article_04d17508-9bd9-5c64-b76c-df35957b9e5e.html
Flint, Michigan, is a major, man-made public health and environmental disaster. It happened because of an anti-environment and regulatory agenda set by Gov. Rick Snyder. Could what happened there happen here? Snyder chose an emergency manager who was a political crony and industry lobbyist who decided to use the polluted Flint River for the town's water supply to save money. Just like in Michigan, Gov. Chris Christie has also stacked his administration and environmental and public health positions with political friends and former lobbyists who worked for polluters. We have serious concerns that what happened in Flint could happen in New Jersey because the Christie administration has weakened and rolled back clean-water protections.

Flint isn't alone: America has a coast-to-coast toxic crisis
By David Rosner and Gerald Markowitz, Grist and TomDispatch, 2/14/2016, 6 a.m.
http://grist.org/climate-energy/flint-isnt-alone-america-has-a-coast-to-coast-toxic-crisis/
The price tag for replacing the lead pipes that contaminated its drinking water, thanks to the corrosive toxins found in the Flint River, is now estimated at up to $1.5 billion. No one knows where that money will come from or when it will arrive. [...]But the city's children are hardly the only ones threatened by this public health crisis. There's a lead crisis for children in Baltimore, Md.; Herculaneum, Miss.; Sebring, Ohio; and even the nation's capital, Washington, D.C.; and that's just to begin a list. State reports suggest, for instance, that "18 cities in Pennsylvania and 11 in New Jersey may have an even higher share of children with dangerously elevated levels of lead than does Flint."

Jesse Jackson, church leaders planning Flint water contamination march

FLINT, Mich. (WLS) --
Civil Rights leader Rev. Jesse Jackson and some Flint, Mich., church leaders are **planning a massive march in protest of the water contamination crisis.** Jackson and the leaders say **they have their own plan to restore clean water to the city.** The leader of the Rainbow PUSH Coalition didn't hold back his feelings about the way the people of Flint have been treated. "An attempt to save short-term money has created a multi-billion dollar project. New pipes, a new water system. There's at one layer there's it's unethical what has happened, another level its illegal. But the third level, there's reconstruction," Jackson said. Jackson says flint is the defining moment in urban reconstruction, in rebuilding America and putting America back to work. **The march is being planned for Friday, Feb. 19.**

Date of Visit: Time of Visit:

RE: Home Water Lead Test Results

Dear Homeowner/Resident

Sorry that we missed you. We were here to follow-up with you about the results of your home's water lead test. The water sample from your home had a high lead level (*50 parts per billion lead or higher). Because of this result, we recommend that you don't drink the water at your home even if you have a filter. We would like to talk with you about this result and be available to answer any questions you may have.

We want to return within 48 hours, but would like to schedule a time that is convenient to you. Please contact us at your earliest convenience at Genesee County Health Department, (810) 257-3503.

Thank you.

Media Monitoring Report
February 14, 2016

Summary: The region collects water to help Flint. A third of the property in the city of Flint is vacant, but water crisis was not beginning of the problem. Some residents' lives are made even harder by Flint's contaminated water.

Below is a sampling of the coverage.

State DEQ didn't take Flint water concerns seriously
February 14, 2016 *Kristen Jordan Shamus, Detroit Free Press*
http://www.freep.com/story/news/local/michigan/2016/02/13/state-deq-flint-water-concerns/80332954/

Miguel Del Toral knew that without corrosion-control chemicals, the Flint River water would begin to eat away at old, lead-laden pipes and household fixtures, potentially poisoning an entire city.

But Del Toral, a U.S. Environmental Protection Agency regulation manager, was shut down in April 2015 when he began to challenge the Michigan Department of Environmental Quality, newly released e-mails show.

The MDEQ stonewalled Del Toral in the same way the agency appears to have put off others who questioned its oversight of the water system in Flint — all the while prolonging the amount of exposure residents had to the toxic heavy metal.

"I knew this was going to happen. Miguel is questioning that Flint is in compliance with optimal corrosion control," the DEQ's Patrick Cook wrote in an April 27, 2015, message to coworkers Stephen Busch and Mike Prysby. "Please read the below e-mail and let me know what you think. While it's not a big hurry at this time since Miguel is out till next week, we eventually will have to respond to him."

The message was sent a year after the City of Flint changed its water source from Lake Huron to the corrosive Flint River and did not add crucial corrosion-control chemicals to prevent lead from leaching into the water.

Busch, district supervisor of the MDEQ's office of drinking water and municipal assistance, replied: "If he continues to persist, we may need Liane (Shekter Smith) or Director (Dan) Wyant to make a call to EPA to help address his over-reaches."

Busch, who was later suspended pending an investigation, also wrote that Del Toral: "continues to base his concern on a single location which has/had a lead service line and 'pre-flushing' concerns which are not part of the current regulations. Flint is now below the criteria for a large system. Technically they don't have to do any of this."

The agency similarly disregarded the concerns of whistle-blower Dr. Marc Edwards, a civil engineering professor from Virginia Tech who came to Michigan to test water samples from homes all over the city because residents said they felt as if the state and city government leaders were deaf to their pleas for help.

Residents complained about foul smells, discoloration and health effects almost immediately after the city stopped drawing from Lake Huron in late April 2014. Soon after the switch, the water system was besieged with problems. Boil-water alerts were issued for E. coli bacteria contamination. Chlorine was added to control the bacterial growth, which led to an excess of trihalomethanes (TTHMs) that cause a wide range of health problems.

The water also may have contributed to outbreaks of Legionnaire's disease, which killed nine people. The most pervasive problem, however, was lead — an odorless, tasteless neurotoxin.

Still the MDEQ held firm that the water was safe despite the lack of corrosion-control measures similar to what was in place before switching to the Flint River water.

Even when the city's testing showed high levels of lead in the tap water of a resident's home, MDEQ officials were quick to dismiss it.

Jennifer Crooks, Michigan program director for ground and drinking water from the Region 5 EPA office, sent this Feb. 26, 2015 e-mail to Busch and Prysby: "WOW!!!! Did he find the LEAD! 104 ppb. She has 2 children under the age of 3... Big worries here."

Prysby insisted it was an isolated incident likely because of the home's own pipes, noting that all other water samples were below the action level for lead.

Busch forwarded the correspondence to his boss, Shekter Smith, saying: "Not sure why Region 5 sees this one sample as such a big deal."

Of course, it wasn't only one sample. Virginia Tech's testing later revealed that high lead levels had been poisoning residents all over the city for months.

Denials continued into September, as then-DEQ spokesman Brad Wurfel penned an e-mail in response to questions from a Flint Journal reporter about the Virginia Tech test results.

"First, we want to be very clear that the lead issue in Flint, to the extent there is one, is not from the source water or the plant or even the transmission lines," Wurfel wrote. "The river has no detectable levels of lead in it, and treated water from the plant has not detectable levels of lead in it. The issue is how, whether, and to what extent the water is interacting with lead plumbing in people's homes. It does not appear their research lab is certified, and we can't speak to the whatever sampling methods are being employed to achieve these results. The results reported so far fail to track with any of the lead sampling done by the DEQ for the past 25 years (since 1991), or the blood-lead levels testing regularly conducted by the state Department of Community Health. That said, we do appreciate that Virginia Tech's team is working on this issue. ... Our results, obtained from two separate rounds of testing over the past year, concluded that the mean average of lead in Flint drinking water, meets state and federal safe drinking water standards."

.....

Region pitches in to help Flint

February 13, 2016 *Edwin Bierschenk nwitimes.com*

http://www.nwitimes.com/news/local/lake/crown-point/region-pitches-in-to-help-flint/article_02b39f41-a4c8-5615-9179-ae3fa39fffb2.html

GARY — Thousands of cases of bottled water were being loaded Saturday outside the offices of the Urban League of Northwest Indiana as Region residents joined others around the nation to help residents of Flint, Michigan.

Flint's drinking water became contaminated after its source was switched from the nearby Detroit water system to the Flint River as a cost-saving measure in 2014. The water was not properly treated and lead from old pipes leached into it.

Vanessa Allen, president and chief executive officer of the Urban League of Northwest Indiana, said organizations, businesses and individuals from around the Region, and even outside the state, responded to the call put out by her and others for water. The result was thousands of cases of water being loaded Saturday for delivery to the housing authority in Flint.

People arrived at the office building to speed delivery of the cases of water that filled the organization's office building on Broadway.

"We decided to do this because we know that our families and our neighbors and our citizens in Flint, Michigan, were in need," Allen said. "And we sent out a call out to everyone and we got a whole lot of organizations that contributed."

Some of the organizations that responded included the American Red Cross and Project Outreach and Prevention on Teen Violence. Also helping out were local high school students, noted Allen.

"It was really a regional effort," said Allen, who said donations came from Lake, Porter and LaPorte counties.

Nickey Walker volunteered his services as a truck driver to transport the 53-foot semitrailer to Flint.

"I like helping people and the people out there need help so I'm volunteering my time to help them because we may need help one day and they can help us," the 49-year-old Gary resident said.

Crown Point First United Methodist Church and the Crown Point Fire and Rescue Department also are helping Flint the residents.

Their goal is to collect enough bottled water, pitcher water filters with cartridges and faucet filters to fill a semitrailer. Monetary donations also are welcome.

The water and other items will be delivered to Lincoln Park United Methodist Church in Flint to be distributed from that site.

.....

Flint's problems didn't start with water
February 13, 2016 *Nancy Kaffer, Detroit Free Press Columnist*
http://www.freep.com/story/opinion/columnists/nancy-kaffer/2016/02/13/flint-water-foreclosure/80235900/

A third of the property in the city of Flint is vacant.

That's according to the Genesee County Land Bank, the organization charged with pushing back against the encroaching wave of blight that touches nearly every neighborhood in this struggling city — of 56,000 parcels in Flint, about 20,000 are empty or blighted.

And it's going to get worse.

How much worse, no one can say. But there's little doubt in the minds of Doug Weiland, executive director of the land bank, and Genesee County Treasurer Deb Cherry, that because of Flint's ongoing water crisis, more people will stop paying their property taxes in the years ahead.

"It's hard to know the impact, because we've never been through anything like this," Cherry said.

In the long-term, it likely means more homes will be foreclosed, and almost certainly become vacant or blighted. In the short-term, the city will lose revenue, leaving Flint with less money to pay for police officers

and firefighters, for garbage pickup and schools — or for repairs to or investment in its infrastructure, like the water system.

Flint's water crisis exacerbates a cycle that has been taking place for decades in cities across Michigan: places like Flint or Detroit or Saginaw or Benton Harbor.

In Flint, it's linked to the city's economic travails — the departure of General Motors dealt a devastating blow to the city from which it has not recovered. And now, to its water, still not safe to drink, nearly five months after the State of Michigan admitted that the city's water supply had been compromised.

People leave, thus tax revenue drops. The city has less money with which to provide basic services, so more folks move out — meaning there's even less money. So more people leave.

Flint spent four years under a succession of state-appointed emergency managers, brought in to balance the city's budget — along the way, endorsing or making a series of disastrous decisions that left the city's water undrinkable.

Nor was the emergency managers' basic charge — balancing the budget — successful. In the last fiscal year, the city's deficit was about $7 million.

Even after Flint's water is safe to drink, the city's long-term problems, those made worse by the crisis, will remain. And that's a reality neither Gov. Rick Snyder nor the Michigan Legislature have begun to publicly entertain.

"What kind of increase (in foreclosures) that will correlate to, I don't know, but I would guess that it's going to be pretty significant," said Alex Alsup, chief product officer at Detroit-based data firm Loveland Technologies, which has worked extensively to chronicle Detroit's blight and cycle of foreclosures. "The thing that needs to happen is, if the state is thinking about water bill reductions or paying off water bills, they need to be thinking about property taxes the same way."

Facing the crisis

For nearly two years, water contaminated by coliform bacteria, a hodgepodge of ill-chosen chemicals, and finally, lead, has flowed through Flint's pipes, into homes and businesses, exposing the nearly 100,000 residents of this town to terrible health risks. Slow to acknowledge the problem, and glacial in response once it had, the State of Michigan has finally begun to treat Flint's water crisis as the public health catastrophe that it is.

Snyder's budget proposal, released last week, envisions $195 million plowed into the city for emergency relief, infrastructure repair, services for children, who are most vulnerable to the serious, lifelong effects of lead poisoning, and $30 million for residents' water bills — about half what Flint Mayor Karen Weaver says is required to keep the system intact.

All of this, and more, is necessary.

But none of it addresses the problem of Flint's value, or the city's long fight against blight.

Last year, Flint collected about $19 million in property taxes; that's about 23% of the city's $81-million general fund budget. The taxable value of all property in the city is about $750 million, according to the land bank. Collections have declined since 2004, when about 89% of Flint residents paid their property taxes promptly, the Free Press reported earlier this month. Now, it's about 64%. And even after five years of emergency management, the city's running a deficit — about $7 million last year.

Before the water crisis, Flint's rate of foreclosure had stabilized, Cherry said, hitting consistent numbers each year. That was progress.

The land bank's Weiland says the city's high rate of poverty means some residents can't afford to relocate. But even if folks don't walk away, the prospect of reduced property assessments — granted when the value of a property is negatively impacted (by something like undrinkable water) — means tax revenue would shrink.

Appraisers and real estate attorneys told the Free Press earlier this month that it is inevitable that many such assessment reductions would be requested, and granted.

Foreclosure law issues

Michigan's foreclosure law, updated in 1999, shortens the span of time between a property's first tax delinquency and foreclosure, and allows county treasurers some leeway in exercising foreclosure. If a city can't collect property taxes, the delinquent bill is sent to the county, which attempts to collect for two years. At the third year, the property is foreclosed on, and put up for sale in the county's tax auction. The whole idea is to get property into the hands of folks who'll pay the taxes.

In places like Flint, it doesn't work.

About 2,500 properties in Genesee County were put up for sale in last year's tax foreclosure auction — including about 1,700 properties in Flint. Just 271 properties in the county-wide inventory were sold; 2,112 were transferred to the land bank. The land bank's job is to keep such properties well-maintained, and out of the hands of speculators, preparing for the day when those parcels will again have value.

"The abandoned property we have, there's very little market," Weiland said. "I expect we're going to be holding these properties for a long time" — but, he says, the land bank is still doing business, even after the water crisis.

Yet a land bank is palliative care, a way to deal with the problem of blight and abandonment after it has been created.

"As we've seen in Detroit, there are a lot of conditions and symptoms that are damaging to the city and its people, but it's really the property taxes and this super-efficient foreclosure law that seems to have the greatest impact in displacing people from their property. It's perpetuating cycles, expansion of vacancy and blight, so I would expect that if there's not any kind of intervention, that's going to be a pretty serious problem for the city," Alsup says. "The whole country's built on real estate values, property taxes and (losing that is) really what is toxic to the organism of the city."

Cherry is near-militant about Flint's plight. When the city hands its tax-delinquent properties to the county later this year, Cherry says, she'll refuse to foreclose on homes considered tax-delinquent because of unpaid water bills attached as liens to property taxes.

"My attorney says I have the right to do that because they're fraudulent water bills," she said. "Unless something changes, that's what our plan is."

And it's difficult to imagine any local or state official leading the charge to force Cherry to foreclose on homeowners with undrinkable water. And she says her office is often able to work with property owners to avoid foreclosures.

But again, Cherry's best efforts can only stanch the bleeding.

The state's response thus far to the Flint crisis has focused on the water. That's important. But we're just beginning to understand the span and depth of its reverberations — and what must be done to mitigate the harm.

.....

Poisoned water makes some Flint lives even more difficult

February 13, 2016 *John Carlisle, Detroit Free Press*

http://www.freep.com/story/news/columnists/john-carlisle/2016/02/13/flint-family-poisoned-by-poverty-and-toxic-water/79423502/

FLINT – She sat in the wooden chair where she spends most of her time, took a hit off her cigarette and watched over her helpless mother, who was curled up in a hospital bed in the dining room.

"We just sit here all day long," said Lisa Gaines. "She might talk to me, then again she might not. But she don't like being left alone."

Erma Jean Gaines, Lisa's 70-year-old mother, has been bedridden for five years now, ever since she broke her foot trying to escape a hospital bed and never properly healed. Even though she's thin and frail, everyone still calls her Big Mama.

"This foot right here don't turn no more," Lisa said, reaching down under her mother's blanket and pulling out a crooked foot covered with a soft white footie. Big Mama's face became a pained wince. "So we can't take her nowhere. It's like we're stuck."

The Gaines family lives in a battered little house on Page Street, not far from downtown. There's Lisa, 51, whose sole source of income after a car accident is disability; and her brother Edward, 54, who's also on disability thanks to severe diabetes that's caused him to waste away; and Big Mama, who spends her life in a bed.

Their neighborhood is rough. Most of the houses are gone. It could be any inner-city neighborhood anywhere in America, except for one thing — here the water is poison.

Like a lot of Flint, where 40% of its nearly 100,000 residents live in poverty, the Gaines household is poor in money, poor in health, poor in circumstances. Bringing poisoned water into the mix made already tough lives even more difficult. And it's hard to find the line where the poverty ends and the poisoning begins.

The bad water has made thousands of poor people like them sick. It's cost them more of their scarce money. It forces them to spend far too much time worrying about something as basic to life as getting safe water. And with nowhere to move and no money to do so, the Gaines family is trapped at ground zero of the water crisis.

Lisa lifted up her pant leg and scratched at a dry, white rash. She's got a strange rash on her stomach, too. Maybe it's just the dry skin common to some diabetics like her.

But she's convinced it's from months of showering in Flint water, which the family still uses because it's hard to wash yourself one bottle of water at a time, and because the state keeps telling them it's safe to use, even though the water still comes out brown when it first flows from the faucet.

"I know it's from the water," Lisa said, still scratching. "And everybody that said the water's OK, they need to be made to live here. They're not bathing in the water. They're not drinking the water. If they was here, staying here as long as we have, they wouldn't be talking."

Sick and tired

Lisa was the first one in the family to notice the water's unusual smell. It changed a couple years ago, right around April 2014, when the city began drawing drinking water from the Flint River. But everyone told her it was fine.

Then came the rashes.

Big Mama developed them on her neck and her thighs. Lisa got them, too. Her brother Edward got painful sores on his back. Her son Patrick, 29, who lived not far away at the time, got a rash on his chest that only started getting better when he moved away from Flint and its water supply. And when Lisa's daughter Angella, 32, came from California to visit for a few weeks a year ago, her 3-year-old toddler Austyn developed rashes and sores all over his body.

Then came the stomach aches.

Edward used to guzzle water thanks to the excessive thirst of diabetes, and after months of drinking tap water he developed diarrhea so bad he still has to wear a diaper all the time. "When he runs, it runs all day long," Lisa explained.

Edward shuffled down slowly from his bedroom upstairs. He lifted his T-shirt and showed the rashes and sores on his back. "It itches and then it burns," he said. He weighed 60 pounds more a couple years ago, but his illnesses have withered him down to a skinny frame.

When the warnings came out about the water, the family tried to adapt. Lisa had a water company deliver 10 jugs of clean water a month, at her own expense. The city gave them a filter for the kitchen faucet, at taxpayer expense, though the water still comes out cloudy. And there's no shortage of people handing out bottled water since the crisis broke, trying to play catch up for a delayed official response.

"Red Cross!" shouted a man at the front door. He was delivering free water to the few occupied homes on the street. Lisa got up from the chair. "Come here, mama," she said to her dog. Around here everybody's called mama, even Pig the 10-year-old pit bull.

"Wow, look at that dog," said Darius Lewandowski, a Red Cross volunteer, as the hobbled old dog wagged her tail and stumbled her way to the door. Lewandowski seemed genuinely stunned. "When did this happen?"

"This is from the water!" Lisa told him. The old dog wagged her whole body with her tail. Her back was raw from where she had been biting at her dry skin.

Everybody in the house stopped using the tap water when they found out it was bad. Everybody except Pig the dog.

Nobody thought at first about giving the dog water from the tap. Until she couldn't stand up very well and started stumbling around when she tried to walk. Until she developed a rash on her back and thick, pink boils appeared all over her body. "It's like her skin came outside her fur," Lisa said.

Maybe she's just an old dog with old dog problems. But the family insisted she was healthy until two years ago, right around the time the water was switched.

Pig rolled onto her back and began kicking her legs in the air, back and forth, using the floor to scratch her back, like any dog. Normally this would be cute. Until she got up and dried flakes of her skin were left on the wood floor and her back was scraped open again. Pig waddled over to Lisa.

"Come on, mama, it's OK," she said, rubbing her behind her ears.

A little help from her friends

As morning turned to afternoon, the family sat around Big Mama's bed in the dining room, watching an endless loop of TV shows from the 1970s on one of the few channels they get. A wire antenna from their $19 TV receiver is strung over her bed and taped to the far wall.

Laura Haley was washing dishes in the kitchen, using tap water because she needs the water hot, even though she said the rashes and bumps on her skin were from the water running over her hands. The 47-year-old family friend lives not far and walked over to help.

She, too, said her health has collapsed the past two years. "When they first switched the water I started having problems with my memory, I started getting dizzy, having trouble with my balance," Haley said. "I wound up being hospitalized twice. They didn't know what was going on."

Maybe it was mono, the doctors told her. Or her heart. "But it wasn't my heart," she insisted. "They ran all kinds of tests. It's this water."

Two years ago, she was going to school at nearby University of Michigan-Flint for a social work major. She was on the honor roll, she said. But she started losing her memory, failed her last two semesters, and dropped out in frustration.

Now she comes by to help out with household chores, or sit with Big Mama a while, just to give Lisa a little break. "I call her Mama Lisa, because here's a woman who's made a decision to take care of her mother. I've lived through it. I watched my mother go through it with my grandma, and the toll it took on her being a

caregiver, full time, no help from the state, no help from relatives or friends, nobody. It's a lot of work and she does this all by herself."

She met Lisa decades ago, when Lisa drove an ice cream truck and Haley's kids would go nuts whenever they heard the jingle of her arrival.

"My girls was always talking about the ice cream lady, 'cause there were times when they didn't have money for ice cream and she'd give them ice cream anyway," Haley said. "So I wanted to meet this lady. And she was a very sweet person, and we just struck up a friendship from there."

A pile of laundry spilled from the tiny laundry space into the kitchen, almost to her feet at the sink. After the dishes she'd turn to washing all the blankets and pajamas, most of which belong to Big Mama. The family has to put two kinds of detergent and a germicidal bleach in the washing machine to make sure the sickly woman doesn't catch something from the water.

Having to go through all this to accomplish a simple task like laundry, having to get water a little bottle at a time for drinking or cooking or tooth brushing, day after day, has become maddening.

"I used to watch those commercials where you send so much a month overseas where the water's not drinkable," Haley said. "I never thought that it would be here in Flint. And we're here in the United States, yet we're living like we're in a Third World country. It's crazy."

A moment of peace

Lisa sat in her wooden chair again, smoking a cigarette, drinking coffee made from bottled water, watching as her mother slept deeply. Most of Lisa's days are spent in that chair, except for the rare times when her mother is away.

Three times a week Big Mama goes for dialysis. Three times a week Lisa gets a pail of warm water, brings it to her mother's bedside, peels away her bedclothes, removes her diaper and washes her in sections before paramedics arrive and carry the woman out the front door, down the crooked and crumbling concrete steps, onto a gurney and into an ambulance.

And three times a week, she gets a few moments to herself.

It was Tuesday morning, an hour before they'd arrive, and Lisa was getting ready to wake up her mother.

It's not easy caring for Big Mama. She's bipolar and very moody and yells at Lisa. She's developed dementia. And now she's covered in unusual rashes that nobody can explain, except that they first appeared around the time Flint switched its water.

At 10 sharp the paramedics arrived. Four of them made their way into the house and took up positions around the old woman.

"Ready to rock and roll?" one of them asked her.

Big Mama didn't reply. They hoisted her up, walked her out the door, down the steps and into the ambulance.

Lisa watched from the doorway until her mom was safely in the ambulance. Then she came back in and sat back in her chair, her home within her home.

"If I didn't own this house I would take off," she said. "What I'm hoping is that my mother and brother can leave here. I do not want them dying in here due to this water. But I think they will because they are so sick."

She lit another cigarette, sipped her now-cold coffee, and leaned back for a short rest before her mother came back home and needed constant attention again.

Big Mama's lotions and medicines crowded the top of a nightstand next to the hospital bed. Her washed blankets and clothes stood 2 feet high in the corner. The dining room table shoved against the wall was covered in a stack of bills and old newspapers and flyers from the city warning people not to drink the tap water.

Among the bills in that pile was the one they just got for the water that made them sick

Subject: FEMA Daily TPs from Lansing IOF EM-3375-MI
Attachments: Talking Points Feb. 14.docx

Good morning all:
There are no changes to the Daily Numbers today.

Talking Points: Flint, Michigan Water Contamination
February 14, 2016 @ 9 a.m.

Daily Numbers

Reported at 8 a.m. on February 14, 2016.

As of February 14, 2016, the following commodities were requested by and provided to the state of Michigan in support of the response to the emergency conditions resulting from contaminated water in the city of Flint.

- 1,937,844 liters of water
- 136,964 water filter replacement cartridges
- 40,000 water and pitcher filters

Major Disaster Declaration/Full EM Denial

- Governor Snyder's January 20, 2016, appeal for a major disaster declaration for contamination and damage to the public water system in the City of Flint was denied on January 22, 2016. After review, FEMA determined that this event does not meet the statutory definition of major disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

    - *IF ASKED:* To qualify for a "major disaster" declaration there must be a natural catastrophe or, regardless of cause, a fire, flood or explosion which causes damages of significant severity and magnitude to warrant a declaration. FEMA's assistance is intended to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage and loss by the natural catastrophe, fire, flood or explosion. It was determined that the presence of lead in the Flint drinking water was not caused by a natural catastrophe, or by a fire, flood or explosion, so it does not qualify for a major disaster declaration.

- FEMA's assistance remains limited to what the President authorized in the Emergency Declaration on January 16, 2016. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of

this declaration. The portions of the Emergency Declaration not granted can be appealed by the Governor.

- The decision means that the state can continue to work directly with other federal agencies and those agencies can provide assistance through their own authorities.

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and the Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

HHS as Federal Response Lead

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- Assistant Secretary for Preparedness and Response Dr. Nicole Lurie will lead this effort, supported by HHS Acting Assistant Secretary for Health Dr. Karen DeSalvo, as well as two U.S. Public Health Service officers.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

- FEMA will work with the HHS team in Michigan to establish a collaborative process to best support state and local leaders with identifying the size and scope of the problem and help them develop and execute a plan to address the public health and infrastructure issues in Flint.

Emergency Declaration

- On January 14, FEMA received Governor Snyder's request for an Emergency Declaration, as well as a Major Disaster Declaration for emergency protective measures, temporary housing and repairs to homes and low-cost loans for covering uninsured loss of property, as well as other federal assistance.

- On January 16, 2016, President Barack Obama declared an emergency for Genesee County in the State of Michigan, limited to Direct Federal Assistance, as a result of the emergency conditions resulting from contaminated water in the city of Flint, authorizing FEMA to support the state in its efforts to respond to the incident.

- Under this emergency declaration, FEMA is authorized to provide emergency protective measures, Category B, limited to Direct Federal Assistance, under the Public Assistance program limited to 75 percent of the total eligible costs. FEMA will, in coordination with the state, provide water, water filters,

water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration.

IF ASKED about period of assistance through EM (90 days):

- FEMA's emergency assistance is designed to be supplemental and temporary in nature. FEMA, and our partners in other federal agencies, will be working closely with the state, county, and city officials to support those officials in the development of medium and longer term solutions to this problem.

- The state may submit a request to extend the current 90 day period of assistance established by the declaration, providing a valid reason that the extension is necessary.

If ASKED about the $5 million cap on assistance

- When the amount of federal assistance for an emergency declaration exceeds $5 million, FEMA is required to notify Congress.

Other Federal Agency Assistance To-Date

- U.S. Health and Human Services

    - The Department of Health and Human Services (HHS) Office of the Assistant Secretary for Preparedness and Response (ASPR) is working to identify vulnerable Flint residents who may not be able to travel to obtain filters and water testing kits. They are also working with the Centers for Medicare and Medicaid Services (CMS) to provide critical information needed for city responders to locate vulnerable residents and to help focus the city's outreach efforts.

    - HHS-funded health care centers in the area are offering free lead testing for their patients and are reaching out to patients to make them aware of the free testing. Exposed children will receive ongoing monitoring while they are health center patients. Health centers also are providing bottled water at their facilities and are assisting patients in obtaining bottled water or water filters in coordination with county-wide efforts.

    - HHS is helping educate residents who use HHS programs and services, such as Head Start programs and programs that serve seniors. In addition, HHS-funded local agencies on aging and community partners are reaching out to seniors and grandparents raising grandchildren to help them find water and filter distribution sites and to provide homebound residents with assistance in obtaining and installing filters.

    - The Centers for Disease Control and Prevention (CDC) is currently providing technical assistance to the Michigan state health department to assess lead exposure especially in homes with children. CDC also has provided recommendations on educational interventions for children affected by lead.

- U.S. Environmental Protection Agency

- In mid-October, the EPA established a Flint Safe Drinking Water Task Force comprised of EPA scientists who are internationally recognized experts in the field of lead in drinking water. The EPA Task Force is providing technical assistance to the Michigan Department of Environmental Quality and the City of Flint to implement corrosion control treatment and to develop school and residential sampling protocols.

- EPA is also conducting an audit of the Michigan Department of Environmental Quality (MDEQ) drinking water program – to examine MDEQ's implementation of the Safe Drinking Water Act and related rules on lead and copper, total coliform, nitrates and ground water. This comprehensive audit will provide Flint residents and the people of Michigan with more information about MDEQ oversight of public water supplies and will identify actions that may be needed to strengthen the Michigan drinking water program.

- Housing & Urban Development

  - Flint was identified as one of six target cities in the second round of the Strong Cities – Strong Communities (SC2) White House initiative in 2014. This program focuses on enhanced Federal agency support in areas of blight reduction, public safety and economic development.

  - Discussions are ongoing between the FEMA Region 5 SC2 program lead and Department of Housing and Urban Development (HUD) staff on the Flint water crisis impacts to SC2 programs and initiatives; as well as possible opportunities for collaboration through existing federal engagement with local, county and State agencies.

  - HUD is working closely with the city on economic development and interagency coordination. They have successfully assisted the city with the purchase and installation of water filters. HUD had an existing lead hazard grant to Flint, targeted to lead paint, $325,000 of which could be used for addressing the water lead contamination. Additionally, HUD has provided a data tracking and reporting system for the State of Michigan to use in its lead investigations.

- U.S. Army Corps of Engineers

  - The FEMA Region 5 Recovery Coordinator is in discussion with the United States Army Corps of Engineers to identify possible technical assistance and/or Subject Matter Experts on public water distribution systems, and possible courses of action.

- US Department of Agriculture

  - USDA has waived requirements on potable tap water availability at school meal service, allowing schools to provide bottled water. The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) is also allowing participants to use WIC vouchers for ready-to-feed infant formula, which does not need to be mixed with water, and participants can also swap powdered formula for ready-to-feed formula.

Subject: *UCG Flint External Affairs Daily Messaging Plan - 2/14/16*
Attachments: Daily Msg Plan for Flint Water Response_2-14-2016.pdf; Daily Msg Plan for Flint Water Response_2-14-2016.docx

Good Morning. Today's UCG Flint External Affairs Messaging Plan (2-14-16) is attached and below:

FLINT WATER RESPONSE
DAILY STRATEGIC MESSAGING
Feb. 14, 2016

Key Messages

- EPA advises residents to run cold water, throughout the house, for two minutes, every morning to flush pipes.
- The safest option to protect children younger than 12 months of age, for lead and copper, is to only use bottled water for drinking water and the reconstitution of infant formula, or any other food product.
- Have your water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- The safest option for vulnerable populations including pregnant and nursing mothers, and children under six years old, is to use bottled water.

- Affected small businesses should contact the Small Business Administration (SBA) at 800-659-2955 to determine if available low-interest disaster loans can help with financial obligations.

Products for Release

Operational Communication Events

- None

Stakeholder Calls/Briefings/Meetings/Trainings

- None

Speakers Bureau IGA and Outreach Events/Activities

- **Faith Forum at Lady of Guadalupe, Catholic Church, @ 9 am 2316 W. Coldwater Road**

LOOKING AHEAD

UPCOMING EVENTS/ACTIVITIES

- **Tentative Surgeon General Events:**
  - **Meeting w/Healthcare Providers** Feb 15 @ 2pm Greater Flint Health Coalition; 519 S. Saginaw St.
  - **Town Hall w/Healthcare Providers** Feb 15 @ 6pm Riverfront Hall 1 Riverfront Center West
  - **Community Resilience Group meeting** Feb 16 @ 11 am GCCARD 601 N. Saginaw St.
  - **Community Engagement Forum** Feb 16 @ 6pm Mount Carmel Baptist Church, 1610 W. Pierson Rd.

- **Genesee County Board of Commissioners** Feb 16 @ 9 a.m. 1101 Beach St. (FYI)
- **Crisis and Emergency Risk Communications Training** via VTC, Feb. 16 @ 1pm
- **ARC Community Leadership** Meeting Feb 16 @ 2pm ARC Building
- **Blood Lead Testing** Feb 16 @ 2 pm 701 Third St.
- **Congressional/Legislative Conference Call** Feb. 16 @ 2:30pm 1-800-320-4330, pin
- **Flint Water Class Action/Info Meeting** Feb 16 @ 6:30 pm Northbank Center 432 N. Saginaw St.
- **Federal Agency Briefing** Feb 17 @11am 866-625-6066 pin
- **Parent Meeting and Information Sharing** Feb 17 @830am 1360 Milborne Ave
- **Blood Lead Testing** Feb 17 @ 4pm 6031 Dupont
- **HHS Secretary Visit:** Feb 18
- **Parents Meeting and Information Sharing** Feb 18 @ 830 am 3002 Farley St.
- **Education Points of Recovery Group** Feb 18 @ 11 am, 5075 S. Pilgrim Rd.
- **Crisis and Emergency Risk Communications Training** via VTC, Feb. 18 @1pm
- **ARC Community Partners Meeting** Feb 18 @ 3pm ARC Building
- **Glendale Hills Neighborhood Association** Feb 18 @ 630 pm, 2920 W. Court St.
- **Faith Forum** Feb 21 @ 1pm, New Jerusalem Full Gospel Baptist Church 1035 E. Carpenter
- **NBC25 Town Hall** Feb 29 EPA Mark Durno to attend
- **Congressional Delegation (CODEL)** visit March 4
- **Speak Out** event with Black Caucus visit March 4
- **EPA Public Meeting and Expo** Mid-March

COMMUNITY (FIELD) FEEDBACK

- **TONE:**
  - Mistrust of local medical providers
  - Emerging mistrust of federal agencies
  - Confusion due to volume of multiple messaging sources
  - Doubt that filters are effective for removing lead
  - Attitude that "damage is already done" but willingness to look ahead towards what can be done
- **CONCERNS:**
  - Literacy levels – print materials are text heavy; community would like simpler message with more visual communication
  - Continued challenges getting water due to transportation barriers
  - Nervousness among immigrant communities about interacting with officials
  - Payment for lab (blood tests) for Adults $36

- Next level water use (laundry, pets, etc.)
- Health-related (rash, dermatitis, dry skin, skin cancer, organ damage, infertility)
- Quantity of resources provided to residents (water, filters, etc.)
- Paying water bills

o **GAPS:**

- Filters for showers. recyclable cartridges
- Want to learn about more than just lead, in the water
- Manny Spanish speakers unaware of water issues

o **OPPORTUNITIES:**

- Provide Frequently Asked Question Fact Sheet
- More Education of the Media
- More outreach to underserved and ethnic groups

PLANNED MESSAGING/PRODUCTS

o **HHS**

- Issue #2 of Key Stakeholder Advisory planned for 2/17

o **CDC:**

- Infographic on mitigation of health effects of lead
- Talking points about health effects of lead on adults (tentative)

o **EPA:**

- Sampling Results letter for homeowners
- FAQ on Top Public Questions
- Photo Slide Show for social media – EPA sampling steps

EMERGING ISSUES THAT MAY REQUIRE ADDITIONAL MESSAGING:

o Possible need to develop campaign to get the remaining kids tested.
o A need to re-engage the health provider community to start lead testing

  - More Education of the Media
  - More outreach to underserved and ethnic groups

PLANNED MESSAGING/PRODUCTS

- HHS
  - Issue #2 of Key Stakeholder Advisory planned for 2/17
- CDC:
  - Infographic on mitigation of health effects of lead
  - Talking points about health effects of lead on adults (tentative)
- EPA:
  - Sampling Results letter for homeowners
  - FAQ on Top Public Questions
  - Photo Slide Show for social media – EPA sampling steps

EMERGING ISSUES THAT MAY REQUIRE ADDITIONAL MESSAGING:

- Possible need to develop campaign to get the remaining kids tested.
- A need to re-engage the health provider community to start lead testing

By Christopher Brennan / NEW YORK DAILY NEWS /
Updated: Saturday, February 13, 2016, 11:04 AM

The new mayor of Flint, Mich., has ousted a **trio of the city's top officials as it seeks to rebound from its water crisis.**

Mayor Karen Weaver has parted ways with **Flint's Police Chief James Tolbert, Fire Chief David Cox Jr. and City Administrator Natasha Henderson,** according to her release on Friday.

Weaver, who is three months into her term, says that Tolbert and Cox resigned their posts, though the men told ABC12 they were unexpectedly fired. The moves come as Flint handles the fallout from its water supply poisoning scandal, though it was not clear if the three officials' departure was directly related. Mayor Weaver said in a statement that the posts would be filled with "highly qualified individuals who will help us as we work to restore faith and hope in our city government."

EM-3375-MI
Media Monitoring Report
February 13, 2016

Summary: Media coverage focuses on Governor Snyder's decision to testify before Congress and his releasing of emails. Due to the release of emails, media coverage of the disclosure of the email contents is high especially relating to the Flint Water Quality Supervisor who reportedly stated the water was not safe eight days before the water was switched. Link to the emails is included in the WLNS article.

Below is a sampling of the coverage.

Contents:

Snyder will testify to Congress over Flint water crisis, releases 20,000 emails

Gov. Snyder, Darnell Earley to testify before Congress on Flint water crisis

Thousands of pages of e-mails show exchanges between state officials regarding Flint water

E-mails: Flint water plant was rushed into operation

Flint woman on bottled water tests positive for lead

Snyder's hearing plan: Push for lead pipeline removal

Here are the stunning social costs of the Flint water crisis

Flint water sampling for state analysis to be done at about 400 homes

Snyder will testify to Congress over Flint water crisis, releases 20,000 emails
Published time: 13 Feb, 2016 03:04

https://www.rt.com/usa/332328-snyder-testify-flint-water-congress/

Michigan Governor Rick Snyder (R) invited himself to speak before the House Oversight Committee concerning the Flint water crisis amidst the release of over 20,000 emails from various state agencies involved in the failure to prevent lead contamination.

A Thursday phone call to congressional committee chairman Representative Jason Chaffetz (R-Utah) led to Governor Snyder being confirmed on Friday for a future hearing. He will sit alongside US Environmental Protection Agency Administrator Gina McCarthy, though no date has yet been set.

"The people of Flint have suffered because they were failed by all levels of government, and so it is understandable that there are questions at all levels of government," Snyder said in a press release. He also expressed the intention to help other cities facing similar risks of water poisoning.

The House Oversight Committee's ranking Democratic member, Representative Elijah Cummings (Maryland), released a statement of his own in response.

"Contrary to Governor Snyder's recent claim that he requested this 'opportunity to testify,' the reality is that he is finally bowing to mounting public pressure to answer questions before Congress about the central and critical role his administration played in this man-made disaster," Cummings wrote.

In 2014, the water source for 100,000 residents in Flint was switched to the Flint River without being treated with chemicals needed to combat the corrosion of lead piping. The result was an alarming rise in the blood-lead-levels in children, which can result in permanent brain damage.

The committee last gathered to hear testimony on the crisis on February 3, but Snyder had been neither asked, nor called upon to participate. The new director of the Michigan Department of Environmental Quality (DEQ), Keith Creagh, has been the highest ranking state official to testify thus far. He was the replacement for Dan Wyant, who resigned in December over the department's negligence in controlling corrosion.

Some of the questions Snyder could face in his eventual congressional testimony may be prompted by the emails released on Friday, which were written both before and after water issue became a crisis by the employees of six state departments responsible for handling the problem.

One email sent on September 30, a week before Snyder acknowledged the dangerously high lead levels and forced Flint to stop using the Flint River as the source of its water supply, shows DEQ's Office of Drinking Water and Municipal Assistance field operations chief Richard Benzie commending seven employees for the *"effort you have made to respond to this issue."*

"It is noticed and appreciated. In recognition for your performance, I have arranged for you to receive a 2 percent merit increase starting tomorrow," the email read.

In fact, the raise had been scheduled long before as a cost-of-living adjustment, which all Michigan state workers receive, The Detroit News reported. The tone, however, is likely to be picked up on by some members of the congressional committee.

In another released email from October 14, 2014, EPA Michigan Program Manager Jennifer Crooks appears to make light of the city residents' grievances.

"Yep. Another complaint about our favorite water supply :)," Crooks said, utilizing a smiley face in an email forwarded to DEQ officials.

Another Crooks email from February 9, 2015 boasted of *"developing a thick skin"* as a result of fielding angry complaints from constituents.

"Let me tell you, this Flint situation is a nasty issue — I've had people call me 4 letter words over the phone, yell at me and call me a crook," she wrote. *"I'm developing a thick skin."*

Not all of the more than 20,000 released emails made light of the situation, however.

One sent on April 17, 2014 by laboratory and water quality supervisor Mike Glasgow to DEQ officials warned against moving ahead with the switch to Flint River water too hastily, according to WXMI news.

Glasgow asked for more time to get his staff and plans prepared, expressly saying he would not approve any water distribution from the Flint plant without a delay of a couple weeks. However, the decision wasn't ultimately up to him, and he knew it, writing that his superiors *"seem to have their own agenda."*

On April 25, 2014, Flint ended its relationship with its Detroit water supplier and switched to the polluted Flint River.

.....

Gov. Snyder, Darnell Earley to testify before Congress on Flint water crisis
February 12, 2016 *WXYZ*
http://www.wxyz.com/news/gov-snyder-asks-for-opportunity-to-testify-before-congress-on-flint-water-crisis

LANSING, Mich. (WXYZ) - Michigan Gov. Rick Snyder will testify in front of Congress about his knowledge of the Flint water crisis. This comes after Snyder requested an opportunity to testify on Friday.

According to spokesman Dave Murray, Snyder called Rep. Jason Chaffetz, a Republican from Utah, and offered to travel to Washington D.C. for any future hearing.

In that hearing, Snyder would "explain mistakes made by water quality experts that led to the current crisis and detail the emergency response in place to help residents recover," according to his office.

According to the House Committee on Oversight & Government Reform, those testifying include Snyder, former Flint Emergency Manager Darnell Earley, former Mayor Dayne Walling, former Region 5 Administrator for the EPA Susan Hedman, EPA Administrator Gina McCarthy, EPA Region 5 Water Expert Miguel Del Toral and Marc Edwards, a professor of environmental and water engineering at Virginia Polytechnic Institute and University.

"We are committed to investigating the failures in Flint. We appreciate Governor Snyder's willingness to appear before the Committee and look forward to hearing from EPA Administrator McCarthy as well," Chaffetz said. "Their perspectives on this issue are important as we seek to ensure a crisis of this magnitude never occurs in another American city. The diverse and insightful panel of witnesses assembled will shed light on many of our remaining questions and help us propose reforms to the authorizing committees."

Snyder was not invited to testify in the first Flint water hearing on Feb. 3 in front of the U.S. House Committee on Oversight and Government Reform. He was invited to testify in front of members of the Democratic Steering and Policy Committee.

"The people of Flint have suffered because they were failed by all levels of government, and so it is understandable that there are questions at all levels of government," Snyder said in a release. "In Michigan we are learning a great deal from this crisis and I am hopeful the federal government also will use this as an opportunity to examine health and safety protections in place, assess infrastructure needs, and avoid this type of crisis in the future."

7 Action News has learned Earley will be deposed by Congress on Feb. 25 in Washington. Sources tell 7 Action News Gov. Snyder could testify on either **March 15** or **March 23.**

Redacted Subpoena to Earley

Thousands of pages of e-mails show exchanges between state officials regarding Flint water
By Alexandra Ilitch Published: February 13, 2016, 12:40 am Updated: February 13, 2016, 12:46 am

http://wlns.com/2016/02/13/thousands-of-pages-of-e-mails-show-exchanges-between-state-officials-regarding-flint-water/
LANSING, MI (WLNS) – The governor releases more than 21,000 pages of emails from his office this morning, the same day he agrees to testify in Washington D.C.

The massive amount of emails shows exchanges relating to Flint's water between many state officials.

As soon as those emails were disclosed, our newsroom started sifting through them.

While 6 News still going through all those emails, but of the ones that we've seen so far there's a couple that stand out.

On March 25, 2013, the Flint City Council voted to use the Karegnondi Water Authority as its water source.

Emails released Friday show, the day after, on March 26, Steven Busch, Former District Supervisor with the Michigan Department of Environmental Quality, sent an email to DEQ officials, including former DEQ Director Dan Wyant, saying continuous use of the Flint River as the city's water source, could cause an increase, in microbial and carcinogens or cancer causing substances in the water, which would put the public at risk.

Email sent by Former DEQ District Supervisor, Steve Busch
During this time, an emergency manager was in control of the city and state officials were working to determine whether or not they should use the Flint River as it's source, or settle on a deal with Detroit to use it's water.

Emails show that on March 27, a day after Busch sent the email to DEQ officials about those potential risks, Dan Wyant sent an email to the Michigan Department of Treasury, saying the DEQ supports the switch to the Flint River water, saying: "All indications are that we are supportive of KWA and it's cost benefits compared to D-W-S-D options."

Email Former DEQ Director, Dan Wyant sent to MI Dept. of Treasury saying DEQ supports water switch over
Andy Dillon, who was the state treasurer at the time, signed off on it, as required by law, because the city was under the direction of a state appointed emergency manager.

On April 25, 2014, the city began using the Flint River as it's water source.

6 News is still in the process of going through these emails, we'll update you on anything else we find.

You can read the emails here.

E-mails: Flint water plant was rushed into operation
Paul Egan, Todd Spangler and Kristen Jordan Shamus, Detroit Free Press 3:53 a.m. EST February 13, 2016

http://www.freep.com/story/news/local/michigan/flint-water-crisis/2016/02/12/e-mails-flint-water-plant-rushed-into-operation/80300220/

LANSING — Eight days before the Flint water treatment plant began pumping water from the Flint River for citizens to drink, a city official complained he was being rushed into starting up the plant too quickly.

"I do not anticipate giving the OK to begin sending water out any time soon," Mike Glasgow, the city's laboratory and water quality supervisor, said in an April 17, 2014, e-mail to Michigan Department of Environmental Quality official Mike Prysby.

"If water is distributed from this plant in the next couple of weeks, it will be against my direction. I need time to adequately train additional staff and to update our monitoring plans before I will feel we are ready."

The e-mail was among a huge batch of Flint water e-mails released Friday by the state government.

Despite Glasgow's objections, city officials in an April 25, 2014, ceremony shut off the tap to the Lake Huron water they had been receiving from the Detroit Water and Sewerage Department and began drawing and treating water from the Flint River.

Glasgow said in the e-mail he would "reiterate" his message that the plant was not ready to officials above him, "but they seem to have their own agenda."

"I have people above me making plans to distribute water ASAP," Glasgow said in the e-mail.

Glasgow did not respond to an e-mail from the Free Press on Friday seeking comment. A DEQ spokeswoman did not respond to an e-mail asking whether a rush to put the plant into operation contributed to a host of problems with the Flint drinking water.

It also was not apparent what response Glasgow received from the DEQ after he sent his e-mail in 2014.

The plant was beset by problems almost immediately after starting up, with residents complaining about the taste, odor and appearance of the water.

There were problems with e. coli bacteria. Extra chlorine used to address that issue contributed to the water exceeding federal guidelines for total trihalomethanes (TTHMs), which cause a range of health problems, particularly with long-term exposure. But the biggest issue was a failure to add phosphates or some kind of corrosion control chemical to the drinking water. As a result, the corrosive water ate away at a protective coating on pipes, joints and fixtures and caused unsafe levels of lead to leach into an unknown number of households and poison an unknown number of children and other Flint residents.

There's also a concern that problems with the water may have contributed to outbreaks of Legionnaires' disease in the Flint area, which caused nine deaths.

It isn't clear that the rush to put the plant into operation is a reason that corrosion controls were not used.

Other records released by the state indicate that the Flint water treatment plant only obtained a construction permit to install equipment to add phosphates to the water in late October 2015 and installation was to begin Nov. 9.

There were other indications the switch to Flint River water — timed to meet a one-year termination notice for Detroit water service — was hurried.

In March 2014, a state Treasury Department official reluctantly approved a $676,300 construction contract to help prepare the water plant for operation, despite the fact the city had obtained only a single bid, from Zito Construction.

"Typically, I have concerns about awarding bids to only one bidder," Treasury official Richard Kline said in a March 18, 2014, e-mail to another Treasury official.

"However the city has a very aggressive timeline in order to meet an April completion date before losing service from (Detroit)."

On April 23, 2014, DEQ official Stephen Busch, who was suspended pending an investigation earlier this year, sent colleagues a set of proposed DEQ talking points for the water switch ceremony to be held in two days.

"The City of Flint is going beyond minimum public health standard requirements to provide drinking water at a level of service meeting its customers' expectations," Busch said in an e-mail to then-DEQ communications director Brad Wurfel, who resigned in December.

Flint woman on bottled water tests positive for lead
Robert Allen, Detroit Free Press 7:26 a.m. EST February 13, 2016

http://www.freep.com/story/news/local/michigan/flint-water-crisis/2016/02/12/flint-woman-bottled-water-tests-positive-lead/80303610/

Flint resident LeKia Nolan said she only drinks bottled and filtered water.

But this week, a blood test found a small amount of lead — the toxic metal that continues to be found in the city's tap-water supply. Her mother and nephew also have been exposed.

"It is really emotionally damaging. It is mentally and emotionally," said Nolan, 38. "Basically, I'm a healthy person. So for me to know that I've been exposed to something so harmful, it's really upsetting. I cried for the first time last night, since all of this has been going on." She said she's not sure how the lead would have gotten into her system. She's been on bottled and filtered water since September, and the blood test was in January.

In an effort to help others, Nolan and Marseille Allen have continued passing out water since last month using a GoFundMe page that's tallied more than $50,000 in donations.

The fund-raising effort started when Nolan's sister, professional basketball and former WNBA player Deanna Nolan, sent money from Russia for a couple pallets of bottled water. More people wanted to help, so the page was set up.

Next week, the effort is to include passing out more bottled water, as well as bathing wipes and shower spigot filters, to the city's residents, LeKia Nolan said Friday.

She said she's started a nutritional business, Nolan Integrative Wellness, to provide health coaching through schools to make sure kids learn healthy eating habits.

Lead is shown to cause permanent brain damage in children, but state officials have been encouraging kids to eat foods high in calcium, iron and vitamin C to help mitigate the effects. Prolonged exposure to lead can cause

abdominal pain, depression, forgetfulness, irritability, nausea and more, according to the Centers for Disease Control and Prevention.

Snyder's hearing plan: Push for lead pipeline removal
February 12, 2016 *Jonathan Oosting and Chad Livengood, Detroit News Lansing Bureau*
http://www.detroitnews.com/story/news/michigan/flint-water-crisis/2016/02/12/snyder-flint-water-testify-congress/80292054/ *(for full story click on link)*

Gov. Rick Snyder plans to push for a national discussion on removing lead water pipelines in aging American cities when he testifies before a congressional committee investigating Flint's water contamination crisis.

U.S. Rep. Jason Chaffetz, the Utah Republican who chairs the House Oversight & Government Reform Committee, accepted Friday Snyder's request to testify before the committee on a panel with with U.S. Environmental Protection Agency Administrator Gina McCarthy. A date has not yet been set for the second hearing, which follows a Feb. 3 session in which the GOP governor was not called to testify.

"There's an opportunity here that we can seize to address this problem, or at least start having everyone talk about it," Snyder spokesman Dave Murray said Friday. "Because this is not just a Flint problem."

The committee's ranking Democrat viewed Snyder's sudden willingness to testify with skepticism.

"Contrary to Gov. Snyder's recent claim that he requested this 'opportunity to testify,' the reality is that he is finally bowing to mounting public pressure to answer questions before Congress about the central and critical role his administration played in this man-made disaster," U.S. Rep. Elijah E. Cummings, D-Md., said in a statement.

Snyder announced his desire to testify before the committee Friday morning after his office publicly disclosed more than 20,000 pages of state government records and emails related to Flint's 2014 switch to Flint River water.

On Thursday, Snyder called Chaffetz and offered to travel to Washington, D.C., for a future hearing. The governor wants to answer questions about what led to Flint's water contamination crisis as well as highlight the need for Congress to take action on lead abatement issues looming in other cities, Murray said.

"There needs to be a national infrastructure discussion around this," Murray said. "There have been problems in other cities."

Snyder declined an invitation to answer questions Wednesday before the House Democratic Steering and Policy Committee. He had already been scheduled to present his fiscal year 2017 budget proposal on the same day as the hearing.

"I am glad to see that Gov. Snyder has agreed to testify under oath about the Flint water crisis after declining multiple requests to appear before Congress," U.S. Rep. Dan Kildee, D-Flint Township, said Friday in a statement. "The governor's administration and his state-appointed emergency financial managers created this crisis and he must answer questions so that the whole truth can be found."

.....

Here are the stunning social costs of the Flint water crisis
February 12, 2016 *Janell Ross The Washington Post*
https://www.washingtonpost.com/news/the-fix/wp/2016/02/12/here-are-the-stunning-social-costs-of-the-flint-water-crisis/ *(for full story click on link)*

The situation in Flint is bad. Very, very bad. It is hard-to-believe-this-is-happening-in-America bad, even for people who might not have huge faith in their country's government.

If you doubt that or remain fuzzy on the essential, non-political toll of Flint's water crisis , you really should take a moment and listen to this NPR story about a Flint woman -- wife and mother of two -- who must contemplate the number of bottles of water necessary to cook her family different meals and has noticed what she suspects are developmental differences between her older son and younger one. She filled her younger son's bottles with Flint's lead-laden tap water during the time that public officials insisted that it was safe.

If you have a young child in your life whom you love, consider what it would mean to know that you may have poisoned them every time you gave that child a bottle, a bath or a meal. That is how very real the situation is in Flint right now. Do not let the raging game of politicians and bureaucrats pointing the finger fully distract you. Then consider what is also known about the long-term social consequences of lead poisoning and the public spending needs it creates. What follows is based on science -- not politics, not ideology. Science. But there are certainly political questions for each of us to consider here, too.

To help us, The Fix caught up with Richard Rothstein, a research associate at the left-leaning Economic Policy Institute. Rothstein and his colleague, Leila Morsy, a lecturer at the University of New South Wales in New Zealand, released a report in June that really should sit on some kind of recommended national reading list. The report compressed down decades of research on the short- and long-term effects of lead exposure. And there is really only way to summarize it: The truth is both alarming and extremely revealing.

This is not joyful reading, folks. But it is important.

.....

Flint water sampling for state analysis to be done at about 400 homes
February 12, 2013 *Molly Young | myoung7@mlive.com The Flint Journal*

http://www.mlive.com/news/flint/index.ssf/2016/02/around_400_flint_homes_chosen.html#incart_river_home

FLINT, MI -- Sentinel site teams have identified around 400 Flint homes that will serve as regular water testing sites for the next two months.

Ten teams comprised of three people each, including a community member, an employee from the MDEQ and a licensed plumber, started knocking on doors Wednesday, Feb. 10, to teach about 400 residents the scientifically sound method to collect the samples.

The goal is to monitor all types of homes for changes in water quality and contaminants over an eight-week period to help determine when the drinking water is safe and where changes made to the water are taking affect.

"So we'll be able to trend how our corrosion control is working over time," said Bryce Feighner, chief of Michigan Department of Environmental Quality, office of waste management and radiological protection.

The residents will collect a sample of water after the lines have been stagnant for at least six hours, and the sentinel site teams will collect samples every two weeks over the course of an eight-week period, Feighner said.

"But it's not necessarily going to end there. We're going to let the data determine when this process ends." Feighner said.

There were about 1,950 residents interested in being part of the sentinel testing, Feighner said, but that number was narrowed down and the team pinpointed certain homes they wanted to participate after looking at several layers of data.

First, the team took the locations of the 1,950 residents who volunteered to be part of the ongoing testing, and crossed it with what information the city does have about the locations of lead service lines. About 156 of the 400 homes were chosen this way.

Then, they picked homes from the three areas identified by Dr. Mona Hanna-Attisha where people are most likely to have high levels of lead in their blood.

Finally, they used three layers of data from the Environmental Protection Agency, including minority populations, income levels and homes built prior to 1960, which the EPA says is an indicator of lead paint, another way lead can get into the body.

"So we looked at all those layers, we added additional sites, and when we were all done, we made sure we had representation throughout all nine wards of the city, and the end result was these 402 sentinel sites," Feighner said.

Teams started going to the homes Wednesday morning to meet with resident and teach them a scientifically sound method for collecting water samples. Before they set out Friday morning, they had knocked on 250 doors and made contact with and trained 110 residents. They hoped to reach all 400 homes by Sunday and have water samples ready to be picked up on Monday.

Results take a few days to get back, but they will be posted online at Michigan.gov/flintwater.

Amid water crisis, it's about working together for Flint

Michigan Live
February 13, 2016 at 8:55 AM

Nicole Lurie, M.D., is assistant secretary for preparedness and response for the U.S. Department of Health and Human Services.

By Dr. Nicole Lurie

Three weeks ago, President Obama asked me to head the federal response to the water crisis in Flint. Since then, I have spent time in the city talking with community members, government officials and technical experts about the situation. Understandably, residents are worried, confused and angry; people want a solution they can count on so they so they can drink a glass

of water without worrying about it. As part of the fix, they also want to be sure that their kids go forward with the best shot they can have at a healthy life. So do I.

I'm used to responding to emergencies, but this response is, for me, a particularly personal one. It was lead that propelled me into a career in medicine and public health. As I flew out to Flint, I flashed back to high school. A pediatrician named Dr. Martha Lepow got me — as a high school student — involved in her crusade to end lead poisoning in children. I knocked on doors, collected blood and urine samples and paint chips, and using the results, mapped out lead in neighborhoods. Armed with the data, Dr. Lepow pushed to change standards and laws to better protect children's health from lead.

We've learned so much since then. Today, we know that there is no healthy lead level in a child's blood. We also know now that there is a lot we can do to help kids who have been exposed to lead. Quality health care, good parenting, early childhood education and healthy food help counter some of the effects of lead. I'm hopeful that working together, we can put these in place for the people of Flint.

We're making progress. Not only are federal experts supporting state and local officials in identifying the problem's size and scope, but we also are helping make and execute a plan to mitigate short- and long-term health effects of lead exposure.

To help, EPA is testing water in the distribution system and in homes to determine lead and chlorine levels. Chlorine keeps bacteria from spreading. EPA is making this information available to the public so Flint residents know what's in the water and can see progress. EPA also is testing water before and after it comes through filters to see how well filters are working. Preliminary tests are encouraging and show that filters are working well.

To help meet the health needs of people impacted by lead, CDC is working with county and state health departments to determine the number of children exposed to lead in Flint to ensure that children who should be screened are getting screened.

The USDA's Food and Nutrition Service is working with families in the Special Supplemental Nutrition Program for Women, Infants, and Children to provide ready-to-feed formula which doesn't need to be mixed with water.

USDA also is providing additional grant funding to help affected schools purchase more fresh fruits and vegetables high in calcium, iron and Vitamin C because these foods can help children exposed to lead.

If you live in Flint, you can help your family. Use water filters until this is over, and clean the aerator in your faucet. If you have young kids, consider having them tested for lead. Add fresh fruits and vegetables to your family's diet, and do the things we know will help them grow up healthy and strong. If you know someone in Flint, spread the word about these important steps.

Finding a solution to the water crisis is the first part of rebuilding a healthier, more vibrant community. Doing so requires more than the resources of any single government agency — county, state or federal. Civic and faith-based organizations, businesses and neighbors will need to work together with government agencies and with families toward a common goal: recovering as a stronger community.

I imagine there are students in Flint who could benefit from getting out of the classroom and engaged in their community like I did as a high school student. Get them involved in Flint's recovery, too. Drawing on the talent and energy of every member of the community can help end this crisis faster and have a lasting positive effect: building a stronger, more resilient city, not just now but far into the future.

Amid water crisis, it's about working together for Flint
Michigan Live
February 13, 2016 at 8:55 AM

Nicole Lurie, M.D., is assistant secretary for preparedness and response for the U.S. Department of Health and Human Services.

By Dr. Nicole Lurie

Three weeks ago, President Obama asked me to head the federal response to the water crisis in Flint. Since then, I have spent time in the city talking with community members, government officials and technical experts about the situation. Understandably, residents are worried, confused and angry; people want a solution they can count on so they so they can drink a glass of water without worrying about it. As part of the fix, they also want to be sure that their kids go forward with the best shot they can have at a healthy life. So do I.

I'm used to responding to emergencies, but this response is, for me, a particularly personal one. It was lead that propelled me into a career in medicine and public health. As I flew out to Flint, I flashed back to high school. A pediatrician named Dr. Martha Lepow got me — as a high school student — involved in her crusade to end lead poisoning in children. I knocked on doors, collected blood and urine samples and paint chips, and using the results, mapped out lead in neighborhoods. Armed with the data, Dr. Lepow pushed to change standards and laws to better protect children's health from lead.

We've learned so much since then. Today, we know that there is no healthy lead level in a child's blood. We also know now that there is a lot we can do to help kids who have been exposed to lead. Quality health care, good parenting, early childhood education and healthy

food help counter some of the effects of lead. I'm hopeful that working together, we can put these in place for the people of Flint.

We're making progress. Not only are federal experts supporting state and local officials in identifying the problem's size and scope, but we also are helping make and execute a plan to mitigate short- and long-term health effects of lead exposure.

To help, EPA is testing water in the distribution system and in homes to determine lead and chlorine levels. Chlorine keeps bacteria from spreading. EPA is making this information available to the public so Flint residents know what's in the water and can see progress. EPA also is testing water before and after it comes through filters to see how well filters are working. Preliminary tests are encouraging and show that filters are working well.

To help meet the health needs of people impacted by lead, CDC is working with county and state health departments to determine the number of children exposed to lead in Flint to ensure that children who should be screened are getting screened.

The USDA's Food and Nutrition Service is working with families in the Special Supplemental Nutrition Program for Women, Infants, and Children to provide ready-to-feed formula which doesn't need to be mixed with water.

USDA also is providing additional grant funding to help affected schools purchase more fresh fruits and vegetables high in calcium, iron and Vitamin C because these foods can help children exposed to lead.

If you live in Flint, you can help your family. Use water filters until this is over, and clean the aerator in your faucet. If you have young kids, consider having them tested for lead. Add fresh fruits and vegetables to your family's diet, and do the things we know will help them grow up healthy and strong. If you know someone in Flint, spread the word about these important steps.

Finding a solution to the water crisis is the first part of rebuilding a healthier, more vibrant community. Doing so requires more than the resources of any single government agency — county, state or federal. Civic and faith-based organizations, businesses and neighbors will need to work together with government agencies and with families toward a common goal: recovering as a stronger community.

I imagine there are students in Flint who could benefit from getting out of the classroom and engaged in their community like I did as a high school student. Get them involved in Flint's recovery, too. Drawing on the talent and energy of every member of the community can help end this crisis faster and have a lasting positive effect: building a stronger, more resilient city, not just now but far into the future.

Talking Points: Flint, Michigan Water Contamination
February 13, 2016 @ 9 a.m.

Daily Numbers

Reported at 8 p.m. on February 12, 2016

As of February 13, 2016, the following commodities were requested by and provided to the state of Michigan in support of the response to the emergency conditions resulting from contaminated water in the city of Flint.

- 1,937,844 liters of water
- 136,964 water filter replacement cartridges
- 40,000 water and pitcher filters

Major Disaster Declaration/Full EM Denial

- Governor Snyder's January 20, 2016, appeal for a major disaster declaration for contamination and damage to the public water system in the City of Flint was denied on January 22, 2016. After review, FEMA determined that this event does not meet the statutory definition of major disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

  - *IF ASKED:* To qualify for a "major disaster" declaration there must be a natural catastrophe or, regardless of cause, a fire, flood or explosion which causes damages of significant severity and magnitude to warrant a declaration. FEMA's assistance is intended to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage and loss by the natural catastrophe, fire, flood or explosion. It was determined that the presence of lead in the Flint drinking water was not caused by a natural catastrophe, or by a fire, flood or explosion, so it does not qualify for a major disaster declaration.

- FEMA's assistance remains limited to what the President authorized in the Emergency Declaration on January 16, 2016. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration. The portions of the Emergency Declaration not granted can be appealed by the Governor.

- The decision means that the state can continue to work directly with other federal agencies and those agencies can provide assistance through their own authorities.

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and the Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

HHS as Federal Response Lead

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- Assistant Secretary for Preparedness and Response Dr. Nicole Lurie will lead this effort, supported by HHS Acting Assistant Secretary for Health Dr. Karen DeSalvo, as well as two U.S. Public Health Service officers.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

- FEMA will work with the HHS team in Michigan to establish a collaborative process to best support state and local leaders with identifying the size and scope of the problem and help them develop and execute a plan to address the public health and infrastructure issues in Flint.

Emergency Declaration

- On January 14, FEMA received Governor Snyder's request for an Emergency Declaration, as well as a Major Disaster Declaration for emergency protective measures, temporary housing and repairs to homes and low-cost loans for covering uninsured loss of property, as well as other federal assistance.

- On January 16, 2016, President Barack Obama declared an emergency for Genesee County in the State of Michigan, limited to Direct Federal Assistance, as a result of the emergency conditions resulting from contaminated water in the city of Flint, authorizing FEMA to support the state in its efforts to respond to the incident.

- Under this emergency declaration, FEMA is authorized to provide emergency protective measures, Category B, limited to Direct Federal Assistance, under the Public Assistance program limited to 75 percent of the total eligible costs. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration.

IF ASKED about period of assistance through EM (90 days):

- FEMA's emergency assistance is designed to be supplemental and temporary in nature. FEMA, and our partners in other federal agencies, will be working closely with the state, county, and city officials to support those officials in the development of medium and longer term solutions to this problem.

- The state may submit a request to extend the current 90 day period of assistance established by the declaration, providing a valid reason that the extension is necessary.

If ASKED about the $5 million cap on assistance

- When the amount of federal assistance for an emergency declaration exceeds $5 million, FEMA is required to notify Congress.

Other Federal Agency Assistance To-Date

- U.S. Health and Human Services

    - The Department of Health and Human Services (HHS) Office of the Assistant Secretary for Preparedness and Response (ASPR) is working to identify vulnerable Flint residents who may not be able to travel to obtain filters and water testing kits. They are also working with the Centers for Medicare and Medicaid Services (CMS) to provide critical information needed for city responders to locate vulnerable residents and to help focus the city's outreach efforts.

    - HHS-funded health care centers in the area are offering free lead testing for their patients and are reaching out to patients to make them aware of the free testing. Exposed children will receive ongoing monitoring while they are health center patients. Health centers also are providing bottled water at their facilities and are assisting patients in obtaining bottled water or water filters in coordination with county-wide efforts.

    - HHS is helping educate residents who use HHS programs and services, such as Head Start programs and programs that serve seniors. In addition, HHS-funded local agencies on aging and community partners are reaching out to seniors and grandparents raising grandchildren to help them find water and filter distribution sites and to provide homebound residents with assistance in obtaining and installing filters.

    - The Centers for Disease Control and Prevention (CDC) is currently providing technical assistance to the Michigan state health department to assess lead exposure especially in homes with children. CDC also has provided recommendations on educational interventions for children affected by lead.

- U.S. Environmental Protection Agency

    - In mid-October, the EPA established a Flint Safe Drinking Water Task Force comprised of EPA scientists who are internationally recognized experts in the field of lead in drinking water. The EPA Task Force is providing technical assistance to the Michigan Department of Environmental

Quality and the City of Flint to implement corrosion control treatment and to develop school and residential sampling protocols.

- EPA is also conducting an audit of the Michigan Department of Environmental Quality (MDEQ) drinking water program – to examine MDEQ's implementation of the Safe Drinking Water Act and related rules on lead and copper, total coliform, nitrates and ground water. This comprehensive audit will provide Flint residents and the people of Michigan with more information about MDEQ oversight of public water supplies and will identify actions that may be needed to strengthen the Michigan drinking water program.

- Housing & Urban Development

  - Flint was identified as one of six target cities in the second round of the Strong Cities – Strong Communities (SC2) White House initiative in 2014. This program focuses on enhanced Federal agency support in areas of blight reduction, public safety and economic development.

  - Discussions are ongoing between the FEMA Region 5 SC2 program lead and Department of Housing and Urban Development (HUD) staff on the Flint water crisis impacts to SC2 programs and initiatives; as well as possible opportunities for collaboration through existing federal engagement with local, county and State agencies.

  - HUD is working closely with the city on economic development and interagency coordination. They have successfully assisted the city with the purchase and installation of water filters. HUD had an existing lead hazard grant to Flint, targeted to lead paint, $325,000 of which could be used for addressing the water lead contamination. Additionally, HUD has provided a data tracking and reporting system for the State of Michigan to use in its lead investigations.

- U.S. Army Corps of Engineers

  - The FEMA Region 5 Recovery Coordinator is in discussion with the United States Army Corps of Engineers to identify possible technical assistance and/or Subject Matter Experts on public water distribution systems, and possible courses of action.

- US Department of Agriculture

  - USDA has waived requirements on potable tap water availability at school meal service, allowing schools to provide bottled water. The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) is also allowing participants to use WIC vouchers for ready-to-feed infant formula, which does not need to be mixed with water, and participants can also swap powdered formula for ready-to-feed formula.

Subject: UCG Flint Daily External Affairs Messaging Plan 2-13-16
Attachments: Daily Msg Plan for Flint Water Response_2-13-2016.pdf; Daily Msg Plan for Flint Water Response_2-13-2016.docx

Good Morning teammates. Today's UCT Flint Daily External Affairs Messaging Plan is attached and below:

FLINT WATER RESPONSE
DAILY STRATEGIC MESSAGING
Feb. 13, 2016

Key Messages

- EPA advises residents to run cold water, throughout the house, for two minutes, every morning to flush pipes.
- The safest option to protect children younger than 12 months of age, for lead and copper, is to only use bottled water for drinking water and the reconstitution of infant formula, or any other food product.
- Have your water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- The safest option for vulnerable populations including pregnant and nursing mothers, and children under six years old, is to use bottled water.
- Affected small businesses should contact the Small Business Administration (SBA) at **800-659-2955** to determine if available low-interest disaster loans can help with financial obligations.

Products for Release

- *News Releases*
  - **None**

Operational Communication Events

- *News Interviews*
  - **None**

Stakeholder Calls/Briefings/Meetings/Trainings

- **None**

Speakers Bureau IGA and Outreach Events/Activities

- **Access Community Canvass Event** @ 8 a.m. Community-wide
- **Latino Coalition Community Canvass Event** @ 12:30 p.m. 609 E. 5th Ave.

LOOKING AHEAD

UPCOMING EVENTS/ACTIVITIES

- **Surgeon General Visit:** Feb 15-16 ***tentative events**: flint healthcare provider meeting, home visits and canvassing, Town Hall with healthcare providers, community resilient meeting and community engagement forum.
- **Crisis and Emergency Risk Communications Training** via VTC, Feb. 16 @ 1pm
- **Congressional/Legislative Conference Call** Feb. 16 @ 2:30pm 1-800-320-4330, pin
- **Federal Agency Briefing** Feb 17 @11am 866-625-6066 pin
- **HHS Secretary Visit:** Tentatively Feb 18
- **Crisis and Emergency Risk Communications Training** via VTC, Feb. 18 @1pm
- **NBC25 Town Hall** Feb 29
- **EPA Public Meeting and Expo** End of Feb
- **Congressional Delegation (CODEL)** visit March 4
- **Speak Out** event with Black Caucus visit March 4

COMMUNITY (FIELD) FEEDBACK

- **TONE:**
  - Frustration (from water boil notice and underserved communities)
  - Signs of Hope (media stories covering positive businesses outlook)

- **CONCERNS:**

  - Payment for lab (blood tests) for Adults $36
  - Next level water use (laundry, pets, etc.)
  - Health-related (rash, dermatitis, dry skin, skin cancer, organ damage, infertility)
  - Quantity of resources provided to residents (water, filters, etc.)
  - Paying water bills
  - HUD complex for seniors
    - ✓ Hard time carrying water to/into homes above 1st floor
    - ✓ No room in home to store water; potential fire hazard
    - ✓ Unfamiliar with steps to get water tested

- **GAPS:**
  - Filters for showers. recyclable cartridges
  - Want to learn about more than just lead, in the water

- OPPORTUNITIES:
  - Provide Frequently Asked Question Fact Sheet
  - More Education of the Media

PLANNED MESSAGING/PRODUCTS

- CDC:
  - Infographic on mitigation of health effects of lead

- EPA:
  - NR Lead Assessment Results (2/16)
  - Sampling Results letter for homeowners
  - FAQ on Top Public Questions
  - Photo Slide Show for social media – EPA sampling steps

EMERGING ISSUES THAT MAY AFFECT MESSAGING:

- Possible need to develop Campaign/PSA to get the remaining kids tested.
- A need to re-engage the health provider community to start lead testing

- Have your water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- The safest option for vulnerable populations including pregnant and nursing mothers, and children under six years old, is to use bottled water.
- Affected small businesses should contact the Small Business Administration (SBA) at **800-659-2955** to determine if available low-interest disaster loans can help with financial obligations.

LOOKING AHEAD

UPCOMING EVENTS/ACTIVITIES

- **Surgeon General Visit:** Feb 15-16 ***tentative events**: flint healthcare provider meeting, home visits and canvassing, Town Hall with healthcare providers, community resilient meeting and community engagement forum.
- **Crisis and Emergency Risk Communications Training** via VTC, Feb. 16 @ 1pm
- **Congressional/Legislative Conference Call** Feb. 16 @ 2:30pm 1-800-320-4330, pin
- **Federal Agency Briefing** Feb 17 @11am 866-625-6066 pin
- **HHS Secretary Visit:** Tentatively Feb 18
- **Crisis and Emergency Risk Communications Training** via VTC, Feb. 18 @1pm
- **NBC25 Town Hall** Feb 29
- **EPA Public Meeting and Expo** End of Feb
- **Congressional Delegation (CODEL)** visit March 4
- **Speak Out** event with Black Caucus visit March 4

COMMUNITY (FIELD) FEEDBACK

- **TONE:**
  - Frustration (from water boil notice and underserved communities)
  - Signs of Hope (media stories covering positive businesses outlook)

- **CONCERNS:**

  - Payment for lab (blood tests) for Adults $36
  - Next level water use (laundry, pets, etc.)
  - Health-related (rash, dermatitis, dry skin, skin cancer, organ damage, infertility)
  - Quantity of resources provided to residents (water, filters, etc.)
  - Paying water bills
  - HUD complex for seniors
    - ✓ Hard time carrying water to/into homes above 1st floor
    - ✓ No room in home to store water; potential fire hazard
    - ✓ Unfamiliar with steps to get water tested

- **GAPS:**
  - Filters for showers. recyclable cartridges
  - Want to learn about more than just lead, in the water

- **OPPORTUNITIES:**
  - Provide Frequently Asked Question Fact Sheet
  - More Education of the Media

PLANNED MESSAGING/PRODUCTS

- **CDC:**
  - Infographic on mitigation of health effects of lead

- **EPA:**
  - NR Lead Assessment Results (2/16)
  - Sampling Results letter for homeowners
  - FAQ on Top Public Questions
  - Photo Slide Show for social media – EPA sampling steps

EMERGING ISSUES THAT <u>MAY</u> AFFECT MESSAGING:

- Possible need to develop Campaign/PSA to get the remaining kids tested.
- A need to re-engage the health provider community to start lead testing

Subject:	FW: State Officials To Investigate Possible Link Between Lead-Contaminated Water And Miscarriages In Flint, MI-UPDATE 21 to MMC IOI #0081-16

Sharing...

Location(s): Flint, Michigan
State officials are investigating to see whether lead-contaminated Flint River water had any effect on the rate of miscarriages in the city, said a spokeswoman for the Michigan Department of Health and Human Services.

"It's something that our epidemiologists are looking at, because we know lead can have effects throughout the life course," the spokeswoman said.

So far, the state says it's too early to tell whether the Flint water caused an increase in miscarriages. In fact, the state says nobody knows if miscarriages increased while women in Flint drank the contaminated water because statistics are not available yet.

The Centers for Disease Control and Prevention says there is "consistent evidence" that pregnant women exposed to high lead levels have a higher risk of "spontaneous abortion," or miscarriage, which is defined as the loss of a fetus before the 20th week of pregnancy.

High levels of lead can also cause physical and mental developmental problems in children, such as low birth weight.

Subject: Sharing media story: The Congressional Black Caucus Is Heading To Flint

The Congressional Black Caucus Is Heading To Flint
Tyler Tynes
Politics Fellow, The Huffington Post

WASHINGTON -- The **Congressional Black Caucus will travel to Flint, Michigan, in March** to protest the city's ongoing water crisis.

The "**Speak Out" event will allow Flint residents to tell members of Congress how their lives have been affected** by a crisis linked to environmental racism.

"What has happened in Flint should touch the heart of anyone who has compassion for others, and especially for those who care for the well-being and safety of our children," CBC Chairman G. K. Butterfield said. "The CBC was among the first to demand a thorough federal investigation of the Flint water crisis and we will be among those visiting with Flint families to further amplify the urgency of this situation."

Rep. Dan Kildee (D-Mich.), a native of Flint, helped organize the event with Butterfield, Rep. Brenda Lawrence (D-Mich.) and Rep. Keith Ellison (D-Minn.), the co-chair of the Congressional Progressive Caucus. Kildee helped mobilize support, briefing CBC members on the Flint crisis in a series of meetings.

"What is happening in my hometown breaks my heart. Resources are needed right now for Flint and the families, particularly children, who are the victims of this terrible tragedy," Kildee said in a release. "Governor Snyder, whose administration's policies created this public health emergency, has a moral obligation to help the victims of this crisis." And getting members to Flint and putting boots on the ground is important, since congressmen didn't fully understand until a few weeks ago how dire the situation is.

"Frankly, members of Congress were not aware of the problem until the last six or eight weeks. People knew there was a problem but it really didn't come up to a national recognition," Rep. Robert "Bobby" Scott (D-Va.) told The Huffington Post. "Obviously there needs to be an immediate response. There are short term and long term responses that have to be made. The health effects are permanent and long term."

The CBC has been busy this week. On Thursday, it formally announced that the caucus' political action committee would endorse Hillary Clinton for president. Clinton has courted the black vote, earning strong support from African-Americans and even holding campaign events in Flint last weekend.

Additional details about the upcoming event in Flint haven't been released, but will be in the coming weeks.

Other members of the caucus believe what happened in Flint wouldn't have happened in a more affluent community. "You can not have, in 2016, 100,000 people unable to get clean drinking water out of their [pipes]. That's unconscionable," Rep. Elijah Cummings (D-Md.) told HuffPost. "I am convinced that, you know, we have a lot of people who are very poor and who are minorities and we have people who many of them are underprivileged. If this were in a different type of neighborhood, if it were a predominately white community, this wouldn't happen. I think we would all be upset."

Subject:	sharing media story: Obama administration plans to extend Medicaid coverage to Flint victims

Obama administration plans to extend Medicaid coverage to Flint victims
Politico.com

The Obama administration plans to **extend Medicaid coverage to pregnant women and children affected by the Flint, Michigan water crisis,** senior officials told House Democrats on Friday.

During a meeting with leading House Democrats, Health and Human Services Secretary Sylvia Burwell, Assistant Secretary Dr. Nicole Lurie and Environmental Protection Agency Administrator Gina McCarthy told lawmakers they **anticipate being able to offer health care coverage to some individuals who may have consumed contaminated water in Flint.**

The Medicaid coverage would include **lead-blood level monitoring, behavioral health and nutritional support. The secretaries also told lawmakers that HHS is working with Michigan on an expedited basis.**

"Leader Pelosi appreciates the in-depth briefing this morning from the administration and is pleased that HHS is signaling their willingness to grant this Medicaid waiver for children and expectant mothers," said Drew Hammill, a spokesperson for Minority Leader Nancy Pelosi.

Republican Gov. Rick Snyder needs to formally request the coverage, but he's already signaled he intends to do so.

"We're focused on protecting the health and welfare of Flint residents, especially children and young adults who might have been exposed to lead," Snyder said previously. "We want to make sure comprehensive medical care services are available, and we hope the federal government will partner in our efforts."

Pregnant women and children are at increased risk from the lead that entered the Flint water system. It's become a major health and political issue. House Democrats have asked for new funding to help repair the city's water infrastructure and provide aid to residents who have gotten sick.

House Democrats also want Snyder to testify on the Flint water crisis but the GOP governor has declined to appear at previous congressional hearings organized by Democrats. On Friday, Snyder's office called Republicans on the House Oversight Committee and asked to appear at a future hearing.

Michigan Rep. Dan Kildee, whose district includes Flint, said Snyders' testimony will help residents move forward.

"The Governor's administration and his state-appointed emergency financial managers created this crisis and he must answer questions so that the whole truth can be found. Flint families deserve answers from the Governor and immediate solutions from the state about what is being done to make things right for the people of Flint."

There have also been calls for state officials who knew about the contamination but failed to act to face criminal charges. The Department of Justice said it will conduct an investigation.

During the meeting with House Democrats Friday, **McCarthy explained that the EPA is continuing to monitor drinking water quality and share that information with residents of Flint.**

Burwell and Surgeon General Vivek Murthy plan to travel to Flint next week. The meeting was held at Pelosi's request. Minority Whip Steny Hoyer, Democratic Caucus Chairman Xavier Becerra, Michigan Reps. Debbie Dingell, Dan Kildee, Sander Levin and others attended.

Subject:	sharing media story: Flint police chief says he's been fired by mayor

Flint police chief says he's been fired by mayor
Robert Allen, Detroit Free Press 2:48 p.m. EST February 12, 2016

Flint Police Chief James Tolbert said he was fired Friday unexpectedly. "I don't know how it came about," said Tolbert, 55, a former deputy police chief in Detroit. "With the restoration of power to the mayor, the mayor has full authority to hire and fire as she sees fit."

Tolbert said there hadn't been any problems between him and Mayor Karen Weaver, and being police chief of the city was "a really great experience." He was in the position for about two years and four months before he said Weaver told him Friday morning that he was fired. "I really enjoyed working with the outstanding officers," he said. "They do an outstanding job with limited resources."

Flint has been under an emergency manager the past few years, and under that system, the mayor's office loses power to decide who the police chief is. In Detroit, Police Chief James Craig was appointed under an emergency manager, but Mayor Mike Duggan decided to keep him in the position after the emergency management ended. WZZM13.com also reports that **Flint Fire Chief David Cox Jr. was fired.**

Tolbert has 38 years of law enforcement experience and previously worked for Detroit Police Department. He said he doesn't have plans yet for what to do next. "Of course I would've loved to see a lot of the initiatives I started all the way to fruition," he said. "That's just the way it is in the field of chiefs of police. **You are serving at the will of the mayor."**

Subject: sharing media story: Michigan governor to testify before Congress on Flint water crisis

Michigan governor to testify before Congress on Flint water crisis

By MATTHEW BLEICHER (WEYI) |Friday, February 12th 2016

LANSING, Mich. Gov. Rick Snyder **has asked for the chance to testify before the House Oversight Committee in Washington D.C.**

Previously the Republican-led committee had not invited Snyder to testify. Now, however, **Snyder is volunteering to go.** Snyder says that he wants the chance to explain how local, state, and federal governments all failed Flint. He also says in a statement that **he wants to explain the improvements he has recommended at the federal and state level to make sure this type of crisis never happens again.**

"The people of Flint have suffered because they were failed by all levels of government, and so it is understandable that there are questions at all levels of government," Snyder said in a statement sent to WEYI. "In Michigan we are learning a great deal from this crisis and I am hopeful the federal government also will use this as an opportunity to examine health and safety protections in place, assess infrastructure needs, and avoid this type of crisis in the future."

The House Committee on Oversight and Government reform has accepted Snyder's offer to testify. The committee announced that they will hold a second round of hearings, though the date was not released.

Along with Snyder, former Flint Emergency Manager Darnell Earley is also on the list to testify. Former Flint Mayor Dayne Walling, former EPA Region 5 Administrator Susan Hedman, and EPA water expert Miguel Del Toral are also on the list to testify.

Subject: FW: Draft news release: EPA Updates Flint Response Website with Lead Assessment Results

Sharing...

All,

Here is a draft release EPA plans to send today about our lead assessment results. Please let me know if you have any edits or if this is ok with your office.

EPA Updates Flint Response Website with Lead Assessment Results

FLINT, MICH. – Today, the U.S. Environmental Protection Agency is releasing preliminary results of lead sampling at Flint residences, as well as an interactive map of sampling results. The map is available at www.epa.gov/flint.

EPA's lead sampling effort is intended to determine how much lead is in the drinking water collected from the sinks of homes suspected of having lead service lines and to assess the performance of corrosion control treatment over time. Corrosion control helps to treat pipes so lead does not get into the water.

EPA scientists took a series of samples to collect all of the water in the pipes between the kitchen faucet and the street. At each residence sampled, the results EPA is posting show how much lead is found in the samples and where it is originating from in the plumbing system. Personal identifying information is removed prior to data being posted and data will be shared directly with homeowners immediately upon receipt.

The samples will help EPA determine where the lead is coming from within a home's plumbing (for example, from pipes in the house versus from the lead service line leading into the home). EPA will compare results from ongoing sampling events to assess the performance of corrosion control treatment over time.

In addition to the residential lead assessment, several other EPA sampling efforts are planned or underway in Flint. This includes testing to confirm that lead-removal filters are working as expected in homes with high lead levels. Early results show that filters are effective at removing lead from the water. The agency continues to recommend that Flint residents use NSF-certified filters in their homes.

EPA is also testing to confirm adequate levels of chlorine in the system. Chlorine is used to disinfect drinking water systems and prevent the growth of viruses and bacteria such as E. coli. In drinking water systems, the presence of chlorine is normal.

Each effort involves collecting samples at locations throughout the city, and submitting them for analysis in an EPA laboratory. Preliminary data is being made available at www.epa.gov/flint in order to provide the public with information as samples are processed. Preliminary data should be considered raw, unprocessed information. EPA will post final data as soon as its quality has been assured. Typically, the rigorous quality control procedures used to finalize sampling data can take up to 15 days to complete.

EPA and the Centers for Disease Control and Prevention agree that there is no safe blood lead level in children. Lead is harmful to health, especially children. Until sufficient information is gained to determine when the water is safe to drink, EPA and CDC recommend that people only consume bottled or filtered water. Use only bottled water for water, food and formula given to babies under 1 year old. Bottled water is the safest choice for pregnant or breastfeeding women and kids under 6 years of age.

EPA recommends that residents, if they have concerns, contact their local health provider to have themselves or their children tested for lead. EPA will continue to work with the city of Flint to monitor drinking water quality and to ensure the public is receiving up to date information. To learn more about the health effects of lead in water visit http://www.cdc.gov/nceh/lead/tips/water.htm.

EPA also recommends that residents run cold water throughout the house for 2 minutes every morning to flush pipes and clean their aerators every week. For more information, please visit our website at www.epa.gov/flint.

Media Monitoring Report
February 12, 2016

Summary: Boil water advisory confuses residents. Governor Snyder releases water-crisis departmental emails. State kept mum on Legionnaires' disease concerns. EPA administrator grilled by congressman. Governor wants Flint residents to call him. New York Times reports on challenges faced by Flint. As crisis impacts Flint's real estate market, CNN asks home owners looking to move to contact the network.

Below is a sampling of the coverage.

Boil water advisory adds to confusion over how to make Flint tap water safe to drink
February 11, 2016 *Lindsey Smith Michigan Radio*
http://michiganradio.org/post/boil-water-advisory-adds-confusion-over-how-make-flint-tap-water-safe-drink#stream/0 *(for full story, click on link)*

If you live in Flint, it can be really hard to figure out what you should and should not do with your tap water. The messages from officials, scientists and non-profit groups sometimes conflict with one another and they've changed over time.

This week, an unfortunate turn of events has made an already confusing situation even worse.

Michael Hood started going door-to-door in Flint last month. The wilderness guide from the Ann Arbor area was part of a newly formed group called Crossing Water, and they wanted to see what they could do to help people in Flint.

"Most folks have heard that the water is not safe to drink, but not everybody," Hood said.

It might seem crazy, Hood says, with the Internet and 24-hour cable news, that some people in Flint still don't know about potentially dangerous levels of lead in their drinking water. But, Hood points out, there are a lot of people who can't afford Internet or cable, who don't speak English, who cannot read.

"They've heard from word of mouth that the water is bad, so they're just boiling the water thinking that's going to be OK. There are also a lot of immigrants from South and Central America, and when the water is bad down there they know to boil the water because it's usually a bacterial issue or something in the water," he said.

But when you boil water that's got high levels of lead in it, the lead doesn't go away. It just gets worse, more concentrated, more dangerous to drink.

Hood was dumbfounded that no official agency seemed to be addressing this common misconception. So his group jumped into action, working with some billboard companies, TV and radio stations, to get the message out: Boiling your water will not remove lead.

But then, on Tuesday, there was a major water main break in Flint. That caused the water system to lose pressure. That means there was the potential for dangerous bacteria to get into the system. So the city put out a notice, warning people to boil their water.

"It really does send a contrary message, and that message has to get out there unfortunately, but it really has sent a confusing message to the public. So people are really scared. People are really confused and they don't know what to do," Hood said.

Public officials acknowledge it is a confusing time.

"People were concerned again, 'oh my gosh, is it safe to shower or bathe?' So you can imagine the confusion. I certainly can understand the confusion," said Dr. Eden Wells. She's the chief medical executive for the Michigan Department of Health and Human Services.

Until the boil water advisory is lifted, Wells says people in Flint should boil their tap water after it's gone through a certified lead filter. The state put out a list to help clear up the most commonly asked questions about the advisory.

Once the boil water advisory is lifted, people will need to replace the cartridges on their lead filters. A state health department spokesman says there are "plenty" of replacement filter cartridges available. Residents can get filters and cartridges for free at distribution centers across the city.

Governor Snyder releases departmental emails related to Flint water crisis
February 12, 2016 *WXYZ*
http://www.wxyz.com/news/view-governor-snyder-releases-departmental-emails-related-to-flint-water-crisis

WXYZ) - This morning, Governor Rick Snyder's office released departmental emails relating to the Flint water crisis.

"By making the information easily accessible, everyone can review it and take what they need, and then we can all focus and work together on solutions, healing and moving Flint forward," Snyder said in a press release.

The emails include correspondence from the Department of Environmental Quality, Department of Health and Human Services, Department of Treasury, Department of Technology, Management and Budget, and Department of Agriculture and Rural Development.

On verge of Flint Legionnaires' alert, state stayed mum
February 12, 2016 *Chad Livengood and Karen Bouffard, The Detroit News*
http://www.detroitnews.com/story/news/michigan/flint-water-crisis/2016/02/12/flint-legionnaire-disease-emails/80265486/ *(for full story click on link)*

At least six Environmental Protection Agency officials discussed in late March Genesee County's Legionnaires' disease outbreak and a suspected link to Flint's change in water sources — and were told the state would alert the public.

No pronouncements about the outbreak were made then. Two months later, a Michigan health official's email to the Centers for Disease Control and Prevention declared "the outbreak is over." The disease would kill four more people in the summer and fall and would not be brought to the public's attention until the next year.

When the public was informed, the words came from Gov. Rick Snyder during a Jan. 13 press conference. Snyder maintained he had heard about the Legionnaires' outbreak two days earlier.

Thomas Poy, the ground and drinking water branch chief of EPA Region 5, told those on the March phone call that "the state is currently figuring out a communication-with-the-public plan," according to notes from Jennifer Crooks, the EPA's Michigan drinking water program manager.

A trove of more than 24,000 pages of Flint-related documents among local, state and federal officials released by Snyder's administration reveals EPA Midwest water experts held the March 26 conference call to discuss the Flint-area Legionnaires' disease outbreak. Among those contributing was Region 5 water expert Miguel Del Toral, who at the time expressed concerns about the lack of corrosion controls and the likely risk of lead contamination in Flint's drinking water.

DETROIT NEWS
Regulators dismissed dissenters on Flint crisis

Del Toral discussed the possibility that "extensive flushing" of Flint's stagnant water by residents may have caused bacteria-fighting chlorine residual in the pipes to be washed away, leaving the pipes susceptible to Legionella bacterial growth, according to notes from the conference call.
Darren Lytle, an expert in Legionella from the EPA's Cincinnati office, told his colleagues that his previous research showed that changes in water chemistry can cause disruption and "destabilize" water piping systems. Lytle "thought the incidence of Legionella must be fairly extensive for the (Genesee County Health Department) to notice and study," according to the conference call notes.

Lytle offered to come to Flint and study the origins of the pneumonia-causing bacteria, records show.

But state and county officials appear to have never followed through with the offer for help, an EPA official said. As it did in Flint's lead contamination, the agency stayed publicly silent about the threats to public health in Genesee County while state and local officials debated how to approach the problem, records show.

DETROIT NEWS

DEQ official: Staffers earn raises for Flint work

"There wasn't any follow-up with them asking us to do anything," EPA spokeswoman Monica Lee said Thursday. "There wasn't any specific ask there, we were just kind of put on alert that they were looking at Legionnaires' disease."

Numbers alarmed EPA

Notes from the March 26 conference call suggest EPA officials had been briefed by state officials about what they were planning to do. Genesee County contacted the EPA about the outbreak in February 2015, and shared data on cases that had occurred by then. According to Lee, the agency was so alarmed by the numbers they immediately contacted the CDC to alert them.

Disclosure of the outbreak fell to state and local health officials as well as the CDC, Lee said.

"CDC has the lead on this. It's not EPA at all," Lee said.

CDC spokeswoman Kristen Nordlund on Thursday said the agency offered its epidemiologic expertise and laboratory support, but it required a direct state request.

"Based on the available information, CDC felt that a comprehensive investigation was warranted and offered to further assist Michigan," Nordlund said in an email. "In this case, Michigan felt that they had the skills and resources needed to perform the investigation themselves."

EPA's Crooks emailed those notes on March 30 to Michigan Department of Environmental Quality water regulators Stephen Busch and Mike Prysby, state employees who oversaw Flint's water. Busch is currently suspended.

"(EPA's) Tom Poy said that we are laying a foundation now with resources for when the state goes public with the issue of Legionella," according to the notes.

The Legionnaires' disease outbreak that infected 87 Flint-area residents and caused nine deaths from April 2014 through November was not made public until Jan. 13, when Snyder announced them in a hastily called press conference in Detroit. Snyder had learned of the outbreak two days before, an aide said.

In January, state health officials finally requested support from CDC's Legionella experts 11 months after it was offered, Nordlund said.

.....

Midland congressman grills EPA administrator on Flint water crisis

February 11, 2016 *Mark Tower | mtower@mlive.com The Saginaw News*

http://www.mlive.com/news/saginaw/index.ssf/2016/02/congressman_questions_epa_admi.html#incart_2box_news_flint *(for full story click on link)*

WASHINGTON, D.C. — The U.S. congressman who represents much of central and northern Michigan took a hard line with federal officials during a congressional hearing regarding the crisis over Flint's water supply.

After a decision was made for the city to switch from Lake Huron to the Flint River as its primary water source, corrosion resulted in elevated levels of lead leaching into Flint's water. The number of infants and children with elevated lead levels in their blood nearly doubled citywide.

U.S. Rep. John Moolenaar, R-Midland, asked some difficult questions of Environmental Protection Agency Administrator Gina McCarthy during a House Agriculture Committee hearing Thursday, Feb. 11.

The exchange was captured on a video of the hearing posted to Moolenaar's YouTube channel. Here is a text version of what was said:

"My understanding is the EPA was aware, as of February of last year, that corrosion controls that would have prevented lead from leaching through the pipes was not being implemented," Moolenaar said. "That there were serious concerns about, you know, raised levels of lead. In fact, above the enforcement action level of the EPA. The EPA was aware of that and did nothing. We're almost a year later, and the EPA did nothing. Can you explain to me why that happened?"

McCarthy, who has previously criticized Gov. Rick Snyder's administration and Flint's appointed emergency managers for what happened in Flint, responded by pointing the finger again at state officials.

"I believe in April of last year was when the state actually told us and corrected a mis-impression they gave us that corrosion control was not happening," she said. "EPA vigorously, from that point forward, recommended to the state that they take action to get corrosion control up and running. Were there other things we could have done or should have done? That is the focus of our attention at this point. But we did oversee this and recommend the appropriate steps for the state to take."

Moolenaar pointed out that a Flint resident reached out to the EPA about elevated lead levels in February 2015.

"If you knew this in February, why was there no action taken for almost a year?" he asked.

McCarthy said state officials gave EPA officials "an indication" that corrosion control was occurring to prevent lead leeching and that the agency "relied on that."

"We clearly did everything we could to get the state of Michigan to get everything they were supposed to do," she said. "When I became aware and engaged, that is when you saw an enforcement action taken."

.....

Snyder to Flint: Pick up the phone. It's your governor
February 12, 2016 *Matthew Dolan, Detroit Free Press*
http://www.freep.com/story/news/local/michigan/flint-water-crisis/2016/02/11/snyder-flint-pick-up-phone-s-your-governor/80237222/ *(for full story click on link)*

Fears over eating produce from gardens in Flint fed by suspect water. The plight of children who drank city water but now live elsewhere. A lack of information about how to survive when lead-tainted water still flows from taps.

Those were the revelations that Gov. Rick Snyder said he gleaned Thursday from talking to Flint residents by phone during a virtual town hall about the city's drinking water crisis.

"We've learned something from every time we've done these calls," Snyder told listeners during the 45-minute call.

Phoning Flint residents and patching them in directly to the second-term Republican governor is one of the ways his administration has tried to push out information about the crisis directly to those affected.

It's also driven by a strategy hatched inside a besieged administration anxious to boost Snyder's flagging profile. The governor has taken a number of political hits after Snyder said his administration failed to protect city residents properly from lead leaching from corroding water pipes. Other critics also blame a lack of oversight by federal regulators and city officials.

Snyder's popularity and job approval numbers plummeted as a result of the Flint drinking water catastrophe, with 69% of those surveyed in late January saying the governor has handled the crisis poorly. Several prominent Democrats, including presidential candidate Bernie Sanders, a senator from Vermont, have called for Snyder's resignation.

The governor has rebuffed those calls, saying he is dedicated to restoring safe water for the city and aiding those affected by the crisis, including children who may have consumed lead-tainted water.

Flint health professionals to coordinate lead-related care
February 11, 2016 *AP*
http://www.clickondetroit.com/news/flint-water-crisis/flint-health-professionals-to-coordinate-leadrelated-care

FLINT, Mich. - A health information organization is giving $250,000 to connect all health care providers serving residents affected by the crisis caused by lead in Flint's drinking water.

Grand Rapids-based nonprofit Great Lakes Health Connect said Thursday its donation aims to electronically link all Flint-area hospitals and doctors' offices so they can provide better, more timely care.

The plan is to securely store patient information that's immediately accessible to health care providers.

If consumed, lead can cause developmental delays, behavioral problems and learning disabilities.

The money will pay for costs associated with connecting roughly 40 doctors' offices, building the database and train those using it.

Great Lakes Health Connect is working with the area's major health systems and Greater Flint Health Coalition.

Kasich to visit MSU next Monday
February 12, 2016 *WILX.com*
http://www.wilx.com/news/localnews/headlines/Kasich-To-Visit-MSU-Next-Monday-368566711.html

More presidential candidates are scheduled to campaign in Michigan as the March 8th primary inches closer.

Next up...Ohio Governor John Kasich.

The republican candidate will speak at Michigan state university next Monday.

The "College Republicans" and State Representative Tom Leonard will host him at The Union from three until 3:30.

Chelsea Clinton: Flint challenge will last generations
February 11, 2016 *Leonard N. Fleming, The Detroit News*
http://www.detroitnews.com/story/news/michigan/flint-water-crisis/2016/02/11/chelsea-clinton-flint-challenge-will-last-generations/80250460/ *(for full story click on link)*

Flint — Former first daughter Chelsea Clinton echoed Thursday the sentiments of her mother and Democratic presidential hopeful Hillary Clinton and expressed concern about the lead contamination of Flint's drinking water during a stop here.

All of Flint's nearly 9,000 children age 6 and under are assumed to have been exposed to the lead-contaminated water and to need health, nutritional and educational services to decrease the possible damage.

"This is a challenge that will last generations," Chelsea Clinton said about Flint water crisis after she toured the children's clinic at Hurley Medical Center.

Clinton met with Dr. Mona Hanna-Attisha, the Hurley pediatrician who discovered elevated lead levels in Flint children in August after the city began drawing water from the Flint River in April 2014. Her findings eventually prompted the state to admit there was a lead exposure problem and switch back to Detroit's water system.

Bernie Sanders May Soon Visit Flint
February 10, 2016 *Maggie Haberman NY Times*
http://www.nytimes.com/live/new-hampshire-primary-2016-election/bernie-sanders-may-soon-visit-flint/

MANCHESTER, N.H. — Senator Bernie Sanders's campaign is in discussions about visiting Flint, Mich., in the coming days, ahead of a March 6 debate there against his rival, Hillary Clinton, a person briefed on the discussions said.

It is unclear when a visit would take place, although a date as early as next week has been discussed. The person briefed on the discussions was not authorized to speak about them.

Michael Briggs, a spokesman for Mr. Sanders, declined to comment.

The discussions about a possible visit come just after Mrs. Clinton visited Flint, an overwhelmingly African-American city that has been ravaged by lead poisoning. The primary fight is about to move to South Carolina, a state where the Democratic electorate is heavily African-American. Mrs. Clinton's aides believe she will fare well in the state.

.....

U.S. Senate talks on Flint aid bill remain deadlocked
February 11, 2016 *Melissa Nann Burke, The Detroit News*
http://www.detroitnews.com/story/news/michigan/flint-water-crisis/2016/02/11/flint-senate/80232862/ *(for full story click on link)*

Washington — Senate Democrats remain deadlocked with Republicans on reaching an assistance package for Flint a week after blocking a vote to advance the bipartisan energy bill over the issue.

Both sides say talks on the Flint amendment are continuing. But the chamber has moved on to debating legislation on customs enforcement and North Korean sanctions, as lawmakers prepare to break for a week.

U.S. Sens. Debbie Stabenow, D-Lansing, and Gary Peters, D-Bloomfield Township, are seeking a Flint funding package of up to $600 million, largely to help with replacing and rebuilding water infrastructure that has been corroded and is leaching lead into the drinking water supply.

The senators say each time they have reached a potential agreement with Republican senators in negotiations on how to pay for, or offset, the package's cost, it's rejected by the larger GOP caucus. The senators pledged to continue to negotiate in good faith until they secure an aid package.

"Every time we think we have something, the rug has been pulled out from under us after hours and hours and hours of work," Stabenow said Thursday on the Senate floor. "Frankly, I feel like Charlie Brown when Lucy is pulling the football away, time after time, after time."

Peters said he shares Stabenow's frustration.

"We've had some very positive conversations, but as we have those positive conversations, it seems it unravels right when we are very close to making it a reality," he said Thursday on the floor. "Why is it that members of the United States Senate can't step up for all Americans who are suffering?"

Stabenow said one exception was last weekend's work with Sen. Jim Inhofe, the Oklahoma Republican who chairs the Committee on Environment and Public Works, on a "fully paid-for proposal" to help Flint families as well as the opportunity for communities across the country needing aid for water infrastructure projects. They haven't been able to get a vote on the proposal, she added.

Peters explained that one suggestion to pay for the package would have eliminated a tax incentive permitting deductions for donations of property intended for easements for golf courses. The Joint Committee on Taxation has estimated that eliminating the deduction would generate $272 million over 10 years.

"Some Republicans have argued for this very elimination of this very tax deduction, and that would pay for infrastructure. It would pay to help the children of Flint," Peters said. "I know some of our colleagues on the other side of the aisle want to protect the wealthy donors to golf courses, but I believe the children of Flint are more important."

A spokesman for Senate Energy Committee Chairwoman Lisa Murkowski, R-Alaska, noted that last week Murkowski offered an amendment to the energy bill to provide up to $550 million to Flint, including $50 million that would be made available immediately and the rest of which would have to be paid back.

Stabenow objected to the amendment, saying it would not provide enough aid up front to Flint. It would rely largely on loans through the nascent Water Infrastructure Finance and Innovation Act Fund, which is months away from being set up.

"It is unclear to us why it is not seen as an acceptable response," Murkowski spokesman Mike Tadeo said.

"The Energy Committee has been and remains unable to agree to add anything to our broad, bipartisan energy bill that directly and deliberately violates the rules of the Senate, the Constitution or increases deficit spending. Doing so would prevent the bill from ever reaching conference — and, among other consequences, prevent aid from reaching the people of Flint, Michigan."

Stabenow is concerned that there's not the "resolve" among senators to help the families of Flint, noting that some Republicans are making floor remarks to "attack the people you're supposed to be negotiating with" and insisting that Flint's water crisis is a local issue.

The federal Disaster Relief Fund contains $6 billion to $7 billion, and Michigan is asking for a "small withdrawal from that account" for the families and children of Flint, Stabenow said.

.....

Why It Won't Be Easy or Cheap to Fix Flint's Water Crisis
February 11, 2016 *Julie Bosman New York Times*
http://www.nytimes.com/2016/02/12/us/why-it-wont-be-easy-or-cheap-to-fix-flints-water-crisis.html?_r=0 *(for full story click on link)*

During his annual budget address on Wednesday, Gov. Rick Snyder of Michigan laid out a series of sweeping proposals to help Flint cope with its contaminated water supply.

He proposed spending $195 million on bottled water, filters, infrastructure, nutritional assistance, education and health care. Above all, he said, he will make Flint's water safe again.

"We must solve the Flint water crisis," Mr. Snyder, a Republican, said in the State Capitol in Lansing, as protesters chanted in the background.

But those solutions will not come quickly or easily. Four months after state officials admitted that the water flowing through taps in Flint's homes had been contaminated with lead and other chemicals since 2014, they are still scrambling to work with local leaders and form a plan to undo the damage.

Lead can cause long-term health and developmental issues in children, and the effects are irreversible.

Details on water crisis march with Jesse Jackson, Greg Mathis in Flint
February 10, 2016 *Roberto Acosta | racosta1@mlive.com The Flint Journal*
http://www.mlive.com/news/flint/index.ssf/2016/02/details_on_national_march_with.html

FLINT, MI -- Several organizations are expected to come together Friday, Feb. 19 for a mile-long national march organized in part by Rev. Jesse Jackson to highlight the push for clean water in Flint.

Pastor Alfred Harris, president of the Concerned Pastors for Social Action Group, said the march will begin at 11 a.m. Friday, Feb. 19 at the Metropolitan Baptist Tabernacle, 930 E. Myrtle Ave.

The roughly one-mile march will run from Myrtle, up Industrial Avenue, east on Stewart Avenue, and end at the Flint Water Plant, 4500 N. Dort Highway.

Jackson announced during a Feb. 2 press conference on a class-action lawsuit seeking $150 million to help refund water bills and repair infrastructure that a "major national march" was in the works.

Organizations involved in the planned march include Jackson's Rainbow PUSH Coalition, the Michigan Legislative Black Caucus, and the Concerned Pastors group.

Jackson has appeared at several recent events in Flint, including a Jan. 17 rally during which he called it a "disaster zone" and a "crime scene."

He said he's been in contact with Doctors Without Borders to have every home in the city tested and is working on a "broad-based coalition" for action that includes the concerned pastors and Water You Fighting For? groups.

Jackson is expected to be in attendance at the march, along with Judge Greg Mathis who made a Jan. 30 stop at Quinn Baptist AME Church to chat with resident about their legal rights concerning the water crisis.

Harris previously said the group is partnering up with Jackson who will be with them "shoulder to shoulder" in the days ahead.

"What we want to do, we want to go from bottled water to pipes to restoration," he said. "We want the citizens of Flint to be restored in all aspects of their lives."

.....

Flint water impacts real estate market
February 12, 2016 *Dave Spencer (WJBK)*
http://www.fox2detroit.com/news/flint-water-crisis/89076361-story

The trickling effects of the Flint water crisis may be filtering into the housing market.

Agents are now arming themselves with pamphlets directing questions about lead in the water to local experts and performing water tests, which weren't conducted prior to the water crisis.

The biggest obstacle is perception and misinformation, according to Jim Miller with RE/MAX of Flint.

"You just want to inform them right off the bat so they know and you know," he said. "We don't want to give out bad information."

As far as the numbers go, there are 388 active listings in the city, which Miller said is a usual amount. He added that the average sales price has risen to $19,000 for a single-family home.

But renters stuck in a lease may be feeling the weight of the lead-filled water a bit more. While some live in apartment complexes that advertise that they don't use Flint water, other renters in the area, who are likely on fixed incomes, can't move away from the situation.

However, since a state of emergency has been declared, Fannie Mae will do what it can to help those seeking a home loan in Flint.

.....

There are a lot of empty homes in Flint, Michigan
February 11, 2016 *Kathryn Vasel. CNN*
http://money.cnn.com/2016/02/11/real_estate/cities-with-most-vacancies/

Nationwide, the average vacancy rate is 1.6%, according a report from RealtyTrac. But in Flint, Michigan, the rate is nearly five times higher at 7.5%--the highest in the nation.

"That is pretty worrisome," said Daren Blomquist, vice president at RealtyTrac. "The long-term impact is blight that spreads from neighborhoods and ripples out to the larger community ... it ultimately drags on home prices and values."

In Flint, one in 14 houses are vacant, Blomquist noted. But in five zip codes close to the city's center, the problem is much worse: one in five houses are empty.

"It's a downward spiral as vacancy rates rise," he said. "A homeowner who is trying to sell their house might have to end up walking away, and that adds to the problem."

Flint is under a state of emergency after it was discovered that the city's water supply had been contaminated with unsafe levels of lead.

"I would suspect there is not a lot of demand in buying or renting in the city at this point," Blomquist said.

The city's housing market was hit hard during the Great Recession, but prices were up in 2015. Now there are signs that the water crisis could be straining the market's recovery. The median home price fell by 8% in December alone, the biggest drop in the country.

The situation isn't much better an hour south of Flint. Detroit's vacancy rate is 5.3%.

On a national level, the majority of vacant homes are investment properties. Less than 5% of vacant homes are in foreclosure or are bank owned, according to Blomquist.

Here are the cities with the highest vacancy rates:

Flint, Michigan: 7.5%
Detroit, Michigan: 5.3%
Youngstown, Ohio: 4.4%
Beaumont-Port Arthur, Texas: 3.8%
Atlantic City, New Jersey: 3.7%

Cities with lowest vacancy rates:

San Jose, California: 0.2%
Fort Collins, Colorado: 0.2%
Manchester, New Hampshire: 0.3%
Provo, Utah: 0.3%
Lancaster, Pennsylvania: 0.3%

Are you a homeowner in Flint, Michigan looking to move? We'd like to hear from you. Tell us your story and you could be featured in an upcoming story on CNNMoney.

Media Monitoring Report
February 11, 2016

Summary: Flint water crisis becomes political blame-game. Protesters call for Gov. Snyder's resignation. Emails claim Gov. Snyder ordered DEQ to withhold Flint lead test results. More than 400 Flint residents to

receive at-home water test training. SBA opens help center for small businesses affected by Flint's water crisis. State institute training new pipe layers to help Flint. Flint fire department says water is damaging its trucks.

Below is a sampling of the coverage.

Flint fuels finger pointing, political maneuvering
February 11, 2016 *Kathleen Gray and Todd Spangler, Detroit Free Press*
http://www.freep.com/story/news/local/michigan/flint-water-crisis/2016/02/11/flint-fuels-finger-pointing-political-maneuvering/80016758/ *(for full story click on link)*

As the Flint water crisis evolves from ongoing public health crisis to the search for a costly solution, the situation also has taken on the air of a football game, a political football game, that is.

"Some of the actions seem to be more about the people making the statements rather than helping the people of Flint," said Lansing political consultant Tom Shields, of Marketing Resource Group. "It's tough not to be cynical because it has become such a political football."

The crisis over lead-tainted water has become fodder for local, state and national politics where Democrats are assigning blame to the Republican-led administration of Gov. Rick Snyder and Republicans are pointing the finger at Democrats in Flint as well as the Environmental Protection Agency under the control of President Barack Obama.

"Politicians using an issue for their own election? Oh My God, that would be new," said political consultant Robert Kolt sarcastically. "It's a convenient narrative for any politician to run on the Flint water crisis for whatever angle it might take."
"You would want politicians with high visibility to have this on their radar, but you don't want them to take advantage of it for their personal gain," said Detroit political consultant Mario Morrow, who worked for both Govs. Jennifer Granholm and Snyder. "I would hate to think that people are using this for personal gain. And that will be proven if they can deliver on some promises instead of just continuing with political rhetoric."

As the U.S. House Oversight Committee last week opened the first hearing on Flint, Democratic members — particularly U.S. Rep. Brenda Lawrence, D-Southfield — vociferously demanded that Snyder should appear before the committee, even though it would have been exceedingly rare for Congress to try to force a governor to appear and Snyder ultimately wasn't invited to testify.

Flint mayor Karen Weaver talks with Congressional Delegates after they met with Flint families affected by the water crisis. Salwan Georges, Detroit Free Press
Rep. Sheila Jackson Lee, center, talks to the media. Behind her are, from left, Rev. Reginald G. Flynn, Rep. Dan Kildee and Rep. Sander Levin. Elected officials met with Flint families affected by water crisis during Neighborhood Meetings. Salwan Georges, Detroit Free Press
The hearing played out as expected, with Democrats going after Snyder's handpicked successor at the Michigan Department of Environmental Quality, Keith Creagh, and Republicans firing questions at an acting deputy assistant administrator at the EPA, Joel Beauvais, neither of whom had direct knowledge or involvement in what happened in Flint, but who both took their lumps. But committee Chairman Jason Chaffetz, R-Utah, and other members of the committee still had to be credited with taking an approach that, while questioning why the EPA didn't move faster, did not let the state officials off the hook, either.
"This is a failing at every level," Chaffetz said. "The public has a right to be outraged. Outrage doesn't even begin to cover it."
But if the partisanship in the committee room was at least somewhat tempered, that wasn't the case on the floor of the U.S. Senate, where Democrats blocked, for the moment at least, further consideration of a long-awaited energy modernization act, with U.S. Sens. Debbie Stabenow and Gary Peters, Michigan Democrats, demanding it include hundreds of millions to rebuild Flint's damaged water infrastructure.

Republicans offered a compromise — $50 million upfront and more in low-interest loans to follow — but Democrats didn't bite, hijacking the bill on two key votes and ensuring that negotiations would continue. Stabenow said the move was necessary to ensure that adequate funding is put in place to respond to the crisis but Senate Majority Whip John Cornyn of Texas said it was more about "embarrassing" Republicans.

The heated political atmosphere is unlikely to cool down anytime soon either, with presidential candidates being asked about it, the Senate debate over funding far from over, Chaffetz calling witnesses to be deposed, the House Energy and Commerce Committee planning a hearing in March, congressional Democrats holding their own hearing and almost-daily questions for White House press secretary Josh Earnest on the subject.

For the residents of Flint, the national attention on the crisis, even if politically motivated, means only one thing: a solution may come quicker.

After hearing Clinton speak on Sunday, Flint resident James Shelton shrugged off criticism of her focus on the city. "I'll tell you this, I just put a check in the mail for Hillary. I'm a politics freak, so I think this is a good thing."

Carolyn Harper of Flint said she can understand the criticism but she believes Clinton is "going to do what she says. Put her and the mayor (Flint Mayor Karen Weaver) together and they're going to get something done."

And state Rep. Al Pscholka, R-Stevensville, said requests from Snyder for more state money for Flint will reveal the motivations of his colleagues in the Legislature.

"I just think it's really time for people to look in their souls and ask 'Do you want to be a servant, not to gain something for yourself, and in many ways, not to cover your own tail,'" he said.

.....

Protests as Governor lays out budget
February 11, 2016 *FOX 47 News*
http://www.fox47news.com/news/local-news/protests-as-governor-lays-out-budget

Governor Rick Snyder wants to spend nearly $200 million to help Flint, but it was difficult for him to get that message across in his budget presentation on Wednesday thanks to a loud group of protesters.

Dozens of protesters waited outside the House Appropriations room while the Governor was speaking. Many were Flint residents chanting things like, "Snyder's got to go" and "fix the pipes."

The Governor couldn't help but hear those messages inside the committee room, with the protesters audible chants.

For Flint resident Desiree Duell, getting more funding is only part of the solution.

"What would really satisfy me is if Governor Snyder resigned," Duell said. "He needs to be gone so we can rebuild trust with our government."

Governor Snyder said he's doing his best to make Flint a priority. In his presentation the Governor asked lawmakers to approve $195.4 million in one-time funding for Flint.

"What we tried to be was responsive to the areas we're hearing from flint residents, concerns about the water, concerns about the kids, concerns about the long term of the community," Snyder said.

That funding would come from the state's surplus and would pay for things like replacing pipes and nutritional programs. Snyder is also banking on more funding from Washington.

"I hope the federal government is rolling up its sleeves and diving into this like we are," Snyder said. "We need to stand up for the people of Flint and get them better results."

Duell says that doesn't cut it for her, and she wants to see more of a focus on what the state will be doing for Flint in the future.

"We need a very specific plan on how this money is going to be used and long term needs for the residents of Flint," she said. "We don't need some one time gimmick."

A decision Duell doesn't think the governor will make.

.....

Snyder ordered DEQ to withhold Flint lead test results, emails claim
February 10, 2016 *Gary Ridley | gridley@mlive.com*
http://www.mlive.com/news/flint/index.ssf/2016/02/snyder_ordered_deq_to_withhold.html#incart_special-report *(for full story click on link)*

FLINT, MI – Gov. Rick Snyder and other state officials allegedly withheld lead testing results from county health officials while they worked to find ways to present the information to the public, according to emails obtained by The Flint Journal.

Local health officials say the governor and the Michigan Department of Environmental Quality withheld lead testing results, including results from a Flint elementary school, while the agency discussed the best way to present the information to the public.

But, Snyder's office said Wednesday, Feb. 10, that information was shared quickly after testing and denied withholding any information

Emails obtained this week from the Genesee County Health Department through the Freedom of Information Act show growing frustration on the county's part as it attempted to obtain information from the DEQ.

"MDEQ explained that the Governor prohibited releasing all Genesee County lead results until after the press conference," wrote Jim Henry, Genesee County's environmental health supervisor.

Henry, in an interview Wednesday, said county officials didn't learn of the test results until they were distributed following a press conference.

"They should have alerted the schools and they didn't," Henry said.

Gov. Rick Snyder announced Oct. 8 during a press conference that three buildings within the Flint School District tested above the federal limits for lead in the drinking water, including results of more than six times the federally allowable level at Freeman Elementary School.

The announcement included a plan to buy nine months of water from the Detroit Water and Sewerage Department to end the city's reliance on the Flint River as its drinking water source.

An additional $4 million was requested for efforts to address immediate lead issues, including further testing of children in Flint school buildings where the high lead rates were discovered.

Following the announcement, a meeting was held Oct. 16 with DEQ officials, including then drinking water chief Liane Shekter Smith, and Henry, according to the emails.

According to an Oct. 18 email Henry wrote to county Health Officer Mark Valacak summarizing the meeting, DEQ apologized for not releasing school lead results in a timely manner and claimed they were ordered by Snyder to delay the release.

The governor's office, when asked Wednesday denied they ordered the DEQ to delay releasing any information, but said the start of testing and announcement were only six days apart.

"The email seems to reflect someone summarizing a discussion at a meeting, and we are unsure what actually was said there," Snyder Press Secretary Dave Murray said. "We do know that the testing began on Oct. 2, it took some time to test 13 buildings, action was taken immediately and the Governor held a press conference in Flint to discuss the results on Oct. 8. There was no delay during that time period.

"People were quickly informed of the results in the schools, and that action on the fixtures with elevated levels was taken immediately."

The DEQ announced three days after the meeting that Shekter Smith was being reassigned. She was eventually suspended and ultimately fired Feb. 5.

More than 400 Flint residents to receive at-home water test training
February 10, 2016 *Roberto Acosta | racosta1@mlive.com The Flint Journal*
http://www.mlive.com/news/flint/index.ssf/2016/02/more_than_400_flint_residents.html#incart_2box_news_flint

FLINT, MI – More than 400 homes spanning Flint's nine wards have been targeted as "sentinel sites" where residents will be trained to test water from their faucets for the state to provide lead level results.

Gov. Rick Snyder announced the plan Wednesday, Feb. 10, that includes state Department of Environmental Quality employees and licensed plumbers heading to the swath of homes for the program.

"Their diligence in taking scientific samples from their home's water system is crucial in helping us decide the right time to declare when Flint neighborhoods have safe drinking water," said Snyder in a statement.

A look at the more than 400 'sentinel sites' where Flint residents will receive training from the state Department of Environmental Quality and licensed plumbers to conduct their own water testing. *Courtesy Photo*

The U.S. Public Health Service Commissioned Corps officers is aiding the Genesee County Health Department in the clearance of a months-long backlog of blood lead levels results for Flint residents.

A group of 13 officers have cataloged roughly 800 blood tests, mainly from children, and mailed out test results with educational material, as well as the information being sent to the state.

"We are proud to stand shoulder-to-shoulder with community leaders and local health officials to support the community in response to this crisis," said Dr. Karen DeSalvo, HHS Acting Assistant Secretary for Health, who oversees the USPHS Commissioned Corps.

Capt. Phil Farabaugh, who is leading the USPHS strike team efforts in the city, said "It's an honor to serve the residents of Flint" and they are ready to provide technical skills to the community.

Snyder recently announced the hiring of 50 city residents as part of a partnership with Orchards Children's Services and Flint YMCA's Safe Places Program to conduct water testing.

Help center opens for small businesses impacted by Flint's water crisis
February 10, 2016 *Dominic Adams | dadams5@mlive.com The Flint Journal*
http://www.mlive.com/news/flint/index.ssf/2016/02/help_center_opens_for_small_bu.html

FLINT, MI – Businesses impacted by Flint's water crisis will have a place to go in the city for assistance.

The Small Business Administration opened the Flint Business Recovery Center on Wednesday, Feb. 10 to aid entrepreneurs and business owners who are seeing their bottom line affected by the elevated lead levels in the water here.

A location inside the Oak Business Center, 2712 Saginaw St., will be open from 8 a.m. to 5 p.m., Monday through Friday through Feb. 25, according to a statement from U.S. senators Gary Peters and Debbie Stabenaw and Congressman Dan Kildee.

Flint's water is currently in the national spotlight after elevated blood levels were discovered in some Flint children after the city changed its water source from Lake Huron water purchased from the Detroit water system to the Flint River in April 2014, a decision made while the city was being run by a state-appointed emergency manager.

State regulators never required that the river water be treated to make it less corrosive, causing lead from plumbing and pipes to leach into the water supply.

Even though the city reconnected to the Detroit water system in October, local officials have advised Flint resident not to drink city water unless they are using a lead-clearing filter.

"Small businesses in Flint, especially restaurants, bars and others in the hospitality industry, have seen a drop off in customers and revenue due to contaminated water even as they have installed filtration systems to ensure their products are safe," Peters said in the statement. "The water crisis has exacerbated the economic hardships already facing the Flint community."

The Small Business Administration approved an economic injury disaster loan declaration for Genesee County and the city of Flint, which will allow loans for businesses adversely affected by the city's water crisis, the statement said.

Eligible businesses and non-profits can apply for up to $2 million in long term, low interest loans that can be uses on capital needs like making payroll or replacing inventories.

"I applaud the swift action by the Obama Administration to support small businesses in Flint," Kildee said in the statement. "I've met directly with Flint business owners who have shared with me their daily struggles to keep the doors open through this ongoing crisis. These federal loans will help put Flint on a road to recovery."

Loan applications are accepted until Nov. 7.

"There is no question that the Flint water crisis has hurt the bottom lines of our small businesses," Stabenaw said in the statement. "The new SBA recovery center will give them a place to get the help they need to get through this crisis and prosper."

Training New Pipe Layers
February 11, 2016 *Joy Wang WILX.com*
http://www.wilx.com/news/localnews/headlines/Training-New-Pipe-Layers-368409501.html

For more than 20 years, Jeff Steiss replaced pipes in Flint.

"Huge problem," said Steiss, an instructor at the Michigan Laborers' Training and Apprenticeship Institute. "Huge problem. The infrastructure in Flint, good share of it is 80-100 years old."

That's why he's spending the rest of his career training other laborers to fix the problem.

"The scope of the job is very unclear right now," said Steiss. "I mean originally they talked about replacing all the main line. That's not really feasible to do at once."

Especially without enough workers. The institute offers an 80 hour training course to teach laborers to lay pipes.

"They're learning how to put water main together," said Lynn Coleman, the Director of the institute. "Fire hydrants, different things, and all the different intricacies that go along with it, along with keeping them safe while they're working in the trench."

The Michigan Laborer's Training Center is also partnering with other groups, including Michigan Works! and Flint Youthbuild to get enough workers trained to get the job done in Flint.

"To assure that the city of Flint residents get a chance to be trained and be safe when they go out there to work for a contractor and do work on their own backyard," said Coleman.

Plus the local labor union already has 200 workers ready to get started.

"We have the knowledge," said Daniel Husted with Laborers' Local 1075. "We have the people trained to do that. The weather you know we can't predict what the weather will do."

One of many factors that could slow the process down.

"They're going to have to do a lot of planning," said Steiss. "A lot of planning and a lot of research."

To get clean water to Flint as quickly as possible.

"The faster you want to do it, the more money it's gonna cost," said Steiss.

And the more people it's going to take.

.....

Flint water damaging city fire trucks
February 11; 2016 *WSYM-TV*
http://www.fox47news.com/news/local-news/fint-water-damaging-city-fire-trucks

The sooner those water lines are replaced in flint the better. That's according to the city's fire department.

The chief believes the city's corrosive water is damaging its fire trucks and says if the problem gets any worse it could be devastating.

"At just a year and a half old, Flint Fire Engine 61 is the newest in the fleet. The intake valve, we see rust around it. We also have rubber that seals it. Those are being destroyed by whatever is in the water."

It was brought to his attention about a week ago by emergency equipment mechanic Mike Taylor, who took a photo of one of the fittings. Taylor says the photo shows pieces of Flint's water line getting caught in the pumps.

"That's a brand new $462,000 pump that we're talking about."

Fire Chief David Cox, Jr. says this type of corrosion shouldn't be happening for several years.

"We actually called the manufacturers of three of our fire trucks and they actually gave us some ideas of how to combat that a little bit, but what's done is done and we're hoping it doesn't get to a point where we have to replace pumps."

Which is what happened to the pump of a much older truck sent to Cox a couple months ago.

An invoice provided to the department estimates 65,000 dollars in repairs. Right now, the goal is to prevent that from happening to more engines by flushing out water lines weekly.

So far, Cox says there hasn't been much of an impact on the department's ability to fight fires.

"We test those pumps every day and if they're not working right, when we test them in the morning, then they won't be in service."

People at the fire department are trying to figure out how the water is affecting it's fire suppression systems.

Those are the sprinklers seen in businesses and some homes that go off when there's a fire.

The chief says they're calling around to sprinkler companies to see if they're doing any inspections.

Subject: Draft Release for Water Main Break

FYI – to go out in a few minutes. I will send the link when it's posted.

EPA Statement of Flint Water Main Break, Boil Water Order

U.S. EPA is working closely with the City of Flint and Michigan Department of Environmental Quality on the recent water main break and boil order. After the water transmission line broke on Feb. 9, EPA coordinated with CDC, ATSDR and other members of the Flint Water Response Unified Coordination Group to determine what additional steps residents should take given the current issues with lead in drinking water.

Flint residents have been advised to either drink bottled water or to drink boiled water that has been already been filtered through an NSF-certified filter rated to remove lead. Use only bottled water for water, food and formula given to babies under 1 year old. Bottled water is the safest choice for pregnant or breastfeeding women and kids under 6 years of age.

The city has isolated the broken main, and following established protocols, has checked residual chlorine levels in the drinking water system and conducted two rounds of microbial testing. The first round of microbial testing found no contamination. If the second round is also clean, the city will lift the boil order, although residents should still drink only filtered or bottled water because of the ongoing lead issue.

Especially in winter, water main breaks are common in Flint and other cities with older infrastructure. When these breaks occur, cities follow established protocols to notify residents and to ensure the safety of drinking water.

Talking Points: Flint, Michigan Water Contamination
February 18, 2016 @ 10 a.m.

Daily Numbers

Reported at 10 a.m. on February 18, 2016

As of February 18, 2016, the following commodities were requested by and provided to the state of Michigan in support of the response to the emergency conditions resulting from contaminated water in the city of Flint.

- 1,982,844 liters of water
- 168,256 water filter replacement cartridges
- 40,968 water and pitcher filters

Major Disaster Declaration/Full EM Denial

- Governor Snyder's January 20, 2016, appeal for a major disaster declaration for contamination and damage to the public water system in the City of Flint was denied on January 22, 2016. After review, FEMA determined that this event does not meet the statutory definition of major disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act.
    - *IF ASKED:* To qualify for a "major disaster" declaration there must be a natural catastrophe or, regardless of cause, a fire, flood or explosion which causes damages of significant severity and magnitude to warrant a declaration. FEMA's assistance is intended to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage and loss by the natural catastrophe, fire, flood or explosion. It was determined that the presence of lead in the Flint drinking water was not caused by a natural catastrophe, or by a fire, flood or explosion, so it does not qualify for a major disaster declaration.
- FEMA's assistance remains limited to what the President authorized in the Emergency Declaration on January 16, 2016. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of

this declaration. The portions of the Emergency Declaration not granted can be appealed by the Governor within 30 days.

- The state of Michigan can continue working to meet any unmet needs with support from voluntary groups, the private sector, other agencies and state programs that can provide assistance through their own authorities.

- FEMA will support HHS and other agencies as needed to identify and mobilize the capabilities of our federal partners.

HHS as Federal Response Lead

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- Assistant Secretary for Preparedness and Response Dr. Nicole Lurie will lead this effort.

- FEMA will work with the HHS team in Michigan to establish a collaborative process to best support state and local leaders with identifying the size and scope of the problem and help them develop and execute a plan to address the public health and infrastructure issues in Flint.

Emergency Declaration

- On January 14, FEMA received Governor Snyder's request for an Emergency Declaration, as well as a Major Disaster Declaration for emergency protective measures, temporary housing and repairs to homes and low-cost loans for covering uninsured loss of property, as well as other federal assistance.

- On January 16, 2016, President Barack Obama declared an emergency for Genesee County in the State of Michigan, limited to Direct Federal Assistance, as a result of the emergency conditions resulting from contaminated water in the city of Flint, authorizing FEMA to support the state in its efforts to respond to the incident.

- Under this emergency declaration, FEMA is authorized to provide emergency protective measures, Category B, limited to Direct Federal Assistance, under the Public Assistance program limited to 75 percent of the total eligible costs. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration.

IF ASKED about period of assistance through EM (90 days):

- FEMA's emergency assistance is designed to be supplemental and temporary in nature. FEMA, and our partners in other federal agencies, will be working closely with the state, county, and city officials to support those officials in the development of medium and longer term solutions to this problem.

- The state may submit a request to extend the current 90 day period of assistance established by the declaration, providing a valid reason that the extension is necessary.

If ASKED about the $5 million cap on assistance

- When the amount of federal assistance for an emergency declaration exceeds $5 million, FEMA is required to notify Congress.

FOR IMMEDIATE RELEASE
February 18, 2016
Release #: 38

Michigan.gov/flintwater has key information in American Sign Language and four other languages

FLINT, Mich. – To ensure all communities in Flint have the information they need, the State of Michigan continues to add to its inventory of communication materials. Key informational materials related to the Flint water crisis are available in Spanish, Mandarin Chinese, Arabic and Hmong, as well as American Sign Language (ASL).

"It is vital that all Flint residents, regardless of their native language, have access to the information and resources they need during this emergency," said Governor Rick Snyder.

The Michigan School for the Deaf is located in Flint, and the area is home to a large population of individuals who are deaf. The State is working on making critical information available in American Sign Language, including this video.

"Flint is home to a number of individuals who may not be proficient in English, including a significant community of people who use American Sign Language," said Agustin Arbulu, Director of the Michigan Department of Civil Rights. "It is critical that they have access to the same important information we're providing to everyone, in a form they can understand."

After consulting with community leaders and the Michigan Department of Civil Rights, the state worked with certified translators to have key documents translated to ensure important information is available to those with no or limited English comprehension.

Translated documents are available in the "Alternative Language Resources: Español - 中文 - العربي" area of www.michigan.gov/flintwater. Further, our federal partners have resources available in Spanish, traditional Chinese, simple Chinese, Vietnamese, and Korean available at www.epa.gov/flint.

For additional information related to the response in Flint, visit www.michigan.gov/flintwater.

FOR IMMEDIATE RELEASE
Feb. 18, 2016

Gov. Rick Snyder made the following statement today with regards to U.S. Department of Health and Human Services Secretary Sylvia Burwell visiting Flint:

"I'm encouraged by Sec. Burwell's visit to Flint today, and hope she brings with her the news that the federal government will soon approve my request to expand Medicaid for Flint children up to age 21 and pregnant women. Expanded health care and nutrition services are essential for Flint residents, and we continue to work in partnership with the federal government to find ways we can work together during this critical time in Flint's recovery."

Gov. Rick Snyder: Process under way to locate and replace lead water pipes in Flint

Flint-based engineering firm to track service lines, identify high-priority areas

FLINT, Mich. – Work on replacing high-risk lead service lines in Flint is under way as state and city leaders collaboratively focus on removing pipes in priority areas while analyzing the city's water pipe network to maximize efficiency, Gov. Rick Snyder said.

The state today came to an agreement with Rowe Professional Services, a Flint-based engineering firm, to update recent analysis of water pipes in the city and boost efforts to protect the health and safety of city residents.

"We're committed to the people of Flint, and the top priority is ensuring people have access to safe water," Snyder said. "We need to make sure people will be able to once again turn on the tap and be able to use what comes from it. We're immediately targeting high-risk, high-hazard homes to help those families. Together, we can focus on longer-term solutions."

Retired National Guard Brig. General Michael McDaniel is assisting in coordinating the efforts between the city of Flint, the Lansing Board of Water and Light, state and federal agencies and other stakeholders.

"Flint Mayor Karen Weaver wants this work to be completed as quickly as possible to protect Flint residents," McDaniel said. "We've been working in partnership to identify the areas that need to be

addressed immediately and remove lead pipes, bringing peace of mind to Flint families and make sure this never happens again."

Snyder said a supplemental budget request approved unanimously in the Legislature last month includes money for utilities and can be used to survey Flint's underground network of pipes. Ongoing water testing is revealing where there are high-risk, high-priority areas that should be addressed most quickly. Teams are moving with great urgency to locate where lead water pipes are located and focus on high-risk areas.

"We need to find out which of the city's pipes are made of lead and have lead soldering, and are the most critical to address immediately," he said. "We're hiring Flint residents and training them to assist with that process, working together to make the community safer."

A supplemental budget request to the Legislature includes $25 million that can be used for water infrastructure. Snyder said other resources can potentially be tapped for additional funds to replace pipes.

The $25 million was included in a $195 million package of immediate and long-term support for Flint and its families that Snyder unveiled as part of Wednesday's budget presentation, focusing on health, education and infrastructure.

The budget request includes money for other infrastructure needs, including water testing, inspecting and replacing fixtures in schools and daycare facilities, prioritizing infrastructure repairs and staying connected with Detroit water.

Also included is money for food and nutritional programs, health-related programs and funds to bring relief to residents who had been paying for water they could not use.

Numbers did not change for today. Bullet points have been revised.

Talking Points: Flint, Michigan Water Contamination
February 17, 2016 @ 9 a.m.

Daily Numbers

Reported at 9 a.m. on February 17, 2016

As of February 17, 2016, the following commodities were requested by and provided to the state of Michigan in support of the response to the emergency conditions resulting from contaminated water in the city of Flint.

- 1,982,844 liters of water
- *168,256 water filter replacement cartridges*
- 40,968 water and pitcher filters

Major Disaster Declaration/Full EM Denial

- Governor Snyder's January 20, 2016, appeal for a major disaster declaration for contamination and damage to the public water system in the City of Flint was denied on January 22, 2016. After review, FEMA determined that this event does not meet the statutory definition of major disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act.
    - *IF ASKED:* To qualify for a "major disaster" declaration there must be a natural catastrophe or, regardless of cause, a fire, flood or explosion which causes damages of significant severity and magnitude to warrant a declaration. FEMA's assistance is intended to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage and loss by the natural catastrophe, fire, flood or explosion. It was determined that the presence of lead in the Flint drinking water was not caused by a natural catastrophe, or by a fire, flood or explosion, so it does not qualify for a major disaster declaration.
- FEMA's assistance remains limited to what the President authorized in the Emergency Declaration on January 16, 2016. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of

this declaration. The portions of the Emergency Declaration not granted can be appealed by the Governor within 30 days.

- The state of Michigan can continue working to meet any unmet needs with support from voluntary groups, the private sector, other agencies and state programs that can provide assistance through their own authorities.

- FEMA will support HHS and other agencies as needed to identify and mobilize the capabilities of our federal partners.

HHS as Federal Response Lead

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- Assistant Secretary for Preparedness and Response Dr. Nicole Lurie will lead this effort.

- FEMA will work with the HHS team in Michigan to establish a collaborative process to best support state and local leaders with identifying the size and scope of the problem and help them develop and execute a plan to address the public health and infrastructure issues in Flint.

Emergency Declaration

- On January 14, FEMA received Governor Snyder's request for an Emergency Declaration, as well as a Major Disaster Declaration for emergency protective measures, temporary housing and repairs to homes and low-cost loans for covering uninsured loss of property, as well as other federal assistance.

- On January 16, 2016, President Barack Obama declared an emergency for Genesee County in the State of Michigan, limited to Direct Federal Assistance, as a result of the emergency conditions resulting from contaminated water in the city of Flint, authorizing FEMA to support the state in its efforts to respond to the incident.

- Under this emergency declaration, FEMA is authorized to provide emergency protective measures, Category B, limited to Direct Federal Assistance, under the Public Assistance program limited to 75 percent of the total eligible costs. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration.

IF ASKED about period of assistance through EM (90 days):

- FEMA's emergency assistance is designed to be supplemental and temporary in nature. FEMA, and our partners in other federal agencies, will be working closely with the state, county, and city officials to support those officials in the development of medium and longer term solutions to this problem.

- The state may submit a request to extend the current 90 day period of assistance established by the declaration, providing a valid reason that the extension is necessary.

If ASKED about the $5 million cap on assistance

- When the amount of federal assistance for an emergency declaration exceeds $5 million, FEMA is required to notify Congress.

Hi Jackie,

I'm having email problems. Can you send this to the ESF-15 group?

Below is a press release EPA would like to send out today that is similar to the Feb. 4 press release we sent to reaffirm that filters are working. We have more results that confirm that the filters work. If there are any comments or edits, please send to Rachel.

> *EPA Continues to Recommend Flint Residents Use Filters*

FLINT, MICH. -- The U.S. Environmental Protection Agency today released additional sampling results showing that lead-removal filters are working as expected in Flint homes with high lead levels, confirming results released earlier. The agency continues to recommend that Flint residents use NSF-certified filters in their homes.

EPA visited homes where high levels of lead contamination were previously detected in sampling by the Michigan Department of Environmental Quality. At each home, EPA sampled raw water (without filter), water from resident's existing filters (in-use), and water from new NSF-certified filters to determine the levels of lead in the water. EPA also re-visited some homes with high lead levels it sampled previously, and re-tested water from their filters. The latest results show that NSF-certified filters are effective at removing lead from the water. EPA shares results directly with the homeowners immediately upon receipt, and removes all personal identifying information prior to posting the data online.

The safest option for vulnerable populations, including pregnant and breast-feeding women and children six years old and under, is to use bottled water. Everyone else should use filtered water for cooking, drinking and their pets. EPA recommends the following tips for residents to reduce their exposure to lead in water sources:

- Residents should be sure to use filters according to the instructions and replace filter cartridges before they expire.
- Residents should clean out their faucet aerators by unscrewing the aerator at the tip of the faucet, and removing any debris that has collected there. Aerators are located at the tip of household faucets and have a screen to collect particles and sediment. Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.

Michigan to pay for lead tests in Flint

WKYT – February 15, 2016

FLINT (WJRT) - (02/15/16) - The Michigan Department of Health and Human Services is asking Genesee County to stop charging Flint residents for testing their blood for potential toxic lead.

Department Director Nick Lyon says the state wants to cover the $36 tests for anyone in Flint who doesn't have health insurance or whose insurer doesn't cover the tests.

A private lab under contract with the county Health Department has been directly billing residents.

State's chief medical officer: Flint Legionnaires' probe followed "standard practice"

Michigan Radio – February 15, 2016, By Sarah Cwiek

Michigan's top doctor says the state's investigation into Flint's deadly Legionnaires' disease outbreak followed "standard public health practice."

The state's Chief Medical Officer, Dr. Eden Wells, says that investigation "was very consistent ... with any outbreak investigation that's been conducted."

Wells' comments come at a time when publicly released emails from state officials, including some with the Department of Health and Human Services, raise serious questions about state agencies' response to an unfolding public health crisis.

Among those questions:

- Why did MDHHS officials fail to follow up with the Centers for Disease Control, after federal experts expressed concern about an initial Flint-area Legionnaires' outbreak in 2014?
- Why did state health communicable diseases director Jim Collins declare the Legionnaires' outbreak "over" in June 2015, the same week Genesee County health officials confirmed two more cases, followed by another disease spike?
- Why wasn't the public notified about the outbreak until January, 2016 — when Gov. Snyder disclosed it, along with a potential link to Flint's larger water contamination crisis?

Wells, who started her job with the state in May 2015, said the state chose not to call on federal resources — even after the EPA, notified of the outbreak by county health officials in February 2015, alerted the CDC — because state agencies believed they had "all the resources needed" to investigate.

"It was my understanding ... that the number of epidemiologists, the resources needed for the assistance to the local health department, were already provided at the state level," Wells said.

Wells said it's her "sense that the CDC was involved quite early on, in conjunction with the state" in the outbreak investigation. She said it's standard for federal agencies to wait for a formal state-level request before getting involved.

"They [CDC] cannot come into the state unless actually invited by the state epidemiologist," said Wells.

Nonetheless, after a federal disaster declaration, CDC teams are now on the ground in Flint. Wells said they're identifying "high-risk buildings," and developing a model "prevention toolkit" that can be used to prevent future Legionnaires' outbreaks.

The CDC teams are also investigating the source of Flint's outbreak. The legionella bacteria is usually found in water systems.

At least as early as Jan. 2015, county health officials suspected that Flint's April 2014 switch to the Flint River for its water supply contributed to the outbreak, though that was just one of several hypotheses.

More recently, nationally recognized water and legionella experts have suggested the water switch as a likely source of the outbreak.

Wells admits there's a strong "association" between the two. But not all the Legionnaires' cases seemed to fit that hypothesis, and there were other confounding factors that made pinpointing the source difficult.

And because legionella bacteria from patients were never matched to an environmental source, Wells said there's still no "clear evidence" that municipal water caused the outbreak — and there may never be.

"They couldn't get the evidence to say to pull the trigger to say 'We know it's the water,'" said Wells.

"Because believe me, I think if anybody had that evidence — if we had environmental samples that showed there was legionella of the same strain as what was in the patients at that time — then absolutely, that would have rolled out very, very differently."

As for the delayed public notification, that fell largely to the county health agency, according to Wells.

She said the state did recommend that a public health notice go out, but in terms of linking the outbreak to the public water supply, "I do not see that there was any evidence that led to that level, where people could comfortably make that type of public notification."

And as for the state's June 2015 conclusion that the Legionnaires' outbreak was "over," Wells said that was a hard call to make.

"You can either call this one outbreak with two waves, or two separate outbreaks," said Wells, noting that 45 cases were reported in 2014, with a time gap before another 42 cases appeared in 2015. This is a typical pattern for Legionnaires' cases, which usually spike in the summer months.

"To say the first wave or outbreak was over ... is reasonable," Wells said, adding that the state's report on the initial outbreak led to "enhanced surveillance" and recommendations that helped officials recognize and counter the second wave of cases.

Internal emails between county, state, and federal health officials tell a somewhat different story.

After the MDHHS' Collins declared the outbreak "over," Genesee County environmental health supervisor Jim Henry emailed colleagues that "The MDCH Legionella Executive Summary seems rather bold and premature, i.e. "The outbreak is over; the last reported case occurred in March, 2015." In fact, the county had been notified of two possible cases that week, Henry said.

Henry also bemoaned a lack of state help in pinpointing the source of the outbreak: "I have concerns about MDCH's [Michigan Department of Community Health] lack of ability to assist with the collection of environmental samples. CDC has offered their consultants and possibly to cover lab costs. I do not have the same assurance with MDCH."

In November 2015, when Genesee County finally submitted a Legionnaires' report to the CDC's National Outbreak Reporting System (NORS), Henry sent an email praising colleagues' efforts, adding: "The state agencies restricted our actions to the point of interference and inhibition."

Wells said she can only speak for her agency, but has seen "no evidence, at least in my mind, that there was any block between having essentially a federal, state, and local approach to this [investigation.]"

In emails, state and county officials point fingers at each other for lapses and alleged stonewalling that occurred throughout the investigation. Now, they continue to do so publicly.

But Janet Stout, a Legionnaires' expert at the University of Pittsburgh, has said that in her opinion, "responsibility lies at the feet of the state."

"Based on the outcome of all of this, people could have done much more, except the people at the Genesee County Health Department. They went down every potential avenue to raise concern about the uptick of Legionnaires' disease," Stout told the Detroit News.

Local officials have also raised concerns about the possibility of another outbreak this year, especially if Flint once again switches water suppliers — this time, from Detroit water to the Karegnondi Water Authority.

Wells said that with the help of the CDC, preventive measures should be in place at high-risk locations, and "enhanced surveillance for legionella will be ongoing."

Expert: Quick state action might have saved Flint lives

The Detroit News – February 15, 2016, By Karen Bouffard

Quick state action to involve federal agencies and inform the public might have shortened an outbreak of Legionnaires' disease in the Flint area and saved lives, a national expert on the respiratory disease told The Detroit News.

Michigan turned down help from the U.S. Environmental Protection Agency and the Centers for Disease Control and Prevention, according to a Detroit News analysis of more than 24,000 pages of emails released by the Snyder administration and Genesee County.

State agency officials also tried to steer Genesee County health officials away from examining the municipal water system as a potential source of the Legionella bacteria that sickened 87 people between May 2014 and November 2015, killing nine.

Legionnaires' disease is caused in warmer months by a bacteria in warm, fresh water that leads to a severe form of pneumonia and can be found in large plumbing systems, hot tubs and air-conditioning units.

The state's handling of the crisis contrasts markedly with how New York state officials dealt with a Legionnaires' outbreak last summer in the Bronx, said Dr. Janet Stout, a research associate professor with the University of Pittsburgh who assisted with both outbreaks. The Bronx spate included 133 cases, resulting in six deaths.

"New York City and New York state were very, very aggressive in terms of doing the testing and informing the public, and as a result they were able to contain the outbreak very quickly," said Stout, president of Special Pathogens Laboratory, which conducted water testing in the Bronx.

The outbreak lasted about a month — from July 8 to Aug. 3 — and was traced to a cooling tower on top of a hotel, according to New York City.

"As a result, they were able to contain the outbreak very quickly," Stout added. "If you don't make that progression of doing the testing of the environment, the cases continue — which is what we saw in Flint."

A study by state of Michigan epidemiologists of 45 Flint area cases that occurred from June 2014 through March 2015, resulting in five deaths, found that 16 cases were associated with McLaren Regional Medical Center in Flint.

Stout, who was hired by McLaren as a consultant, concluded Legionella bacteria likely entered the hospital through brown water from the municipal water system. But the cache of emails between state, county and federal health agencies documents the state's reluctance to search the water system for clues or relinquish control of the scientific investigation.

EPA officials were so alarmed after they were contacted by Genesee County health officials in February 2015 that they immediately alerted the CDC to the outbreak in Flint, EPA spokeswoman Monica Lee told The News. Both agencies offered on-the-ground expertise. Michigan didn't follow through by requesting the agencies' assistance, which is required for federal participation.

"Michigan felt that they had the skills and resources needed to perform the investigation themselves," said CDC spokesman Kristen Nordlund.

On June 4, 2015, Jim Collins, the state health department's communicable disease division director, issued a memo declaring, "The outbreak is over" — a contention immediately disputed by Genesee County Environmental Health Supervisor Jim Henry, noting there were two confirmed Legionnaires' cases that week.

"That memo put the brakes on things that were going forward, including getting the CDC to come to Flint," Stout said. "That was a critical error because that help would have done a lot of things, including sampling of the water system for Legionella.

"There was no plan for systematic assessment by systematically culturing for Legionella, and testing for Legionella is not something that most departments do very well. A very important opportunity was missed to get that help."

Legionella samples weren't available from Flint area Legionnaires' patients, so it's impossible to make the "strain match" required "to make a definitive statement on environmental causation," according to the Michigan Department of Health and Human Services.

Making the public aware of the outbreak would also have been beneficial because early treatment can stem the progression of Legionnaires' disease, Stout said.

"The first spike was in summer of 2014, and they were still trying (to grasp the situation)," she noted. "The second spike occurred in summer 2015, and certainly at that time it should have been clear to public health officials that this was real and not to wait to inform people.

"Certainly a warning about the potential health effects of this water would have been very helpful. Early diagnosis and early treatment with the appropriate antibiotic results in a better disease course, and reduced mortality."

In mid-January, a task force appointed by Gov. Rick Snyder predicted another surge in Legionnaires' this spring when the weather warms and recommended the city's health care facilities extend disinfection safeguards to all air treatment and cooling systems.

Help refused

When asked on Jan. 19 why the state health department didn't alert the public sooner, director Nick Lyon said experts linked multiple Legionnaires' cases to a single hospital and thought the problem might be resolved if the hospital took appropriate actions.

"It's important for us to inform the public," Lyon said. "It's also important for us to stay open-minded and ensure that we're really checking any sort of possibility for Legionnaires', including anything that could be associated with the water source change."

Legislation introduced in the Senate, but not yet voted on, would require the EPA to directly inform citizens of a public health risk from unsafe water due to lead if the state doesn't act within 15 days of learning about the risk. The bill was co-authored by Michigan Democratic Sens. Debbie Stabenow and Gary Peters. Similar legislation already passed in the U.S. House.

"It is shocking that state health officials turned down federal support nearly a year ago to study the outbreak in Legionnaires' disease," Stabenow said in an email to The News on Sunday. "This is yet another extremely disturbing example of the state failing to meet its responsibility to protect the public health of families in Flint.

"As investigations continue, I will continue to do everything I can to hold decision makers accountable," Stabenow added.

In the past week, the state Department of Health and Human Services contended that during the first wave of Legionnaires' disease, the Genesee County Health Department wasn't following scientific standards for investigating the outbreak and refused state help.

"I don't know if we've had a situation before where the local health department hadn't done the steps ... or taken advantage of state assistance," Geralyn Lasher, a deputy director at Health and Human Services, told The Detroit News.

'A select email'

Lasher said Genesee County also did not alert all doctors in the state about the Legionnaires' outbreak on the Michigan Health Alert Network, a state-run portal for communicating threats to public health. Instead, a handful of Flint-area doctors were told about the outbreak, she said.

"For some reason the ... Genesee County Health Department chose to send a select email to 15 individuals at the three hospitals," Lasher said.

County Environmental Health Supervisor Jim Henry said the county requested help from the state Department of Health and Human Services. Local health departments don't commonly post alerts on the state-run Michigan Health Alert Network. He questioned why the state didn't post an alert on its network.

"All this information goes into the Michigan Disease Surveillance System. They have a person at the state assigned to Legionnaires' that looks at this every day," Henry said. "Why didn't they step up?"

Keith Creagh, the new state Department of Environmental Quality director, said Thursday the nondisclosure of the Legionnaires' disease outbreak by his agency and others for months shows the need for new public reporting requirements.

"There is a reason to be thoughtful and methodical in a crisis," Creagh told The News, "but I think we have an obligation to let people know."

Stout dismissed the contention that the county was to blame for the spread of Legionnaires' disease.

"Based on the outcome of all of this, people could have done much more, except the people at the Genesee County Health Department. They went down every potential avenue to raise concern about the uptick of Legionnaires' disease," she said.

"The state was in the driver's seat, and they made it very clear to the county that they wanted to be in charge of the investigation and wanted the county to stand down in informing the CDC. Certainly the responsibility lies at the feet of the state."

Dual-eligible 101: A guide to MI Health Link's goals, problems

Crain's Detroit Business – February 14, 2016,By Jay Greene

What are dual-eligible beneficiaries?

They are people who qualify for both state-run Medicaid programs for the poor and the federally run Medicare program, which covers seniors age 65 or older and those considered disabled.

These patients are the sickest and most expensive population to care for in the nation. Most have multiple chronic diseases, and more than half require behavioral health services.

ALL SYSTEMS AREN'T GO

The Care Bridge database is supposed to seamlessly transfer patient visit information among health plans, mental health organizations and physicians for people who qualify for both Medicaid and Medicare — known as "dual-eligible" patients. The system is still a "work in progress," though, nearly one year into the three-year program. *Read story.*

What is Michigan's MI Health Link?

It is the name of the dual-eligible demonstration program approved under a 2014 contract with the Centers for Medicare and Medicaid Services. The program goes back to 2011 when Michigan was awarded a $1 million planning grant.

Michigan is now one of 14 states participating in the program serving four regions and 25 counties including Wayne and Macomb, part of southwest Michigan, and the Upper Peninsula.

What is the goal of MI Health Link?

To reduce costs, eliminate duplication of services, expand access to needed care and improve care for up to 110,000 eligible patients.

So far, 35,000 dual-eligible patients are enrolled. Statewide, Michigan has 300,000 people eligible for both Medicaid and Medicare.

How costly are dual-eligible participants?

In Michigan, dual-eligible beneficiaries represent 12 percent of Medicaid enrollment but account for 38 percent of the more than $11.2 billion in Medicaid spending, said the state Department of Health and Human Services.

Nationally, 10 million dual-eligible patients account for nearly 20 percent of all enrollees in Medicare and Medicaid but up to 40 percent of spending, which is $320 billion a year, or 9 percent of the nation's $4 trillion annual health care tab.

Michigan originally projected saving about $10 million during the three-year pilot program. That is a small percentage of the $3.6 billion the state spends taking care of the dual-eligible population. Medicare spends an additional $4.2 billion.

What services do the enrollees receive?

Medicare typically covers hospital, physician, pharmacy and some short-term rehabilitation and long-term care costs. Medicaid covers some medical, dental, pharmacy and the majority of nursing-home costs.

Lack of coordination between the two programs drives up costs and lowers quality.

How are patients receiving care in Michigan?

In 2014, Michigan received approval to implement its program, which required special Medicare permission because it wanted to maintain the historic separation of HMOs and mental health organizations.

In Michigan, the state requires the HMOs, called integrated care organizations, to contract with mental health organizations, called prepaid inpatient health plans, for behavioral health services.

For Southeast Michigan, following a bid process, six health plans and two regional mental health authorities were selected by the state for the pilot program to care for approximately 62,000 dual-eligible patients.

For Wayne and Macomb counties, the health plans are Molina Healthcare of Michigan, HAP Midwest Health Plan, AmeriHealth Michigan Inc., Aetna Better Health, and Fidelis SecureCare of Michigan Inc.

The regional mental health authorities are Detroit Wayne Mental Health Authority and Macomb County Mental Health Authority Services.

In southwest Michigan, Meridian and Aetna are the health plans and Southwest Michigan Behavioral Health is the mental health authority.

In the Upper Peninsula, the health plan is Upper Peninsula Health Plan LLC and the mental health authority is Northcare Network in Marquette.

What are the results so far?

Last month, a Government Accountability Office report concluded that Medicare needs to do a better job overseeing the dual-eligible program. Data provided so far between the states aren't comparable, making it difficult to assess whether care coordination and cost reductions are being achieved, the GAO said.

The office recommends Medicare require states to standardize core data measurements, including quality measurements, consumer surveys and care plans.

A second report, by RTI International, analyzed effectiveness of care coordination programs in California, Illinois, Massachusetts, Minnesota, Ohio, Virginia and Washington.

RTI concluded that care coordination is more costly and time-consuming than the states anticipated. For example, most states grossly underestimated costs of revamping information systems, polices and procedures.

Enrollment has been slow nationally with many patients confused about participation.

Low enrollment for dual-eligible patients frustrates providers

Crain's Detroit Business – February 14, 2016, By Jay Greene

Michigan faces lower enrollment rates and higher disenrollment rates than expected during the first year of its demonstration project to coordinate care for dually enrolled Medicare and Medicaid patients.

But its experience is similar to other 10 states that are in different stages of development, experts told *Crain's*. Four additional states have received approval and are in start-up phases.

Of Michigan's 110,000 eligible enrollees in four regions and 25 Michigan counties, including Wayne and Macomb, 34,800 have enrolled — a 32 percent enrollment rate — and are having their care managed and coordinated by seven health plans and four mental health agencies.

Besides low rates of initial enrollment, which started last May in Wayne and Macomb, another problem facing providers is the high percentage of patients opting out of the program. Dual-eligible enrollees were automatically enrolled unless they declined.

For example, total enrollment for January in Michigan was 34,184, a decline of 6 percent from 36,252 last November.

Wayne County (region 7) had 18,372 enrollees, a 6.5 percent drop from 19,641. Macomb County (region 9) had 4,185 enrollees, a 10 percent drop from 4,655, said the **Michigan Department of Health and Human Services.**

But why are people disenrolling from a program that is intended to improve their care?

Michigan hasn't studied the issue, but Massachusetts, which earlier began its dual-eligible program, found in a report that patients feared losing relationships with trusted providers. They also were worried they might face new service restrictions.

Experts in Michigan said they hear similar fears expressed by patients.

Dan Wojciak, staff attorney with the Lansing-based **Michigan Elder Justice Initiative,** an independent advocacy group funded by the state, said most people dislike the auto-enrollment process.

"People don't like change and having the decision taken away from them," Wojciak said. "I understand the state had to do that to get initial enrollment."

Wojciak said the high number of disenrollment numbers are is because of the lack of initial education.

"If they had done more education early on with this population, especially with providers, the dropout rates would be lower," he said.

Richard Miles, director of HHS' **Bureau of Medicaid Policy and Health System Innovation,** acknowledged that enrollment "has been difficult" because large numbers of people have chosen to leave the program or have declined to be enrolled.

Miles said enrollment is lower than hoped for because it is a new program and provider educational efforts are just ramping up.

But several executives of health plans and mental health organizations cited other reasons that include the federal government's restrictions on marketing and advertising.

Executives also say the state has not advertised or promoted the program as much as it has, for example, the Healthy Michigan Medicaid expansion.

Rick Murdock, executive director of the **Michigan Association of Health Plans,** contends HMOs and mental health organizations should be allowed to conduct their own educational and marketing plans directly to enrollees.

"This would help address enrollment issues," Murdock said.

Under Medicare rules, companies participating in the duel dual-eligible program are only allowed to market to consumers with prior state approval via items like billboards and radio ads. However, they cannot conduct marketing events, including health fairs, where they have direct access to enrollees.

Kerry Branick, deputy group director of the models, demonstration and analysis with the **Centers for Medicare and Medicaid Services,** said there are restrictions on advertising to enrollees to prevent fraud and abuse. She said enrollment is low in all states.

"The large waves of enrollment have ended. We are entering steady state period where (providers) are focusing on

improving the business relationship with plans," Branick said.

Michigan this year plans to ramp up educational outreach to physicians to ensure they properly explain the dual-eligible program to their patients, Miles said. However, the state has no plans to increase enrollee education.

"We want to work more closely (with HMOs and mental health organizations) to promote the program," Miles said. "That is a priority for us in the coming year."

Officials for mental health authorities in Wayne and Macomb counties say they have been conducting educational sessions with providers. They want more help from the state.

For example, officials with the **Detroit Wayne Mental Health Authority** suggested HHS conduct more public service announcements, similar to how Healthy Michigan was advertised.

"The state is walking very conservatively in this area," Detroit Wayne officials told *Crain's* in an email.
Detroit Wayne has recommended that HHS hold live provider meetings in the communities, so physicians get accurate information. "Providers are the primary culprit of the misinformation going to beneficiaries," Detroit Wayne said.

Danielle Devine, deputy director of operations with Detroit-based **Meridian Health Plan of Michigan**, said Meridian has talked with the state about the need for additional education to boost enrollment.

"There isn't a lot of marketing. People aren't familiar with MI Health Link, or Meridian, and are not apt to enroll because they believe their current plan is fine," Devine said. "We can't go out and sell to members."

Over the past few months, she said, Meridian's enrollment has peaked at 4,900 in Southwest Michigan.

On the other hand, Devine said low enrollment could be a blessing in disguise.

"Lower membership has allowed us to focus more on the members, improve process and create a successful program," she said.

Disinformation also plagues the dual enrollment program, said Dave Tigue, president of for **Concerto Healthcare**, which operates four health centers in Detroit.

"Once patients and providers hear what it is really about, I believe those fears will go away because it is a great program with lots of potential for good," he said.

But Tigue said he is frustrated Concerto can't do its own outreach to member programs.

"We are prohibited from education and marketing. We can't sell it ourselves," he said. "It must go through the state or through" an organization like Michigan Enrolls.

"We can't solicit them, just like you can't solicit directly Medicare patients," he said. "If they have an interest, you can have agents talk with them."

Tigue said Wayne County has the highest dropout rate in Michigan.

"There is just not enough education. They are afraid they will lose their benefits and Medicare eligibility," Tigue said. "Just think about it. You get a call or letter from someone, and you have been enrolled in Medicare and like it, would you want to risk switching?"

DHHS addresses food stamp cuts across state

Traverse City Record Eagle - February 14, 2016, By Michael Walton

TRAVERSE CITY — Michigan Department of Health and Human Services officials are encouraging food stamp recipients across the state to make sure they're receiving proper benefit amounts by filing for a Home Heating Credit.

A DHHS press release issued Tuesday states Home Heating Credits of more than $20 can qualify food stamp recipients—including renters who pay heating costs as part of their rent — for increased monthly food assistance through the federal Supplemental Nutrition Assistance Program.

The release comes after recent Record-Eagle reports detailed how public housing residents across the state lost monthly food stamp benefits because they hadn't applied for home heating credits, a form of assistance many residents contend they knew nothing about.

Judy Myers, Cadillac's housing commission director, said many public housing residents she knows have successfully restored food stamp levels after learning about the home heating credit and how it factors into food assistance.

"We're actually having a little party this afternoon to celebrate," Myers said Thursday.

Food stamps cuts hit Michigan public housing residents — and other food stamp recipients — throughout 2015 and resulted from a provision of the 2014 federal Farm Bill designed to curb SNAP costs.

Before the Farm Bill passed, several states like Michigan followed a practice known as "Heat and Eat" which allowed people who received as little as $1 in automatic low-income home heating assistance annually to qualify for increased SNAP benefits.

The Farm Bill raised the $1 requirement for increased SNAP benefits to $20. Michigan was one of only four states where officials declined to increase the automatic home heating payments from $1 to more than $20 after the Farm Bill passed.

As a result elderly and disabled residents at Traverse City's Riverview Terrace public housing complex saw monthly SNAP allocations that previously totaled as much as $150 plunge to as little as $16 per month.

Many like Linda Hazimi have since restored those benefits, thanks in large part to Riverview Terrace resident Priscilla Townsend. Townsend saw what was going on with her neighbors' benefits, figured out the importance of the heating credit and helped her neighbors apply for the assistance, a credit many residents had long qualified for, even if they didn't realize it.

Hazimi said she thinks the information issued by the state this week would have helped her understand how, by applying for the heating credit, she could have avoided food stamps cuts she endured for six months.

"The worst part was nobody told any of us that we had to have that heating credit," Hazimi said as she reviewed the information. "The first line alone makes you more aware."

Bob Wheaton, a DHHS spokesman, previously said DHHS staffers did not err when some Riverview Terrace residents lost large chunks of their monthly food stamp allocations. Michigan's home heating credit program is a Department of Treasury program, so DHHS caseworkers were not required to suggest to clients that they apply for the assistance, although some caseworkers may do so anyway, he said.

But Wheaton in late January said DHHS officials would circulate communications statewide explaining the availability of the home heating credit.

"And explaining to them that it could have an impact on the amount of assistance they would be eligible to receive, and so it would behoove them to apply for a Home Heating Credit," he said.

Wheaton said the information that went out this week was sent to roughly 10,000 individuals who subscribe to the DHHS press release list, and just shy of 7,000 other individuals who've signed up to receive DHHS communications about food assistance.

Visit Record-Eagle.com to view the state's press release and frequently asked questions about the Home Heating Credit.

MI governor seeks $300 million for Flint water, Detroit schools

Young Herald – February 14, 2016, By Marcia Graham

His plan calls for increased programming for preschoolers, more school nurses, lead abatement programs in Flint homes and money to help **Flint** residents pay their water bills. Instead of directly limiting funding for other districts - which Snyder has proposed in the past - his plan would shift the funding from Michigan's yearly payments from tobacco companies under a 1998 settlement.

State officials in MI did not tell the EPA's Midwest regional everything they knew about **Flint**, and the regional office did not share everything it knew with EPA headquarters in *Washington*, Upton said.

Rick Snyder on Wednesday proposed spending hundreds of millions more dollars to address Flint's water crisis and to update infrastructure, including lead water pipes, in the city and across the state. An outbreak of Legionnaires disease, which caused 10 deaths, is also suspected to have been a result of the toxic water. The additional money for **Flint** also includes $30 million to help residents with two years of water bills, dating to when the water source was switched to the **Flint** River in 2014 and improperly treated without anti-corrosion chemicals. They are, however, asking that **Flint** residents avoid giving the tainted water to their dogs, as lead poisoning in canines can lead to gastrointestinal issues, weakness and even seizures, the report added. "I'm committed to providing critical investments needed for the **Flint** water crisis and Detroit Public Schools while maintaining the long-term focus on the key priorities of education, job creation, health and human services, public safety and fiscal responsibility", Snyder said in a statement.

Local health officials say the governor and the **Michigan Department of Environmental Quality** withheld lead testing results, including results from a **Flint** elementary school, while the agency discussed the best way to present the information to the public.

And Kerr says many of those foods - like peanut butter and tuna - are already food bank staples. "We have to start restoring people's confidence and trust in our city's water supply". Tawaab says the Governor's no-show does not send the right message to the children of **Flint**.

"We certainly aren't looking at cuts, which always when you go into the budget you worry about because of the **Flint** issues and **Detroit Public Schools** issues but it's not happening", said Sen. This bill is in response to safe drinking water emergencies like we are seeing in Sebring, Ohio and Flint, Michigan.

Snyder will deliver his annual budget proposal to lawmakers on Wednesday.

"I hope the federal government is rolling up its sleeves and diving into this like we are", Snyder said. "We need to get in here sooner than later to start the fix of the infrastructure and to start providing services for families that have been negatively impacted". The Lansing Board of Water & Light has removed 13,500 lead pipes over a dozen years at a cost of $42 million.

Billerica firm donates water tests to Flint

Lowell Sun – February 14, 2016, By Rick Sobey

BILLERICA -- The images out of Flint, Mich. have caused stomachs to turn and eyes to swell up all around the country.

Flint children suffering from slowed growth and damaged neurological systems; their central nervous systems, kidneys and blood-forming organs seriously affected.

These major, lasting health issues have happened because the municipal water supply there has contained dangerously high levels of lead since 2014.

Since this devastating news broke across the country last month, a local company has stepped up to help Flint families.

Magellan Diagnostics, a Billerica company, is donating its lead-testing equipment to physicians' offices in Flint to expand access to testing.

"We're making our systems available to physicians to help families get immediate answers," Amy Winslow, Magellan's president and CEO, said last week. "We want to help parents quickly get an answer for peace of mind, and for parents to take immediate action if there's a problem."

Michigan public health departments have asked pediatricians to test all children up to age 6 who consumed Flint city water after April 2014 -- which is about 9,000 children; they're considered the most at-risk age group.

Last month, the Billerica company reached out to the health departments about loaning its equipment. Magellan -- *located at 101 Billerica Ave. with 50 employees -- has so far shipped out a couple dozen of its instruments.*

Eden Wells, chief medical executive of the Michigan Department of Health and Human Services, wrote to pediatricians in January: "We appreciate your focused attention to efforts to identify, screen, diagnose and follow-up on children in the City of Flint who may have been exposed... we hope you take advantage of this resource (Magellan's LeadCare II) to expand capabilities within your practice."

The LeadCare II blood lead testing system debuted in 2006, thanks to funding from the Centers for Disease Control and Prevention (CDC). The $8 test is reimbursable, and the instrument costs $2,400.

The fingerstick test requires two drops of blood, then a reagent splices the blood and releases the lead. A drop of that sample is placed on a sensor and it automatically starts the test. Families will know the result in three minutes.

"That quick result is why it fits so nicely into pediatrician visits," Robb Morse, Magellan's global director of marketing, said. "The pediatrician can provide guidance depending on the test results."

Because the test results are delivered on-the-spot, families do not have to take extra trips to the lab or doctor's office.

If treatment is needed, the doctor can guide the family through the next steps while they're in the office. For instance, at very high levels, a specialist may use therapy to cause the lead to be excreted in the urine.

"If lead sources are eliminated before age 2, then the body can recover, not causing further damage," Morse said. "The quicker the family identifies it, the better."

If the test results come back low, then the pediatrician can tell the family the items to be aware of so their child is safe moving forward.

"Most of the time the result is negative, and it gives peace of mind to parents," Morse said. "Pediatricians can then refer to our posters, and what families need to look out for, including toys, pottery, soil, and drinking water, as is the case in Flint."

The Flint problem began in 2014 when city leaders switched its water supply to the Flint River; however, the state did not add anti-corrosive chemicals to the water, which allowed lead from old pipes to leach into the water.

While it's incredibly unfortunate that all these residents are now affected, the LeadCare II system is the perfect technology to help address this situation, Morse said.

"This is why the CDC funded us," he said. "The cost of donating the equipment is insignificant. It's all about how this is a great use of our unique technology, and getting families immediate answers."

Michigan's tobacco settlement fund distribution

Crain's Detroit Business – February 14, 2016, By Lindsay VanHulle

Gov. Rick Snyder has proposed using $72 million per year for 10 years from the state's tobacco settlement funds to pay for a plan to reform **Detroit Public Schools**, which must repay an estimated $515 million in operating debt. *(See related story.)* Michigan is due $284 million in the 2017 fiscal year, which begins Oct. 1. Here's where the funds go:

- $193 million is left after credits are paid to tobacco manufacturers and the state makes securitization payments related to bonds issued in 2006 and 2007 that got the state through lean budget years.
- $17.5 million is paid into the state's Budget Stabilization Fund, or reserves, as reimbursement for Michigan's contribution to the "grand bargain" deal in Detroit's bankruptcy. That payment will be made over 20 years.
- $75 million is paid into the state's 21st Century Jobs Fund.
- $72 million is proposed annually for a decade to pay for DPS reform. That money comes from a nearly $49 million fund balance in the tobacco settlement and money that previously paid for other programs.

Tobacco dollars historically have been used to support Medicaid programs, the Family Independence Program within the **Department of Health and Human Services**, student financial services programs within the **Department of Treasury** and for **Michigan State Police** criminal investigations.

Michigan Department of Health and Human Services retiree recognized

Lenconnect.com – February 15, 2016

ADRIAN - Lenawee County commissioners on Wednesday applauded Becky Clark's nearly 40-year career in the Lenawee County office of the Michigan Department of Health and Human Services.

"This person is what I consider the consummate professional," said office manager Tim Kelly as a certificate of appreciation was presented to Clark in honor of her retirement. "She does her job to a high level and expects a level of work from others," he said.

"I'm hoping I've made a difference," said Clark, a lifelong Riga resident.

Clark was an expert in long-term care policy and Medicaid programs, said the commission certificate of appreciation.

"She has challenged those around her to higher standards and community involvement," the certificate stated.

Health information exchange commits $250K to Flint

Grand Rapids Business Journal – February 15, 2016, By Charlsie Dewey

A Grand Rapids-based health information exchange will collaborate with several other organizations across the state to provide help to the children and families of Flint dealing with the long-term health effects of the city's water crisis.

Great Lakes Health Connect, or GLHC, said it will invest $250,000 in collaboration with the Greater Flint Health Coalition and the health care community throughout Flint and Genesee County to "build up the region's health IT infrastructure," which it said is essential to the "most timely, accurate and secure exchange of medical data, diagnosis and treatment."

GLHC is among the leading providers of HIE services in the nation.

"The goal of the Great Lakes Health Connect board of directors is to give those responding to the health care needs of Flint's residents the tools needed to coordinate care and positively impact the health and wellbeing of Flint's citizens over the long term," said Tom Bres, GLHC board chair.

The investment is targeted at meeting the special needs of the crisis and is aimed at connecting all Genesee County health care providers to GLHC's statewide HIE network.

Establishing this technological connectivity will enable health care providers with enhanced communication to facilitate the long-term care coordination for more than 420,000 Genesee County residents, Bres said.

GLHC said connecting all Genesee County health care entities would ensure the region's providers have access to the most secure, accurate and timely medical data for generations to come.

In addition, GLHC will connect community service organizations such as the Greater Flint Health Coalition to facilitate their efforts in support of the overall lead exposure response.

GLHC said it is committed to leveraging the HIE power in all aspects of community-based health care, from physicians and hospitals to outpatient clinics, dental offices and other health organizations serving Michigan residents.

"This integrated network of providers holds the potential for establishing the greater Flint region as the benchmark model for a care-connected community in the United States — a virtual environment where information can be shared quickly among health care providers, leading to more effective, efficient health care services," Bres said.

The financial commitment being made by GLHC consists of: $100,000 earmarked for a Community Interface Grant that will cover costs associated with linking more than 40 physician offices countywide; $90,000 for a dedicated implementation consultant to coordinate the initiative at the local level; $50,000 will involve the build-out of the

analytics engine enabling the shared communications and detailed data analysis that will be needed for decades to come; and a $10,000 education grant established to facilitate training for all entities being connected.

Dr. Larry Reynolds, president and CEO of Mott Children's Health Center, expressed his "sincerest gratitude," on behalf of the "hundreds of health care providers throughout Genesee County," in response to the donation.

"As health care providers, we will persevere in providing those we serve with the education, testing and treatment they may need now and over the years to come," he said.

"The state of Michigan and the Michigan Department of Health and Human Services believe collaborating with public and private partners is critically important as we assist children and families in Flint affected by the water emergency," said Dr. Eden Wells, the state's chief medical executive. "The efforts and generous financial contribution from Great Lakes Health Connect and partnerships like this with the Greater Flint Health Coalition and health care providers will enhance care coordination so families have access to more timely diagnosis and treatment."

Flint-area hospitals currently leverage a variety of GLHC solutions and contribute to its registries within their emergency department, inpatient, outpatient and physician practice environments.

More than 4,000 provider offices and 128 Michigan hospitals representing 100 percent of hospitals in Genesee County and 85 percent of the acute care beds in the state access the Great Lakes Health Connect registries and solutions.

Flu shots still available from Lenawee County Health Department

Lenconnect.com – February 15, 2016

ADRIAN - The Lenawee County Health Department is prepared for an increase in demand for influenza vaccinations after Tuesday's report of an Oakland County child's flu-related death, said Deidre Reed, director of nursing.

"We'll take all comers," she said. The health department has vaccine available to continue giving flu shots through April or May, she said. Appointments for Wednesday vaccination clinics can be made by calling 264-5226.

The Michigan Department of Health and Human Services urged those not already vaccinated to get a flu shot in a news release about the first pediatric death of the current flu season. Health officials said three out of four confirmed influenza specimens this season are the strain called 2009 H1N1.

"This virus can cause severe flu infections in children and in young- and middle-aged adults," the news released stated. Flu vaccines available this season are a good match for the virus, it said.

Attorney Billy Murphy Says Flint Residents, "living a nightmare"

The Atlanta Voice – February 15, 2016, By Stacy M. Brown

Famed Baltimore Attorney William "Billy" Murphy Jr., has filed a federal class action lawsuit alleging a pattern of behavior by Michigan Gov. Rick Snyder, the mayor and other officials that Murphy said violated the constitutional rights of those who are being forced to pay for clean water but have never received it.

"The governor has to be held accountable," Murphy told the NNPA News Wire in his first detailed interview about the lawsuit and the water disaster in Flint, where superstars like Aretha Franklin, Snoop Dogg, Diddy, Cher, Jimmy Fallon and others have been donating water bottles and funds to assist residents.

The lawsuit, filed on Sunday, Jan. 3, specifically names as defendants Snyder, former Flint Mayor Dwayne Walling, the state of Michigan Department of Health and Human Services, the state Department of Environmental Quality, the state of Michigan and the city of Flint.

Those defendants breached their duties by knowingly, recklessly and callously providing a toxic water supply that's unfit for human use and consumption, Murphy said. Making matters worse, officials insisted that the water was safe and fit and they knowingly, recklessly and callously refused to reinstate a safe water supply despite ample evidence that the water was highly toxic.

Murphy was joined in filing the suit by Flint-based attorney Val Washington, who said officials have for quite some time ignored the contamination.

Both attorneys said the actions were part of a conspiracy.

"In conspiring to commit these constitutional and other deprivations and intentional torts, by actively discriminating against ordinary citizens while, conversely, showing preferential treatment toward certain state of Michigan employees, who were specifically aware of the degradation of water quality in Flint and were provided with safe, portable drinking water alternatives not available to the general public; ignoring citizen complaints regarding the toxicity of the water supply; and, actively misleading [residents] regarding the dangerous health hazards presented without any process – whether procedural or substantive – to seek relief," Murphy noted in the court filing.

Murphy said that the situation not only denied local residents their constitutional rights, but local and state officials conspired to effect that denial which is an act that is "far more insidious than mere interference with their contract rights."

As noted in a recent Washington Post profile of Murphy, the 72-year-old has been the lawyer to call for more than 45 years.

The longtime criminal defense attorney is respected and feared as a litigator and he's been able to secure multimillion-dollar settlements in police brutality and racial discrimination cases.

Last year, the Freddie Gray case in Baltimore again thrusted Murphy into the national spotlight. He continues to represent Gray's family while prosecutors press on with criminal cases against several police officers involved in Gray's death.

Last month, Murphy was asked to come to Flint by a group of local ministers, he said.

"I had heard about Mr. Murphy for years, because of his excellent national reputation. But I never thought we would get a chance to work together to right such a tragic wrong to my beloved Flint," said Washington, a former Circuit Court Judge who also has roots in Baltimore.

State's top doc worked part-time as Flint crisis erupted

Detroit Free Press – February 12, 2016, By Keith Matheny

As Flint's water problems slowly emerged as a public health calamity over the spring, summer and fall of last year, the top medical officer at the Michigan Department of Health and Human Services was continuing her course load as an associate professor and medical residency program director at the University of Michigan, working for the health department only part-time, both the university and health department have confirmed.

The part-time arrangement for Dr. Eden Wells, the state's chief medical executive, appears to have plainly violated state law. Michigan's Public Health Code states that if the director of the state health department is not a doctor, the director shall appoint a chief medical executive who is and "the chief medical executive shall be a full-time employee."

The switch to a part-time chief medical executive began after Gov. Rick Snyder took office in 2011. Every top doctor since has been part-time.

Wells, who began her position with the state health department on May 1 of last year, "has been splitting her time between some of her university duties and her state duties," University of Michigan public affairs director Rick Fitzgerald said.

Wells is the director of the preventive medicine residency program at Michigan's School of Public Health. That position involves supervising students in the program and a seminar that meets once per week, Fitzgerald said. University class schedules show Wells teaching a "by arrangement" epidemiology course from July 1 through Aug. 18. For Fall Semester 2015, which began Sept. 8 of last year and concluded Dec. 23, Wells was listed as teaching two epidemiology courses and a health management and policy course on Tuesday, Wednesday and Thursday afternoons.

Whether Wells actually taught those courses is unclear; Fitzgerald said he did not have that information and Health and Human Services spokeswoman Jennifer Eisner said Wells was in Flint "working on the response" to the water crisis and not immediately available for comment.

It was in July of last year that epidemiologists at the state Department of Health and Human Services reviewed blood test results from Flint children and found a spike in blood-lead levels in the months immediately after the city switched its water supply to the Flint River.

But state epidemiologists explained it away — a "missed opportunity" that could have resulted in an earlier response to the crisis, Wells told the Free Press last month.

"If I knew then what I know now ... We needed a much more robust analysis," she said in January. "We should have torn it up and apart and gone up and down with that (data). That wasn't done.

"When I think about how Flint citizens have just had one thing after another — not just over the past two years, but many, many years — I wish that was not a missed opportunity."

The Department of Health and Human Services, after Free Press inquiries on Wells' part-time status, on Friday issued a news release stating she had become the department's full-time chief medical executive effective Feb. 1, at a salary of $184,000 per year.

Wells' predecessor in the position, Dr. Gregory Holzman, served from 2006 to 2011 in Gov. Jennifer Granholm's administration and the first few months of Snyder's administration.

"I kept quite busy being a full-time person there," said Holzman, who is now state medical officer for the Montana Department of Public Health and Human Services.

Dr. Dean Sienko, Ingham County's health officer, was appointed to replace Holzman on an interim basis at what was then known as the Michigan Department of Community Health. An April 20, 2011, memo Sienko wrote to the Ingham

County Board of Commissioners' human services and finance committees described a very part-time job for the state health department.

"The proposal would require my presence at MDCH for an average of 8 hours/week," Sienko's memo stated. "I would also need to be available to MDCH staff on an on-call basis."

Sienko's successor and Wells' predecessor, Dr. Matthew Davis, was also part-time for the health department from March 2013 until April of last year.

Democratic state Sen. Curtis Hertel Jr., minority vice chair of the Senate's Health Policy Committee, could not explain the apparently unlawful switch to a part-time state chief medical executive, noting that "the Legislature is not involved in the hirings and firings of the department."

"I would say that's a good question for the governor's office and the department," he said.

"Certainly, having a full-time chief medical officer has value. I'm sure he or she can provide assistance in a time of crisis like this."

Messages left with the governor's media office seeking comment were not returned by Friday afternoon.

Eisner did not provide specifics on Wells' work arrangement with the state prior to or since the Flint water crisis gained national and worldwide attention.

"Dr. Wells is available to the department full time for the emergency response in Flint," Eisner stated by e-mail. "Dr. Wells has been accessible to the department 24 hours a day, seven days a week, and is essential to leading our public health efforts."

Flint resident Rhonda Kelso expressed surprise when told about Wells' work arrangement with the state.

"It's horrifying," said Kelso, 52, whose water has shown elevated lead levels in tests in both August and November. Kelso has a 12-year-old daughter with special needs.

She questioned why the Snyder administration made the switch to a part-time chief medical executive when state law requires a full-time top doctor.

"A lot of our officials, members of our government, are doing illegal things," Kelso said. "It's horrifying that they know and they don't care. They are treating us like we are disposable people. Like we're poor and we don't matter."

Wells lone doctor among state health execs

Wells is the only medical doctor listed among the Michigan Department of Health and Human Services' top executives. Department director Nick Lyon has a background in health administration and budgeting. Susan Moran, who heads the department's population health and community services division, which oversees laboratories as well as epidemiology and chronic diseases control, has a background in health care administration; her division was deeply involved in Flint water-related lead and *Legionella* infection issues.

A review of state health departments in other Midwestern states shows Illinois, Indiana and Minnesota all have medical doctors leading their agencies, while Michigan, Ohio and Wisconsin do not.

Among states who responded to Free Press inquiries, Ohio's and Illinois' state health departments have top doctors who work full-time for their respective states. Indiana, with its state health commissioner and chief medical consultant both

medical doctors, allows its top doctors to split their time with personal practice, university or other work, the same as Michigan.

FLINT WATER RESPONSE
DAILY STRATEGIC MESSAGING
Feb. 17, 2016

Key Messages

- Run cold water, throughout the house, for two minutes, every morning to flush pipes.
- Use only bottled water for water, food & formula given to babies under 1 year old. Bottled water is the safest choice for pregnant or breastfeeding women & kids under 6 years of age.
- Have water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- Businesses affected by the Flint water crisis should visit SBA's recovery center in Flint for help in applying for financial assistance. Call 800-659-2955 (TTY 800-877-8339) or visit www.sba.gov/disaster for more information.

Products for Release

- NR EPA –Update: Latest Sampling Results Confirm Filters are Working

Operational Communication Events

- **Media Interview:** CDC – Andrew Keller, WNEM TV5

Stakeholder Calls/Briefings/Meetings/Trainings

- **COMMUNICATION Points of Recovery Group (f)** @ 10 am 1422 W. Court St.
- **Federal Agency Briefing (f)** @11am 866-625-6066 pin

Speakers Bureau IGA and Outreach Events/Activities

- **Parent Meeting and Information Sharing** @830am 1360 Milborne Ave
- **Blood Lead Testing** @ 4pm 6031 Dupont

LOOKING AHEAD

UPCOMING EVENTS/ACTIVITIES (f = federal participation)

- **Feb. 18**
  - **HHS Secretary Visit to Flint (f)** stakeholder roundtable, media avail, visit/tour of clinic.
  - **Parents Meeting and Information Sharing (f)** @ 830 am 3002 Farley St.
  - **EDUCATION Points of Recovery Group (f)** @ 11 am, 2413 W. Maple Ave
  - **Crisis and Emergency Risk Communications Training (f)** via VTC, @1pm
  - **ARC Community Partners Meeting (f)** @ 3pm Food Bank, 2300 Lapeer Rd.
  - **Glendale Hills Neighborhood Association (f)** @ 630 pm, 2920 W. Court St.
- **Feb. 19**
  - **Flint Water Interagency Coordinating Committee (f)** @ 10 am 1 Riverfront Center Ste. D
- **Feb. 21:**
  - **Blood Lead Testing,** Our Lady of Guadalupe Catholic Church, @ 10 am 2316 W. Coldwater Rd.
  - **Faith Forum (f)** New Jerusalem Full Gospel Baptist Church @ 1 pm 1035 E. Carpenter Rd.
- **Feb. 22:**
  - **Parents Meeting and Information Sharing** @ 830am 2413 W. Maple Ave
  - **Flint City Council Meeting** @ 6pm 1101 S. Saginaw St.

- **NBC25 Town Hall (f)** Feb 29 EPA Mark Durno to attend
- **Congressional Delegation (CODEL) (f)** March 4
- **Speak Out** event with Black Caucus March 4
- **EPA Public Meeting and Expo (f)** Mid-March

COMMUNITY (FIELD) FEEDBACK

- TONE:
  - Mistrust of local medical providers
  - Attitude that "damage is already done" but willing to look at what <u>can</u> be done

- CONCERNS:
  - Continued challenges getting water due to transportation barriers
  - Nervousness among immigrant communities about interacting with officials
  - Payment for lab (blood tests) for Adults $36
  - Next level water use (laundry, pets, etc.)
  - Health-related (hair loss, rash, dermatitis, dry skin, skin cancer, organ damage, infertility)
  - Quantity of resources provided to residents (water, filters, etc.)

- GAPS:
  - Filters for showers. recyclable cartridges
  - More visual communications for LEP, low literacy, & deaf communities.

- EFFORTS TO ADDRESS TONE/CONCERNS/GAPS
  - Surgeon General meetings with Healthcare Providers
  - Participation with Community 6 Points of Recovery Groups
  - Elderly advised to call United Way 211 for water delivery support

PLANNED MESSAGING/PRODUCTS

- HHS
  - Issue #2 of Key Stakeholder Advisory planned for 2/17
- CDC:
  - Tentative – website update, adding link from general website to Flint-specific webpage
- EPA:
  - Sampling results letter
  - FAQ on Top Public Questions
  - Photo Slide Show for EPA Sampling Steps
  - Working on Update to Door Hanger

FEMA

FEMA 3375 EM – Contaminated Water in Flint, Michigan

Joint State-Federal Operational Update #6 for Congressional/Legislative Staff

The State of Michigan and FEMA invite you to call into a joint operational update briefing for Congressional and State Legislative staff. Representatives from relevant agencies will be on the line to provide information and answer any questions that you may have.

If there are topics or issues you would like us to address, please let us know in advance so appropriate briefers can be included.

Date: February 16, 2016

Time: 2:30 pm EST

Dial in: **1-800-320-4330**, pin

Please share this information with any other staff that may be interested.

Attachments: Talking Points Feb 16.docx

Updated numbers for today:

Talking Points: Flint, Michigan Water Contamination
February 16, 2016 @ 9 a.m.

Daily Numbers

Reported at 9 a.m. on February 16, 2016

As of February 16, 2016, the following commodities were requested by and provided to the state of Michigan in support of the response to the emergency conditions resulting from contaminated water in the city of Flint.

- 1,982,844 liters of water
- 168,256 water filter replacement cartridges
- 40,968 water and pitcher filters

Major Disaster Declaration/Full EM Denial

- Governor Snyder's January 20, 2016, appeal for a major disaster declaration for contamination and damage to the public water system in the City of Flint was denied on January 22, 2016. After review, FEMA determined that this event does not meet the statutory definition of major disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

    - *IF ASKED:* To qualify for a "major disaster" declaration there must be a natural catastrophe or, regardless of cause, a fire, flood or explosion which causes damages of significant severity and magnitude to warrant a declaration. FEMA's assistance is intended to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage and loss by the natural catastrophe, fire, flood or explosion. It was determined that the presence of lead in the Flint drinking water was not caused by a natural catastrophe, or by a fire, flood or explosion, so it does not qualify for a major disaster declaration.

- FEMA's assistance remains limited to what the President authorized in the Emergency Declaration on January 16, 2016. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration. The portions of the Emergency Declaration not granted can be appealed by the Governor.

- The decision means that the state can continue to work directly with other federal agencies and those agencies can provide assistance through their own authorities.

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and the Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

HHS as Federal Response Lead

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- Assistant Secretary for Preparedness and Response Dr. Nicole Lurie will lead this effort, supported by HHS Acting Assistant Secretary for Health Dr. Karen DeSalvo, as well as two U.S. Public Health Service officers.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

- FEMA will work with the HHS team in Michigan to establish a collaborative process to best support state and local leaders with identifying the size and scope of the problem and help them develop and execute a plan to address the public health and infrastructure issues in Flint.

Emergency Declaration

- On January 14, FEMA received Governor Snyder's request for an Emergency Declaration, as well as a Major Disaster Declaration for emergency protective measures, temporary housing and repairs to homes and low-cost loans for covering uninsured loss of property, as well as other federal assistance.

- On January 16, 2016, President Barack Obama declared an emergency for Genesee County in the State of Michigan, limited to Direct Federal Assistance, as a result of the emergency conditions resulting from contaminated water in the city of Flint, authorizing FEMA to support the state in its efforts to respond to the incident.

- Under this emergency declaration, FEMA is authorized to provide emergency protective measures, Category B, limited to Direct Federal Assistance, under the Public Assistance program limited to 75 percent of the total eligible costs. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration.

IF ASKED about period of assistance through EM (90 days):

- FEMA's emergency assistance is designed to be supplemental and temporary in nature. FEMA, and our partners in other federal agencies, will be working closely with the state, county, and city officials to support those officials in the development of medium and longer term solutions to this problem.

- The state may submit a request to extend the current 90 day period of assistance established by the declaration, providing a valid reason that the extension is necessary.

If ASKED about the $5 million cap on assistance

- When the amount of federal assistance for an emergency declaration exceeds $5 million, FEMA is required to notify Congress.

Other Federal Agency Assistance To-Date

- U.S. Health and Human Services

  - The Department of Health and Human Services (HHS) Office of the Assistant Secretary for Preparedness and Response (ASPR) is working to identify vulnerable Flint residents who may not be able to travel to obtain filters and water testing kits. They are also working with the Centers for Medicare and Medicaid Services (CMS) to provide critical information needed for city responders to locate vulnerable residents and to help focus the city's outreach efforts.

  - HHS-funded health care centers in the area are offering free lead testing for their patients and are reaching out to patients to make them aware of the free testing. Exposed children will receive ongoing monitoring while they are health center patients. Health centers also are providing bottled water at their facilities and are assisting patients in obtaining bottled water or water filters in coordination with county-wide efforts.

  - HHS is helping educate residents who use HHS programs and services, such as Head Start programs and programs that serve seniors. In addition, HHS-funded local agencies on aging and community partners are reaching out to seniors and grandparents raising grandchildren to help them find water and filter distribution sites and to provide homebound residents with assistance in obtaining and installing filters.

  - The Centers for Disease Control and Prevention (CDC) is currently providing technical assistance to the Michigan state health department to assess lead exposure especially in homes with children. CDC also has provided recommendations on educational interventions for children affected by lead.

- U.S. Environmental Protection Agency

  - In mid-October, the EPA established a Flint Safe Drinking Water Task Force comprised of EPA scientists who are internationally recognized experts in the field of lead in drinking water. The EPA Task Force is providing technical assistance to the Michigan Department of Environmental

Quality and the City of Flint to implement corrosion control treatment and to develop school and residential sampling protocols.

- EPA is also conducting an audit of the Michigan Department of Environmental Quality (MDEQ) drinking water program – to examine MDEQ's implementation of the Safe Drinking Water Act and related rules on lead and copper, total coliform, nitrates and ground water. This comprehensive audit will provide Flint residents and the people of Michigan with more information about MDEQ oversight of public water supplies and will identify actions that may be needed to strengthen the Michigan drinking water program.

- Housing & Urban Development

  - Flint was identified as one of six target cities in the second round of the Strong Cities – Strong Communities (SC2) White House initiative in 2014. This program focuses on enhanced Federal agency support in areas of blight reduction, public safety and economic development.

  - Discussions are ongoing between the FEMA Region 5 SC2 program lead and Department of Housing and Urban Development (HUD) staff on the Flint water crisis impacts to SC2 programs and initiatives; as well as possible opportunities for collaboration through existing federal engagement with local, county and State agencies.

  - HUD is working closely with the city on economic development and interagency coordination. They have successfully assisted the city with the purchase and installation of water filters. HUD had an existing lead hazard grant to Flint, targeted to lead paint, $325,000 of which could be used for addressing the water lead contamination. Additionally, HUD has provided a data tracking and reporting system for the State of Michigan to use in its lead investigations.

- U.S. Army Corps of Engineers

  - The FEMA Region 5 Recovery Coordinator is in discussion with the United States Army Corps of Engineers to identify possible technical assistance and/or Subject Matter Experts on public water distribution systems, and possible courses of action.

- US Department of Agriculture

  - USDA has waived requirements on potable tap water availability at school meal service, allowing schools to provide bottled water. The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) is also allowing participants to use WIC vouchers for ready-to-feed infant formula, which does not need to be mixed with water, and participants can also swap powdered formula for ready-to-feed formula.

NAACP National President Cornell William Brooks and NAACP Michigan State and Flint Leadership to Hold Press Conference

BALTIMORE, MD – NAACP National President Cornell William Brooks, together with leadership from the NAACP Michigan State Conference and the Flint branch, will hold a press conference to address the latest developments in the Flint water crisis on Monday, February 15 in Flint, Michigan.

President Brooks traveled to Flint on January 26th to convene a public mass meeting, listen to the community's concerns, and meet with Mayor Karen Weaver and Governor Rick Snyder. Based on community input received at that meeting, the NAACP has finalized a 20-point plan that details necessary steps to address the needs of the citizens of Flint and the resources required for remediation. Additionally, this week, the NAACP formally requested that the U.S. Department of Justice (DOJ) launch civil and criminal investigations into the disastrous water crisis in Flint, Michigan.

The crisis began after Flint's state-appointed emergency manager decided to switch the city's water source from Detroit's Water System to the Flint River, causing the pipes to corrode and leach lead into the water. The NAACP's Flint Branch and Michigan State Conference have diligently worked over the last two years to inform the public about the poisoned water and its devastating effects.

WHO: NAACP President and CEO Cornell William Brooks
NAACP Michigan State Conference President Yvonne M. White
NAACP Flint Branch President Frances L. Gilcreast

WHEN: **Monday, February 15, 2016 at 1:00 p.m.**

WHERE: Christ Fellowship Missionary Baptist Church
317 E. Hamilton Avenue
Flint, Michigan

###

Founded in 1909, the NAACP is the nation's oldest and largest nonpartisan civil rights organization. Its members throughout the United States and the world are the premier advocates for civil rights in their communities.

FLINT WATER RESPONSE
DAILY STRATEGIC MESSAGING
Feb. 16, 2016

Key Messages

- Run cold water, throughout the house, for two minutes, every morning to flush pipes.
- Use only bottled water for water, food & formula given to babies under 1 year old. Bottled water is the safest choice for pregnant or breastfeeding women & kids under 6 years of age.
- Have water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- Affected small businesses should contact the Small Business Administration (SBA) at 800-659-2955 to determine if available low-interest disaster loans can help with financial obligations.

Products for Release

- None

Operational Communication Events

- VIP (f): Surgeon General Vivek Murthy & Deputy Assistant Secretary - Minority Health Nadine Gracia

- Media Inquiries: EPA -Mother Jones, Detroit Public TV and NBC 25

Stakeholder Calls/Briefings/Meetings/Trainings

- PHYSICAL HEALTH Points of Recovery Group (f) @ 830 am MSU Extension, 605 N. Saginaw
- RECOVERY RESOURCES Points of Recovery Group (f) @ 9 am Food Bank, 2300 Lapeer Rd
- Genesee County Board of Commissioners @ 9 a.m. 1101 Beach St. (FYI)
- SG Community Resilience Group meeting (f) @ 11 am GCCARD 601 N. Saginaw St
- MENTAL HEALTH Points of Recovery Group(f) @ 11 am Location TBD
- Crisis and Emergency Risk Communications Training (f) via VTC, @ 1pm
- COORDINATION Points of Recovery Group Meeting (f) @ 2pm 1401 S Grand Traverse St
- Congressional/Legislative Conference Call (f) @ 2:30pm 1-800-320-4330, pin :

Speakers Bureau IGA and Outreach Events/Activities

- Blood Lead Testing @ 2 pm 701 Third St.
- SG Community Engagement Forum (f) @ 6pm Mount Carmel Baptist Church 1610 W. Pierson Rd.
- Flint Water Class Action/Info Meeting @ 6:30 pm Northbank Center 432 N. Saginaw St. (FYI)

LOOKING AHEAD

UPCOMING EVENTS/ACTIVITIES (f = federal participation)

- Feb. 17
  - Parent Meeting and Information Sharing @830am 1360 Milborne Ave
  - COMMUNICATION Points of Recovery Group (f) @ 10 am 1422 W. Court St.
  - Federal Agency Briefing (f) @11am 866-625-6066 pin :
  - Blood Lead Testing @ 4pm 6031 Dupont
- Feb. 18
  - HHS Secretary Visit to Flint (f)
  - Parents Meeting and Information Sharing (f) @ 830 am 3002 Farley St.
  - EDUCATION Points of Recovery Group (f) @ 11 am, 2413 W. Maple Ave
  - Crisis and Emergency Risk Communications Training (f) via VTC, @1pm
  - ARC Community Partners Meeting (f) @ 3pm Food Bank, 2300 Lapeer Rd.
  - Glendale Hills Neighborhood Association (f) @ 630 pm, 2920 W. Court St.
- Feb. 19
  - Flint Water Interagency Coordinating Committee (f) @ 10 am 1 Riverfront Center Ste. D
- Feb. 21:
  - Blood Lead Testing, Our Lady of Guadalupe Catholic Church, @ 10 am 2316 W. Coldwater Rd.
  - Faith Forum (f) New Jerusalem Full Gospel Baptist Church @ 1 pm 1035 E. Carpenter Rd.

- NBC25 Town Hall (f) Feb 29 EPA Mark Durno to attend
- Congressional Delegation (CODEL) (f) March 4
- Speak Out event with Black Caucus March 4
- EPA Public Meeting and Expo (f) Mid-March

COMMUNITY (FIELD) FEEDBACK

- TONE:
  - Mistrust of local medical providers
  - Confusion due to volume of multiple messaging sources
  - Doubt that filters are effective for removing lead
  - Attitude that "damage is already done" but willingness to look ahead towards what <u>can</u> be done
- CONCERNS:
  - Literacy levels – print materials are text heavy; community would like simpler message with more visual communication
  - Continued challenges getting water due to transportation barriers
  - Nervousness among immigrant communities about interacting with officials
  - Payment for lab (blood tests) for Adults $36
  - Next level water use (laundry, pets, etc.)
  - Health-related (hair loss, rash, dermatitis, dry skin, skin cancer, organ damage, infertility)
  - Quantity of resources provided to residents (water, filters, etc.)

- Paying water bills

- **GAPS:**
  - Filters for showers. recyclable cartridges
  - Want to learn about more than just lead, in the water
  - *Many Spanish speakers unaware of water issues*

- **EFFORTS TO ADDRESS TONE/CONCERNS/GAPS**
  - Drafting Frequently Asked Question Fact Sheet
  - Incorporating more images and easy to understand plain language into products
  - Bringing in more EPA Community Involvement Coordinators (CIC), including Spanish speaking
  - Planning a Community Expo
  - Messaging that sampling showing positive (filter use) results
  - Providing online preliminary data on Chlorine sampling
  - Proactively reaching out to Spanish-language news outlets

PLANNED MESSAGING/PRODUCTS

- **HHS**
  - Issue #2 of Key Stakeholder Advisory planned for 2/17
- **CDC:**
  - Tentative – website update, adding link from general website to Flint-specific webpage
- **EPA:**
  - Sampling results letter
  - FAQ on Top Public Questions
  - Photo Slide Show for EPA Sampling Steps

Below is a sampling of the coverage.

Erin Brockovich joins lawsuit over Flint water crisis

February 15, 2016 *Brianna Owczarzak KITV ABC*

Flint, MI -- A famous activist is joining the Flint water crisis lawsuit.

Erin Brockovich announced on her Facebook page she would help represent Flint residents suing the state over the water crisis.

"I am pleased to let you all know, I have joined with the litigation team I feel can best represent you, the consumers, who have been injured, damaged and lied to for so long now," her post said.

There is a community meeting on the lawsuit on Feb. 16 at 6:30 p.m. at Northbank Center, 432 N. Saginaw St. in Flint.

.....

Rick Snyder faces hometown backlash over Flint water crisis

February 15, 2016 *Katrease Stafford, Detroit Free Press*
http://www.freep.com/story/news/local/michigan/flint-water-crisis/2016/02/14/snyder-faces-hometown-backlash-over-flint-water-crisis/80283278/ *(for full story click on link)*

ANN ARBOR — Bitterly cold winds whip around Susan Fecteau as she reaches into a chalk-filled bucket, gets down on her hands and knees and writes a message to Gov. Rick Snyder on the sidewalk in front of his residential loft in the heart of downtown Ann Arbor.

"How are you sleeping up there, Rick? The moms in Flint not enjoying their rest, I think," Fecteau writes in green chalk.

The message is one of dozens Fecteau has written in the past six weeks outside Snyder's home on South Main Street and the various establishments he frequents in the city.

For Fecteau, sidewalk chalking has become a personal cathartic release of anger, but she's not alone.

A growing number of residents in the governor's adopted hometown, angered by his handling of the Flint water crisis, have been publicly expressing their feelings amid calls from across the nation for his resignation.

"For me it was satisfying a blood lust because in the beginning, I was so mad," Fecteau, an Ann Arbor resident, told the Free Press. "I was so outraged. The chalk gave me a voice, so it satisfied a pretty personal need. ... I was shocked that he wasn't in Lansing working around the clock honestly. ...I want people to be aware, to get involved, to go do their own research. There is no reason for people to stick their heads in the sand about this."

Protests, wanted posters with the Snyder's face boldly affixed to utility poles around the city, and a well-publicized heckling incident at a local tavern are signs that the bustling college town where Snyder has spent a chunk of his adult life could be turning against him, Fecteau and other residents said.

But not everyone in Ann Arbor feels Snyder has mishandled the crisis or that he's even to blame at all.

Washtenaw County Republican Committee Chairman John Taylor believes Snyder has "unnecessarily taken a lot of heat."

"This is a terrible crisis for the people of Flint and it's just hard to imagine what they've been going through without basic services like water," Taylor said. "But this should really be about the people of Flint and what it's going to take to bring closure to get this situation resolved. I have to commend the governor because he has done what I believe a true leader should do. He has stepped up to the plate and although there's plenty of blame to go around, he's accepted responsibility for it because he is the leader for our state. He's not pointing fingers or trying to point blame elsewhere and he's working to find solutions."

.....

Expert: Quick state action might have saved Flint lives

February 15, 2016 *Karen Bouffard, The Detroit News*

http://www.detroitnews.com/story/news/michigan/flint-water-crisis/2016/02/15/federal-agencies-quickly-legionnaires-disease-outbreak-flint-water/80385658/ *(for full story click on link)*

Quick state action to involve federal agencies and inform the public might have shortened an outbreak of Legionnaires' disease in the Flint area and saved lives, a national expert on the respiratory disease told The Detroit News.

Michigan turned down help from the U.S. Environmental Protection Agency and the Centers for Disease Control and Prevention, according to a Detroit News analysis of more than 24,000 pages of emails released by the Snyder administration and Genesee County.

State agency officials also tried to steer Genesee County health officials away from examining the municipal water system as a potential source of the Legionella bacteria that sickened 87 people between May 2014 and November 2015, killing nine.

Legionnaires' disease is caused in warmer months by a bacteria in warm, fresh water that leads to a severe form of pneumonia and can be found in large plumbing systems, hot tubs and air-conditioning units.

The state's handling of the crisis contrasts markedly with how New York state officials dealt with a Legionnaires' outbreak last summer in the Bronx, said Dr. Janet Stout, a research associate professor with the University of Pittsburgh who assisted with both outbreaks. The Bronx spate included 133 cases, resulting in six deaths.

"New York City and New York state were very, very aggressive in terms of doing the testing and informing the public, and as a result they were able to contain the outbreak very quickly," said Stout, president of Special Pathogens Laboratory, which conducted water testing in the Bronx.

The outbreak lasted about a month — from July 8 to Aug. 3 — and was traced to a cooling tower on top of a hotel, according to New York City.

"As a result, they were able to contain the outbreak very quickly," Stout added. "If you don't make that progression of doing the testing of the environment, the cases continue — which is what we saw in Flint."

A study by state of Michigan epidemiologists of 45 Flint area cases that occurred from June 2014 through March 2015, resulting in five deaths, found that 16 cases were associated with McLaren Regional Medical Center in Flint.

Stout, who was hired by McLaren as a consultant, concluded Legionella bacteria likely entered the hospital through brown water from the municipal water system. But the cache of emails between state, county and federal health agencies documents the state's reluctance to search the water system for clues or relinquish control of the scientific investigation.

EPA officials were so alarmed after they were contacted by Genesee County health officials in February 2015 that they immediately alerted the CDC to the outbreak in Flint, EPA spokeswoman Monica Lee told The News. Both agencies offered on-the-ground expertise. Michigan didn't follow through by requesting the agencies' assistance, which is required for federal participation.

"Michigan felt that they had the skills and resources needed to perform the investigation themselves," said CDC spokesman Kristen Nordlund.

U.S. Surgeon General to discuss Flint water crisis at local church

February 14, 2016 *Roberto Acosta | racosta1@mlive.com The Flint Journal*
http://www.mlive.com/news/flint/index.ssf/2016/02/us_surgeon_general_to_discuss.html#incart_2box_news_flint

FLINT, MI – The nation's doctor is set to visit Flint this week to learn about the impact of the city's ongoing water crisis on residents.

U.S. Surgeon General Vice Admiral Vivek H. Murthy is scheduled to appear at 6 p.m. Tuesday, Feb. 16 in the sanctuary at Mount Carmel Baptist Church, 1619 W. Pierson Road, along with Dr. Mona Hanna-Attisha.

Rick Carter, executive director of Michigan Faith in Action, said the presentation will include a discussion on how residents are dealing with the ongoing water crisis, effects of lead on the body, and some time for questions from the audience.

"He's here to hear the pulse of the community, which is a good thing, so he can get a sense of how the federal government is responding to these issues especially from his department's perspective," Carter said.

Several organizations are part of a "local table" that helped pull the event together, Carter said, including the Flint Democracy Defense League, WOW Outreach, and People Improving Community through Organizing, or PICO.

Michigan United, the state affiliate of National People's Action, and Michigan Voice, the state affiliate for State Voices, have also been involved in bringing community events to Flint to discuss the water issue.

Hanna-Attisha, director of Hurley's pediatric residency program and an assistant professor in the Department of Pediatrics & Human Development at Michigan State University's College of Human Medicine, is the doctor who first reported elevated blood lead levels in Flint children.

Murthy is also expected to canvas Flint neighborhoods to talk with residents about their health care concerns, Carter said, and how they are coping with the current situation taking place in the city. Tuesday's event is free and open to the public. Anyone with questions may contact Mount Carmel Baptist Church at 810-785-4421.

Genesee County health official tells CNN Legionnaires' deaths were preventable

February 14, 2016 *CNN*
http://www.wxyz.com/news/genesee-county-health-official-tells-cnn-legionnaires-deaths-were-preventable

FLINT, Mich. (WXYZ) - Nine people have died and 87 people have been sickened by Legionnaires' disease in Flint, and those deaths could have been prevented, according to a Genesee County health official.

Speaking exclusively to CNN, Genesee County Health Director Jim Henry said he believed the deaths could have been prevented if it weren't for the state.

According to Henry, state officials kept the CDC away when the county wanted to look at the Flint River as the source of the increase in Legionnaires'.

"We were suspecting the city of Flint water supply," Henry told CNN. He was the supervisor at the time of the outbreak. "That was the big red flag."

Henry said he reached out to the CDC hoping they would have a team of people identify the source, but the CDC never showed up because state officials kept them away.

Flint museum hosts program for children on cleaning water

February 15, 2016 *Associated Press*
http://www.washingtontimes.com/news/2016/feb/15/flint-museum-hosts-program-for-children-on-cleanin/

FLINT, Mich. (AP) - A museum in Flint is hosting a program for children about how to clean dirty water.

The "Water Works" program takes place Monday at Sloan Museum. The event offers a chance for children to challenge their engineering skills to design and test a filtration system.

Advance registration is required. The educational program takes places as the city faces a crisis with lead-tainted drinking water.

The museum earlier announced that it was hosting a traveling exhibit on the science and history of the city's water system in response to the crisis. The exhibit, titled "Water's Extreme Journey," is scheduled to run at the museum through May 8.

A localized portion of the exhibit features a timeline exploring the history of Flint's drinking water beginning in 1873.

.....

Flint faith leaders endorse Hillary Clinton

February 15, 2016 *Hannah Fraser-Chanpong CBS News*
http://www.cbsnews.com/news/flint-faith-leaders-endorse-hillary-clinton/
ELKO, Nevada Three ministers from Flint, Michigan endorsed Hillary Clinton on Monday, citing her commitment to helping the city overcome it's debilitating water crisis.

Clinton traveled to Flint earlier this month, two days ahead of the New Hampshire primary, where she pledged to "keep the spotlight bright" on the city's needs.

"I thank God for Hillary Clinton's recent visit to Flint, Michigan," said Rev. Al Harris in a statement shared by the Clinton campaign. "She didn't use the 'water crisis' as a platform to further her political agenda. I was overwhelmed by her sincere love and compassion for the people of Flint, as she pledged her full support in doing everything it takes to make our fractured community whole."

Harris was joined by Rev. Hubert Miller and Bishop Roger L. Jones Sr., in offering his endorsement to Clinton.

Clinton has also encouraged her supporters to donate to the Flint Child Health and Development Fund. In a fundraising email sent Sunday, Clinton included a link to FlintKids.org, instead of her own website.

"What happened in Flint is the cruelest kind of indifference, and an affront to what we stand for as a nation," the email read. "Clean water is not optional, and it's not a luxury. It's a basic human right."

Clinton's opponent in the race for the Democratic nomination, Bernie Sanders, has also condemned the inaction of state officials as Flint residents complained of smelly, discolored water and health issues, and he has called on Governor Rick Snyder to resign. On the campaign trail, Sanders emphasizes that Flint is just one city coping with old, deteriorating water systems.

"In 2016 it is unimaginable that thousands, perhaps millions, of Americans are facing a scenario where the water coming from their home faucet is hazardous to their health," Sanders wrote in an op-ed co-authored with activist Erin Brockovich and published in the Detroit Free Press on Sunday. "This is unacceptable and we must act decisively."

But the ministers who endorsed Clinton on Monday noted that Clinton is the only candidate to make a visit to Flint.

"No other candidates have shown their presence during this entire water crisis that we are facing," said Jones. "She vowed to help our people and not turn her back on us nor forget about us."

Sanders is scheduled to make two campaign stops in Michigan on Monday in Ypsilanti, home of Eastern Michigan University, and Dearborn, where he will rally with union members.

Science heroes of Flint's lead water crisis *(BLOG)*

February 15, 2016 *Tabitha M. Powledge, Plos Blogs*
http://phys.org/news/2016-02-science-heroes-flint-crisis.html
Old news, from a doc in Rome–in the second century BC, quoted by William Finnegan in the New Yorker. Finnegan's is a fine angry summary of thousands of years of accumulated medical knowledge about the evils of lead, epitomized currently by the lead-filled water crisis in Flint, Michigan–and a scary number of other places.

Lead exposure in childhood, he points out, "can cause stunted growth, permanent mental retardation, speech impairment, hearing loss, reproductive problems, and kidney damage."

Mike the Mad Biologist says its lead crisis means Flint is facing "an educational catastrophe." He argues that the effects of lead poisoning are close to the test-score differences between poor children and those better off and between black and white children.

Incidental Economist Aaron Carroll cites data suggesting that "high blood lead levels were associated with increased oppositional, hyperactive and bullying behaviors in children. Teenagers who had high lead levels in childhood were more likely to have had sex by 13, be pregnant by age 17 and smoke or drink while in their early teens. There is even some evidence of a connection to crime."

Lead poisoning is a problem far beyond Flint. At Vox, Sarah Frostenson points out that "lead exposure is a pervasive issue in the United States. In some places outside of Flint, more than half of children test positive for lead poisoning." The post includes a CDC map showing county-level lead poisoning data throughout the US. It's mostly blank because counties are not required to report lead poisoning data.

Every child should be tested for lead, says doc Claire McCarthy at the Harvard Health Blog. The post summarizes all the ways lead can get into human blood besides a contaminated water supply such as Flint's. She also links to lead resources posted by the American Academy of Pediatrics.

Heroes getting the lead out

Finnegan's post is mostly about Virginia Tech water scientist Marc Edwards, who began his career of water whistleblower inadvertently in 2003 in Washington DC. Public agencies, including the Environmental Protection Agency, punished Edwards for pointing out lead contamination of Washington water. Finnegan focuses on "the baffling and destructive role played by public agencies in lead-water crises."

Which later included the Centers for Disease Control and Prevention's 6-year stonewall. Edwards was vilified, but this is a world in which virtue is, very occasionally, not only its own reward; the MacArthur Foundation bestowed one of its "genius" grants on Edwards.

The Edwards group also spearheaded the Flint lead contamination story with a report last September. As many as 12,000 children may have been poisoned with lead. "[T]he idea of science as a public good is being lost," Edwards recently told Steve Kolowich at the Chronicle of Higher Education. "[W]e have to get this fixed, and fixed fast, or else we are going to lose this symbiotic relationship with the public. They will stop supporting us."

Another science-based hero in the Flint/lead story is pediatrician Mona Hanna-Attisha, who was inspired by the Edwards group's findings to compare Flint hospital records. She found that the number of kids whose blood levels of lead tested high had almost doubled since the city switched its water supply to the Flint River in 2014.

Hanna-Attisha, too, was abused by government agencies for her revelations. "This poisoning of an entire population was entirely preventable," she told The Huffington Post.

Flint residents also turned themselves into citizen-scientists. "Half the water industry does not understand what these people learned on their own to protect their children," Edwards told Anna Maria Barry-Jester at FiveThirtyEight.

The post shows off the site's data smarts with a display of Hanna- Attisha's data on changing lead levels in Flint's children. There are also graphic comparisons of data released by different agencies. The ones from the state of Michigan systematically understate the amounts of lead found in water.

Some In Flint Outraged by State Posting Their Poison Nightmare Online

02/15/2016 08:57 am ET | **Updated** 1 hour ago

http://www.huffingtonpost.com/anthony-baxter/flint-poison-nightmare-online_b_9236094.html

Imagine finding out you had been drinking toxic water with sky-high levels of lead from a friend who messaged you on Facebook.

That's what happened to Ruth Elwart in Flint, Michigan, who is now packing up her things and preparing to move in with her daughter outside the city limits.

"I am furious. My kids are panicking," said Elwart. "They are super worried about me, and basically I don't want my grandkids over here."

It's just one example of the extraordinary treatment of local residents we have discovered as we make a feature documentary on the Flint water crisis. Up to 100,000 people have been exposed to unsafe levels of lead in their drinking water, after state emergency managers who had taken over the city made a disastrous money-saving decision to switch water sources to the highly corrosive Flint River.

We were astonished to discover this week that the Michigan government is openly releasing thousands of new lead test results online without first bothering to directly inform residents most badly affected.

As lead fears mounted last year, Flint officials filed false reports regarding which homes were used for collecting water samples, essentially hiding the extent of the lead problem, so there is an understandable push for greater transparency in releasing information. But once again, the needs of Flint residents most affected seem not to be taken into account.

The reading from Ewart's home is currently among the 15 worst in the city, and her address is there for anyone with a computer to access.

A spokesman for Michigan Gov. Rick Snyder (R) defended the practice, noting that names are never posted alongside addresses.

"Posting the results online is the quickest, most effective way to get people information that they desperately want about the water in their homes," Snyder spokesman Dave Murray said in an email. "The alternative is for them to wait until they receive information in the mail."

The federal Environmental Protection Agency, however, takes a different view, assuring Flint residents that the results of its drinking water testing -- being undertaken separately from the state's efforts -- are strictly confidential. According to the agency, "the EPA will remove all personally identifiable information from sampling data before it is posted publicly."

That the Michigan government is taking no such steps to protect the privacy of families hardest hit by the water crisis enraged Elwart, who has now packed up most of her belongings.

"I am furious," Elwart said. "They should have let me know before they published it for the world to see. I should have been informed what was going on."

Elwart said no one from the Michigan Departments of Health or Environmental Quality has been in touch since the state posted, almost two weeks ago, her lead-in-water reading of more than 1000 parts per billion, or more than 100 times the acceptable level established by the World Health Organization. The EPA requires public water systems to take action if 10 percent of homes have water lead levels above 15 parts per billion. Lower lead levels are not necessarily safe.

The neighbors of Joe Ragnone, a retired English teacher, also found out he had been drinking poisonous water before he did. When he went online to check the results, he had to scroll through hundreds of readings before he found his address.

"I found it very confusing," he said. "And once I got there I didn't understand any of it. Except one column was in red."

He has subsequently discovered he has some of the highest lead-in-water levels ever recorded in Flint, at over 5400 parts per billion. According to Virginia Tech's Professor Marc Edwards, who was instrumental in uncovering the Flint catastrophe, a reading of 5000 "exceeds criteria that classifies water as a hazardous waste."

Ragnone said nobody from the government has contacted him to explain what his readings mean, and what precautions he should take. The filters the state is distributing to Ragnone and other residents, for example, are are not rated to cope with such disastrously high levels of lead.

Thousands of Flint residents have dutifully delivered a water sample from their taps to one of the state's emergency water distribution centers in Flint, from where it is sent to a state laboratory. This follows a public appeal by Gov. Snyder that families should get their water tested.

Although residents who return water samples are given a form to sign, the document does not indicate that the results, with their potentially deeply distressing health implications, will be revealed online with addresses attached.

Irreversible brain damage is just one of the potential risks for children affected by high levels of lead poisoning. Adults can suffer high blood pressure and a range of other symptoms. And Michigan has strict laws governing the release of health information.

Currently, the addresses of 591 homes with lead-in-water levels above the EPA "action level" of 15 parts per billion, are highlighted in red on the Michigan government's website.

Publishing addresses online, without consent, can have other consequences too. Ruth Elwart says that before our visit, the only people who had arrived at her door to ask about her water were three individuals who claimed to be EPA employees needing to carry out tests. When they couldn't produce identification she refused them entry, and she said they tried to break into her home. The police have since issued an alert about the fraudsters.

"I won't be able to sell the house now," Elwart says. "I couldn't sell it to people with children because I couldn't stand the guilt. But no one wants a house here. I just have to get out of the city."

Anthony Baxter is an award winning director whose previous films include You've Been Trumped and A Dangerous Game. Richard Phinney produced and wrote both films.

Subject: FEMA Daily TPs from Lansing IOF EM-3375-MI
Attachments: Talking Points Feb 15.docx

Good morning all:
There are no changes to the Daily Numbers today.

Talking Points: Flint, Michigan Water Contamination
February 15, 2016 @ 9 a.m.

Daily Numbers

Reported at 8 a.m. on February 15, 2016

As of February 15, 2016, the following commodities were requested by and provided to the state of Michigan in support of the response to the emergency conditions resulting from contaminated water in the city of Flint.

- 1,937,844 liters of water
- 136,964 water filter replacement cartridges
- 40,000 water and pitcher filters

Major Disaster Declaration/Full EM Denial

- Governor Snyder's January 20, 2016, appeal for a major disaster declaration for contamination and damage to the public water system in the City of Flint was denied on January 22, 2016. After review, FEMA determined that this event does not meet the statutory definition of major disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

    - *IF ASKED:* To qualify for a "major disaster" declaration there must be a natural catastrophe or, regardless of cause, a fire, flood or explosion which causes damages of significant severity and magnitude to warrant a declaration. FEMA's assistance is intended to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage and loss by the natural catastrophe, fire, flood or explosion. It was determined that the presence of lead in the Flint drinking water was not caused by a natural catastrophe, or by a fire, flood or explosion, so it does not qualify for a major disaster declaration.

- FEMA's assistance remains limited to what the President authorized in the Emergency Declaration on January 16, 2016. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration. The portions of the Emergency Declaration not granted can be appealed by the Governor.

- The decision means that the state can continue to work directly with other federal agencies and those agencies can provide assistance through their own authorities.

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and the Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

HHS as Federal Response Lead

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- Assistant Secretary for Preparedness and Response Dr. Nicole Lurie will lead this effort, supported by HHS Acting Assistant Secretary for Health Dr. Karen DeSalvo, as well as two U.S. Public Health Service officers.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

- FEMA will work with the HHS team in Michigan to establish a collaborative process to best support state and local leaders with identifying the size and scope of the problem and help them develop and execute a plan to address the public health and infrastructure issues in Flint.

Emergency Declaration

- On January 14, FEMA received Governor Snyder's request for an Emergency Declaration, as well as a Major Disaster Declaration for emergency protective measures, temporary housing and repairs to homes and low-cost loans for covering uninsured loss of property, as well as other federal assistance.

- On January 16, 2016, President Barack Obama declared an emergency for Genesee County in the State of Michigan, limited to Direct Federal Assistance, as a result of the emergency conditions resulting from contaminated water in the city of Flint, authorizing FEMA to support the state in its efforts to respond to the incident.

- Under this emergency declaration, FEMA is authorized to provide emergency protective measures, Category B, limited to Direct Federal Assistance, under the Public Assistance program limited to 75 percent of the total eligible costs. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration.

IF ASKED about period of assistance through EM (90 days):

- FEMA's emergency assistance is designed to be supplemental and temporary in nature. FEMA, and our partners in other federal agencies, will be working closely with the state, county, and city officials to support those officials in the development of medium and longer term solutions to this problem.

- The state may submit a request to extend the current 90 day period of assistance established by the declaration, providing a valid reason that the extension is necessary.

If ASKED about the $5 million cap on assistance

- When the amount of federal assistance for an emergency declaration exceeds $5 million, FEMA is required to notify Congress.

Other Federal Agency Assistance To-Date

- U.S. Health and Human Services

    - The Department of Health and Human Services (HHS) Office of the Assistant Secretary for Preparedness and Response (ASPR) is working to identify vulnerable Flint residents who may not be able to travel to obtain filters and water testing kits. They are also working with the Centers for Medicare and Medicaid Services (CMS) to provide critical information needed for city responders to locate vulnerable residents and to help focus the city's outreach efforts.

    - HHS-funded health care centers in the area are offering free lead testing for their patients and are reaching out to patients to make them aware of the free testing. Exposed children will receive ongoing monitoring while they are health center patients. Health centers also are providing bottled water at their facilities and are assisting patients in obtaining bottled water or water filters in coordination with county-wide efforts.

    - HHS is helping educate residents who use HHS programs and services, such as Head Start programs and programs that serve seniors. In addition, HHS-funded local agencies on aging and community partners are reaching out to seniors and grandparents raising grandchildren to help them find water and filter distribution sites and to provide homebound residents with assistance in obtaining and installing filters.

    - The Centers for Disease Control and Prevention (CDC) is currently providing technical assistance to the Michigan state health department to assess lead exposure especially in homes with children. CDC also has provided recommendations on educational interventions for children affected by lead.

- U.S. Environmental Protection Agency

  - In mid-October, the EPA established a Flint Safe Drinking Water Task Force comprised of EPA scientists who are internationally recognized experts in the field of lead in drinking water. The EPA Task Force is providing technical assistance to the Michigan Department of Environmental Quality and the City of Flint to implement corrosion control treatment and to develop school and residential sampling protocols.

  - EPA is also conducting an audit of the Michigan Department of Environmental Quality (MDEQ) drinking water program – to examine MDEQ's implementation of the Safe Drinking Water Act and related rules on lead and copper, total coliform, nitrates and ground water. This comprehensive audit will provide Flint residents and the people of Michigan with more information about MDEQ oversight of public water supplies and will identify actions that may be needed to strengthen the Michigan drinking water program.

- Housing & Urban Development

  - Flint was identified as one of six target cities in the second round of the Strong Cities – Strong Communities (SC2) White House initiative in 2014. This program focuses on enhanced Federal agency support in areas of blight reduction, public safety and economic development.

  - Discussions are ongoing between the FEMA Region 5 SC2 program lead and Department of Housing and Urban Development (HUD) staff on the Flint water crisis impacts to SC2 programs and initiatives; as well as possible opportunities for collaboration through existing federal engagement with local, county and State agencies.

  - HUD is working closely with the city on economic development and interagency coordination. They have successfully assisted the city with the purchase and installation of water filters. HUD had an existing lead hazard grant to Flint, targeted to lead paint, $325,000 of which could be used for addressing the water lead contamination. Additionally, HUD has provided a data tracking and reporting system for the State of Michigan to use in its lead investigations.

- U.S. Army Corps of Engineers

  - The FEMA Region 5 Recovery Coordinator is in discussion with the United States Army Corps of Engineers to identify possible technical assistance and/or Subject Matter Experts on public water distribution systems, and possible courses of action.

- US Department of Agriculture

  - USDA has waived requirements on potable tap water availability at school meal service, allowing schools to provide bottled water. The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) is also allowing participants to use WIC vouchers for ready-to-feed infant formula, which does not need to be mixed with water, and participants can also swap powdered formula for ready-to-feed formula.

FLINT WATER RESPONSE
DAILY STRATEGIC MESSAGING
Feb. 15, 2016

Key Messages

- Run cold water, throughout the house, for two minutes, every morning to flush pipes.
- **Use only bottled water for water, food & formula given to babies under 1 year old. Bottled water is the safest choice for pregnant or breastfeeding women & kids under 6 years of age.**
- Have water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- Affected small businesses should contact the Small Business Administration (SBA) at 800-659-2955 to determine if available low-interest disaster loans can help with financial obligations.

Products for Release

- **Media Advisory:** Surgeon General Media Availability, @730 pm, Riverfront Hall

Operational Communication Events

- **VIP:** Surgeon General Vivek Murthy & Deputy Assistant Secretary - Minority Health Nadine Gracia
- **Potential Interviews:** Surgeon General – media availability in Flint, and EPA - Mother Jones, NBC 25 & Detroit Public TV

Stakeholder Calls/Briefings/Meetings/Trainings

- **SG Meeting w/Healthcare Providers** @ 2pm Greater Flint Health Coalition; 519 S. Saginaw St.

Speakers Bureau IGA and Outreach Events/Activities

- **SG Town Hall w/Healthcare Providers** @ 6pm Riverfront Hall 1 Riverfront Center West

LOOKING AHEAD

UPCOMING EVENTS/ACTIVITIES

- **Feb. 16:**
  - **Genesee County Board of Commissioners** @ 9 a.m. 1101 Beach St. **(FYI)**
  - **SG Community Resilience Group meeting** @ 11 am GCCARD 601 N. Saginaw St.
  - **Crisis and Emergency Risk Communications Training** via VTC, @ 1pm
  - **ARC Community Leadership** Meeting @ 2pm ARC Building
  - **Blood Lead Testing** @ 2 pm 701 Third St.
  - **Congressional/Legislative Conference Call** @ 2:30pm 1-800-320-4330, pin
  - **SG Community Engagement Forum** @ 6pm Mount Carmel Baptist Church 1610 W. Pierson Rd.
  - *Flint Water Class Action/Info Meeting @ 6:30 pm Northbank Center* 432 N. Saginaw St.
- **Feb. 17**
  - **Parent Meeting and Information Sharing** @830am 1360 Milborne Ave
  - **Federal Agency Briefing** @11am 866-625-6066 pin
  - **Blood Lead Testing** @ 4pm 6031 Dupont
- **Feb. 18**
  - **HHS Secretary Visit to Flint**
  - **Parents Meeting and Information Sharing** @ 830 am 3002 Farley St.
  - **Education Points of Recovery Group** @ 11 am, 5075 S. Pilgrim Rd.
  - **Crisis and Emergency Risk Communications Training** via VTC, @1pm
  - **ARC Community Partners Meeting** @ 3pm Food Bank, 2300 Lapeer Rd.
  - **Glendale Hills Neighborhood Association** @ 630 pm, 2920 W. Court St.

- **NBC25 Town Hall** Feb 29 EPA Mark Durno to attend
- **Congressional Delegation (CODEL)** March 4
- **Speak Out** event with Black Caucus March 4
- **EPA Public Meeting and Expo** Mid-March

COMMUNITY (FIELD) FEEDBACK

- **TONE:**
  - Mistrust of local medical providers
  - Emerging mistrust of federal agencies
  - Confusion due to volume of multiple messaging sources
  - Doubt that filters are effective for removing lead
  - Attitude that "damage is already done" but willingness to look ahead towards what can be done
- **CONCERNS:**
  - Literacy levels – print materials are text heavy; community would like simpler message with more visual communication
  - Continued challenges getting water due to transportation barriers
  - Nervousness among immigrant communities about interacting with officials
  - Payment for lab (blood tests) for Adults $36
  - Next level water use (laundry, pets, etc.)
  - Health-related (hair loss, rash, dermatitis, dry skin, skin cancer, organ damage, infertility)
  - Quantity of resources provided to residents (water, filters, etc.)
  - Paying water bills
- **GAPS:**

- Filters for showers. recyclable cartridges
- Want to learn about more than just lead, in the water
- Many Spanish speakers unaware of water issues

o **OPPORTUNITIES:**

- Provide Frequently Asked Question Fact Sheet
- More Education of the Media
- More outreach to underserved and ethnic groups

PLANNED MESSAGING/PRODUCTS

o **HHS**

- Issue #2 of Key Stakeholder Advisory planned for 2/17

o **CDC:**

- Infographic on mitigation of health effects of lead
- Talking points about health effects of lead on adults (tentative)

o **EPA:**

- Sampling Results letter for homeowners
- FAQ on Top Public Questions
- Photo Slide Show for social media – EPA sampling steps

EMERGING ISSUES THAT MAY REQUIRE ADDITIONAL MESSAGING:

o Possible need to develop campaign to get the remaining kids tested.

o *A need to re-engage the health provider community to start lead testing*

FLINT WATER RESPONSE
DAILY STRATEGIC MESSAGING
Feb. 15, 2016

Key Messages

- Run cold water, throughout the house, for two minutes, every morning to flush pipes.
- **Use only bottled water for water, food & formula given to babies under 1 year old. Bottled water is the safest choice for pregnant or breastfeeding women & kids under 6 years of age.**
- Have water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- Affected small businesses should contact the Small Business Administration (SBA) at 800-659-2955 to determine if available low-interest disaster loans can help with financial obligations.

Products for Release

- **Media Advisory:** Surgeon General Media Availability, @730 pm, Riverfront Hall

Operational Communication Events

- **VIP:** Surgeon General Vivek Murthy & Deputy Assistant Secretary - Minority Health Nadine Gracia
- **Potential Interviews:** Surgeon General – media availability in Flint, and EPA - Mother Jones, NBC 25 & Detroit Public TV

Stakeholder Calls/Briefings/Meetings/Trainings

- **SG Meeting w/Healthcare Providers** @ 2pm Greater Flint Health Coalition; 519 S. Saginaw St.

Speakers Bureau IGA and Outreach Events/Activities

- **SG Town Hall w/Healthcare Providers** @ 6pm Riverfront Hall 1 Riverfront Center West

LOOKING AHEAD

UPCOMING EVENTS/ACTIVITIES

- **Feb. 16:**
  - **Genesee County Board of Commissioners** @ 9 a.m. 1101 Beach St. **(FYI)**
  - **SG Community Resilience Group meeting** @ 11 am GCCARD 601 N. Saginaw St.
  - **Crisis and Emergency Risk Communications Training** via VTC, @ 1pm
  - **ARC Community Leadership** Meeting @ 2pm ARC Building
  - **Blood Lead Testing** @ 2 pm 701 Third St.

- Congressional/Legislative Conference Call @ 2:30pm 1-800-320-4330, pin
- SG Community Engagement Forum @ 6pm Mount Carmel Baptist Church 1610 W. Pierson Rd.
- Flint Water Class Action/Info Meeting @ 6:30 pm Northbank Center 432 N. Saginaw St.

- **Feb. 17**
  - Parent Meeting and Information Sharing @830am 1360 Milborne Ave
  - Federal Agency Briefing @11am 866-625-6066 pin
  - Blood Lead Testing @ 4pm 6031 Dupont
- **Feb. 18**
  - HHS Secretary Visit to Flint
  - Parents Meeting and Information Sharing @ 830 am 3002 Farley St.
  - Education Points of Recovery Group @ 11 am, 5075 S. Pilgrim Rd.
  - Crisis and Emergency Risk Communications Training via VTC, @1pm
  - ARC Community Partners Meeting @ 3pm Food Bank, 2300 Lapeer Rd.
  - Glendale Hills Neighborhood Association @ 630 pm, 2920 W. Court St.

- NBC25 Town Hall Feb 29 EPA Mark Durno to attend
- Congressional Delegation (CODEL) March 4
- Speak Out event with Black Caucus March 4
- EPA Public Meeting and Expo Mid-March

COMMUNITY (FIELD) FEEDBACK

- TONE:
  - Mistrust of local medical providers
  - Emerging mistrust of federal agencies
  - Confusion due to volume of multiple messaging sources
  - Doubt that filters are effective for removing lead
  - Attitude that "damage is already done" but willingness to look ahead towards what <u>can</u> be done
- CONCERNS:
  - Literacy levels – print materials are text heavy; community would like simpler message with more visual communication
  - Continued challenges getting water due to transportation barriers
  - Nervousness among immigrant communities about interacting with officials
  - Payment for lab (blood tests) for Adults $36
  - Next level water use (laundry, pets, etc.)
  - Health-related (hair loss, rash, dermatitis, dry skin, skin cancer, organ damage, infertility)
  - Quantity of resources provided to residents (water, filters, etc.)
  - Paying water bills
- GAPS:
  - Filters for showers. recyclable cartridges
  - Want to learn about more than just lead, in the water
  - Many Spanish speakers unaware of water issues
- OPPORTUNITIES:
  - Provide Frequently Asked Question Fact Sheet
  - More Education of the Media
  - More outreach to underserved and ethnic groups

PLANNED MESSAGING/PRODUCTS

- HHS
  - Issue #2 of Key Stakeholder Advisory planned for 2/17
- CDC:
  - Infographic on mitigation of health effects of lead
  - Talking points about health effects of lead on adults (tentative)
- EPA:
  - Sampling Results letter for homeowners
  - FAQ on Top Public Questions
  - Photo Slide Show for social media – EPA sampling steps

EMERGING ISSUES THAT <u>MAY</u> REQUIRE ADDITIONAL MESSAGING:

- Possible need to develop campaign to get the remaining kids tested.
- A need to re-engage the health provider community to start lead testing

Subject: NEWS RELEASE: National Guard Soldier Distributing Water Saves Flint Resident's Life

INTERVIEW OPPORUNITY: Spec. Colwell will be available for interviews at Fire Station #1 located at 210 E. 5th St. from 1-4 p.m. on Friday, Feb. 12.

National Guard Soldier Distributing Water Saves Flint Resident's Life

FOR IMMEDIATE RELEASE
February 12, 2016
Release #: 36

FLINT, Mich. –While helping to hand out water to the citizens of Flint, a National Guard soldier helped save a Flint resident's life.

"This is why I joined the military, to help people," said Spec. Charles D. Colwell, a medic with the Headquarters Company of the 125th Infantry Battalion attached to Alpha Company from Detroit, Mich. He is one of 65 soldiers helping distribute water resources after Gov. Rick Snyder activated the National Guard to help with the Flint water emergency.

Because of his actions on Feb. 1, Spec. Colwell is being recommended for the Michigan Lifesaving Medal by his immediate supervisor.

While on duty at Fire Station #1 in downtown Flint, Pfc. Zacharry R. Burrell greeted the resident who was there to return recyclables. Noticing that she was short of breath and struggling for her inhaler, Burrell ascertained the resident was clearly having a medical condition and needed immediate assistance.

"She stood there for a minute and it kind of looked like she was looking for something in her bag and then she bent down and put her hands on her knees and began coughing uncontrollably and I saw she had an inhaler in her hand," said Burrell.

Burrell brought Spec. Colwell out to the woman, who immediately started assessing her condition. She had been walking with some women to the firehouse. They told Colwell the woman had used her inhaler twice and it was nearly empty. He determined she was also suffering from severe bronchitis, so he called 911.

It wasn't until the next day the other soldiers realized how much he had done when she came back to the firehouse to thank Colwell for saving her life.

Colwell who has been a medic with the Michigan National Guard for the last two years is also a trained emergency medical technician on the civilian side in the city of Detroit.

"I do this so much every day and everyone else is kind of blowing it up," explained a humble Colwell, who doesn't understand why the other soldiers he is working with thinks he deserves the Michigan Lifesaving Medal.

"I couldn't be more proud of him," said his squad leader, Sgt. Brandon M. Lewis. "That's why I put him in for the highest award that I could possibly recommend for him for doing that."

Colwell went beyond his normal duties while in Flint and his actions made what could have been a bad situation a positive one.

"If it wasn't for him, one of us might have misjudged the situation and just thought she was sick," said Lewis. "Not only did he immediately seek her out, but he did everything he could to make her comfortable and by the time the EMTs and paramedics got here he already had an assessment to hand over to them so they were a few steps ahead."

The 125th Infantry Battalion includes soldiers from different companies from around the state who have volunteered to assist the citizens of Flint during this time. They are stationed at water resource sites at the five fire stations, handing out water, water filters and water testing kits.

Subject:	Sharing media story: New warning letters sent to residents about excessive lead levels in Flint

New warning letters sent to residents about excessive lead levels in Flint
By NBC 25 Newsroom |Thursday, February 11th 2016
http://nbc25news.com/news/local/new-warning-letters-sent-to-residents-about-excessive-lead-levels-in-flint

FLINT — **New warning letters sent to residents about excessive lead levels in Flint city water.**

NBC 25 has **obtained a letter from the Genesee County Health Department saying "some residents shouldn't be drinking their water period."**

This comes after the latest round of lead testing in the city. NBC 25 spoke to a homeowner who received the letter.

The homeowner **got a letter from the Michigan Department of Environmental Quality that shows the lead in their home is at 235 parts per million, that is 15 times the federal action limit.**

For Leah and Tony Palladeno, the months waiting and wondering about their health took a new turn. The DEQ says tests at their home show lead and copper levels are extremely high, **so high their water filter can't remove it.** Tony said," We knew, and it's been two and half years now, but my bones and her bones, we can hardly even get up anymore, we're 54-years-old." Tony and Leah also own rental properties nearby and all four have water with too much lead.

Leah Palladeno, which has lead in her blood said, " Like I said when I first went to the Dr. they told me if I wanted a lead test, I would have to pay for it and insurance would accept it, but then I went back a few months later and now it was mandatory for all people."

A Flint City Councilman says he may take action to fix the pipes. Flint city councilman Eric Mays said, "I've got some construction people, and right now we want to locate that, and we want to do the first replacing of the lead pipes, and I've got someone who will do one for free. "

The Genesee County Health Department is also sending out letters like this one. It also says **don't drink the water even if you have a filter.** We reached out to the Genesee County Health Department and the DEQ, but they didn't return our phone calls.

Subject:	sharing media story: Mobile clinic coming to Flint to provide care to children

Mobile clinic coming to Flint to provide care to children
By Associated Press |Friday, February 12th 2016

FLINT — **A mobile medical clinic designed to provide care and resources to children is coming to Flint** as the city deals with a lead-tainted water crisis.

U.S. Sen. Debbie Stabenow, Flint Mayor Karen Weaver and Dr. Mona Hanna-Attisha will be on-hand Friday at Hurley Children's Clinic when **New York-based Children's Health Fund deploys one of the vehicles in its fleet of mobile clinics.**

State officials disconnected Flint from Detroit's water supply in 2014 and began using the Flint River to save money. Regulators failed to ensure the new water was treated properly and lead from pipes leached into the water supply, contributing to a spike in child lead exposure.

Hanna-Attisha is credited with bringing the problem to the public's attention after state agencies initially dismissed her concerns.

Subject: UCG Flint Daily External Affairs Messaging Plan 2-12-16
Attachments: Daily Msg Plan for Flint Water Response_2-12-2016.pdf; Daily Msg Plan for Flint Water Response_2-12-2016.docx

Good Morning. Your daily UCG Flint External Affairs Messaging Plan 2-12-16 is attached and below:

FLINT WATER RESPONSE
DAILY STRATEGIC MESSAGING
Feb. 12, 2016

Key Messages

- EPA advises residents to run cold water, throughout the house, for two minutes, every morning to flush pipes.
- The safest option to protect children younger than 12 months of age, for lead and copper, is to only use bottled water for drinking water and the reconstitution of infant formula, or any other food product.
- Have your water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- The safest option for vulnerable populations including pregnant and nursing mothers, and children under six years old, is to use bottled water.
- Affected small businesses should contact the Small Business Administration (SBA) at **800-659-2955** to determine if available low-interest disaster loans can help with financial obligations.

Products for Release

- *News Releases*
  - **EPA**: Sequential Lead Sampling Locations & Preliminary Results, with Chlorine Info

Operational Communication Events

Speakers Bureau IGA and Outreach Events/Activities

- **US Dept. of Education (DOE) Outreach** @ 830 Erwin L. Davis Education Center, 2413 W. Maple

LOOKING AHEAD

UPCOMING EVENTS/ACTIVITIES

- **Access Community Canvass Event** Feb 13 @ 8 a.m. Community-wide
- **Latino Coalition Community Canvass** Feb 13 @ 12:30 p.m. 609 E. 5th Ave.
- **Surgeon General Visit:** Feb 15-16
- **Crisis and Emergency Risk Communications Training** via VTC, Feb. 16 @ 1pm
- **HHS Secretary Visit:** Tentatively Feb 18
- **Crisis and Emergency Risk Communications Training** via VTC, Feb. 18 @1pm
- **NBC25 Town Hall** Feb 29
- **EPA Public Meeting and Expo** End of Feb
- **Congressional Delegation (CODEL)** visit March 4

COMMUNITY (FIELD) FEEDBACK

- **TONE:**
  - Unanswered Questions, Confusion, Uncertainty of an End State
- **CONCERNS:**
  - Next level water use (laundry, pets, etc.)
  - Health-related (rash, dermatitis, dry skin, skin cancer, organ damage, infertility)
  - Quantity of resources provided to residents (water, filters, etc.)
  - Paying water bills
- **GAPS:**
  - Filters for showers. recyclable cartridges
  - Want to learn about more than just lead, in the water
- **OPPORTUNITIES:**
  - Provide Frequently Asked Question Fact Sheet
  - More Education of the Media

PLANNED MESSAGING/PRODUCTS

- **CDC:**
  - News Release regarding CDC blood lead level screening recommendations

- Infographic on mitigation of health effects of lead

- **EPA:**
  - Sampling Results letter for homeowners
  - FAQ on Top Public Questions

EMERGING ISSUES THAT MAY AFFECT MESSAGING:

- Possible need to develop Campaign/PSA to get the remaining kids tested.
- A need to re-engage the health provider community to start lead testing

COMMUNITY (FIELD) FEEDBACK

- **TONE:**
  - Unanswered Questions, Confusion, Uncertainty of an End State
- **CONCERNS:**
  - Next level water use (laundry, pets, etc.)
  - Health-related (rash, dermatitis, dry skin, skin cancer, organ damage, infertility)
  - Quantity of resources provided to residents (water, filters, etc.)
  - Paying water bills
- **GAPS:**
  - Filters for showers. recyclable cartridges
  - Want to learn about more than just lead, in the water
- **OPPORTUNITIES:**
  - Provide Frequently Asked Question Fact Sheet
  - More Education of the Media

PLANNED MESSAGING/PRODUCTS

- **CDC:**
  - News Release regarding CDC blood lead level screening recommendations
  - Infographic on mitigation of health effects of lead
- **EPA:**
  - Sampling Results letter for homeowners
  - FAQ on Top Public Questions

EMERGING ISSUES THAT MAY AFFECT MESSAGING:

- Possible need to develop Campaign/PSA to get the remaining kids tested.
- A need to re-engage the health provider community to start lead testing

Sentinel Site Teams to Discuss Process For Testing Water at Homes Across the City
402 Flint Households to Help Determine When City's Water Safe to Drink

FOR IMMEDIATE RELEASE
February 11, 2016

DATE:
Friday, Feb.12, 2016

TIME:
9 a.m.

WHERE:
Local Emergency Operations Center
Genesee County Administration Building
1101 Beach Street
Flint, MI 48502

WHO:
Sentinel site teams comprised of Michigan Department of Environmental Quality (DEQ) employees and licensed plumbers.

WHAT:
Yesterday, 10 sentinel site teams began visiting 402 identified Flint homes across the city to teach residents how to test their water in a scientifically accurate manner so they may submit regular samples to the state for testing. This in-depth level of data collection

will help confirm when Flint's drinking water is safe and provide a more streamlined level of post-testing services for resident health and wellness.

To protect individuals' privacy, demonstrations will not be given at residences.

This is an opportunity for media to get photos and video of the information teams that will cover with homeowners.

Subject: sharing media story: The Congressional Black Caucus Is Heading To Flint

The Congressional Black Caucus Is Heading To Flint
"You cannot have, in 2016, 100,000 people unable to get clean drinking water out of their spigots."
02/11/2016 12:57 pm ET, Tyler Tynes
Politics Fellow, The Huffington Post

WASHINGTON -- **The Congressional Black Caucus will travel to Flint, Michigan, in March** to protest the city's ongoing water crisis.

The **"Speak Out" event will allow Flint residents to tell members of Congress how their lives have been affected by a crisis linked to environmental racism.**

"What has happened in Flint should touch the heart of anyone who has compassion for others, and especially for those who care for the well-being and safety of our children," CBC Chairman G. K. Butterfield said. "The CBC was among the first to demand a thorough federal investigation of the Flint water crisis and we will be among those visiting with Flint families to further amplify the urgency of this situation."

Rep. Dan Kildee (D-Mich.), a native of Flint, helped organize the event with Butterfield, Rep. Brenda Lawrence (D-Mich.) and Rep. Keith Ellison (D-Minn.), the co-chair of the Congressional Progressive Caucus. Kildee helped mobilize support, briefing CBC members on the Flint crisis in a series of meetings.

"What is happening in my hometown breaks my heart. Resources are needed right now for Flint and the families, particularly children, who are the victims of this terrible tragedy," Kildee said in a release. "Governor Snyder, whose administration's policies created this public health emergency, has a moral obligation to help the victims of this crisis."

And getting members to Flint and putting boots on the ground is important, since congressmen didn't fully understand until a few weeks ago how dire the situation is.

"Frankly, members of Congress were not aware of the problem until the last six or eight weeks. People knew there was a problem but it really didn't come up to a national recognition," Rep. Robert "Bobby" Scott (D-Va.) told The Huffington Post. "Obviously there needs to be an immediate response. There are short term and long term responses that have to be made. The health effects are permanent and long term."

The CBC has been busy this week. On Thursday, it formally announced that the caucus' political action committee would endorse Hillary Clinton for president. Clinton has courted the black vote, earning strong support from African-Americans and even holding campaign events in Flint last weekend. Additional details about the upcoming event in Flint haven't been released, but will be in the coming weeks. Other members of the caucus believe what happened in Flint wouldn't have happened in a more affluent community.

"You cannot have, in 2016, 100,000 people unable to get clean drinking water out of their [pipes]. That's unconscionable," Rep. Elijah Cummings (D-Md.) told HuffPost. "I am convinced that, you know, we have a lot of people who are very poor and who are minorities and we have people who many of them are underprivileged. If this were in a different type of neighborhood, if it were a predominately white community, this wouldn't happen. I think we would all be upset."

Sharing the FEMA EM 3375-generated MM report:

Summary: Protesters call for Gov. Snyder's resignation. Emails claim Gov. Snyder ordered DEQ to withhold Flint lead test results. More than 400 Flint residents to receive at-home water test training. SBA opens help center for small businesses affected by Flint's water crisis. State institute training new pipe layers to help Flint. Flint fire department says water is damaging its trucks.

Below is a sampling of the coverage.

Flint fuels finger pointing, political maneuvering
February 11, 2016 *Kathleen Gray and Todd Spangler, Detroit Free Press*
http://www.freep.com/story/news/local/michigan/flint-water-crisis/2016/02/11/flint-fuels-finger-pointing-political-maneuvering/80016758/ *(for full story click on link)*

As the Flint water crisis evolves from ongoing public health crisis to the search for a costly solution, the situation also has taken on the air of a football game, a political football game, that is.

"Some of the actions seem to be more about the people making the statements rather than helping the people of Flint," said Lansing political consultant Tom Shields, of Marketing Resource Group. "It's tough not to be cynical because it has become such a political football."

The crisis over lead-tainted water has become fodder for local, state and national politics where Democrats are assigning blame to the Republican-led administration of Gov. Rick Snyder and Republicans are pointing the finger at Democrats in Flint as well as the Environmental Protection Agency under the control of President Barack Obama.

"Politicians using an issue for their own election? Oh My God, that would be new," said political consultant Robert Kolt sarcastically. "It's a convenient narrative for any politician to run on the Flint water crisis for whatever angle it might take."
"You would want politicians with high visibility to have this on their radar, but you don't want them to take advantage of it for their personal gain," said Detroit political consultant Mario Morrow, who worked for both Govs. Jennifer Granholm and Snyder. "I would hate to think that people are using this for personal gain. And that will be proven if they can deliver on some promises instead of just continuing with political rhetoric."

As the U.S. House Oversight Committee last week opened the first hearing on Flint, Democratic members — particularly U.S. Rep. Brenda Lawrence, D-Southfield — vociferously demanded that Snyder should appear before the committee, even though it would have been exceedingly rare for Congress to try to force a governor to appear and Snyder ultimately wasn't invited to testify.

Rep. Sheila Jackson Lee, center, talks to the media. Behind her are, from left, Rev. Reginald G. Flynn, Rep. Dan Kildee and Rep. Sander Levin. Elected officials met with Flint families affected by water crisis during Neighborhood Meetings. Salwan Georges, Detroit Free Press
The hearing played out as expected, with Democrats going after Snyder's handpicked successor at the Michigan Department of Environmental Quality, Keith Creagh, and Republicans firing questions at an acting deputy assistant administrator at the EPA, Joel Beauvais, neither of whom had direct knowledge or involvement in what happened in Flint, but who both took their lumps. But committee Chairman Jason Chaffetz, R-Utah, and other members of the committee still had to be credited with taking an approach that, while questioning why the EPA didn't move faster, did not let the state officials off the hook, either.
"This is a failing at every level," Chaffetz said. "The public has a right to be outraged. Outrage doesn't even begin to cover it."
But if the partisanship in the committee room was at least somewhat tempered, that wasn't the case on the floor of the U.S. Senate, where Democrats blocked, for the moment at least, further consideration of a long-awaited energy modernization act, with U.S. Sens. Debbie Stabenow and Gary Peters, Michigan Democrats, demanding it include hundreds of millions to rebuild Flint's damaged water infrastructure.

Republicans offered a compromise — $50 million upfront and more in low-interest loans to follow — but Democrats didn't bite, hijacking the bill on two key votes and ensuring that negotiations would continue. Stabenow said the move was necessary to ensure that adequate funding is put in place to respond to the crisis but Senate Majority Whip John Cornyn of Texas said it was more about "embarrassing" Republicans.

The heated political atmosphere is unlikely to cool down anytime soon either, with presidential candidates being asked about it, the Senate debate over funding far from over, Chaffetz calling witnesses to be deposed, the House Energy and Commerce Committee planning a hearing in March, congressional Democrats holding their own hearing and almost-daily questions for White House press secretary Josh Earnest on the subject.

For the residents of Flint, the national attention on the crisis, even if politically motivated, means only one thing: a solution may come quicker.

After hearing Clinton speak on Sunday, Flint resident James Shelton shrugged off criticism of her focus on the city. "I'll tell you this, I just put a check in the mail for Hillary. I'm a politics freak, so I think this is a good thing."

Carolyn Harper of Flint said she can understand the criticism but she believes Clinton is "going to do what she says. Put her and the mayor (Flint Mayor Karen Weaver) together and they're going to get something done."

And state Rep. Al Pscholka, R-Stevensville, said requests from Snyder for more state money for Flint will reveal the motivations of his colleagues in the Legislature.

"I just think it's really time for people to look in their souls and ask 'Do you want to be a servant, not to gain something for yourself, and in many ways, not to cover your own tail,'" he said.

.....

Protests as Governor lays out budget
February 11, 2016 *FOX 47 News*
http://www.fox47news.com/news/local-news/protests-as-governor-lays-out-budget

Governor Rick Snyder wants to spend nearly $200 million to help Flint, but it was difficult for him to get that message across in his budget presentation on Wednesday thanks to a loud group of protesters.

Dozens of protesters waited outside the House Appropriations room while the Governor was speaking. Many were Flint residents chanting things like, "Snyder's got to go" and "fix the pipes."

The Governor couldn't help but hear those messages inside the committee room, with the protesters audible chants.

For Flint resident Desiree Duell, getting more funding is only part of the solution.

"What would really satisfy me is if Governor Snyder resigned," Duell said. "He needs to be gone so we can rebuild trust with our government."

Governor Snyder said he's doing his best to make Flint a priority. In his presentation the Governor asked lawmakers to approve $195.4 million in one-time funding for Flint.

"What we tried to be was responsive to the areas we're hearing from flint residents, concerns about the water, concerns about the kids, concerns about the long term of the community," Snyder said.

That funding would come from the state's surplus and would pay for things like replacing pipes and nutritional programs. Snyder is also banking on more funding from Washington.

"I hope the federal government is rolling up its sleeves and diving into this like we are," Snyder said. "We need to stand up for the people of Flint and get them better results."

Duell says that doesn't cut it for her, and she wants to see more of a focus on what the state will be doing for Flint in the future.

"We need a very specific plan on how this money is going to be used and long term needs for the residents of Flint," she said. "We don't need some one time gimmick."

A decision Duell doesn't think the governor will make.

.....

Snyder ordered DEQ to withhold Flint lead test results, emails claim
February 10, 2016 *Gary Ridley | gridley@mlive.com*
http://www.mlive.com/news/flint/index.ssf/2016/02/snyder_ordered_deq_to_withhold.html#incart_special-report *(for full story click on link)*

FLINT, MI – Gov. Rick Snyder and other state officials allegedly withheld lead testing results from county health officials while they worked to find ways to present the information to the public, according to emails obtained by The Flint Journal.

Local health officials say the governor and the Michigan Department of Environmental Quality withheld lead testing results, including results from a Flint elementary school, while the agency discussed the best way to present the information to the public.

But, Snyder's office said Wednesday, Feb. 10, that information was shared quickly after testing and denied withholding any information

Emails obtained this week from the Genesee County Health Department through the Freedom of Information Act show growing frustration on the county's part as it attempted to obtain information from the DEQ.

"MDEQ explained that the Governor prohibited releasing all Genesee County lead results until after the press conference," wrote Jim Henry, Genesee County's environmental health supervisor.

Henry, in an interview Wednesday, said county officials didn't learn of the test results until they were distributed following a press conference.

"They should have alerted the schools and they didn't," Henry said.

Gov. Rick Snyder announced Oct. 8 during a press conference that three buildings within the Flint School District tested above the federal limits for lead in the drinking water, including results of more than six times the federally allowable level at Freeman Elementary School.

The announcement included a plan to buy nine months of water from the Detroit Water and Sewerage Department to end the city's reliance on the Flint River as its drinking water source.

An additional $4 million was requested for efforts to address immediate lead issues, including further testing of children in Flint school buildings where the high lead rates were discovered.

Following the announcement, a meeting was held Oct. 16 with DEQ officials, including then drinking water chief Liane Shekter Smith, and Henry, according to the emails.

According to an Oct. 18 email Henry wrote to county Health Officer Mark Valacak summarizing the meeting, DEQ apologized for not releasing school lead results in a timely manner and claimed they were ordered by Snyder to delay the release.

The governor's office, when asked Wednesday denied they ordered the DEQ to delay releasing any information, but said the start of testing and announcement were only six days apart.

"The email seems to reflect someone summarizing a discussion at a meeting, and we are unsure what actually was said there," Snyder Press Secretary Dave Murray said. "We do know that the testing began on Oct. 2, it took some time to test 13 buildings, action was taken immediately and the Governor held a press conference in Flint to discuss the results on Oct. 8. There was no delay during that time period.

"People were quickly informed of the results in the schools, and that action on the fixtures with elevated levels was taken immediately."

The DEQ announced three days after the meeting that Shekter Smith was being reassigned. She was eventually suspended and ultimately fired Feb. 5.

.....

More than 400 Flint residents to receive at-home water test training
February 10, 2016 *Roberto Acosta | racosta1@mlive.com The Flint Journal*
http://www.mlive.com/news/flint/index.ssf/2016/02/more_than_400_flint_residents.html#incart_2box_news_flint

FLINT, MI – More than 400 homes spanning Flint's nine wards have been targeted as "sentinel sites" where residents will be trained to test water from their faucets for the state to provide lead level results.

Gov. Rick Snyder announced the plan Wednesday, Feb. 10, that includes state Department of Environmental Quality employees and licensed plumbers heading to the swath of homes for the program.

"Their diligence in taking scientific samples from their home's water system is crucial in helping us decide the right time to declare when Flint neighborhoods have safe drinking water," said Snyder in a statement.

A look at the more than 400 'sentinel sites' where Flint residents will receive training from the state Department of Environmental Quality and licensed plumbers to conduct their own water testing. *Courtesy Photo*

The U.S. Public Health Service Commissioned Corps officers is aiding the Genesee County Health Department in the clearance of a months-long backlog of blood lead levels results for Flint residents.

A group of 13 officers have cataloged roughly 800 blood tests, mainly from children, and mailed out test results with educational material, as well as the information being sent to the state.

"We are proud to stand shoulder-to-shoulder with community leaders and local health officials to support the community in response to this crisis," said Dr. Karen DeSalvo, HHS Acting Assistant Secretary for Health, who oversees the USPHS Commissioned Corps.

Capt. Phil Farabaugh, who is leading the USPHS strike team efforts in the city, said "It's an honor to serve the residents of Flint" and they are ready to provide technical skills to the community.

Snyder recently announced the hiring of 50 city residents as part of a partnership with Orchards Children's Services and Flint YMCA's Safe Places Program to conduct water testing.

.....

Help center opens for small businesses impacted by Flint's water crisis
February 10, 2016 *Dominic Adams | dadams5@mlive.com The Flint Journal*
http://www.mlive.com/news/flint/index.ssf/2016/02/help_center_opens_for_small_bu.html

FLINT, MI – Businesses impacted by Flint's water crisis will have a place to go in the city for assistance.

The Small Business Administration opened the Flint Business Recovery Center on Wednesday, Feb. 10 to aid entrepreneurs and business owners who are seeing their bottom line affected by the elevated lead levels in the water here.

A location inside the Oak Business Center, 2712 Saginaw St., will be open from 8 a.m. to 5 p.m., Monday through Friday through Feb. 25, according to a statement from U.S. senators Gary Peters and Debbie Stabenaw and Congressman Dan Kildee.

Flint's water is currently in the national spotlight after elevated blood levels were discovered in some Flint children after the city changed its water source from Lake Huron water purchased from the Detroit water system to the Flint River in April 2014, a decision made while the city was being run by a state-appointed emergency manager.

State regulators never required that the river water be treated to make it less corrosive, causing lead from plumbing and pipes to leach into the water supply.

Even though the city reconnected to the Detroit water system in October, local officials have advised Flint resident not to drink city water unless they are using a lead-clearing filter.

"Small businesses in Flint, especially restaurants, bars and others in the hospitality industry, have seen a drop off in customers and revenue due to contaminated water even as they have installed filtration systems to ensure their products are safe," Peters said in the statement. "The water crisis has exacerbated the economic hardships already facing the Flint community."

The Small Business Administration approved an economic injury disaster loan declaration for Genesee County and the city of Flint, which will allow loans for businesses adversely affected by the city's water crisis, the statement said.

Eligible businesses and non-profits can apply for up to $2 million in long term, low interest loans that can be uses on capital needs like making payroll or replacing inventories.

"I applaud the swift action by the Obama Administration to support small businesses in Flint," Kildee said in the statement. "I've met directly with Flint business owners who have shared with me their daily struggles to keep the doors open through this ongoing crisis. These federal loans will help put Flint on a road to recovery."

Loan applications are accepted until Nov. 7.

"There is no question that the Flint water crisis has hurt the bottom lines of our small businesses," Stabenaw said in the statement. "The new SBA recovery center will give them a place to get the help they need to get through this crisis and prosper."

.....

Training New Pipe Layers
February 11, 2016 *Joy Wang WILX.com*
http://www.wilx.com/news/localnews/headlines/Training-New-Pipe-Layers-368409501.html

For more than 20 years, Jeff Steiss replaced pipes in Flint.

"Huge problem," said Steiss, an instructor at the Michigan Laborers' Training and Apprenticeship Institute. "Huge problem. The infrastructure in Flint, good share of it is 80-100 years old."

That's why he's spending the rest of his career training other laborers to fix the problem.

"The scope of the job is very unclear right now," said Steiss. "I mean originally they talked about replacing all the main line. That's not really feasible to do at once."

Especially without enough workers. The institute offers an 80 hour training course to teach laborers to lay pipes.

"They're learning how to put water main together," said Lynn Coleman, the Director of the institute. "Fire hydrants, different things, and all the different intricacies that go along with it, along with keeping them safe while they're working in the trench."

The Michigan Laborer's Training Center is also partnering with other groups, including Michigan Works! and Flint Youthbuild to get enough workers trained to get the job done in Flint.

"To assure that the city of Flint residents get a chance to be trained and be safe when they go out there to work for a contractor and do work on their own backyard," said Coleman.

Plus the local labor union already has 200 workers ready to get started.

"We have the knowledge," said Daniel Husted with Laborers' Local 1075. "We have the people trained to do that. The weather you know we can't predict what the weather will do."

One of many factors that could slow the process down.

"They're going to have to do a lot of planning," said Steiss. "A lot of planning and a lot of research."

To get clean water to Flint as quickly as possible.

"The faster you want to do it, the more money it's gonna cost," said Steiss.

And the more people it's going to take.

.....

Flint water damaging city fire trucks
February 11, 2016 *WSYM-TV*
http://www.fox47news.com/news/local-news/fint-water-damaging-city-fire-trucks

The sooner those water lines are replaced in flint the better. That's according to the city's fire department.

The chief believes the city's corrosive water is damaging its fire trucks and says if the problem gets any worse it could be devastating.

"At just a year and a half old, Flint Fire Engine 61 is the newest in the fleet. The intake valve, we see rust around it. We also have rubber that seals it. Those are being destroyed by whatever is in the water."

It was brought to his attention about a week ago by emergency equipment mechanic Mike Taylor, who took a photo of one of the fittings. Taylor says the photo shows pieces of Flint's water line getting caught in the pumps.

"That's a brand new $462,000 pump that we're talking about."

Fire Chief David Cox, Jr. says this type of corrosion shouldn't be happening for several years.

"We actually called the manufacturers of three of our fire trucks and they actually gave us some ideas of how to combat that a little bit, but what's done is done and we're hoping it doesn't get to a point where we have to replace pumps."

Which is what happened to the pump of a much older truck sent to Cox a couple months ago.

An invoice provided to the department estimates 65,000 dollars in repairs. Right now, the goal is to prevent that from happening to more engines by flushing out water lines weekly.

So far, Cox says there hasn't been much of an impact on the department's ability to fight fires.

"We test those pumps every day and if they're not working right, when we test them in the morning, then they won't be in service."

People at the fire department are trying to figure out how the water is affecting it's fire suppression systems.

Those are the sprinklers seen in businesses and some homes that go off when there's a fire.

The chief says they're calling around to sprinkler companies to see if they're doing any inspections.

FYI

Chelsea Clinton to make stops in Michigan Thursday
Clinton will visit Flint and Detroit

DETROIT - In support of her mother, Democratic Presidential Candidate Hillary Clinton, Chelsea Clinton will make campaign stops in Michigan on Thursday. Clinton is scheduled to attend events in both Flint and Detroit.

Clinton's visit to Michigan comes just four days after her mother's first visit to Flint, where the presidential candidate delivered passionate words to Flint residents affected by the city's water crisis. The former first daughter's visit will focus on meeting with community leaders who are working to support children and families. Clinton will also be rallying for votes in preparation of Michigan's presidential primary set for March 8.

Here's a lineup of where Chelsea will be:

WHAT: The Hurley Children's Center with Dr. Mona Hanna-Attisha
WHEN: **Thursday, February 11 from 3:00 PM - 3:20 PM** (Media must arrive by 2:45 PM)
WHERE: **300 E 1st Street, Flint, MI 48502 (located inside the Flint Farmer's Market; media should enter through the blue awning)**

WHAT: Meeting with Members of UA Local 370
WHEN: Thursday, February 11 from 3:40 PM - 4:00 PM
WHERE: 5500 West Pierson Road, Flushing, MI 48433

WHAT: Visit with Detroit Mayor Mike Duggan and Tour YouthVille Detroit
WHEN: Thursday, February 11 from 5:15 - 6:30 PM
WHERE: 7375 Woodward Avenue, Detroit, MI 48202

Subject: FEMA Daily TPs from Lansing IOF EM-3375-MI
Attachments: Talking Points Feb 11.docx

Sharing talking points from FEMA EM 3375 mission as an FYI

Good morning all:
There are no changes to the Daily Numbers from the Feb. 10 report.

Talking Points: Flint, Michigan Water Contamination
February 11, 2016 @ 9 a.m.

Daily Numbers

Reported at 6 p.m. on February 10, 2016

As of February 11, 2016, the following commodities were requested by and provided to the state of Michigan in support of the response to the emergency conditions resulting from contaminated water in the city of Flint.

- 1,782,294 liters of water
- 136,964 water filter replacement cartridges
- 40,000 water and pitcher filters

Major Disaster Declaration/Full EM Denial

- Governor Snyder's January 20, 2016, appeal for a major disaster declaration for contamination and damage to the public water system in the City of Flint was denied on January 22, 2016. After review, FEMA determined that this event does not meet the statutory definition of major disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

    - *IF ASKED:* To qualify for a "major disaster" declaration there must be a natural catastrophe or, regardless of cause, a fire, flood or explosion which causes damages of significant severity and magnitude to warrant a declaration. FEMA's assistance is intended to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage and loss by the natural catastrophe, fire, flood or explosion. It was determined that the presence of lead in the Flint drinking water was not caused by a natural catastrophe, or by a fire, flood or explosion, so it does not qualify for a major disaster declaration.

- FEMA's assistance remains limited to what the President authorized in the Emergency Declaration on January 16, 2016. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration. The portions of the Emergency Declaration not granted can be appealed by the Governor.

- The decision means that the state can continue to work directly with other federal agencies and those agencies can provide assistance through their own authorities.

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and the Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

HHS as Federal Response Lead

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- Assistant Secretary for Preparedness and Response Dr. Nicole Lurie will lead this effort, supported by HHS Acting Assistant Secretary for Health Dr. Karen DeSalvo, as well as two U.S. Public Health Service officers.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

- FEMA will work with the HHS team in Michigan to establish a collaborative process to best support state and local leaders with identifying the size and scope of the problem and help them develop and execute a plan to address the public health and infrastructure issues in Flint.

Emergency Declaration

- On January 14, FEMA received Governor Snyder's request for an Emergency Declaration, as well as a Major Disaster Declaration for emergency protective measures, temporary housing and repairs to homes and low-cost loans for covering uninsured loss of property, as well as other federal assistance.

- On January 16, 2016, President Barack Obama declared an emergency for Genesee County in the State of Michigan, limited to Direct Federal Assistance, as a result of the emergency conditions resulting from contaminated water in the city of Flint, authorizing FEMA to support the state in its efforts to respond to the incident.

- Under this emergency declaration, FEMA is authorized to provide emergency protective measures, Category B, limited to Direct Federal Assistance, under the Public Assistance program limited to 75 percent of the total eligible costs. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration.

IF ASKED about period of assistance through EM (90 days):

- FEMA's emergency assistance is designed to be supplemental and temporary in nature. FEMA, and our partners in other federal agencies, will be working closely with the state, county, and city officials to support those officials in the development of medium and longer term solutions to this problem.

- The state may submit a request to extend the current 90 day period of assistance established by the declaration, providing a valid reason that the extension is necessary.

If ASKED about the $5 million cap on assistance

- When the amount of federal assistance for an emergency declaration exceeds $5 million, FEMA is required to notify Congress.

Other Federal Agency Assistance To-Date

- U.S. Health and Human Services

    - The Department of Health and Human Services (HHS) Office of the Assistant Secretary for Preparedness and Response (ASPR) is working to identify vulnerable Flint residents who may not be able to travel to obtain filters and water testing kits. They are also working with the Centers for Medicare and Medicaid Services (CMS) to provide critical information needed for city responders to locate vulnerable residents and to help focus the city's outreach efforts.

    - HHS-funded health care centers in the area are offering free lead testing for their patients and are reaching out to patients to make them aware of the free testing. Exposed children will receive ongoing monitoring while they are health center patients. Health centers also are providing bottled water at their facilities and are assisting patients in obtaining bottled water or water filters in coordination with county-wide efforts.

    - HHS is helping educate residents who use HHS programs and services, such as Head Start programs and programs that serve seniors. In addition, HHS-funded local agencies on aging and community partners are reaching out to seniors and grandparents raising grandchildren to help them find water and filter distribution sites and to provide homebound residents with assistance in obtaining and installing filters.

    - The Centers for Disease Control and Prevention (CDC) is currently providing technical assistance to the Michigan state health department to assess lead exposure especially in homes with children. CDC also has provided recommendations on educational interventions for children affected by lead.

- U.S. Environmental Protection Agency

  - In mid-October, the EPA established a Flint Safe Drinking Water Task Force comprised of EPA scientists who are internationally recognized experts in the field of lead in drinking water. The EPA Task Force is providing technical assistance to the Michigan Department of Environmental Quality and the City of Flint to implement corrosion control treatment and to develop school and residential sampling protocols.

  - EPA is also conducting an audit of the Michigan Department of Environmental Quality (MDEQ) drinking water program – to examine MDEQ's implementation of the Safe Drinking Water Act and related rules on lead and copper, total coliform, nitrates and ground water. This comprehensive audit will provide Flint residents and the people of Michigan with more information about MDEQ oversight of public water supplies and will identify actions that may be needed to strengthen the Michigan drinking water program.

- Housing & Urban Development

  - Flint was identified as one of six target cities in the second round of the Strong Cities – Strong Communities (SC2) White House initiative in 2014. This program focuses on enhanced Federal agency support in areas of blight reduction, public safety and economic development.

  - Discussions are ongoing between the FEMA Region 5 SC2 program lead and Department of Housing and Urban Development (HUD) staff on the Flint water crisis impacts to SC2 programs and initiatives; as well as possible opportunities for collaboration through existing federal engagement with local, county and State agencies.

  - HUD is working closely with the city on economic development and interagency coordination. They have successfully assisted the city with the purchase and installation of water filters. HUD had an existing lead hazard grant to Flint, targeted to lead paint, $325,000 of which could be used for addressing the water lead contamination. Additionally, HUD has provided a data tracking and reporting system for the State of Michigan to use in its lead investigations.

- U.S. Army Corps of Engineers

  - The FEMA Region 5 Recovery Coordinator is in discussion with the United States Army Corps of Engineers to identify possible technical assistance and/or Subject Matter Experts on public water distribution systems, and possible courses of action.

- US Department of Agriculture

  - USDA has waived requirements on potable tap water availability at school meal service, allowing schools to provide bottled water. The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) is also allowing participants to use WIC vouchers for ready-to-feed infant formula, which does not need to be mixed with water, and participants can also swap powdered formula for ready-to-feed formula.

Subject: UCG Flint Daily External Affairs Messaging Plan for 2-11-16

Good Morning Team. Your daily UCG Flint External Affairs Messaging Plan 2-11-16 is attached and below. Have a great day!

FLINT WATER RESPONSE
DAILY STRATEGIC MESSAGING
Feb. 11, 2016

Key Messages

- EPA advises residents to run cold water, throughout the house, for two minutes, every morning to flush pipes.
- **The safest option to protect children younger than 12 months of age, for lead and copper, is to only use bottled water for drinking water and the reconstitution of infant formula, or any other food product.**
- Have your water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- The safest option for vulnerable populations including pregnant and nursing mothers, and children under six years old, is to use bottled water.

Products for Release

- *News Releases*
  - **EPA: Sequential Lead Sampling Locations and Preliminary Results, updated Chlorine Data**
- *Fact Sheet*
  - ***EPA: updating materials to include Copper Health messaging**

Operational Communication Events

- *VIP Visits*
  - **HHS** Dr. Nicole Lurie in Flint

- *News Interviews*
  - **EPA:** Potential for media interviews on How to Use Your Filter & Scheduling NY Times re: EPA's work in Flint

Stakeholder Calls/Briefings/Meetings/Trainings

- **Psychology First Aid Training** @ 8:30 am & 1pm Mott Regional Technology Center, 1401 E. Court St.
- **Flint Water Response Training:** @ 11:30 pm 1610 W. Pierson Rd
- **ARC Community Partners Meeting:** @ 3 p.m. Food Bank, 2300 Lapeer Rd

Speakers Bureau IGA and Outreach Events/Activities

- **Faith-based Meeting** with Community Leaders and Dr. Lurie @ 11 a.m. ARC building
- **SBA Center Opened (2/10)** @ Oak Business Center, 2712 North Saginaw St. Hours: 8 a.m. - 5 p.m. weekdays

LOOKING AHEAD

UPCOMING EVENTS/ACTIVITIES

- **CERC Training** Feb 12, 14, 16 in Lansing
- **Access Community Canvass Event** Feb 13 @ 8 a.m. Community-wide
- **Latino Coalition Community Canvass** Feb 13 @ 12:30 p.m. 609 E. 5th Ave.
- **Surgeon General Visit:** Feb 15-16
- **HHS Secretary Visit:** Tentatively Feb 18
- **NBC25 Town Hall** Feb 29
- **EPA Public Meeting and Expo** End of Feb

COMMUNITY (FIELD) FEEDBACK

- **TONE:**
  - Unanswered Questions, Confusion, Uncertainty of an End State
- **CONCERNS:**
  - Next level water use (laundry, pets, etc.)
  - Health-related (rash, dermatitis, dry skin, skin cancer, organ damage, infertility)
  - Quantity of resources provided to residents (water, filters, etc.)
  - Paying water bills
- **GAPS:**
  - Filters for showers. recyclable cartridges
  - Want to learn about more than just lead, in the water
- **OPPORTUNITIES:**

- Provide Frequently Asked Question Fact Sheet
- More Education of the Media

PLANNED MESSAGING/PRODUCTS

- **CDC:**
  - Infographic on mitigation health effects of lead
- **EPA:**
  - Printing additional quantities of EPA general flier
  - Sampling Results letter for homeowners
  - FAQ on Top Public Questions
  - Version 1 of door hanger printing, Version 2 of door hanger in draft

EMERGING ISSUES THAT MAY AFFECT MESSAGING:

- Possible need to develop Campaign/PSA to get the remaining kids tested.
- A need to re-engage the health provider community to start lead testing

FLINT WATER RESPONSE
DAILY STRATEGIC MESSAGING
Feb. 11, 2016

Key Messages

- EPA advises residents to run cold water, throughout the house, for two minutes, every morning to flush pipes.
- **The safest option to protect children younger than 12 months of age, for lead and copper, is to only use bottled water for drinking water and the reconstitution of infant formula, or any other food product.**
- Have your water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.

- Be sure to use filters according to the instructions and replace filters before they expire.
- The safest option for vulnerable populations including pregnant and nursing mothers, and children under six years old, is to use bottled water.

Good Morning Team. Your daily UCG Flint External Affairs Messaging Plan 2-11-16 is attached and below. Have a great day!

FLINT WATER RESPONSE
DAILY STRATEGIC MESSAGING
Feb. 11, 2016

Key Messages

- EPA advises residents to run cold water, throughout the house, for two minutes, every morning to flush pipes.
- **The safest option to protect children younger than 12 months of age, for lead and copper, is to only use bottled water for drinking water and the reconstitution of infant formula, or any other food product.**
- Have your water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- The safest option for vulnerable populations including pregnant and nursing mothers, and children under six years old, is to use bottled water.

USDA offers lead testing, nutrition support in Flint
Robert Allen, Detroit Free Press 5:43 p.m. EST February 10, 2016

FLINT – **Free blood tests for lead will temporarily be offered to some low-income Flint mothers and children**, the U.S. Department of Agriculture announced Wednesday as staff visited a local elementary school.

Several federal nutrition programs also have been aimed toward helping residents deal with the water crisis, said Dr. Kathryn Wilson, USDA deputy under secretary for food, nutrition and consumer services. After touring Neithercut Community School, she met with media in a room where dozens of bottled-water packages were stacked in a corner.

"Little, tiny elementary school kids — they're worried about the water that they're drinking," Wilson said. "That's heart-wrenching."

She said she saw "a lot of joy" as school staff helped kids choose free fruits and vegetables in the cafeteria. An existing program already offers fresh produce for free at this and other schools, and the USDA last month announced $62,700 to support those efforts in Flint. **Wilson on Wednesday described further plans to see that children get access to quality food that can help lessen the effects of lead poisoning.**

Residents in the city of about 99,000 are living on bottled water as concerns of toxic lead in the tap water persist since the water source was temporarily switched to the Flint River in spring 2014. Hundreds of homes have tested positive for lead above the federal action level, and exposure to the heavy metal is shown to cause permanent brain damage in children.

The blood tests announced Wednesday will be offered to an estimated 3,800 infants, children, and pregnant and post-partum women on the WIC (Women, Infants and Children) program until September 2017. Also, vendors at the Flint Farmers Market will be able to accept payment through the Supplemental Nutrition Assistance Program. And a Summer Electronic Benefit Transfer program previously intended for rural schools will be offered in Flint to help kids eat healthy during summer break, according to the USDA.

"WIC foods currently provide good sources of calcium, iron and vitamin C, nutrients that have been shown to help protect children's bodies from lead poisoning," according to a USDA news release.

Wilson said she hopes the programs will help the children develop lifelong healthy eating habits.

In another Flint-related response from the federal government, **the Small Business Administration also approved the availability of economic injury disaster loans for Genesee County and Flint.**

U.S. Sens. Gary Peters and Debbie Stabenow, Michigan Democrats, and U.S. Rep. Dan Kildee, D-Flint Township, had urged SBA approval, which was filed for by Gov. Rick Snyder. The agency said it was opening a recovery center, located at 2712 Saginaw St., in Flint, on Wednesday to provide assistance and would keep it operating through Feb. 25.

Small-business loans based on economic injury can provide up to $2 million to help meet obligations. The interest rate cannot exceed 4% and the repayment term is determined by a business' ability to repay. In Flint, loan applications will be accepted through Nov. 7.

Subject:	FEMA EM-3375 Flint Media Monitoring Report 02/09/2016
Attachments:	Media Report 2 10 16.docx

Summary: Gov. Rick Snyder proposes an additional $195 million for Flint water crisis in fiscal year 2017 budget. Lansing Board of Water and Light (BWL) will help Flint in replacing water pipes. President Barack Obama's final budget proposes increasing funds for loans that could potentially be used to rebuild Flint's infrastructure, but includes no request for direct funding for the water crisis. Michigan's Attorney General says his team will not "short-change" justice in the investigation into Flint's water crisis. Gospel singers rally donations, bottled water for Flint residents.

Below is a sampling of the coverage.

Gov. Rick Snyder proposes $195M for Flint water as protesters call for his removal
February 10, 2016 *Emily Lawler | elawler@mlive.com*
http://www.mlive.com/news/index.ssf/2016/02/gov_rick_snyder_proposes_195m.html#incart_river_home *(For full story click on link)*

LANSING, MI -- Gov. Rick Snyder entered the House Appropriations room in the state capitol through a throng of booing protesters to present his annual budget proposal on Wednesday.

The governor's proposed budget is for fiscal year 2017, which runs from Oct. 1, 2016 to Sept. 30, 2017. The budget he proposed totalled $54.9 billion, up 0.8 percent over the previous fiscal year. That includes $10.28 million in general fund, which are state discretionary dollars.

Snyder proposed $195 million to address the Flint water crisis. That amount would be spread over the current fiscal year 2016 and the FY 2017 budget lawmakers are now planning. It would bring the total Flint aid from state government to $232 million.

"The issue now is we have citizens in need. Let's address those issues, let's take care of it," Snyder said, thanking legislators for previous Flint appropriations.

Here's where the money Snyder is proposing would go:

- Safe drinking water - $37M
- Food and nutrition - $15M
- Physical, social and educational well-being - $63M
- Water bill relief - $30M
- Reserves - $50M

Snyder said at the situation evolves and the state knows where it can better use resources the $50 million reserve fund would be deployed after consultation with the legislature.

"I thought this was a prudent measure given that this is not a traditional situation," Snyder said.

Meanwhile, people protesting outside of the room were audible as the governor presented his budget, chanting things like "hey, ho, Snyder's got to go" and "drink the water, Rick."

Nakiya Wakes was among those gathered outside the meeting room. She was pregnant with twins and her due date would have been tomorrow. But in the second trimester she miscarried.

"I think it was because of drinking the poisoned water for over a year which lead to me losing my babies," Wakes said.

Her children have tested positive for blood lead levels of the actionable level, she said. Her personal budget doesn't include the resources to move away from the city. The state budget should include money to fix it, she said.

"Gov. Snyder's budget needs to include a fix for replacing all the pipes in our community... the only thing I want to hear from Gov. Snyder today is how he plans on replacing every single pipe in Flint," Wakes said.

Senate Minority Leader Jim Ananich, D-Flint, said in a statement that he would continue pushing for more resources.

""The priorities laid out in this proposal for Flint seem to match the areas we have been stressing for some time — health, education and infrastructure," Ananich said. "Although this is a step forward, I'm going to keep pushing for resources to get results for the people in my community. Our challenge now is to make sure that the state delivers and we don't take our foot off the gas."

Snyder in response to a legislative question during his presentation pointed out that the state has spent many multiples on Flint as what the federal government has contributed.

"We could use more help from Washington. The support we've gotten from Washington at this point in time is $5 million dollars," Snyder said.

Throughout the governor's budget presentation Wakes and other protesters were audible.

But the governor's budget included more than just Flint.

These proposals will be vetted by the legislature during a months-long budget process.

More information on the governor's budget proposal is available here.

Lansing BWL helping Flint figure out how to replace lead pipes
February 10, 2016 *WSYM-TV*
http://www.fox47news.com/news/local-news/lansing-bwl-helping-flint-figure-out-how-to-replace-lead-pipes

When the Lansing Board of Water and Light (BWL) first started replacing lead pipes with copper ones 12 years ago, the process was slow and messy.

"We would take a back hoe and go out in the street and just dig a trench all the way to the customer's house, through the sidewalk," BLW General Manager Dick Peffley said.

It tore up yards and took eight to nine hours.

So the utility company developed a faster, more efficient way.

"Then we learned that we could pull the pipe underground," Peffley said.

BWL now digs a hole in the street, pulls the old pipe out and slides the new one in. The new process costs about $3,500, the old one was about $8,000.

A team of BWL employees is taking the knowledge and experience BWL has gained from replacing lead service lines for over a decade to Flint. The city is trying to replace its 15,000 service lines.

"We've been doing it since 2004, so we can just share that expertise with them," Peffley said. "Save them the learning curve because they want to do a bit more of a fast track."

Flint hopes to replace all of its lead piping in a year. Lansing has taken 12 years to replace 13,500 lead lines, and will replace the remaining 650 by June 2017.

Flint Mayor Karen Weaver announced today the Fast Start Plan - the estimated $55 million plan to remove and replace the lead pipes in the city.

"We deserve new pipes. That's the only way this community is going to be confident and people will stay here and people will come," Weaver said. "We have to get new pipes."

BWL management will help in a consulting role, but Flint workers will be on the ground replacing the pipes, not BWL employees.

.....

No direct money for Flint in Obama's last budget
February 09, 2016 *Todd Spangler, Detroit Free Press*
http://www.freep.com/story/news/2016/02/09/no-direct-money-flint-obamas-last-budget/80063984/

WASHINGTON – President Barack Obama's final budget request to Congress — worth more than $4 trillion — doesn't set aside money specifically for the ongoing water crisis in Flint, but it does propose increasing funds for loans that could potentially be used to rebuild that city's infrastructure.

While the U.S. Senate is still debating whether and how much to authorize in funding for Flint, where high levels of lead have been found in residents' tap water, the Obama administration's proposed fiscal 2017 budget released Tuesday includes $157 million more for low-interest loans that would go to states to help rebuild, repair and replace old water infrastructure.

Last month, the president signed an emergency declaration for Flint, setting in motion a federal response but setting no specific funding commitment for the city, which has been struggling with high lead levels blamed on corrosive river water leaching lead from old service pipes.

The White House has said it's supportive of efforts in Congress to allocate funding for Flint, even though it has rejected requests to declare a major disaster in the city due to statutes that limit those to natural events, fires or explosions. Gov. Rick Snyder has said it could cost $700 million or more to replace and repair damaged infrastructure in Flint.

Obama's budget, which is certain to face major revisions in a Republican-controlled Congress in an election year, sets out a series of ambitious proposals, including upgrading the nation's unemployment insurance program and making large investments in cancer research, drug treatment and cybersecurity.

In terms of Michigan-specific spending, the General Services Administration's budget includes $81 million to consolidate federal agencies and some 800 federal employees at a former IRS computing center on Michigan Avenue near the Lodge Freeway in Detroit and nearly $11 million for work at the Patrick V. McNamara Federal Building garage.

As for the proposed new Detroit River bridge, the Homeland Security Department's budget still makes no direct mention of funding to staff and equip a $250-million customs plaza there, but it does, for the first time, mention that span – the Gordie Howe International Bridge – by name, noting the need to begin working on signage and "technical solutions" that will speed the flow of traffic once it is built.

However, despite Homeland Security Secretary Jeh Johnson's remarks last April that a compelling case could be made for finally moving forward on the long-awaited customs plaza expansion at the Blue Water Bridge in Port Huron, no funding appeared to be included for the project, which dates back more than a decade.

.....

Michigan AG: We're not going to short-change justice in Flint water crisis probe
February 09, 2016 *Dave Bartkowiak WDIV*
http://www.clickondetroit.com/news/flint-water-crisis/michigan-attorney-general-updates-investigation-into-flint-water

FLINT, Mich. - Michigan Attorney General Bill Schuette said Tuesday his team will not "short-change" justice in the investigation into Flint's water crisis.
Read: Michigan AG says things went 'terribly, terribly wrong' in Flint

In January, Schuette said Todd Flood -- a former assistant prosecutor in Wayne County -- will spearhead the state's investigation into what, if any, laws were broken in the process that left Flint's water contaminated with lead. Andy Arena -- the former head of the FBI's Detroit office -- also is part of the investigation team.

Flood said Monday his team of investigators, which he called "top-shelf," will be looking into everything from involuntary manslaughter to misconduct in office.

"Two things have to happen for a crime to be committed: A guilty mind and guilty act put together," said Flood.

Arena said they are focusing on a timeline of events and the key points.

"When were the bad decisions made?" he said.

Arena went on to call this the "biggest case in the history of the state of Michigan."

The team of investigators includes Ellis Stafford, of the Detroit Crime Commission and formerly with the Michigan State Police. Stafford said this is personal for him.

"In a perfect world we wouldn't be investigating my city. I'm from Flint. I was born and raise there. I got a personal stake in this," he said.

The financially struggling city switched from Detroit's municipal water system and began drawing from the Flint River in 2014 to save money. The water wasn't properly treated to prevent lead from pipes from leaching into the supply.

Residents have been urged to use bottled water and to put filters on faucets.

In January, Schuette said Todd Flood -- a former assistant prosecutor in Wayne County -- will spearhead the state's investigation into what, if any, laws were broken in the process that left Flint's water contaminated with lead. A Resident of Flint, Michigan Explains the Devastating Financial Side of the Water Crisis
February 09, 2016, *Jack Moore GQ*
http://www.gq.com/story/flint-michigan-water-crisis-financial-toll

The water crisis in Flint, Michigan is a national shame. In 2014, as a cost-cutting measure from a state-appointed emergency manager, the city of Flint switched from the Detroit Water system to the Flint River as the primary supply of water (temporarily until they joined a new water system). But almost immediately residents of Flint began complaining about their taps running brown, and dirty water that smelled. And rather than setting about trying to fix it, the city said the water was federally tested and was safe.

But in actuality, tests were indicating that the water showed dangerous levels of lead. And yet even when residents discovered this, the city and the state continuously refused to do anything about it, while simultaneously the state provided free bottled water to any state employees in Flint. It's a tragic story that is still in its sadly early days. No one knows exactly how long it will be until the water in Flint is safe to drink again, because the dangerous water from the river caused the corrosion of lead pipes that run to homes.

And it turns out that's not the only problem. One thing that has not been talked much about is the financial crisis that this situation has caused in the lives of many Flint residents.

Well, last night on *Reddit*, a video emerged of a local Flint woman, Melissa Mays, discussing the dire financial situation this water crisis has put residents in, and it's terrifying. According to her, in addition to getting terrible, unsafe water, residents also paid out the nose for the right to be poisoned. And even now, residents continue to get water bills despite the, you know, poison that is coming into their homes. And it turns out refusing to pay for months of someone poisoning you can have its own, terrifying consequences.

So the basic situation financially, according to Melissa, is that the water department can destroy a person's life for refusing to pay for, and I can't be clear enough about this, POISONOUS WATER. And though the department has paused shut offs for the moment, as of now residents are still expected to pay these bills or potentially face terrible repercussions once that temporary pause is lifted.

Again, this is a national shame.

.....

Bishop Marvin Sapp, Gospel Singers Rally Donations, Bottled Water for Flint, Michigan
February 09, 2016 *Christine Thomasos, Christian Post Reporter*
http://www.christianpost.com/news/flint-michigan-bishop-marvin-sapp-gospel-singers-donation-bottled-water-crisis-157192/

Bishop Marvin Sapp is one of numerous gospel singers, including Donnie McClurkin, Karen Clark Sheard, Dorinda Clark Cole and Kierra Sheard, that are using their platforms to help Flint, Michigan, in the midst of a water crisis.

Sapp is doing more than just bringing water to the troubled residents of Flint, but also preaching and doubling dollar donations.

The 49-year-old gospel singer and senior pastor of Grand Rapids Lighthouse Full Life Center, who oversees 15 churches in Michigan, Illinois, Ohio and Missouri as bishop over the Central Province of GUF, spoke about his plans to help those in Flint on Feb. 11.

Last month, President Barack Obama declared that the city was in a federal state of emergency after years of water contamination led to high lead levels in drinking water, and named the water contamination as a possible cause of a Legionnaires' disease outbreak in the area. The problem started in 2014, when Flint stopped using the Detroit Water and Sewerage Department as a water source that drew from Lake Huron and the Detroit River.

Instead, government officials decided Flint should use the Flint River as their main supply for drinking water to save money, which ultimately became a health risk to thousands.

Now, Michigan pastor and gospel singer Marvin Sapp is leading a call to action after preaching at The Church of the Harvest in Flint on Feb. 4 and Feb. 5. He expressed excitement to be preaching to those discouraged in Flint and called for water donations.

"I believe it's important for us, in this day and time, to bring something that's tangible too, something that's absolutely needed and that is water," he said on the Tom Joyner Morning Show. "I just don't believe that we should just sit idly by and watch things happen, so I just decided I'm not just going to take the Word, but I'm going to take water, too,"

Although the Flint water crisis has been taking place for nearly two years, Sapp said, "I'm thankful that it's finally coming to the forefront."

Fellow gospel singer and Pastor Donnie McClurkin also joined with Sapp in sending water to Flint.

"Got about over 5000 CASES (not bottles) of clean water headed to FLINT, MI," McClurkin told his Twitter followers.

Last month, Bishop J. Drew Sheard, who serves as a general board member of the Church of God in Christ & Prelate of the Michigan North Central Jurisdiction, joined with his gospel singing wife, Karen Clark Sheard, daughter Kierra Sheard and sister-in-law Dorinda Clark Cole to present a concert that benefited Flint residents. At the concert, donations of bottled water were accepted

The Water Crisis Concert was a success. The Lord blessed North Central Jurisdiction, under the direction of @bishopdrewsheard, to accomplish our efforts of buying over seven thousand cases of water for #Flint," Clark Sheard wrote on Facebook. "This event was held at Cathedral of Faith Ministries COGIC with @pastorchrismartin! #geicogic #faith #family."

Talking Points: Flint, Michigan Water Contamination
February 10, 2016 @ 9 a.m.

Daily Numbers

Reported at 6 p.m. on February 9, 2016

As of February 10, 2016, the following commodities were requested by and provided to the state of Michigan in support of the response to the emergency conditions resulting from contaminated water in the city of Flint.

- 1,782,294 liters of water
- 136,964 water filter replacement cartridges
- 40,000 water and pitcher filters

Major Disaster Declaration/Full EM Denial

- Governor Snyder's January 20, 2016, appeal for a major disaster declaration for contamination and damage to the public water system in the City of Flint was denied on January 22, 2016. After review, FEMA determined that this event does not meet the statutory definition of major disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

    - *IF ASKED:* To qualify for a "major disaster" declaration there must be a natural catastrophe or, regardless of cause, a fire, flood or explosion which causes damages of significant severity and magnitude to warrant a declaration. FEMA's assistance is intended to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage and loss by the natural catastrophe, fire, flood or explosion. It was determined that the presence of lead in the Flint drinking water was not caused by a natural catastrophe, or by a fire, flood or explosion, so it does not qualify for a major disaster declaration.

- FEMA's assistance remains limited to what the President authorized in the Emergency Declaration on January 16, 2016. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of

this declaration. The portions of the Emergency Declaration not granted can be appealed by the Governor.

- The decision means that the state can continue to work directly with other federal agencies and those agencies can provide assistance through their own authorities.

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and the Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

HHS as Federal Response Lead

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- Assistant Secretary for Preparedness and Response Dr. Nicole Lurie will lead this effort, supported by HHS Acting Assistant Secretary for Health Dr. Karen DeSalvo, as well as two U.S. Public Health Service officers.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

- FEMA will work with the HHS team in Michigan to establish a collaborative process to best support state and local leaders with identifying the size and scope of the problem and help them develop and execute a plan to address the public health and infrastructure issues in Flint.

Emergency Declaration

- On January 14, FEMA received Governor Snyder's request for an Emergency Declaration, as well as a Major Disaster Declaration for emergency protective measures, temporary housing and repairs to homes and low-cost loans for covering uninsured loss of property, as well as other federal assistance.

- On January 16, 2016, President Barack Obama declared an emergency for Genesee County in the State of Michigan, limited to Direct Federal Assistance, as a result of the emergency conditions resulting from contaminated water in the city of Flint, authorizing FEMA to support the state in its efforts to respond to the incident.

- Under this emergency declaration, FEMA is authorized to provide emergency protective measures, Category B, limited to Direct Federal Assistance, under the Public Assistance program limited to 75 percent of the total eligible costs. FEMA will, in coordination with the state, provide water, water filters,

water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration.

IF ASKED about period of assistance through EM (90 days):

- FEMA's emergency assistance is designed to be supplemental and temporary in nature. FEMA, and our partners in other federal agencies, will be working closely with the state, county, and city officials to support those officials in the development of medium and longer term solutions to this problem.

- The state may submit a request to extend the current 90 day period of assistance established by the declaration, providing a valid reason that the extension is necessary.

If ASKED about the $5 million cap on assistance

- When the amount of federal assistance for an emergency declaration exceeds $5 million, FEMA is required to notify Congress.

Other Federal Agency Assistance To-Date

- U.S. Health and Human Services

    - The Department of Health and Human Services (HHS) Office of the Assistant Secretary for Preparedness and Response (ASPR) is working to identify vulnerable Flint residents who may not be able to travel to obtain filters and water testing kits. They are also working with the Centers for Medicare and Medicaid Services (CMS) to provide critical information needed for city responders to locate vulnerable residents and to help focus the city's outreach efforts.

    - HHS-funded health care centers in the area are offering free lead testing for their patients and are reaching out to patients to make them aware of the free testing. Exposed children will receive ongoing monitoring while they are health center patients. Health centers also are providing bottled water at their facilities and are assisting patients in obtaining bottled water or water filters in coordination with county-wide efforts.

    - HHS is helping educate residents who use HHS programs and services, such as Head Start programs and programs that serve seniors. In addition, HHS-funded local agencies on aging and community partners are reaching out to seniors and grandparents raising grandchildren to help them find water and filter distribution sites and to provide homebound residents with assistance in obtaining and installing filters.

    - The Centers for Disease Control and Prevention (CDC) is currently providing technical assistance to the Michigan state health department to assess lead exposure especially in homes with children. CDC also has provided recommendations on educational interventions for children affected by lead.

- U.S. Environmental Protection Agency

- In mid-October, the EPA established a Flint Safe Drinking Water Task Force comprised of EPA scientists who are internationally recognized experts in the field of lead in drinking water. The EPA Task Force is providing technical assistance to the Michigan Department of Environmental Quality and the City of Flint to implement corrosion control treatment and to develop school and residential sampling protocols.

- EPA is also conducting an audit of the Michigan Department of Environmental Quality (MDEQ) drinking water program – to examine MDEQ's implementation of the Safe Drinking Water Act and related rules on lead and copper, total coliform, nitrates and ground water. This comprehensive audit will provide Flint residents and the people of Michigan with more information about MDEQ oversight of public water supplies and will identify actions that may be needed to strengthen the Michigan drinking water program.

- Housing & Urban Development

  - Flint was identified as one of six target cities in the second round of the Strong Cities – Strong Communities (SC2) White House initiative in 2014. This program focuses on enhanced Federal agency support in areas of blight reduction, public safety and economic development.

  - Discussions are ongoing between the FEMA Region 5 SC2 program lead and Department of Housing and Urban Development (HUD) staff on the Flint water crisis impacts to SC2 programs and initiatives; as well as possible opportunities for collaboration through existing federal engagement with local, county and State agencies.

  - HUD is working closely with the city on economic development and interagency coordination. They have successfully assisted the city with the purchase and installation of water filters. HUD had an existing lead hazard grant to Flint, targeted to lead paint, $325,000 of which could be used for addressing the water lead contamination. Additionally, HUD has provided a data tracking and reporting system for the State of Michigan to use in its lead investigations.

- U.S. Army Corps of Engineers

  - The FEMA Region 5 Recovery Coordinator is in discussion with the United States Army Corps of Engineers to identify possible technical assistance and/or Subject Matter Experts on public water distribution systems, and possible courses of action.

- US Department of Agriculture

  - USDA has waived requirements on potable tap water availability at school meal service, allowing schools to provide bottled water. The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) is also allowing participants to use WIC vouchers for ready-to-feed infant formula, which does not need to be mixed with water, and participants can also swap powdered formula for ready-to-feed formula.

Good Morning – attached and below is today's UCG Flint Daily Messaging Plan – 2-10-16

FLINT WATER RESPONSE
DAILY STRATEGIC MESSAGING
Feb. 10, 2016

Key Messages

- We are concerned about levels of lead found in the Flint, Michigan water supply and its impact on the health and safety of the community.
- The CDC recommends that all children under 6 years of age have a blood lead test before April 1, 2016.
- **EPA advised residents to run cold water throughout the house, for two minutes, every morning to flush pipes.**
- Have your water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- The safest option for vulnerable populations including pregnant and nursing mothers, and children under six years old, is to use bottled water.

- *Residents may contact the newly established EPA hotline (800-426-4791) or email address (flintwater@epa.gov) for information about EPA's water sampling efforts. The hotline will provide immediate, telephonic translation in multiple languages.*

Products for Release

- *News Releases*
  - **USDA** – Specific to Nutrition Assistance provided to Flint
- *Fact Sheet*
  - **USDA** – USDA-wide Nutrition and Food Safety
- *Advisory*
  - **UCG Flint** - Weekly Update
  - **USDA** – VIP Elementary School Visit (Media Opportunity)
  - **HHS**: USPHS Reduce GCHD Backlog

Operational Communication Events

- *VIP Visits*
  - **HHS VIP:** Dr. Karen DeSalvo, HHS Acting Assistant Secretary - Health (Stakeholder Meetings)
  - **USDA VIP:** Dr. Katie Wilson, Deputy Undersecretary (School & WIC Clinic Visit)
- *News Interviews*
  - Potential for media interviews with VIP Visits
  - Potential for media interviews on How to Use Your Filter
  - Scheduling CBS Chicago on Chicago Lead Study
  - Scheduling NY Times re: EPA's work in Flint
- *News Conferences*
  - **None**

Stakeholder Calls/Briefings/Meetings/Trainings

- **UM-Flint College Course**: Science of Water Delivery @ 4:30 pm - 6:30 pm, Ballroom, North Bank Center 432 N. Saginaw St.
- **U.S. Congressional Hearing:** Flint Mayor @ 2pm Democratic Steering and Policy Committee "The Flint Water Crisis: Lessons for Protecting America's Children – Capital Visitors Center

Speakers Bureau IGA and Outreach Events/Activities

- **None**

LOOKING AHEAD

UPCOMING EVENTS/ACTIVITIES

- **Flint Water Response Training:** Feb 11 @ 11:30 pm 1610 W. Pierson Rd
- **ARC Community Partners Meeting:** Feb 11 @ 3 p.m. Food Bank
- **Dr. Lurie Meeting with Faith-based leaders** Feb 11 @ 11 a.m. ARC building
- **CERC Training** Feb 12, 14, 16 in Lansing, times and location TBD
- **Access Community Canvass Event** Feb 13 @ 8 a.m. Community-wide
- **Latino Coalition Community Canvass** Feb 13 @ 12:30 p.m. 609 E. 5th Ave.
- **Surgeon General Visit:** Feb 15-16
- **HHS Secretary Visit:** Tentatively Feb 18
- **EPA Planning Public Meeting** End of Feb
- **NBC25 Town Hall** Feb 29

COMMUNITY (FIELD) FEEDBACK

- **TONE:**
  - Unanswered Questions, Confusion, Uncertainty of an End State

- **CONCERNS:**
  - Health-related (rash, dermatitis, dry skin, skin cancer, organ damage, infertility)
  - Discrepancy about where clients should drop off water testing kits
  - Quantity of resources provided to residents (water, filters, etc.)
  - Paying water bills

- **GAPS:**
  - Social media indicating water distribution may not be reaching all members of the community quickly enough.
  - Filters for showers. recyclable cartridges
  - Want to learn about more than just lead, in the water

- **OPPORTUNITIES:**
  - Provide Frequently Asked Question Fact Sheet
  - More Education of the Media

PLANNED MESSAGING/PRODUCTS

- **CDC:**
  - Infographic on Childhood lead poisoning for Flint Residents, adaptation
- **EPA:**
  - Sampling Results letter for homeowners
  - FAQ on Top Public Questions
  - Version 1 of door hanger printing, Version 2 of door hanger in draft

EMERGING ISSUES THAT MAY AFFECT MESSAGING:

- The need for health messaging related to **2/9 Water Main Break** in Flint
- **Residents need to run their water to flush out the pipes, and they may not be using system at all, only bottled water**
- EPA strike team testing of UM-Flint Dorm (AmeriCorps members)
- Possible need to develop Campaign/PSA to get the remaining kids tested.
- A need to re-engage the provider community to start lead testing

MDHHS releases emails related to the Genesee County Legionnaires Disease investigations

LANSING, Mich. – The mission of the Michigan Department of Health and Human Services is to promote public health. Through the department's dedication to protect residents against potential health threats, we can build a better, healthier future for families in our state.

"To be successful in this mission, we rely on strong relationships with our partners at the local level including primary care providers, community organizations, health plans, and most importantly our local health departments," said Nick Lyon, director of MDHHS. "This is true in normal times, and it is essential during emergencies like the Flint water crisis."

Recent comments in the media are inconsistent with the collaboration that has taken place between the Michigan Department of Health and Human Services and the Genesee County Health Department. MDHHS is releasing some of its earliest email conversations between its epidemiologists and the Genesee County Health Department regarding legionella cases.

The MDHHS partnership with the Genesee County Health Department is central to providing Flint residents with the health resources they need to overcome obstacles in both the short and long terms. MDHHS and the Genesee County Health Department have worked side by side to deliver health services, exchange data and ideas, and to be there for the Flint community that is understandably worried and frustrated during this crisis.

"We know that the Legionnaires outbreaks have added to public concerns," said Dr. Eden Wells, chief medical executive with MDHHS. "We want Flint to know we take these concerns seriously – that we have investigated these cases and committed our staff to support and guide the local investigations."

In the fall of 2014, the Michigan Department of Health and Human Services was aware of an increase in Legionnaires' disease cases in Genesee County and it was determined that additional support from the state was needed. The state stepped in to offer that support. Within a month, state epidemiologists were actively conducting interviews with cases and medical record reviews to make sure that Flint residents had the joint resources of local and state experts.

MDHHS and GCHD worked together on the initial public health response which centers around outreach to the healthcare community to promote testing of suspect cases. MDHHS offered communications resources to develop public messages, created a healthcare provider message for the Genesee County Health Department, and laid out distribution guidance.

MDHHS shared this information with federal partners at the Centers for Disease Control and Prevention to ensure that the steps taken were the appropriate measures to protect the health of residents in Flint.

Today, the Michigan Department of Health and Human Services is engaged with environmental health officials on the local and national levels to proactively address the potential for future Legionnaires disease cases.

While there have been no additional cases of Legionnaires Disease in months locally, MDHHS is currently working with experts and providers to prevent future outbreaks. MDHHS continues to

distribute water filters, develop and share educational materials, provide behavioral health services, fund nurse case managers, provide fresh foods and expand the Pathways to Potential program in Flint.

Director Lyon added, "When it comes to health, our team and the partners we turn to for support have not lost sight of our mission: protect the health of our residents by bridging the gaps to promote more and better opportunities for success in Flint."

American Red Cross and United Way Play Crucial Role Coordinating Volunteer Efforts in Flint

FOR IMMEDIATE RELEASE
February 9, 2016
Release #: 32

FLINT, Mich. - Since early January, over 2,000 volunteers have volunteered their time to assist Flint residents during the water emergency. Volunteers are coordinated through the Volunteer Reception Center, operated jointly by the American Red Cross and United Way of Genesee County. These volunteers have performed numerous tasks throughout the community from delivering water resources door-to-door to assembling water test kits.

"We have had volunteers of all ages from all different backgrounds come forward to help," stated Sarah Lewan, community volunteer manager. "We have processed more than 200 groups of varying sizes, including corporate groups, social groups and concerned citizens."

Volunteers are utilized at a variety of community organizations to provide assistance with water distribution, warehousing, data entry and assembly of water test kits. The volunteers give whatever time they can, whether it is a couple of hours or availability for several days.

There are opportunities for additional groups and individuals to volunteer. To learn more or sign-up to volunteer, visit www.flintvolunteer.com<http://www.flintvolunteer.com/>.
The State of Michigan continues to coordinate response efforts in partnership with the City of Flint, Genesee County and local community organizations.

Additional information about water response efforts is available at www.michigan.gov/flintwater<http://www.michigan.gov/flintwater>, by calling United Way's 211 or visiting www.helpforflint.com<http://www.helpforflint.com/>.

Outreach to Flint's Blind Community Helps Ensure Access to Information and Resources

FOR IMMEDIATE RELEASE
February 9, 2016
Release #: 33

Flint, Mich. – The Bureau of Services for Blind Persons (BSBP) is working to ensure Flint's blind community has access to all information and resources related to the Flint water emergency.

"We have made direct contact with all of the bureau's blind clients who live in Flint to ensure they have the resources they need and we will continue to provide assistance to any Flint resident who is blind or visually impaired," said BSBP Director Edward Rodgers.

Bureau staff contacted nearly 40 BSBP clients living in Flint by either home visit or phone to ensure they had access to all health-related water emergency information and to offer assistance in obtaining bottled water, filters, water replacement cartridges and water testing kits.

Information is available in braille by contacting the bureau. Flint residents who are blind or visually impaired and need further assistance or information should contact Sue Luzenski at the BSBP at Luzenskis@michigan.gov<mailto:Luzenskis@michigan.gov> or 517-335-4265.

The State of Michigan continues to coordinate response efforts in partnership with the City of Flint, Genesee County and local community organizations. Additional information about water response efforts is available at www.michigan.gov/flintwater<http://www.michigan.gov/flintwater>, by calling United Way's 211 or visiting www.helpforflint.com<http://www.helpforflint.com/>.

For more information about the BSBP, visit www.michigan.gov/bsbp<http://www.michigan.gov/bsbp> or call 1-800-292-4200, TTY 888-864-1212.

Subject: Media Monitoring FLINT: Michigan Water Quality Response 2.9.16
Attachments: Michigan Water Quality Response Communication Surveillance Report 2.9.16.docx

Sharing latest media monitoring report:

US TV and radio news stories had its typical weekend decrease but increased on Monday.

Major themes included news about lawsuits against state and city officials over the water crisis; new emails showing how city and state agencies failed to share information on Legionnaires' disease outbreak investigation with Genesee County (includes email from CDC's Laurel Garrison); and two dogs in Flint tested positive for lead poisoning.

Major media outlets continue to report how the water lead poisoning issue is a nationwide crisis. Included stories about NY, PA, IA, OH, MD, DC, and Chicago.

Emerging issues include disagreements between Flint officials and residents as to what water system they should join; Flint's city administrator said current funding approved by MI Senate is only half of what they need to cover water bills; **Flint Mayor said officials are working on plan to remove and replace all lead pipes beginning this month;** and GM and United Auto Workers union said they plan to donate $3M over five years to support increased health and education services for Flint children exposed to lead.

CDC/USG mentions included former director of NCEH told NYT that lead in Flint is "tip of the iceberg"; CDC figures of 535,000 children with lead exposure in the U.S. were widely cited; and Gov. Snyder declined invitation from House Democrats to testify on the Flint crisis.

Social media mentions followed news media stories, but news of Democratic Presidential candidates discussing the crisis and celebrity Beyoncé announcing a fund to benefit Flint children were the most retweeted.

The next CSR will be distributed on February 12. Again, if you have any questions or want to add someone to the distribution list, please contact CDC IMS JIC Research (eocjicres@cdc.gov).

Media Summaries

TRADITIONAL NEWS MEDIA

Major Public Health Themes

- Parents of a 2-yo girl filed suit against state and city gov't officials in Flint, MI; even though family spent months living with friends and relatives to avoid the Flint water system, parents were threatened with Child Protective Services by a local official because of elevated lead levels in the girl's blood
- Several other lawsuits have been filed seeking compensation for residents exposed to lead, getting water lines replaced at no cost to residents, and one on behalf of people who contracted Legionnaires' disease
- New emails show how city and state agencies failed to share information with Genesee County as it investigated Legionnaires' disease outbreak; includes email from CDC's Laurel Garrison saying "comprehensive investigation" needed to stop one of the largest community-wide outbreaks in past decade (http://on.freep.com/20HeG99)
- Marc Edwards, a civil engineer professor who brought public attention to the crisis, argued that current incentives in science and academia push researchers toward "safe" projects that don't irritate funders; this process was instrumental in the failure of science to recognize and deal with Flint
- Two dogs in Flint tested positive for lead poisoning, though the "vast majority" of tests in dogs have been negative; state veterinary officials are reminding the public to not let pets drink unfiltered water in Flint
- Though Flint has stopped drawing its water from the Flint River, pipes that were damaged by river water continue to leach lead; estimated 12,000 children exposed

Lead Issues outside Flint, MI

- Many states, including NY, PA, and IA, have much higher proportions of children with lead poisoning, with 6.7%, 8.5%, and 32% respectively; nationwide, 535,000 children aged 1-5 suffer from lead poisoning (http://nyti.ms/1PeE6lY)
- Huff Post described childhood lead crises in OH, MD, MO, and DC (http://huff.to/20mdeDA)
- In Chicago, EPA reported "alarming levels" of lead flowing from household faucets years after construction that disturbed water lines; 80% of Chicago properties have lead service lines (http://trib.in/1XdJlQr)
- Vox trying to figure out how widespread lead exposure is in U.S. children. Said some researchers think lead was associated with 1990s spike in teen crime; blood lead levels as low as 2 µg/dL have been linked to reduced IQ in children (http://bit.ly/1K2YVln)

Points of Confusion/Potential Rumors/Misinformation

- None

Emerging Issues

- Metro Detroit water system would like to keep Flint as a customer but Flint officials signed an agreement to be part of a new consortium, the Karegnondi Water Authority (KWA). Residents would like to stay with Detroit but canceling contract with KWA could be costly (http://detne.ws/1LaHo5M)
- Flint's city administrator said $30M proposal that passed by MI Senate will only cover water bills through end of 2016, with shutoffs resuming after the funds run out; $60M needed (http://bit.ly/1K9lJij)
- Flint Mayor stated officials are working on plan to remove and replace all lead pipes; said will cost $55M, begin within the month, and high-risk households would be given priority (http://on.freep.com/1Q7cvXk)
- GM and United Auto Workers union said they plan to donate $3 million over five years to support increased health and education services for Flint children exposed to lead (http://abcn.ws/1TaKpee)
- 50 Flint residents are being hired to help with water testing using state funding (http://bit.ly/1Le8kBJ)
- Beyoncé announced a new effort, #BeyGOOD, supporting local United Way programs and continued efforts to remedy the water crisis in Flint, as part of her upcoming world tour (http://bit.ly/20iUCnZ)
- Despite state of emergency declared by the Flint Mayor, the MI Governor, and Pres. Obama, inmates at the Genesee County Jail were forced to drink, cook with, and shower in the lead-tainted water while jail employees were given bottled water (http://bit.ly/1XfT9id)

CDC/USG Mentions

CDC

- Dr. Richard J. Jackson, former director of NCEH, told NYT that, "Lead in Flint is the tip of the iceberg." CDC worried over 500,000 children in the U.S. are suffering from lead poisoning (http://nyti.ms/1PeE6lY, http://huff.to/20mdeDA)
- CDC figures of 535,000 children with lead exposure in the U.S. were widely cited

Other USG

- Gov. Snyder declined an invitation from House Democrats to testify on the Flint crisis (http://cnn.it/1TQ4jKT); Flint Mayor will testify later this week (http://bit.ly/1K9OZGN)
- Presidential candidate Hilary Clinton met with Flint residents Sunday to discuss the crisis (http://on.wsj.com/1QpiWiO)

SOCIAL MEDIA (Twitter, Facebook, Blogs)

Major Public Health Themes

- Posts shared tweets by Democratic Presidential candidates Hillary Clinton and Bernie Sanders on the Flint water crisis and Clinton's visit to Flint (~13,000 retweets)
  - Hillary Clinton: "'The children of Flint are just as precious as the children of any other part of America.' —Hillary in Flint today" (https://t.co/JlvflCyOYg; 1,513 retweets)
  - Bernie Sanders: "The latest revelation about the public health crisis in Flint is horrifying" (1,401 retweets)
- Posts shared news the parents of 2-year-old with lead poisoning suing Flint. Several other lawsuits have also been filed (~2,000 retweets)
- Posts shared news on Flint dogs testing positive for lead poisoning (800 retweets)
- Post continued to share news on people making donation to support the Flint community. More recently posts included Beyoncé announcing a fund to benefit Flint children (~8,000 retweets)

Lead Issues Outside Flint, MI

- Posts shared More Science News tweet "Erin Brockovich Thinks This California City Is the Next Flint" (http://bit.ly/23NaTGj; 2,801 retweets)
- Posts shared Mark Ruffalo (actor) Wash. Post opinion "Flint isn't an anomaly. We're heading toward a national water crisis" (http://wapo.st/1mijKh5; 668 retweets)
- Posts shared tweets from NYT reporter Nicholas Kristoff "Infuriating story of how lead poisoning goes WAY beyond Flint, damaging kids everywhere" (350 retweets)

Points of Confusion/Potential Rumors/Misinformation

- None

Emerging Issues

- Posts shared video by Michael Moore (documentary filmmaker) and Pablo Proenza (film director) on overview of the Flint crisis (https://t.co/L5UxFE3Q8G; 579 retweets)
- Posts continued to share articles on effect of water crisis on Flint community (~900 retweets)
  - NYT article "Almost 400 properties in Flint registered high levels of lead in their drinking water" (330 retweets)
  - NPR story "Mother in Flint, Mich.: 'I will never trust this water ever again.'" (334 retweets)
- Posts continued to share news on Marc Edwards, civil engineering professor who helped expose the dangers of the water crisis last year. "How scientists failed the public in the Flint water crisis" (650 retweets)

CDC/USG Mentions

- Posts shared Gov. Snyder declining U.S House invitation to testify (700 retweets)
- Posts shared CNN article "CNN will host Democratic presidential debate in Flint, Michigan, city dealing with toxic water crisis" (https://t.co/BrfYuEaZYl; 312 retweets)

Attachments:	Media Report 2 09 16.docx

Summary: Flint Mayor Karen Weaver holds press conference on plans to remove all Flint's contaminated water pipes. GM and union to donate funds to help Flint children. Fifty Flint residents to be hired to help with water testing. **Flint Mayor to testify on the water crisis on Wednesday before the Democrats' Steering and Policy Committee on Capitol Hill.** Emails show that CDC voiced concerns over Legionnaires' disease clash between city, county and state officials months ago. State Board of Canvassers has approved a petition to recall Gov. Rick Snyder, but not over water crisis.

Below is a sampling of the coverage.

Flint mayor: Pipe replacement to begin next month
February 09, 2016 -- *Katrease Stafford, Detroit Free Press*
http://www.freep.com/story/news/local/michigan/flint-water-crisis/2016/02/09/flint-mayor-details-plan-replace-lead-pipes/80049056/

Flint Mayor Karen Weaver outlined Tuesday an estimated $55-million public works project expected to begin within a month to remove Flint's lead-contaminated pipes from the water distribution system.

First priority will be given to high-risk households with pregnant women and children, Weaver said at a news conference at City Hall.

"In order for Flint residents to once again have confidence and trust in the water coming from their faucets, all lead pipes in the city of Flint need to be replaced," Weaver said. "The success of the 'Fast Start' plan will require coordination between the city, state and federal officials as well as funding from the Michigan Legislature, Congress or both. I'm asking Gov. Snyder and the state to partner on this effort. We'll let the investigations determine whose to blame for Flint's water crisis, but I'm focused on solving it. It's going to take time to get this done, but we're going to move quickly to get this done."

Last week, Flint Mayor Karen Weaver called for the immediate removal of the city's lead-contaminated pipes and announced a plan that will get a major boost in help from Lansing Mayor Virg Bernero, who has offered technical assistance from the Lansing Board of Water and Light. Lansing has removed about 13,500 lead pipes in the city.

The "Fast Start" plan will require extensive coordination between city, state and federal officials, as well as funding from the Michigan Legislature and Congress, Weaver said. Weaver was joined Tuesday by retired

National Guard Brigadier General Michael McDaniel, who said he believes the project can be done within a year by 32 crews.

McDaniel is assisting in coordinating activities between the the city, the Lansing Board of Water and Light, state and federal agencies, and other stakeholders. The preliminary project scope developed by the BWL shows that up to 15,000 lead pipes could be removed in one year "under optimal conditions," Weaver said.

Flint's drinking water became contaminated with lead in April 2014 after the city, while under the control of a state-appointed emergency manager, switched its source to the Flint River as a temporary cost-cutting move and the state Department of Environmental Quality failed to require the addition of needed corrosion-control chemicals. As a result, corrosive water caused lead to leach from pipes, joints and fixtures, causing many citizens to receive water with unsafe lead levels. The state has told residents not to drink the water without filtering and says it is treating all Flint children as having been exposed to unsafe levels of lead.

The FBI is now investigating the contamination of Flint's drinking water amid a growing public outcry. U.S. Rep. Candice Miller, R-Harrison Township, proposed an emergency $1-billion grant to be authorized through the Environmental Protection Agency, and two Democratic U.S. senators and U.S. Rep. Dan Kildee, D-Flint Township, proposed up to $400 million in dollar-for-dollar matching funds from the state to do much the same thing.

The U.S. Attorney's Office announced Jan. 5 that it was assisting the U.S. Environmental Protection Agency in a Flint drinking water investigation and Gina Balaya, a spokeswoman, said federal prosecutors are "working with a multi-agency investigation team on the Flint water contamination matter, including the FBI, the U.S. Postal Inspection Service, EPA's Office of Inspector General, and EPA's Criminal Investigation Division."

Several lawsuits have been filed in connection with the crisis. Monday, the family of a 2-year-old girl whose blood test results showed the toddler suffers from lead poisoning, announced an individual suit against Gov. Snyder, former Flint emergency manager Darnell Earley, former Flint Mayor Dayne Walling and several other state and Flint officials.

.....

GM, UAW donating $3M to help Flint kids
February 09, 2016 *Michael Wayland*
http://www.detroitnews.com/story/news/michigan/flint-water-crisis/2016/02/09/gm-uaw-donation/80047788/

General Motors Co. and the United Auto Workers will donate $3 million to the United Way of Genesee County to help support health and education needs for the children of Flint who have been impacted by lead-contaminated water.

The company on Tuesday said the five-year commitment "will address immediate, ongoing and growing needs of Flint children affected by lead." The donation will be broken up into $600,000 per year, according to a company spokesman.

"This crisis has impacted every Flint resident, most specifically children under the age of six who face a long road to recovery," said United Way of Genesee County CEO Jamie Gaskin. "We're outlining a framework that will support these children with things like at-home care, nutritional assistance and early childhood and supplemental education so they can continue to learn and grow."

The announce comes less than a week after UAW President Dennis Williams condemned public officials for the Flint water fiasco as well as consumer advocate Ralph Nader questioning if the Detroit-based automaker did enough to raise awareness of potential problems with Flint's treatment of water months before high levels of lead were discovered.

GM spokesman Tom Wickham said the donation has nothing to do with Nader's public letter on Friday questioning to company's actions.

"We've been in talks with the United Way for a number of weeks now," he said Tuesday morning. "We were looking to find the right area to support, given all the financial support that has come in."

That "right area," the company said, includes early literature programs, support for preschool, nutritional needs, school nursing, before-and after-school programming, increased special education capacity and increased social, emotional and behavioral health school counselors.

Gov. Rick Snyder: State partners with Flint human service groups to hire 50 Flint residents to assist with water testing
February 08, 2016 – *Gov. Rick Snyder's Office*
http://www.michigan.gov/snyder/0,4668,7-277--376088--,00.html

FLINT, Mich. –Flint residents will be hired to assist with water testing under a new partnership forged Friday between the state and Flint human service groups, Gov. Rick Snyder announced today.

The partnership with Orchards Children's Services and Flint YMCA's Safe Places Program will help hire and train 50 residents this month to fill jobs on teams helping conduct water tests across the city.

"The people of Flint deserve timely action on emergency efforts to help the city move toward recovery," Snyder said. "We realize our water testing teams need more manpower to get the job done. There is no one better suited to help the city bounce back than Flint residents themselves and we appreciate Orchards Children's Services and the YMCA for helping connect Flint talent with this important positions."

Snyder said this hiring is part of a larger and ongoing effort to ensure Flint residents benefit from opportunities created by relief efforts in response to the water crisis.

"Orchards Children's Services and the YMCA are committed to serving children and families in Flint as we have done long before this crisis and will do long after," said Michael Williams, president of Orchards Children's Services. "The solution to this situation should involve the people of Flint and that is why we are partnering with the state to strengthen our community for the future."

Details on how to apply are available at http://www.orchards.org.

.....

Flint Mayor To Testify Before Democrats
February 8, 2016 *Mike Lillis*
http://thehill.com/homenews/house/268616-flint-mayor-to-testify-before-democrats

Flint Mayor Karen Weaver will visit Capitol Hill this week to testify on the water crisis plaguing her city.

House Democrats have scheduled a Wednesday hearing to examine the emergency on their partisan Steering and Policy Committee.

They've invited Weaver, a Democrat, and Republican Gov. Rick Snyder (Mich.) to appear. Only Weaver has accepted.

The Democrats are highlighting the crisis to send a broader election-year warning that cuts to public works programs and other government initiatives can have dire consequences. That debate is set to take off this week as President Obama prepares to unveil his 2017 budget blueprint — the last of his White House tenure — and the Republicans ready their counter-proposal to be released later in the month.

The competing budgets are perhaps the starkest evidence of the sharp ideological divide between the two parties when it comes to defining the size and role of government at all levels.

The Democrats' annual proposals have included robust spending on public health, infrastructure, education and other federal programs they deem "investments" in the country's future — a script Obama's budget is sure to follow. The Republicans, by contrast, have used their yearly budget bills to advocate enormous cuts in the same programs, citing the need to rein in government spending they consider to be out of control.

The Flint water crisis has become symbolic of that larger fight.

In 2014, emergency managers appointed by Snyder switched the city's water source from Lake Huron to the Flint River in an effort to cut government spending while a new pipeline was constructed. The new water was not treated with chemicals to prevent leaching from lead pipes, and thousands of Flint residents are feared to have been exposed to toxic levels of the heavy metal, which can cause brain damage and other health problems.

Snyder has urged Obama to direct more funds from the Federal Emergency Management Agency (FEMA) to address the crisis. The president, joined by other leading Democrats, has rejected those overtures, arguing that FEMA funds should be reserved for natural disasters, not man-made disasters like that in Flint. The Democrats have warned of crumbling infrastructure all over the country, and they want Congress to approve more federal spending for such projects in the budget.

The Democrats' hearing will come amid intensifying scrutiny over the reluctance of some public officials ensnared in the crisis to testify on Capitol Hill.

Last week, the House Oversight and Government Reform Committee held a hearing on the topic. Chairman Jason Chaffetz (R-Utah) had invited three officials to attend — Miguel Del Toral, an Environmental Protection Agency (EPA) water official, former EPA regional head Susan Hedman and former Flint emergency manager Darnell Earley. None complied, and Earley's refusal in particular has agitated Chaffetz, who issued a subpoena for his appearance.

"Participation before this committee is not optional," he said. "When you get invited to go before the Oversight and Government Reform Committee, you are going to show up."

Joining Weaver at Wednesday's Democratic hearing will be several public health specialists, including Dr. Yanna Lambrinidou, president of Parents for Nontoxic Alternatives, and Dr. Mona Hanna-Attisha, director of the pediatric residency program at Flint's Hurley Medical Center.

.....

Flint e-mails: CDC voiced concerns over Legionnaires actions
February 09, 2016 *Matthew Dolan, Elisha Anderson, Paul Egan and John Wisely, Detroit Free Press (click link for full article)*
http://www.freep.com/story/news/local/michigan/flint-water-crisis/2016/02/09/flint-e-mails-state-city-appear-unable-share-info/80028820/

More than eight months before Gov. Rick Snyder disclosed a deadly Legionnaires' disease outbreak in the Flint area, federal health officials worried a lack of cooperation in Michigan could be hampering the public health response.

Thousands of pages of e-mails obtained by the Detroit Free Press through the Freedom of Information Act show increasing concern about the quality of the Flint's drinking water as tensions grew over a lack of coordination to combat the waterborne disease.

County health officials were warned for reaching out to federal experts for help while they struggled to persuade Flint city officials to provide needed information, the e-mails show. Others in e-mails wondered about ethical breaches and the possibility of a cover-up.

Family of lead-poisoned Flint girl, 2, files suit

In sum, a review of the e-mails provided by Genesee County from several public-information requests appear to illustrate the inability, if not unwillingness, of city and state agencies to share information with the county as it investigated multiple Legionnaires' cases. The clash among bureaucrats went on privately for months despite growing fears inside Flint among residents that something was deeply wrong with the city's drinking water. "We are very concerned about this Legionnaires' disease outbreak," Laurel Garrison of the Centers for Disease Control and Prevention, wrote to Genesee County health officials in an April 27, 2015, e-mail. "It's very large, one of the largest we know of in the past decade, and community-wide, and in our opinion and experience it needs a comprehensive investigation."

Garrison added in her e-mail that "I know you've run into issues getting information you've requested from the city water authority and the MI Dept of Environmental Quality. Again, not knowing the full extent of your investigation it's difficult to make recommendations, and it may be difficult for us to provide the kind of detailed input needed for such an extensive outbreak from afar."

There were at least 87 cases across Genesee County during a 17-month period, including nine deaths, but the public was never told about the increase when it was happening — even after an initial wave of more than 40 cases were under investigation by early 2015.

It is unclear whether swifter action by government officials could have prevented a return of the outbreak last summer. But a public health investigation is ongoing. Legionnaires' disease is a pneumonia caused by bacteria in the lungs. People get sick if they inhale mist or vapor from contaminated water systems, hot tubs or cooling systems, or in some cases, showers.

Genesee County Health Department officials could not be reached for comment Monday night.

Typically, Genesee County saw between six and 13 Legionnaires' cases a year, according to officials. In 2014, the number jumped to 42. In 2015, there were 45 confirmed cases.

Officials investigating the outbreak in 2014 worried about disclosing a suspected cause.

Liane Shekter Smith, the head of the Office of Drinking Water and Municipal Assistance for the state Department of Environmental Quality contacted state health officials "a couple of times" to discuss the Legionnaires' outbreak in 2014, according to e-mails.

"She was concerned that an announcement was going to be made soon about the water as the source of the infection; I told her the Flint water was at this point just a hypothesis," Susan Bohm of the Department of Health and Human Services wrote to officials in Genesee County in an e-mail dated Oct. 21, 2014.

Last week, Snyder announced Sheketer Smith's termination, saying "putting the well-being of Michiganders first needs to be the top priority for all state employees."

The e-mails released Monday also showed how local officials struggled to contain the outbreak.

On Feb. 10, 2015, Genesee County Health Department epidemiologist Shurooq Hasan wrote to an outside expert about 47 Legionnaires' disease cases in 2014, which was almost four times the number of cases in 2013.

"We have investigated a hospital as a potential source for the disease, but have expanded our investigation to include the city water supply," Hasan said in the e-mail.

"Of our 47 cases, 25 cases have occurred within the city water supply distribution system. No common links have been found between the cases. The majority of our cases are home bound immune-comprised individuals who have not traveled and are not readily mobile," he wrote.

Hasan said those stricken were in such bad condition that they are unable to answer questions that would assist with the investigation.

.....

Board approves petition to recall Michigan Gov. Rick Snyder
February 09, 2016 *WSBC.com*
http://www.wsbt.com/news/local/Board-approves-petition-to-recall-Michigan-Gov-Rick-Snyder/37898112

LANSING, Mich. (AP) - The State Board of Canvassers has approved a petition to recall Gov. Rick Snyder, but denied the majority of proposals related to Flint's lead-tainted water crisis.

The board was split across party lines Monday on one proposal to recall Snyder for acknowledging he had "failed" the people of Flint in his State of the State Address. The measure has failed because a vote of 3-1 is needed to approve ballot language.

The board unanimously approved another petition stemming from Snyder's authorization to move the office dealing with struggling schools - the State School Reform Office/Redesign Office - into the Michigan Department of Technology, Management and Budget.
The board has rejected other petitions related to Flint because members said they didn't "factually" and "clearly" state each reason for the recall.

Chelsea Clinton to visit Michigan this week
February 09, 2016 *WILOX.com*
http://www.wilx.com/home/headlines/Chelsea-Clinton-to-visit-Michigan-this-week-368119441.html

Chelsea Clinton will be in Michigan this week to campaign for her mother's presidential bid.
The former first daughter will be in Flint and Detroit on Thursday.
We will let you know when the Clinton team announces the time and location of Chelsea's campaign stops.

Subject: FEMA Daily TPs from Lansing IOF EM-3375-MI

Talking Points: Flint, Michigan Water Contamination
February 9, 2016 @ 9 a.m.

Daily Numbers

Reported at 6 p.m. on February 8, 2016

As of February 9, 2016, the following commodities were requested by and provided to the state of Michigan in support of the response to the emergency conditions resulting from contaminated water in the city of Flint.

- 1,782,294 liters of water
- 127,764 water filter replacement cartridges
- 40,000 water and pitcher filters

Major Disaster Declaration/Full EM Denial

- Governor Snyder's January 20, 2016, appeal for a major disaster declaration for contamination and damage to the public water system in the City of Flint was denied on January 22, 2016. After review, FEMA determined that this event does not meet the statutory definition of major disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

    - *IF ASKED:* To qualify for a "major disaster" declaration there must be a natural catastrophe or, regardless of cause, a fire, flood or explosion which causes damages of significant severity and magnitude to warrant a declaration. FEMA's assistance is intended to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage and loss by the natural catastrophe, fire, flood or explosion. It was determined that the presence of lead in the Flint drinking water was not caused by a natural catastrophe, or by a fire, flood or explosion, so it does not qualify for a major disaster declaration.

- FEMA's assistance remains limited to what the President authorized in the Emergency Declaration on January 16, 2016. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration. The portions of the Emergency Declaration not granted can be appealed by the Governor.

- The decision means that the state can continue to work directly with other federal agencies and those agencies can provide assistance through their own authorities.

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and the Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

HHS as Federal Response Lead

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- Assistant Secretary for Preparedness and Response Dr. Nicole Lurie will lead this effort, supported by HHS Acting Assistant Secretary for Health Dr. Karen DeSalvo, as well as two U.S. Public Health Service officers.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners -- including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

- FEMA will work with the HHS team in Michigan to establish a collaborative process to best support state and local leaders with identifying the size and scope of the problem and help them develop and execute a plan to address the public health and infrastructure issues in Flint.

Emergency Declaration

- On January 14, FEMA received Governor Snyder's request for an Emergency Declaration, as well as a Major Disaster Declaration for emergency protective measures, temporary housing and repairs to homes and low-cost loans for covering uninsured loss of property, as well as other federal assistance.

- On January 16, 2016, President Barack Obama declared an emergency for Genesee County in the State of Michigan, limited to Direct Federal Assistance, as a result of the emergency conditions resulting from contaminated water in the city of Flint, authorizing FEMA to support the state in its efforts to respond to the incident.

- Under this emergency declaration, FEMA is authorized to provide emergency protective measures, Category B, limited to Direct Federal Assistance, under the Public Assistance program limited to 75 percent of the total eligible costs. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration.

IF ASKED about period of assistance through EM (90 days):

- FEMA's emergency assistance is designed to be supplemental and temporary in nature. FEMA, and our partners in other federal agencies, will be working closely with the state, county, and city officials to support those officials in the development of medium and longer term solutions to this problem.

- The state may submit a request to extend the current 90 day period of assistance established by the declaration, providing a valid reason that the extension is necessary.

If ASKED about the $5 million cap on assistance

- When the amount of federal assistance for an emergency declaration exceeds $5 million, FEMA is required to notify Congress.

Other Federal Agency Assistance To-Date

- U.S. Health and Human Services

  - The Department of Health and Human Services (HHS) Office of the Assistant Secretary for Preparedness and Response (ASPR) is working to identify vulnerable Flint residents who may not be able to travel to obtain filters and water testing kits. They are also working with the Centers for Medicare and Medicaid Services (CMS) to provide critical information needed for city responders to locate vulnerable residents and to help focus the city's outreach efforts.

  - HHS-funded health care centers in the area are offering free lead testing for their patients and are reaching out to patients to make them aware of the free testing. Exposed children will receive ongoing monitoring while they are health center patients. Health centers also are providing bottled water at their facilities and are assisting patients in obtaining bottled water or water filters in coordination with county-wide efforts.

  - HHS is helping educate residents who use HHS programs and services, such as Head Start programs and programs that serve seniors. In addition, HHS-funded local agencies on aging and community partners are reaching out to seniors and grandparents raising grandchildren to help them find water and filter distribution sites and to provide homebound residents with assistance in obtaining and installing filters.

  - The Centers for Disease Control and Prevention (CDC) is currently providing technical assistance to the Michigan state health department to assess lead exposure especially in homes with children. CDC also has provided recommendations on educational interventions for children affected by lead.

- U.S. Environmental Protection Agency

  - In mid-October, the EPA established a Flint Safe Drinking Water Task Force comprised of EPA scientists who are internationally recognized experts in the field of lead in drinking water. The EPA Task Force is providing technical assistance to the Michigan Department of Environmental Quality and the City of Flint to implement corrosion control treatment and to develop school and residential sampling protocols.

- EPA is also conducting an audit of the Michigan Department of Environmental Quality (MDEQ) drinking water program – to examine MDEQ's implementation of the Safe Drinking Water Act and related rules on lead and copper, total coliform, nitrates and ground water. This comprehensive audit will provide Flint residents and the people of Michigan with more information about MDEQ oversight of public water supplies and will identify actions that may be needed to strengthen the Michigan drinking water program.

- Housing & Urban Development

  - Flint was identified as one of six target cities in the second round of the Strong Cities – Strong Communities (SC2) White House initiative in 2014. This program focuses on enhanced Federal agency support in areas of blight reduction, public safety and economic development.

  - Discussions are ongoing between the FEMA Region 5 SC2 program lead and Department of Housing and Urban Development (HUD) staff on the Flint water crisis impacts to SC2 programs and initiatives; as well as possible opportunities for collaboration through existing federal engagement with local, county and State agencies.

  - HUD is working closely with the city on economic development and interagency coordination. They have successfully assisted the city with the purchase and installation of water filters. HUD had an existing lead hazard grant to Flint, targeted to lead paint, $325,000 of which could be used for addressing the water lead contamination. Additionally, HUD has provided a data tracking and reporting system for the State of Michigan to use in its lead investigations.

- U.S. Army Corps of Engineers

  - The FEMA Region 5 Recovery Coordinator is in discussion with the United States Army Corps of Engineers to identify possible technical assistance and/or Subject Matter Experts on public water distribution systems, and possible courses of action.

- US Department of Agriculture

  - USDA has waived requirements on potable tap water availability at school meal service, allowing schools to provide bottled water. The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) is also allowing participants to use WIC vouchers for ready-to-feed infant formula, which does not need to be mixed with water, and participants can also swap powdered formula for ready-to-feed formula.

Your daily UCG Flint External Affairs Messaging Plan for 2-9-16 is attached and below.

FLINT WATER RESPONSE
DAILY STRATEGIC MESSAGING
Feb. 9, 2016

Key Messages

- We are concerned about levels of lead found in the Flint, Michigan water supply and its impact on the health and safety of the community.
- The CDC recommends that all children under 6 years of age have a blood lead test before April 1, 2016.
- Have your water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- The safest option for vulnerable populations including pregnant and nursing mothers, and children under six years old, is to use bottled water.
- Residents may contact the newly established EPA hotline **(800-426-4791)** or email address **(flintwater@epa.gov)** for information about EPA's water sampling efforts. The hotline will provide immediate, telephonic translation in multiple languages.

Speakers Bureau IGA and Outreach Events/Activities

- None

LOOKING AHEAD

UPCOMING EVENTS/ACTIVITIES

- **HHS VIP Visit:** Feb 10 Karen DeSalvo, HHS Acting Assistant Secretary for Health (Includes Stakeholder Meetings)
- **USDA VIP** visit Feb 10 Dr. Katie Wilson, Deputy Undersecretary (Includes School & WIC Clinic Visit
- **ASPR VIP** visit Feb 11 Dr. Lurie – possible meeting with Faith-based leaders
- **Flint Water Response Training:** Feb 11 @ 11:30 pm 1610 W. Pierson Rd
- **ARC Community Partners Meeting:** Feb 11 @ 3 p.m. Food Bank
- **CERC Training** Feb 12, 14, 16 in Lansing (Location, Time TBD)
- **Access Community Canvass Event** Feb 13 @ 8 a.m. Location TBD
- **Latino Coalition Community Canvass** Feb 13 @ 12:30 p.m. 609 E. 5th Ave.
- **HHS Secretary Visit:** Tentatively Feb 18
- **EPA Planning Town Hall** (End of Feb)

COMMUNITY (FIELD) FEEDBACK

- **TONE:**
  - Unanswered Questions, Confusion, Uncertainty of an End State
- **CONCERNS:**
  - Health-related (rash, dermatitis, dry skin, skin cancer, organ damage, infertility)
  - Discrepancy about where clients should drop off water testing kits reported by some clients and whether or not they would receive results back.
  - Giving out certain quantities: 2 cartridges for PUR but only 1 replacement filter for Britta. This creates some issues for clients who want or need more
  - Lots of comments and concerns about having to pay back water bills.

- **GAPS:**
  - Social media indicating water distribution may not be reaching all members of the community quickly enough.
  - Filters for showers. recyclable cartridges

- **OPPORTUNITIES:**
  - Provide Frequently Asked Question Fact Sheet
  - More Education of the Media

PLANNED MESSAGING/PRODUCTS

- **CDC:**
  - **NR:** Blood Lead Testing Recommendations
  - **Infographic:** Lead in the Home
- **EPA:**
  - Version 1 of door hanger printing, Version 2 in draft
  - Changing Flier on How to Properly use filter, to infographic to be distributed with filters
  - Fact Sheet on toll free number and email address
  - FAQ on Top Public Questions
- **State:** Lead Poisoning in Pets Messaging (State JIC and MDARD)

EMERGING ISSUES THAT MAY AFFECT MESSAGING:

- EPA strike team testing of UM-Flint Dorm (AmeriCorps members)
- Possible need to develop Campaign/PSA to get the remaining kids tested.
- A need to **re-engage** the provider community to start lead testing (Pediatricians, Family Medicine, NPs, PA, WIC, Head Start and Early Head Start/Churches).
- EPA said water filters installed in homes may be working better than expected, however residents are saying they are still finding high lead levels in their water.

OPERATIONAL TASKS FOR MESSAGING OPPORTUNITIES:

- AmeriCorps Volunteer activities
- Resource List for External Audiences
- CDBG grants
- Water filters in HUD property
- Other programs to address nutritional needs of children
- WIC funding to possibly coordinate blood tests for children

Your daily UCG Flint External Affairs Messaging plan is attached and below:

FLINT WATER RESPONSE
DAILY STRATEGIC MESSAGING
Feb. 9, 2016

Key Messages

- We are concerned about levels of lead found in the Flint, Michigan water supply and its impact on the health and safety of the community.
- The CDC recommends that all children under 6 years of age have a blood lead test before April 1, 2016.
- Have your water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- The safest option for vulnerable populations including pregnant and nursing mothers, and children under six years old, is to use bottled water.
- Residents may contact the newly established EPA hotline **(800-426-4791)** or email address (flintwater@epa.gov) for information about EPA's water sampling efforts. The hotline will provide immediate, telephonic translation in multiple languages.

Subject: FYI: Press conference featuring Missouri and Michigan moms: National Press Club Tomorrow, Tuesday, February 9

Moms from Flint, Michigan and St. Louis, Missouri to Address EPA's Failure to Protect Children and Families
WASHINGTON, Feb. 8, 2016 /PRNewswire-USNewswire/ -- On Tuesday, February 9, a coalition of moms from Michigan and Missouri will hold a press conference to address EPA's failure to act on serious threats to public health in both communities.

Flint, Michigan is reeling from ongoing lead poisoning in its drinking water. EPA senior managers reacted to alarms sounded by its own staff by downplaying the risks and hiding the warnings about the lead levels from the public.

In Bridgeton, Missouri (a suburb of north St. Louis), families live near a radioactive Superfund landfill containing nuclear wastes that were illegally dumped during the Manhattan Project. The nuclear wastes are adjacent to an underground fire at a neighboring landfill. The Bridgeton/West Lake landfill site is owned by the Republic Services waste corporation, and workers there have no protection from either the radioactive wastes or the toxic emissions emitted by the landfill daily. EPA Administrator Gina McCarthy has refused for over two years to meet with the Just Moms St. Louis community group.

At the press conference, leaders from both the Just Moms St. Louis and the Flint-based Water You Fighting For community groups will discuss the environmental and public health catastrophes in both communities, and EPA's responses to date. They will also ask EPA Administrator McCarthy to meet with the Just Moms St. Louis members who traveled here to request that the EPA act on its authority under the Superfund Act to move families away from the landfill, as the agency has done previously with Love Canal and other communities.

WHAT: Press conference featuring Missouri and Michigan moms

WHEN: Tuesday, February 9, 2016 at 10 a.m. EST

LOCATION: National Press Club

529 14th St. NW, 13th Floor, Washington, DC 20045 (Zenger Room)

Call-in number: (888) 223-4641 (International calls: 1-303-223-2682)

Attachments: Flint Social Media Summary_8Feb16.docx

Sharing...social media analysis

Good afternoon,

Attached is a summary of topics and themes seen in social media since our last report on 5 Feb 16 for the Flint Water Contamination incident.

BLUF: The conversation is largely political in nature dominated by reactions to presidential candidates. Users shared mostly positive comments about Hillary Clinton's visit to Flint. Other users expressed frustration that Flint was not mentioned by candidates in the GOP debate on 6 February 2016. Additionally, general comments from several sources seem to suggest that water distribution may not be reaching all members of the community quickly enough.

Talking Points: Flint, Michigan Water Contamination
February 8, 2016 @ 9 a.m.

Daily Numbers

Reported at 6 p.m. on February 7, 2016

As of February 8, 2016, the following commodities were requested by and provided to the state of Michigan in support of the response to the emergency conditions resulting from contaminated water in the city of Flint.

- 1,782,294 liters of water
- 127,764 water filter replacement cartridges
- 40,000 water and pitcher filters

Major Disaster Declaration/Full EM Denial

- Governor Snyder's January 20, 2016, appeal for a major disaster declaration for contamination and damage to the public water system in the City of Flint was denied on January 22, 2016. After review, FEMA determined that this event does not meet the statutory definition of major disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

  - *IF ASKED:* To qualify for a "major disaster" declaration there must be a natural catastrophe or, regardless of cause, a fire, flood or explosion which causes damages of significant severity and magnitude to warrant a declaration. FEMA's assistance is intended to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage and loss by the natural catastrophe, fire, flood or explosion. It was determined that the presence of lead in the Flint drinking water was not caused by a natural catastrophe, or by a fire, flood or explosion, so it does not qualify for a major disaster declaration.

- FEMA's assistance remains limited to what the President authorized in the Emergency Declaration on January 16, 2016. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of

this declaration. The portions of the Emergency Declaration not granted can be appealed by the Governor.

- The decision means that the state can continue to work directly with other federal agencies and those agencies can provide assistance through their own authorities.

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and the Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

HHS as Federal Response Lead

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- Assistant Secretary for Preparedness and Response Dr. Nicole Lurie will lead this effort, supported by HHS Acting Assistant Secretary for Health Dr. Karen DeSalvo, as well as two U.S. Public Health Service officers.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

- FEMA will work with the HHS team in Michigan to establish a collaborative process to best support state and local leaders with identifying the size and scope of the problem and help them develop and execute a plan to address the public health and infrastructure issues in Flint.

Emergency Declaration

- On January 14, FEMA received Governor Snyder's request for an Emergency Declaration, as well as a Major Disaster Declaration for emergency protective measures, temporary housing and repairs to homes and low-cost loans for covering uninsured loss of property, as well as other federal assistance.

- On January 16, 2016, President Barack Obama declared an emergency for Genesee County in the State of Michigan, limited to Direct Federal Assistance, as a result of the emergency conditions resulting from contaminated water in the city of Flint, authorizing FEMA to support the state in its efforts to respond to the incident.

- Under this emergency declaration, FEMA is authorized to provide emergency protective measures, Category B, limited to Direct Federal Assistance, under the Public Assistance program limited to 75 percent of the total eligible costs. FEMA will, in coordination with the state, provide water, water filters,

water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration.

IF ASKED about period of assistance through EM (90 days):

- FEMA's emergency assistance is designed to be supplemental and temporary in nature. FEMA, and our partners in other federal agencies, will be working closely with the state, county, and city officials to support those officials in the development of medium and longer term solutions to this problem.

- The state may submit a request to extend the current 90 day period of assistance established by the declaration, providing a valid reason that the extension is necessary.

If ASKED about the $5 million cap on assistance

- When the amount of federal assistance for an emergency declaration exceeds $5 million, FEMA is required to notify Congress.

Other Federal Agency Assistance To-Date

- U.S. Health and Human Services

    - The Department of Health and Human Services (HHS) Office of the Assistant Secretary for Preparedness and Response (ASPR) is working to identify vulnerable Flint residents who may not be able to travel to obtain filters and water testing kits. They are also working with the Centers for Medicare and Medicaid Services (CMS) to provide critical information needed for city responders to locate vulnerable residents and to help focus the city's outreach efforts.

    - HHS-funded health care centers in the area are offering free lead testing for their patients and are reaching out to patients to make them aware of the free testing. Exposed children will receive ongoing monitoring while they are health center patients. Health centers also are providing bottled water at their facilities and are assisting patients in obtaining bottled water or water filters in coordination with county-wide efforts.

    - HHS is helping educate residents who use HHS programs and services, such as Head Start programs and programs that serve seniors. In addition, HHS-funded local agencies on aging and community partners are reaching out to seniors and grandparents raising grandchildren to help them find water and filter distribution sites and to provide homebound residents with assistance in obtaining and installing filters.

    - The Centers for Disease Control and Prevention (CDC) is currently providing technical assistance to the Michigan state health department to assess lead exposure especially in homes with children. CDC also has provided recommendations on educational interventions for children affected by lead.

- U.S. Environmental Protection Agency

    - In mid-October, the EPA established a Flint Safe Drinking Water Task Force comprised of EPA scientists who are internationally recognized experts in the field of lead in drinking water. The EPA Task Force is providing technical assistance to the Michigan Department of Environmental

Quality and the City of Flint to implement corrosion control treatment and to develop school and residential sampling protocols.

- EPA is also conducting an audit of the Michigan Department of Environmental Quality (MDEQ) drinking water program – to examine MDEQ's implementation of the Safe Drinking Water Act and related rules on lead and copper, total coliform, nitrates and ground water. This comprehensive audit will provide Flint residents and the people of Michigan with more information about MDEQ oversight of public water supplies and will identify actions that may be needed to strengthen the Michigan drinking water program.

- Housing & Urban Development

  - Flint was identified as one of six target cities in the second round of the Strong Cities – Strong Communities (SC2) White House initiative in 2014. This program focuses on enhanced Federal agency support in areas of blight reduction, public safety and economic development.

  - Discussions are ongoing between the FEMA Region 5 SC2 program lead and Department of Housing and Urban Development (HUD) staff on the Flint water crisis impacts to SC2 programs and initiatives; as well as possible opportunities for collaboration through existing federal engagement with local, county and State agencies.

  - HUD is working closely with the city on economic development and interagency coordination. They have successfully assisted the city with the purchase and installation of water filters. HUD had an existing lead hazard grant to Flint, targeted to lead paint, $325,000 of which could be used for addressing the water lead contamination. Additionally, HUD has provided a data tracking and reporting system for the State of Michigan to use in its lead investigations.

- U.S. Army Corps of Engineers

  - The FEMA Region 5 Recovery Coordinator is in discussion with the United States Army Corps of Engineers to identify possible technical assistance and/or Subject Matter Experts on public water distribution systems, and possible courses of action.

- US Department of Agriculture

  - USDA has waived requirements on potable tap water availability at school meal service, allowing schools to provide bottled water. The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) is also allowing participants to use WIC vouchers for ready-to-feed infant formula, which does not need to be mixed with water, and participants can also swap powdered formula for ready-to-feed formula.

Good Morning. Your 2-8-16 Daily UCG Flint External Affairs Messaging Plan is attached and below:

FLINT WATER RESPONSE
DAILY STRATEGIC MESSAGING
Feb. 8, 2016

Key Messages

- We are concerned about levels of lead found in the Flint, Michigan water supply and its impact on the health and safety of the community.
- The CDC recommends that all children under 6 years of age have a blood lead test before April 1, 2016.
- Have your water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- The safest option for vulnerable populations including pregnant and nursing mothers, and children under six years old, is to use bottled water.
- Over the past few weeks the federal government has ramped up support for the people of Flint, bringing in technical experts from the Federal Family.

- We're looking across the federal government at ways we can use our programs and our expertise to help the city and the state ensure immediate access to safe water and a safe water supply.
- Residents may contact the newly established EPA hotline **(800-426-4791)** or email address **(flintwater@epa.gov)** for information about EPA's water sampling efforts. The hotline will provide immediate, telephonic translation in multiple languages.

Products for Release

- *News Releases*
  - **None**

Operational Communication Events

- *News Interviews*
  - **Planning Interviews to supplement Flier on How to Properly Use Filter
- *News Conferences*
  - **None**

Stakeholder Calls/Briefings/Meetings/Trainings

- **Flint City Council Meeting** @ 6 pm 1101 S. Saginaw St (No invitation, FYI only)

Speakers Bureau IGA and Outreach Events/Activities

- **Blood Lead Testing Event:** @ 3pm – 6pm, Carriage Town Ministries
- **N. Flint Food Cooperative Community Meeting:** @ 6 pm 5005 Cloverlawn Drive

LOOKING AHEAD

UPCOMING EVENTS/ACTIVITIES

- **ARC Community Leadership Meeting** Feb 9 @ 2 p.m. 1401 S Grand Traverse
- **Tentative VIP visit by USDA** Undersecretary and Regional Admin. Feb 10
- **Flint Water Response Training:** Feb 11 @ 11:30 pm 1610 W. Pierson Rd
- **ARC Community Partners Meeting:** Feb 11 @ 3 p.m. Food Bank
- **CERC Training** Feb 12, 14, 16 in Lansing and Flint (times and location TBD)
- **Access Community Canvass Event** Feb 13 @ 8 a.m. Location TBD
- **Latino Coalition Community Canvass** Feb 13 @ 12:30 p.m. 609 E. 5th Ave.
- **HHS Secretary Visit:** Tentatively Feb 18

COMMUNITY (FIELD) FEEDBACK

- **TONE:**
  - Unanswered Questions, Confusion, Uncertainty of an End State
- **CONCERNS:**
  - Health-related (rash, dermatitis, dry skin, skin cancer, organ damage, infertility)
  - Only providing 1 case per household. This creates some issues for clients who want or need more
  - Discrepancy about where clients should drop off water testing kits reported by some clients and whether or not they would receive results back.

- Giving out certain quantities: 2 cartridges for PUR but only 1 replacement filter for Britta. This creates some issues for clients who want or need more
- Lots of comments and concerns about having to pay back water bills.

o **GAPS:**
- Filters for showers. recyclable cartridges

o **OPPORTUNITIES:**
- Provide Frequently Asked Question Fact Sheet
- More Education of the Media

PLANNED MESSAGING/PRODUCTS

o **EPA:** Flier on how to properly use your Filter
o **State:** Lead Poisoning in Pets Messaging (State JIC and MDARD)
o **EPA** is updating its fact sheet currently on the Web to include the new toll-free number and email address.
o **EPA** is working to create door-knob leave behinds

EMERGING ISSUES THAT MAY AFFECT MESSAGING

o EPA strike team testing of UM-Flint Dorm (AmeriCorps members)
o Possible need to develop Campaign/PSA to **get the remaining kids tested.**
o A need to **re-engage** the provider community to start lead testing (Pediatricians, Family Medicine, NPs, PA, WIC, Head Start and Early Head Start/Churches).
o EPA said water filters installed in homes may be working better than expected, however residents are saying they are still finding high lead levels in their water.

OPERATIONAL TASKS FOR MESSAGING OPPORTUNITIES:

o AmeriCorps Volunteer activities
o Resource List for External Audiences
o CDBG grants
o Possible creation of a Multi-Agency Resource Center (MARC)
o Water filters in HUD property
o Other programs to address nutritional needs of children
o WIC funding to possibly coordinate blood tests for children

Finley: What isn't helping in Flint
By Nolan Finley, Detroit News 02/07/16 8:26 AM
A crisis isn't solved by finger pointing, grandstanding, gotcha games, exaggerations and hysteria. That's what's been going on in Flint, and it isn't helping. Instead of pulling together, Michigan is fracturing. Politicians see in Flint not a disaster that demands single-minded focus on solutions, but a delicious opportunity that can't be squandered. We are months into the awareness that the city's water system carried lead into residents, and still there has not been a summit of local, state and federal officials to unite behind a fix-it strategy. What's been going on is an embarrassment, and has additionally damaged a state whose reputation is built on pure, abundant water. That isn't helping the people of Flint.

CNN schedules Democratic debate in Flint
By Kyle Balluck, The Hill 02/07/16 8:14 AM
CNN announced early Sunday that it will host a debate between Democratic presidential candidates Hillary Clinton and Bernie Sanders next month in Flint, Mich., which has been hit hard by contaminated drinking water. The March 6 event will come two days before the Michigan and Mississippi primaries. "Our Democratic candidates have run spirited campaigns focused on how to best move our country forward, and our upcoming debate in Flint, Michigan is a critical setting to highlight what's at stake in these elections," Democratic National Committee Chairwoman Debbie Wasserman Schultz said in a statement distributed by CNN.

Walberg talks jobs, Flint water crisis and more
By Dan Cherry, Le Connect 02/07/16 8:00 AM
More than two dozen residents spent their morning Saturday with U.S. Rep. Tim Walberg at a coffee hour at Family Kitchen restaurant in Madison Township. Walberg, a Republican from Tipton, answered a dozen questions submitted on cards on a wide range of topics, from local infrastructure and jobs to the Flint water crisis and the upcoming presidential election. Jobs and the local economy remain Walberg's "No. 1 issue," he said, but more must be done to make it easier for businesses to thrive in Michigan and Lenawee County. Regulation fees that nationally total $1.9 trillion are levied on job providers "just for regulatory compliance costs," Walberg said.

Detroit, Flint to host presidential debates
By Crain's Detroit Business 02/07/16 8:00 AM
Michigan will play host to two presidential debates days ahead of the March 8 state primary. Republican candidates will debate issues in Detroit on March 3, and Democratic candidates Hillary Clinton and Bernie Sanders will face off in Flint on March 6. The two-hour GOP debate, presented by the Fox News Channel, will air at 9 p.m. across Fox's various media platforms including Internet, TV and radio. The location of that debate has yet to be finalized, but the Fox Theatre is

reportedly in the running. Megyn Kelly of Fox News will again be a moderator, leaving candidate Donald Trump's attendance an unknown.

Flint biz treads water through crisis
By Marti Benedetti, Crain's Detroit Business 02/07/16 8:00 AM
The Flint water crisis is taking a toll on the city that goes beyond lead poisoning. The Flint Cultural Center, considered a jewel with its expansive neighborhood of theaters, museums and a large public library, could be hurt by declining property values and tax collections as a result of the water crisis. At the same time, Flint business owners hope water woes won't stem the downtown renaissance of recent years. Kay Schwartz, director of library services for the Flint Public Library in the cultural center, said the water crisis has the potential to hurt library financing, but it has weathered financial crises before. In 2009, in the midst of the recession and General Motors' bankruptcy, a library millage of 2.9 mills produced $4.7 million. The library relies on a property tax millage for 90 percent of its income.

Hillary Clinton to speak in Flint Sunday
By FOX 2 Detroit 02/07/16 7:08 AM
Days away from the New Hampshire Primary and Hillary Clinton has decided to visit Flint Sunday where she will attend a community meeting with Flint Mayor Karen Weaver and local residents to hear firsthand about the water crisis that is harming families and what our leaders need to do to fix it. Clinton will use her trip to urge the Republican-controlled Senate to approve the Senate Democrats' $600 million amendment to help Flint. Earlier this week, Senate Democrats blocked an energy bill in order to try to force action on the Flint provision.

Four things to know about Hillary Clinton's Flint visit during water crisis
By Amanda Emery, MLIVE 02/07/16 6:05 AM
Democratic presidential candidate Hillary Clinton is visiting Flint Sunday amid the city's water crisis to hear first-hand from residents. Here are the four things to know about Clinton's visit:

1. Clinton is scheduled to attend a community meeting with Flint Mayor Karen Weaver and local residents on Sunday, Feb. 7 to discuss the Flint water crisis. The meeting is free and open to the public.
2. The meeting will be held at the House of Prayer Missionary Baptist Church, located at 1851 West Carpenter Road in Flint, at 1:30 p.m.
3. Doors open at 9:30 a.m. to the community. There is a regular church service at 11 a.m. Everyone who comes to the church will have to go through security.
4. Clinton will also use her trip to urge the Republican-controlled Senate to approve the Senate Democrats' $600 million amendment to help Flint. Senate Democrats on Thursday, Feb. 4 blocked an energy bill after Republicans refused to include hundreds of millions of dollars in emergency federal aid to Flint.

CNN to hold Democratic presidential debate in Flint, Michigan
By Mark Preston, CNN 02/07/16 5:59 AM [video clip]
Hillary Clinton and Bernie Sanders will debate next month in Flint, Michigan, a city thrust into the national spotlight after it was discovered residents were drinking toxic tap water. The debate will air on CNN, the Democratic National Committee announced on Sunday. The internationally televised event on March 6 will take place two days before the Michigan and Mississippi primaries and is part of a broader deal reached by Clinton and Sanders to add more DNC-sanctioned presidential primary debates to the schedule.

Flint Water Crisis Overrides Governor Snyder's Middle East Trip
By Alfredo Watts, The Lake Andes Wave 2/07/16 4:47 AM
One of the prior suits alleges there is no sovereign immunity because the water switch denied residents their federal constitutional rights to bodily integrity and to be free from state-created danger. The fund, established by the Community Foundation of Greater Flint, is a supplemental...

Earley subpoenaed to testify in Flint water crisis
By Michael Christensen, My Tech Bits 02/07/16

Some families discovered that the amount of lead in their water was "above toxic waste-dump levels", Mrs. Stabenow said. The U.S. House Oversight and Government Reform Committee is expected to hold a hearing today on Flint's water crisis. "The public has every right to be outraged". Snyder's office said the agency that has already accepted blame for much of the Flint water crisis dropped the ball on the Legionnaires' disease issue and nobody told the governor about it. The Michigan Democratic Party has now called on Snyder to resign. "To date, Congress has not heard testimony from you on the Flint water crisis".

D.C. report: Aid for Flint, Michigan, drawing attention
By Randy Krehbiel, Tulsa World 02/07/16 12:00 AM
The Senate resumes work on an energy bill that has become bogged down by dozens of amendments and an attempt to include emergency aid for Flint, Michigan, in it. U.S. Sen. Jim Inhofe more or less blamed President Barack Obama's attention to climate change for the lead-contaminated water crisis in Flint. Inhofe said Obama has consistently short-changed the Drinking Water State Revolving Fund "while increasing funding for subsidies for his corporate friends that share his global warming views."

Thomas Lucente: Flint water crisis — You can't make this stuff up
By Thomas Lucente, Lima Ohio 02/07/16 1:18 AM
The hypocrisy of the left is always entertaining, though quite dangerous. The thing is, they simply don't see it. Let's take the water crisis in Flint, Michigan. The crisis was a failure of government at all levels. Initial reports would have you believe the switch was made to save money. That fits in with the leftist narrative that austerity and responsible fiscal management is bad and government spending — the more the better — is always good. However, that was not the case. Government officials chose the KWA because the new project, while more costly to Flint residents, would create jobs and stimulate the economy.

Officials accused of Flint water crisis cover-up in Wednesday House hearing
By Curtis Figueroa, Sinema Blaze 02/07/16
Gov. Rick Snyder is expected to propose an additional $30 million in state funding to help Flint residents pay their water bills. Joel Beauvais, acting water chief for the U.S. Environmental Protection Agency, said MI officials ignored federal advice to treat Flint water for corrosion-causing elements a year ago and delayed for months before telling the public about the health risks. The panel subpoenaed EPA's Susan Hedman to appear at a deposition in Washington later this month. State officials testifying before the committee admitted more should have been done.

Activists ask United Nations to intervene in Flint
By Niraj Warikoo, Detroit Free Press 02/07/16 3:12 AM
Did the Flint water contamination violate international treaties the U.S. has agreed to? Activists want the United Nations to come to Flint and investigate. Many people have been asking city, state and federal officials to help in Flint. Now, some activists want international intervention, asking the United Nations to investigate the water problems in Flint as possible violations of international treaties the U.S. has agreed to. Last week, activists with the Detroit Water Brigade traveled to New York City to testify about Flint and Detroit before the United Nations' Commission for Social Development at its Civil Society Forum. Afterward, they sent a letter to the U.S. Mission to the United Nations asking it to allow the United Nations to send a fact-finding mission to Flint.

Red Cross needs volunteers for Flint water relief
By Rhonda Ross, WZZM ABC 13 02/07/16 6:00 AM
The country has been rallying together to bring relief to those affected by the Flint water crisis. Many have been donating bottled water but if you're looking to take things a step further, The American Red Cross could use your help. Mike Mitchell from the American Red Cross of West Michigan says volunteers are needed more than ever to assist in relief efforts. Mitchell says people are needed to help deliver water and supplies to people who can not make it to relief stations, such as the elderly or the disabled. Anyone interested in volunteering in Flint can visit the American Red Cross office in Flint to sign up.

Clinton, Sanders to debate in Flint, MI on March 6

By RNN Staff WMC Action News NBC 5 02/07/16 6:21 AM
Next month's Democratic debate will take place in Flint, MI, the city now in the national spotlight because of its toxic tap water, CNN reports. The Democratic National Committee announced the location Sunday. The event will be televised live on CNN on March 6, two days before the Michigan and Mississippi primaries. The debate is part of a broader deal reached by Clinton and Sanders to add more DNC-sanctioned primary debates to the schedule.

Memo to Clinton From Flint: Bring Water
By Justin Glawe, Daily Beast 02/07/16 12:15 AM
During her visit on Sunday, Hillary Clinton will once again shine the media spotlight on Flint. Unfortunately, so far the press attention has brought little relief for residents. The only thing that the people of Flint need to hear from Hillary Clinton when she arrives here tomorrow is where they can get bottled water. The crisis in Flint is not over because it has received national media attention or because politicians are now owning up to their failures. It is a present, silent, man-made disaster that is ongoing — and the infrastructure of the response is being handled by every level of government as poorly as the water crisis itself.

Hillary Clinton Meeting With Flint Mayor, Residents On Sunday
By CBS Detroit 02/06/16 10:15 PM
Democratic Presidential candidate Hillary Clinton will be in Flint Sunday to speak with residents who are dealing with the city's drinking water crisis firsthand. Clinton is set to attend a community meeting with Flint Mayor Karen Weaver and local residents to hear about the water crisis that is harming families and what our leaders need to do to fix it. he meeting will be held at 1:30 p.m. Sunday (doors open at 9:30 a.m.) at the House of Prayer Missionary Church, 1851 W Carpenter Road.

A long friendship put spotlight on Flint water crisis
By Rochelle Riley, Detroit Free Press 02/06/16 10:57 PM
The moment that changed the course of thousands of lives in Flint actually came in the spring of 2014 — before the city switched its water source from Lake Huron to the Flint River. Elin Betanzo, a water engineer working for the Northeast Midwest Institute, was sitting in a Mt. Pleasant conference room on April 16, 2014, at a meeting of the Michigan section of the American Water Works Association. It was a training class for people who understand water systems and rivers and lead, who work for municipal water plants and who help to police them.

Dr. Mona Hanna-Attisha Talks about Flint Water Crisis
By Crystal A. Proxmire, Oakland County 115 02/06/16 [video clip]
n Flint there have been many people who fought in their own ways to bring attention to the problems faced by residents since the water was switched from Detroit water to water from the Flint River. One of those who brought forward research about increased levels of lead, and who has been advocating for more resources to help the children exposed to it, has been Royal Oak native Doctor Mona Hanna-Attisha. Dr. Hanna-Attisha came home to Royal Oak Saturday to talk with various groups about the crisis in Flint. She also recalled her Royal Oak roots.

Lawmakers introduce Flint water, Tesla sales bills
By Kathleen Gray, Detroit Free Press 02/06/16 10:35 PM
In addition to the Tesla bills, the Flint water crisis continues to dominate action in Lansing. Two bills were introduced last week to set up a revolving fund to deal with the replacement of water infrastructure pipes and another to require testing for lead and other contaminants in the water supply going into schools.

Dr. Mona Hanna-Attisha goes from doctor to global hero
By Rochelle Riley, Detroit Free Press 02/06/16 10:58 PM
The night before her scheduled appearance on national TV to talk about the Flint water crisis, Dr. Mona Hanna-Attisha walked into the Oakland County home she shares with her husband and two daughters and plopped onto the couch. She wanted to listen to an NPR interview (the first of herself she would watch or hear). But her 7-year-old daughter "began screaming 'No more Flint!' and took the phone and threw it across the room," she said with a laugh.

Money for Flint? Yes, but bigger issues loom

By Stephen Henderson, Detroit Free Press 02/06/16 10:39 PM

Michigan Sens. Debbie Stabenow and Gary Peters say they want $600 million to help Flint deal with infrastructure. Rep. Candice Miller upped the ante to $1 billion, which is what she wants the Environmental Protection Agency to send to help replace lead service lines in people's homes. (For the record, I think the total cost here falls way shy of $1 billion, but it's a nice round number for the headlines, right?) And so the political scramble to fix what got broken in Flint continues to unfold, and I'm guessing we haven't seen the last of the one-upmanship or center-stage grabbing.

Bernie Sanders' campaign sets up shop in Flint before Hillary Clinton's visit on Sunday

By Steve Carmody, Michigan Radio 02/06/16 2:00 PM

Hillary Clinton is bringing her presidential campaign to Flint Sunday. But her rival for the Democratic presidential nomination is also setting up shop in town this weekend. Hillary Clinton and Bernie Sanders will top the Democratic side of Michigan's presidential primary next month. On Friday, a handful of volunteers were busy making hand-made signs in the new Bernie Sanders campaign office in Flint on Friday.

Talking Points: Flint, Michigan Water Contamination

February 7, 2016 @ 9 a.m.

Daily Numbers

Reported at 6 p.m. on February 6, 2016

As of February 7, 2016, the following commodities were requested by and provided to the state of Michigan in support of the response to the emergency conditions resulting from contaminated water in the city of Flint.

- 1,782,294 liters of water
- 127,764 water filter replacement cartridges
- 40,000 water and pitcher filters

Major Disaster Declaration/Full EM Denial

- Governor Snyder's January 20, 2016, appeal for a major disaster declaration for contamination and damage to the public water system in the City of Flint was denied on January 22, 2016. After review, FEMA determined that this event does not meet the statutory definition of major disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act.
    - *IF ASKED:* To qualify for a "major disaster" declaration there must be a natural catastrophe or, regardless of cause, a fire, flood or explosion which causes damages of significant severity and magnitude to warrant a declaration. FEMA's assistance is intended to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage and loss by the natural catastrophe, fire, flood or explosion. It was determined that the presence of lead in the Flint drinking water was not caused by a natural catastrophe, or by a fire, flood or explosion, so it does not qualify for a major disaster declaration.
- FEMA's assistance remains limited to what the President authorized in the Emergency Declaration on January 16, 2016. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of

this declaration. The portions of the Emergency Declaration not granted can be appealed by the Governor.

- The decision means that the state can continue to work directly with other federal agencies and those agencies can provide assistance through their own authorities.

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and the Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

HHS as Federal Response Lead

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- Assistant Secretary for Preparedness and Response Dr. Nicole Lurie will lead this effort, supported by HHS Acting Assistant Secretary for Health Dr. Karen DeSalvo, as well as two U.S. Public Health Service officers.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and Department of Agriculture (USDA), and others—that are already working to help residents in Flint.

- FEMA will work with the HHS team in Michigan to establish a collaborative process to best support state and local leaders with identifying the size and scope of the problem and help them develop and execute a plan to address the public health and infrastructure issues in Flint.

Emergency Declaration

- On January 14, FEMA received Governor Snyder's request for an Emergency Declaration, as well as a Major Disaster Declaration for emergency protective measures, temporary housing and repairs to homes and low-cost loans for covering uninsured loss of property, as well as other federal assistance.

- On January 16, 2016, President Barack Obama declared an emergency for Genesee County in the State of Michigan, limited to Direct Federal Assistance, as a result of the emergency conditions resulting from contaminated water in the city of Flint, authorizing FEMA to support the state in its efforts to respond to the incident.

- Under this emergency declaration, FEMA is authorized to provide emergency protective measures, Category B, limited to Direct Federal Assistance, under the Public Assistance program limited to 75 percent of the total eligible costs. FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration.

IF ASKED about period of assistance through EM (90 days):

- FEMA's emergency assistance is designed to be supplemental and temporary in nature. FEMA, and our partners in other federal agencies, will be working closely with the state, county, and city officials to support those officials in the development of medium and longer term solutions to this problem.

- The state may submit a request to extend the current 90 day period of assistance established by the declaration, providing a valid reason that the extension is necessary.

If ASKED about the $5 million cap on assistance

- When the amount of federal assistance for an emergency declaration exceeds $5 million, FEMA is required to notify Congress.

Other Federal Agency Assistance To-Date

- U.S. Health and Human Services

  - The Department of Health and Human Services (HHS) Office of the Assistant Secretary for Preparedness and Response (ASPR) is working to identify vulnerable Flint residents who may not be able to travel to obtain filters and water testing kits. They are also working with the Centers for Medicare and Medicaid Services (CMS) to provide critical information needed for city responders to locate vulnerable residents and to help focus the city's outreach efforts.

  - HHS-funded health care centers in the area are offering free lead testing for their patients and are reaching out to patients to make them aware of the free testing. Exposed children will receive ongoing monitoring while they are health center patients. Health centers also are providing bottled water at their facilities and are assisting patients in obtaining bottled water or water filters in coordination with county-wide efforts.

  - HHS is helping educate residents who use HHS programs and services, such as Head Start programs and programs that serve seniors. In addition, HHS-funded local agencies on aging and community partners are reaching out to seniors and grandparents raising grandchildren to help them find water and filter distribution sites and to provide homebound residents with assistance in obtaining and installing filters.

  - The Centers for Disease Control and Prevention (CDC) is currently providing technical assistance to the Michigan state health department to assess lead exposure especially in homes with children. CDC also has provided recommendations on educational interventions for children affected by lead.

- U.S. Environmental Protection Agency

  - In mid-October, the EPA established a Flint Safe Drinking Water Task Force comprised of EPA scientists who are internationally recognized experts in the field of lead in drinking water. The EPA Task Force is providing technical assistance to the Michigan Department of Environmental Quality and the City of Flint to implement corrosion control treatment and to develop school and residential sampling protocols.

- EPA is also conducting an audit of the Michigan Department of Environmental Quality (MDEQ) drinking water program – to examine MDEQ's implementation of the Safe Drinking Water Act and related rules on lead and copper, total coliform, nitrates and ground water. This comprehensive audit will provide Flint residents and the people of Michigan with more information about MDEQ oversight of public water supplies and will identify actions that may be needed to strengthen the Michigan drinking water program.

- Housing & Urban Development

  - Flint was identified as one of six target cities in the second round of the Strong Cities – Strong Communities (SC2) White House initiative in 2014. This program focuses on enhanced Federal agency support in areas of blight reduction, public safety and economic development.

  - Discussions are ongoing between the FEMA Region 5 SC2 program lead and Department of Housing and Urban Development (HUD) staff on the Flint water crisis impacts to SC2 programs and initiatives; as well as possible opportunities for collaboration through existing federal engagement with local, county and State agencies.

  - HUD is working closely with the city on economic development and interagency coordination. They have successfully assisted the city with the purchase and installation of water filters. HUD had an existing lead hazard grant to Flint, targeted to lead paint, $325,000 of which could be used for addressing the water lead contamination. Additionally, HUD has provided a data tracking and reporting system for the State of Michigan to use in its lead investigations.

- U.S. Army Corps of Engineers

  - The FEMA Region 5 Recovery Coordinator is in discussion with the United States Army Corps of Engineers to identify possible technical assistance and/or Subject Matter Experts on public water distribution systems, and possible courses of action.

- US Department of Agriculture

  - USDA has waived requirements on potable tap water availability at school meal service, allowing schools to provide bottled water. The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) is also allowing participants to use WIC vouchers for ready-to-feed infant formula, which does not need to be mixed with water, and participants can also swap powdered formula for ready-to-feed formula.

Subject:	UCG Flint External Affairs Daily Messaging Plan 2-7-16
Attachments:	Daily Msg Plan for Flint Water Response_2-7-2016.doc; Daily Msg Plan for Flint Water Response_2-7-2016.pdf

Good Morning. Your Daily UCG Flint External Affairs Messaging Plan is attached and below:

FLINT WATER RESPONSE DAILY STRATEGIC MESSAGING
Feb. 7, 2016

- We are concerned about levels of lead found in the Flint, Michigan water supply and its impact on the health and safety of the community.
- The CDC recommends that all children under 6 years of age have a blood lead test before April 1, 2016.
- Have your water tested as soon as possible using the official, free water testing kit or testing by EPA.
- Until the system has recovered, EPA recommends that Flint residents clean aerators once a week.
- Be sure to use filters according to the instructions and replace filters before they expire.
- The safest option for vulnerable populations including pregnant and nursing mothers, and children under six years old, is to use bottled water.
- Over the past few weeks the federal government has ramped up support for the people of Flint, bringing in technical experts from the Federal Family.
- We're looking across the federal government at ways we can use our programs and our expertise to help the city and the state ensure immediate access to safe water and a safe water supply.
- Residents may contact the newly established EPA hotline **(800-426-4791)** or email address **(flintwater@epa.gov)** for information about EPA's water sampling efforts. The hotline will provide immediate, telephonic translation in multiple languages.

Products for Release

- *News Releases*
  - **None**
- *Fact Sheet*
  - **EPA** Advice to Residents for Water. Printed 2500 copies and upload to website updated

Operational Communication Events

- *News Interviews*
  - **None**
- *News Conferences*
  - **None**

Stakeholder Calls/Briefings/Meetings/Trainings

- **(As an FYI) Community Meeting:** Flint's Mayor Karen Weaver with (Candidate). @ 1:30 p.m. House of Prayer Missionary Baptist Church on 1851 W. Carpenter Road. Doors will open at 9:30 a.m. streaming live on www.NBC25News.com.

Speakers Bureau (Community) Outreach Events

- **None**

LOOKING AHEAD

UPCOMING EVENTS/ACTIVITIES

- **Blood Lead Testing Event**: Mon, Feb 8 @ 3pm – 6pm, Carriage Town Ministries
- **N. Flint Food Cooperative Community Meeting:** Mon, Feb 8, 6 pm 5005 Cloverlawn Drive
- ****Tentative VIP visit by USDA** Undersecretary and Regional Admin. Wed, Feb 10**
- **Flint Water Response Community Training:** Feb 11 @ 11:30 pm 1610 W. Pierson Rd
- **ARC Community Partners Meeting:** Feb 11 @ 3 p.m.
- **HHS Secretary Visit:** Tentatively Feb 18

PLANNED MESSAGING/PRODUCTS

- **CDC:** Lead Poisoning in Pets Messaging
- **EPA** is updating its fact sheet currently on the Web to include the new toll-free number and email address.
- **EPA** is working to create door-knob leave behinds that say "we stopped by and if you want to schedule a water sample visit, please call."
- **EPA** is making business cards with relevant EPA, state, county and CDC contact info for residents.

EMERGING ISSUES THAT MAY AFFECT MESSAGING

- EPA strike team testing of UM-Flint Dorm (AmeriCorps members)
- Possible need to develop Campaign/PSA to **get the remaining kids tested.**
- A need to **re-engage** the provider community to start lead testing (Pediatricians, Family Medicine, NPs, PA, WIC, Head Start and Early Head Start/Churches).
- EPA said water filters installed in homes may be working better than expected, however residents are saying they are still finding high lead levels in their water.

OPERATIONAL TASKS FOR MESSAGING OPPORTUNITIES:

- AmeriCorps Volunteer activities
- Resource List for External Audiences
- CDBG grants
- Possible creation of a Multi-Agency Resource Center (MARC)
- Water filters in HUD property
- Other programs to address nutritional needs of children
- WIC funding to possibly coordinate blood tests for children

EM-3375-MI
Media Monitoring Report
February 6, 2016

Summary: Flint water crisis news includes a report from NPR comparing a city in Louisiana that has had contaminated water from dilapidated pipes for years. Donations of water continue to arrive from other states to Flint. As Hillary Clinton's visit to Flint draws near, she sent out a tweet regarding the demographics of the city, which drew ridicule on Twitter.

Below is a sampling of the coverage.

Flint water crisis spurs hearings by Michigan Civil Rights Commission
February 05, 2016 at 10:34 a.m.
http://www.mlive.com/news/flint/index.ssf/2016/02/michigan_civil_rights_commissi_1.html

Lansing, MI – The Michigan Civil Rights Commission will conduct at least three hearings regarding discrimination allegations involving Flint's water crisis.

Commission officials said they were still working on details but said the first hearing will be held in Flint before the end of the month.
Water bottles piled up on Wednesday, Feb. 3, 2016 at Flint Fire Station #6 on West Pierson Rd, a Water Resource Center, in Flint. The Michigan National Guardsmen continue to hand out bottled water and filters for the ongoing Flint water crisis. Rachel Woolf | MLive.com*Rachel Woolf | MLive.com*

Commission Co-Chair Arthur Horwitz said in a recent media release that the commission is obligated to look into the matter.

"What is happening in Flint will have far-reaching consequences for the people who live and work there, many of whom are protected by state and national civil rights laws," said Arthur Horwitz, co-chair of the MCRC, in a media release. "We have an obligation under our constitutional mandate to investigate allegations of discrimination, including disparate treatment based on race, color, national origin or any other protected status."

Since the Flint water crisis went national, leaders of various organizations including the NAACP and Congressional Black Caucus have claimed racism as one of the reasons behind the crisis many of them pointing fingers directly at Gov. Rick Snyder and his administration.

"Fifty-seven percent of Flint is African American," said Virgie Rollins, chair of the Democratic National Committee Black Caucus in a January press conference. This governor's administration has poisoned thousands of those residents."

Gov. Rick Snyder's press secretary Dave Murray said the governor is working on a solution for Flint residents.

"Gov. Snyder has said we will cooperate fully with any authorities looking at what happened in Flint with the water. It's important to look at missteps at all three levels of government – local, state and federal – so such a crisis doesn't occur again'" Murray said.

Flint has been plagued with ongoing water issues since the city switched from Detroit to the Flint River for its water supply in April 2014. Residents have endured a number of boil advisory alerts, skin issues and in September of 2015 doctors at Hurley Medical Center revealed that children in the Flint area had elevated lead levels since the switch.

That news caused a series of health emergencies and the urgency to provide safe drinking water to residents.

Rasha Demashkieh recognized contributions that people have made to help Flint residents.

"People all over the country and indeed the world are concerned about the people of Flint, and many are working tirelessly to solve this crisis," said Demashkieh, who also serves as co-chair for the commission. "Everyone – those who are directly impacted as well all who are trying to help – deserve our best effort to find out if discrimination played any role."

The commission investigates discrimination claims against people because of religion, race, color or national origin under various acts including Michigan's Elliot-Larsen Civil Rights Act.

Their Jan. 25 vote supported a resolution saying they would "convene a series of at least three (3) public hearings to accept and/or compel testimony to address the question of whether the civil rights of Flint residents have been violated or abridged as a result of actions resulting in the provision of unsafe water to Flint residents through the public water system."

.....

Tri-states gathering bottled water for Flint, Michigan with 'Just Add Water' drive
02/05/2016 *Shirley Descorbeth, Multimedia Journalist*

http://www.kwwl.com/story/31153934/2016/02/05/tri-states-gathering-bottled-water-for-flint-michigan-with-just-add-water-drive
DUBUQUE (KWWL)

People living in Flint, Michigan can't drink their tap water -- and Dubuquers are doing something about it.

"We've been working a lot and talking to the social workers and organizations based in Flint. Getting some information as to what their needs are," said Resources Unite executive director, Josh Jasper.

During the month of February, the non-profit organization, Resources Unite is collecting bottled water for the city of Flint.

Their water supply was switched from Lake Huron to the Flint River. After complaints, it was switched back, but the damage was done. The water damaged the pipes, and lead now seeps into the water supply.

"The level of lead in my water was higher than hazardous waste levels," said a resident of Flint at Wednesday's Congressional hearing.

Organizers of the "Just Add Water" drive -- are hoping to send 1,000 cases of water to Flint in semis, but also volunteer by installing water filters in homes.

At the Lowe's in Dubuque, people can actually buy a pallet of water -- that's 60 cases for the effort. It'll be stored, until the group heads to Flint.

"The other reality is...not everyone can donate a pallet of water...so what we want to do, we're just simply asking everyone in the community, every single person in the Tri-state area to donate one case of water...just one case," added Jasper.

In addition to water, hygiene products are also being collected. We're told mothers in Flint, are in need of diapers, wipes and formula.

A number of people from the Tri-state area getting involved with this effort, like local businesses and schools. Some of them include the University of Dubuque, also the Western Dubuque Community School District.

Resources Unite is looking for volunteers to actually go to Flint in a bus to volunteer the weekend of March 5th.

http://www.freep.com/story/news/local/michigan/2016/02/06/flint-food-establishments-water-inspections/79920914/

Flint food establishments urged to get water inspections

02/06/2016 *Associated Press*
FLINT — Officials are encouraging food establishments in Flint to take advantage of free water safety inspections being offered amid the city's crisis with lead-tainted water.

Michigan Lt. Gov. Brian Calley joined other officials on Friday to show how the Michigan Department of Agriculture and Rural Development and the Genesee County Health Department are working with restaurants, bars, food markets and food processors to ensure safety.

DETROIT FREE PRESS
Snyder's Flint task force is battling state departments

Officials say food establishments must take extra precautions, including having water tested by an accredited laboratory to prove it is safe to use; installing approved water filters as needed; flushing unfiltered faucets; or using commercially bottled water.
The state is paying for water testing and sending out inspectors. Officials say health inspectors are focusing on priority facilities such as those that provide childcare.

.....

http://www.npr.org/2016/02/06/465702398/beyond-flint-in-the-south-another-water-crisis-has-been-unfolding-for-years

Beyond Flint: In The South, Another Water Crisis Has Been Unfolding For Years
It's not simply Flint that has bad water. The Michigan city, which has grabbed headlines recently for its rampant water contamination, is joined in that dubious distinction by another town, much farther south: St. Joseph, La.

"It's just a given fact that at some point during the week, you're going to have brown or yellow water," says resident Garrett Boyte.

Boyte says there have been problems with the water there for a decade, but it's only in the past few weeks that St. Joseph has gotten any media attention.

"What's happening here in St. Joseph got the attention it's gotten because Flint has made water a public issue," he says. "And what I try to tell people is, this isn't just happening in St. Joseph or in Flint. It's happening in Louisiana, it's happening in Kentucky and Tennessee and Mississippi and in areas of poor and disenfranchised communities across the country."

The cause of the dark water in St. Joseph seems to be a broken pipe in the community's aging system. While local officials have said it's not dangerous, the break in the pipe could be a warning.

"Most of their issues seem to be around pipes that are 90 years old and are constantly being repaired," says Jimmy Guidry, Louisiana's state health officer.

He tells NPR's Scott Simon that work has been done to plan a replacement for the broken pipe, but that such fixes can be costly — especially in such a small community.

"Like most small water systems, when you don't have many customers, it's very expensive and it's not affordable," Guidry says. "But they have to do so because right now there's risk of worse things than color."

And the aging water system has been an issue not just in St. Joseph, according to Guidry, but in other communities throughout Louisiana and other states, as well. He says it's "cost-prohibitive" for small communities to address the mandates from the Environmental Protection Agency on water standards.

"If you have enough customers, you tend to replace infrastructure over time, because you have a funding source. But when you don't have a funding source, you're looking for a low-interest loan if you can afford it or you're looking for a grant, which there aren't many of those around," Guidry says. "It's very difficult for them to meet the standards that are required and then give them the quality of water that they want."

When you look at it, it looks like sludge. It doesn't look like something you want to put in your body.

As the pipes have degraded over time, that difficulty has only escalated.

"It could take years," he says. "It's the kind of thing, which if you don't maintain it along the way, you're going to have to take care of it when it gets in trouble, and now it's in serious trouble. And it's going to be very costly to take care of those issues."

For the time being, though, Guidry says he agrees with St. Joseph residents: He wouldn't drink the water, either. Though it's not so much from safety concerns as an even simpler reason: It looks disgusting.

"It's not that I don't think it's safe from the standpoint that we measure the bacteria, we measure all the chemicals that make it safe. But when you look at it, it looks like sludge," he says. "It doesn't look like something you want to put in your body."

http://www.huffingtonpost.com/jerome-schultz/the-longterm-emotional-co_b_9120724.html
The Long-Term Emotional Consequences of Toxic H2O in Flint, Michigan

02/05/2016 Jerome Schultz (blog)
I am deeply worried about the myriad and horrific consequences of the poisoning of the water supply in Flint, Michigan. These could lead to serious disabling conditions in young children, ranging from intellectual impairment to anemia, slowed growth, hyperactivity, inattention, and moderate to severe learning disabilities. I am particularly concerned about the emotional impact that this man-made environmental tragedy will have on the affected children and their families over time.

Many parents of children with learning disabilities are eager to know why their child has LD, and many worry that they might have done something that caused it. Others beat themselves up, feeling they should have done something that would have prevented it. The resulting shame, self-blame and embarrassment that is often seen in parents can affect the quality of relationships between the parent and child and between spouses, or even grandparents.

The egregiously neglectful and probably criminal actions that took place in Flint will most certainly add a level of **anger** to that mix; an appropriate emotional reaction, but one that will exacerbate intra-familial and intrapsychic tensions and stress in a way that will make the future for these kids and families even less optimistic.

The inestimable costs (financial, emotional and time)associated with this unconscionable action will mount and grow over time. And in a few years, when the kids ask: "*Mom, Dad...why do I feel so dumb all the time?*" telling them that the government poisoned their drinking water will bring no comfort at all. For all but the most forgiving of families and individuals, the anger will persist and unfortunately become a factor that will affect the trajectory of these kids and their families for years to come.

It goes without saying that support for appropriate educational intervention for these victims becomes a moral obligation for the civic leaders of Flint. However, we must not ignore the long-term collateral effects of this thoughtless and disastrous re-routing of a water supply through a network of toxic conduits. We need to be thinking of ways to support these families and children emotionally as they navigate the (forgive me) murky waters that lie ahead.

For more information and advice, please contact The Learning Disabilities Association of America, which has pledged its support in this important matter.

All-

We are trying hard to get a handle on this situation. I am growing concerned that the State's liability is growing without a central decision-maker or someone who is responsible for the funds signing off.

Can someone please tell us who is in charge of these decisions? We have been provided an OIP index, so I am expecting to have Chris Christensen sign these rental agreements.

There are now two locations where you are delivering water:

1) Court Street
2) Clio Road

Do you need BOTH locations? Will you continue to have deliveries going to both locations? At this point, the state will have to enter into two rental agreements for both.

Good morning ,

Sorry for the delay responding. There was a glitch at the beginning but we unloaded 18 trucks. Finished about 8pm. I understand the project may move to a different location.
Anything we can do to assist let me know.

Thank you,
Bob

Subject: Semi Trucks

Mr. Scherman,
There were 4 Semi trucks unloaded at the 1st facility. The School Superintendent asked them not to unload any more. We went to the Department of Education, they do not have legal jurisdiction over School Superintendents. Mark, Michigan State Police, is trying to go to the alternate ware house to see if you can take the other trucks today.

Sent: Thursday, February 11, 2016 1:55 PM
Subject: F&NC Store List
Attachments: Copy of Copy of Copy of Kent County Food Retail Facilities- hidden view (246112).xls

Good afternoon,

As a follow up to our F&NC meeting yesterday, attached is the list of food retailers in Kent County.

We are looking to find food retailers that provide fresh fruits and vegetables to GIS map.
The stores highlighted in yellow/beige are the ones we know meet this criteria. The stores in blue are ones that we are unsure of.

We are looking for help from committee members to look into any of the stores highlighted in blue to confirm or deny if they provide fresh fruits and vegetables. In addition, please let us know if there are any stores that are NOT highlighted but do sell fresh fruits and vegetables.
Please email Tracie by Wednesday, February 17th with any additions/comments pertaining to the store list.

Thanks!

Today Mr. Duty called again.....

Does not have a water filter and has been trying to get someone to come to his home to deliver one and help him attach it. He also has not been able to get his blood tested. His address is 2110 Stevenson St. Flint, MI 48504. He says he has called multiple times and no one has been to his house yet.

Subject: Flint resident- needs help/ water resources

Hi team,

Can we send someone out to home to test his water- check out the water coming out of his faucet?

Thank you,

Laura Stoken

Chris,

Can you please facilitate this request? Unified Coordination Group Liaison Don Boyce, Director of Emergency Management for US Department of Health and Human Services, would like to have an informal meet with Genesee County Emergency Management and Health Departments. He is hoping to possibly meet at your office or EOC tomorrow. I suggested meeting with Captain Tafoya, April Swartou, and you. Is there a time and location that will work for you tomorrow?

I Cced all parties.

Subject: FW: KROGER STORE SHELVING

Jeanette,
I am forwarding the e-mail received from the Landlord at the Kroger site. I believe we set up a chain of command for the Landlords for each space leased for the water project.
Mr. Sadek was told to only take "orders" or requests from the State Police person who is usually located and present at each site. If you wish to change the person in charge who can make decisions and notify the Landlord of each request, just let me know who and what their position is. Please inform all the site managers at the Kroger site that they have to request changes through that person. Unless the Landlord is informed by the designated person "in charge", the Landlord will not make any changes.
Please request a Construction Change Order (CCO) through channels if you would like anything changed, or want to use and replace camera equipment.
In making these requests it is my hope we can all get the equipment and cooperation we want from each Landlord, without having them frustrated to the point they want to stop.

Attachments: IMG_3566.jpg; IMG_3565.jpg; IMG_3564.jpg

Maureen –

Attached are pictures of what Ramsay provided on the mezzanine to keep individuals away. We will convey to all individuals working in the warehouse to stay out of the area.

I spoke to MSP personnel at the SEOC and all contact regarding the space needs to be routed through MSP. The Seventh Day Adventist will be taking over running of the space from MDOC, but have been told they need to contact MSP and not Ramsay.

MDOC is working with SDA as they transition duties over. Once the transition is complete, Debra will have key to the warehouse and can be reached at 612 229-1676.

Thank Ramsay for his patience with us!

Subject: RESTRICTED ACCESS AREAS: KROGER STORE

Hi Maureen:
Mark Russo contacted Justin today regarding a potential hazard which he felt should be brought to our attention. On the upper mezzanine in the receiving area of the store (near the truck dock) is a large compressor room which is accessed by a stairway. The compressor room contains about 30 large reciprocating refrigeration machines which operate on high voltages. They provide the cooling for all of the cases and freezers in the store. Apparently someone went up stairs, undid the wire which tied the door closed to the adjacent door handle and went inside. In that room is a "hole" that is used to hoist the compressors in the event they need to be replaced. They each weigh more than 1000#. Someone nearly fell through that hole to the first floor.

This concerns me. First, this area is absolutely off limits. No one should ever go in there for any reason other than an emergency. There is a tremendous amount of power in there and freon, moving parts, fans, etc. and the

hoist-way to the first floor. It is dangerous. That is why it was secured (sort of!) but we did not anticipate anyone entering that room. What I am going to do is have maintenance put a chain across the stairway leading up to that area with a "Keep Out" sign on it. I am also going to do the same thing with the Building Automation system room to protect our automation controller. I understand that a group of volunteers will be running the distribution however it would be good if I can obtain the name and phone number of whomever is in charge and who is a key-holder in the event of after-hours emergencies. If you have any suggestions on my thoughts please advise. Thanks.

Ramsay

someone else wants this changed again. In addition to this, the new coordinator wants to know if they can use the closed circuit video camera system. I have no problem with the cameras however they would need to provide the head-end equipment as that was removed. I think we need to have these volunteers understand we fulfilled the directives of the MSP and others to remove and relocate the shelving. I can't keep calling people back for new ideas. If they want to pay for it I have no issues, but the costs are becoming excessive. Any thoughts on how we can curtail these volunteers would be appreciated .

Jeanette! It's been approved by the Governor's office. Can you work first thing with the Maureen to secure the lease? We will want month-to-month, full access to the entire building, as well as the parking lot. Also, Ramsey mentioned we could have use of the forklifts and pallet jacks. Another thing, we will need 99% of the shelving removed. I think the coolers can stay, but probably not the freezers.

Thanks so much Jeanette! This is so exciting!!!

Chad, if you could please proceed with getting the Adventists to staff it?

Just an FYI for everyone else.

All-

We are trying hard to get a handle on this situation. I am growing concerned that the State's liability is growing without a central decision-maker or someone who is responsible for the funds signing off.

Can someone please tell us who is in charge of these decisions? We have been provided an OIP index, so I am expecting to have Chris Christensen sign these rental agreements.

There are now two locations where you are delivering water:

1) Court Street
2) Clio Road

Do you need BOTH locations? Will you continue to have deliveries going to both locations? At this point, the state will have to enter into two rental agreements for both.

Mr. Scherman,
There were 4 Semi trucks unloaded at the 1st facility. The School Superintendent asked them not to unload any more. We went to the Department of Education, they do not have legal jurisdiction over School Superintendents. Mark, Michigan State Police, is trying to go to the alternate ware house to see if you can take the other trucks today.

Bob –

We are going to work on getting the product out of the Court Street warehouse over the next few days. The Clio warehouse is where all deliveries are going. Trucks arrived this morning to begin filling the space.

All-

We are trying hard to get a handle on this situation. I am growing concerned that the State's liability is growing without a central decision-maker or someone who is responsible for the funds signing off.

Can someone please tell us who is in charge of these decisions? We have been provided an OIP index, so I am expecting to have Chris Christensen sign these rental agreements.

There are now two locations where you are delivering water:

1) Court Street
2) Clio Road

Do you need BOTH locations? Will you continue to have deliveries going to both locations? At this point, the state will have to enter into two rental agreements for both.

Good morning ,

Sorry for the delay responding. There was a glitch at the beginning but we unloaded 18 trucks. Finished about 8pm. I understand the project may move to a different location.
Anything we can do to assist let me know.

Thank you,
Bob

Mr. Scherman,
There were 4 Semi trucks unloaded at the 1st facility. The School Superintendent asked them not to unload any more. We went to the Department of Education, they do not have legal jurisdiction over School Superintendents. Mark, Michigan State Police, is trying to go to the alternate ware house to see if you can take the other trucks today.

Kent County DMHHS Partners:
Attached are the notes from our January meeting. We heard first-hand stories from Chris Striebel, Leslie Montgomery-Bean, and Jessica Mitchell on disaster deployment and long term recovery considerations. There is no way to adequately capture the stories Chris and Leslie shared, but I have done my best to summarize their points. Although Jessica could not attend, she wrote the DMHHS a report, which is at the end of the minutes.
Our next meeting is Tuesday, February 9th, 3:30 p.m. at KCHD, as usual. There will be cookies (probably pink in color) and coffee adequate to wash down the sweetness. Hope you can join us.

At 1035 on Sunday, February 14, 2016, Courtney Kohloff (MDEQ) slipped and fell in the driveway of the residence located at 905 Victoria Avenue, Flint, Michigan. When interviewed by Mark DuCharme, Genesee County EOC Deputy IC, Ms. Kohloff reported soreness and no apparent injury. Mr. DuCharme ensured Ms. Kohloff documented the accident on ICS Form 214, and notified her regular duty supervisor to ensure appropriate agency specific accident forms are completed. Ms. Kohloff completed her shift assignment to MDEQ Sentinel Monitoring Program Task Force 10 without restriction.

Please contact me if you have further questions.

This moringna at 10:00 am I had contact at residence
Accompanied by Elevated Lead and Copper Initial Assessment Task Force #11 with UA 370 P@P Dale Collins, MDEQ Environmental Advisor Pisha Williams and MDHHS Health Advisor Carly Adams.

Dale Collins inspected his kitchen faucet and water meter. He advised has galvanized plumbing. He also stated there is black debris in the hose from the sink faucet.

provided the faucet head to Pisha Williams MDEQ, who placed it in a plastic bag and took possession of it. She advised she would have the head tested. Also taken from the residence was a water sample.

UA 370 Collins advised they would schedule a visit next week to install a new faucet.

also added he believes the water pump station located a few residence from his house is tainted with debris from the Flint river. He believes when the water was supplied from the Flint river it corroded the screen/filter at the local pumping station causing it to provide black tainted water. The pumping station is located at Chevrolet and Stevenson.

Brian,

The water sample was not collected using the proper protocols for residential home sampling. Because of that we do not want it to be part of the overall database. If it is not useful to EPA then please just dump the sample and recycle the bottle. Thanks.

Scott/Mark Ducharme,

The faucet looks like a normal faucet; no black debris or slime. Based on pervious discussions with the Test America there is not enough material to test.

Also, the water sample dropped off with the faucet is the grab type that needs to go to the state lab. Do you want us to bring it to the county EOC or drop it off at a fire station?

2ND Draft Objectives

Operational Period #6 (Thurs Feb 4 0800 to Sat Feb 6 0800)

Commander's Intent: Coordinate and support local and State government to provide Federal support to meet the needs of the Flint Community during the Water Crisis.

Objectives for Operational Period #6

1a. Conduct emergency water testing to a) determine chlorine and bacterial levels in the water supply; and b) study efficacy of water filters. (WQTF) **DEQ**

2 Coordinate with local and State partners to evaluate and if needed, respond to higher levels of concern for lead and other contaminants. (WQTF) **DEQ/DHHS**

3 Develop and implement environmental sampling plans to a) evaluate water quality concerns; b) conduct regulatory sampling in accordance with the LCR/SDWA; c) conduct sequential sampling to better understand lead leachability in the water distribution system; and d) establish a pipe-rig to assess water quality for transition to the KWA source waters. (WQTF) **DEQ**

4 Ensure compliance with EPA enforcement orders pursuant to this incident. (WQTF) **DEQ**

5a Coordinate the develop of targeted public health messaging and communication products for lead exposure in collaboration with the Genesee County Health Department, the Michigan Department of Health and Human Services and US Environmental Protection Agency. (PEATF) **DHHS/JIC**

6 Develop and publish CDC recommendation advising lead testing for all children under 6 years of age and pregnant women with risk factors in collaboration with state and local health officials. (HMTF) **DHHS**

7a Provide lead education and a community engagement strategy to the Genesee County Health Department. (HMTF) **DHHS/JIC (risk communications)**

7b Provide nurse case work management to Genesee County Health Department. (HMTF) **DHHS**

7c Provide call center technical assistance to Genesee County Health Department. (HMTF) **DHHS**

7d Develop a data collection strategy for Genesee County Health Department. (HMTF) **DHHS/DEQ/MDARD**

10 Assess progress toward improving micro-nutrient effort for the school system. (NETF) **DHHS/MDE/MDARD**

11 Assess progress towards enhancing healthy food availability for the community. (NETF) **MDARD/DHHS/TED/MDE**

12 Coordinate the intergovernmental, public and external affairs effort to ensure awareness and visibility of communications activities regarding Flint water crisis with State and Federal partners. (PEATF) **JIC**

13 Investigate what Administration for Children and Families (ACF) programs are available to meet the State requests for meeting children's needs. (HSTF) **DHHS/MDE**

14 Investigate what Administration for Children and Families (ACF) programs are available to meet the State requests for meeting pregnant and breast feeding women's needs. (HSTF) **DHHS**

15 Assess eligibility of Community Development Block Grant (CDBG) funds to meet the State's request for transportation support. (HSTF) **MEDC/MDOT**

16 Assess approach to public messaging and outreach with State and Federal partners. (PEATF) **JIC**

FHCO Command and General Staff Agenda

USER'S GUIDE

For optimal performance, please carefully read all instructions before attaching and using your Brita® Faucet Filtration System.

Hello and welcome!

Thank you for choosing Brita®, the world's No. 1 brand of household water filtration. Brita's certified water filtration systems turn ordinary water into healthier, great-tasting drinking water. Just follow the easy instructions in this booklet to quickly install your Brita® Faucet Filtration System (no additional tools needed!). To find out more about Brita, check out our website at www.brita.com.

Limited One-Year Warranty

Brita LP (Warrantor) warrants your Brita® Faucet Filtration System (FF-100) for one year from the date of purchase (except for the filter cartridge, which is warranted for 30 days) against all defects in materials and workmanship, when used in compliance with the user's guide. If for any reason the product proves to be defective within one year from the date of purchase, call Brita Consumer Services at 1-800-24-BRITA (U.S.) or 1-800-387-6940 (Canada), or ship the unit to the address below and the unit will be repaired or replaced without charge. Please package your unit carefully to avoid damage in transit.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

The Warrantor assumes no responsibility for incidental or consequential damages; for damages arising out of misuse of the product or the use of any unauthorized attachment; or for damages resulting from the use of the product with a defective water faucet. *Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.*

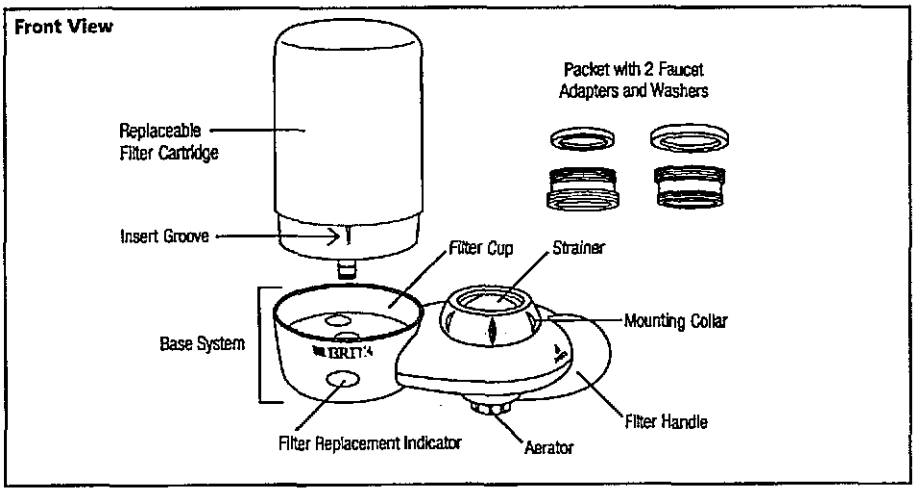
Should service be required during or after the warranty period, or should you have any questions regarding how to use your Brita product, please call Brita Consumer Services at 1-800-24-BRITA (U.S.) or 1-800-387-6940 (Canada) Monday through Friday between 9:00 a.m. and 5:30 p.m., Eastern Standard Time.

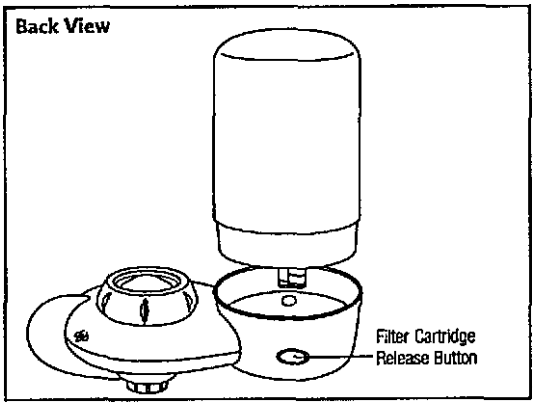
In U.S.: Brita
1221 Broadway
Oakland, CA, U.S.A.
94612-1888

In Canada: Brita
150 Biscayne Crescent
Brampton, ON, Canada
L6W 4V3

You may reach Brita Consumer Services at 1-800-24-BRITA (U.S.) or 1-800-387-6940 (Canada).

COMPONENTS AND FEATURES





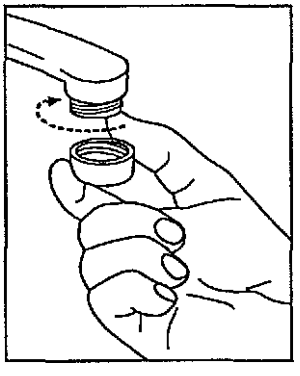
If any parts are missing, or to locate retailers, please call BRITA Consumer Services at 1-800-24-BRITA (U.S.) or 1-800-387-6940 (Canada).

NOTE: *This product contains a nonreplaceable, sealed battery. The batteries and electronics are sealed in a waterproof compartment inside your Brita® Faucet Filtration System and do not come into contact with water. The Filter Replacement Indicator is designed to last for the life of your Brita® Faucet Filtration System (about 5 years, depending on usage).*

INSTALLATION IN FIVE EASY STEPS

STEP 1: Remove aerator from faucet.

Unscrew (clockwise) the aerator and remove any original rubber washers from your faucet. If difficult to remove, use a dry towel to grip the aerator. Clean off any scale or rust buildup.



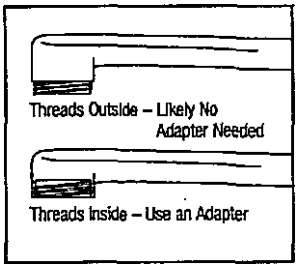
STEP 2: Determine if you need to use an adapter.

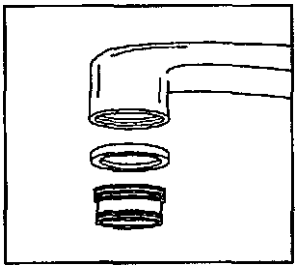
If your faucet has threads on the outside:
You most likely will not need to use an adapter. Attempt to attach the system directly to your faucet. If it does not fit, call Brita Consumer Services at 1-800-24-BRITA (U.S.) or 1-800-387-6940 (Canada). **Proceed to Step 3.**

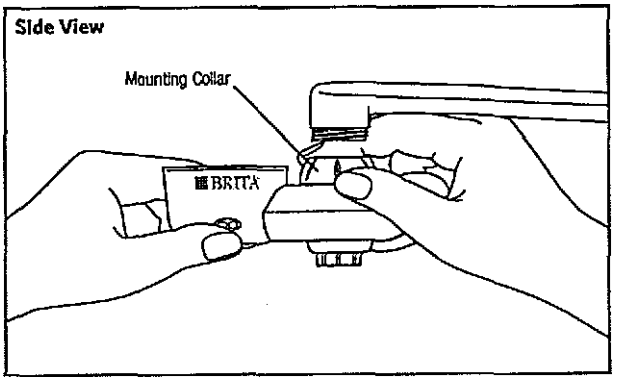
If your faucet has threads on the inside:
You will need to use one of the adapters and corresponding washers provided. Select the proper adapter and washer that fit onto your faucet. If neither adapter fits, please call Brita Consumer Services at 1-800-24-BRITA (U.S.) or 1-800-387-6940 (Canada).

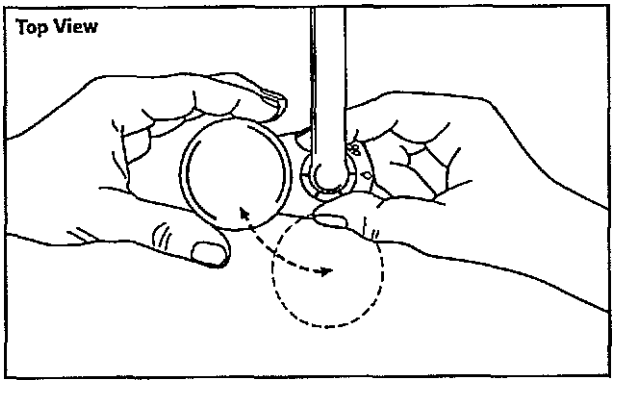
Place the washer into the recessed end of the adapter. Twist the adapter *(counterclockwise) onto your faucet and tighten by hand* until snug. If difficult to tighten, insert a coin into the notch in the bottom of the adapter and twist until snug. Caution: Using pliers to tighten the adapter may damage the threading.

NOTE: *The Brita® Faucet Filtration System cannot be attached to faucets with a built-in spray feature at the end of the faucet.*









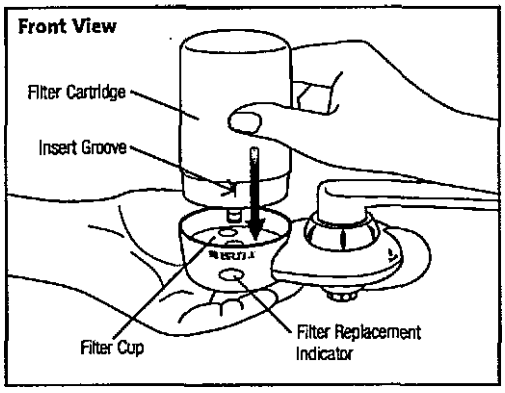
STEP 3: Attach the base system to your faucet.

Position the base system so that the filter cup is on the left side of your faucet and the Filter Replacement Indicator is facing you. Twist the mounting collar onto the faucet and tighten by hand until snug. Do not tighten with pliers. Do not over-tighten.

If you are having difficulty, rotate the base system backward and forward while further tightening the mounting collar.

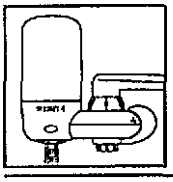
STEP 4: Insert filter cartridge into filter cup.

Support the bottom of the filter system with one hand. Align the insert groove on the lower part of the cartridge with the Filter Replacement Indicator at the front of the filter cup. Insert the filter cartridge into the filter cup until a "click" is heard. Do not force the filter cartridge into the system base. Inserting the new filter cartridge automatically resets and activates the electronic Filter Replacement Indicator. A green signal will flash, indicating that the filter is engaged.



STEP 5: Flush the new filter cartridge with water.

Move the filter handle toward you to the filtered Brita® water setting: BRITA



Turn on the faucet to flush the new filter for 5 minutes to remove any carbon dust and activate the filter. It is normal for carbon dust to appear. The 100 gallon/ 378 liter filter life begins after the 5-minute conditioning period.

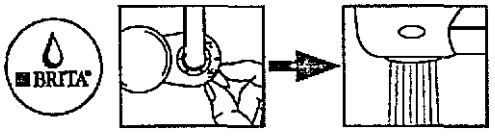
NOTE: *Use with cold water only. Do not run hot water (above 100°F/38°C) through the filter, as it may damage the filter.*

USE AND CARE OF FILTER

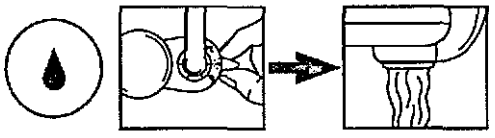
Your Brita® Faucet Filtration System is ready to use!

By adjusting the handle to the following positions, you can select the water you want:

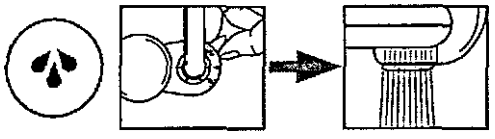
FILTERED WATER
Move handle to forward position to...
Only draw filtered water from filter port. All other water is unfiltered.



STREAM OF UNFILTERED WATER
Move handle to middle position to...



SPRAY OF UNFILTERED WATER
Move handle to rear position to...



Filter Replacement Indicator

Regular filter replacement is the key to ensuring healthier and great-tasting water. The Brita® Faucet Filtration System makes it easy for you to know when to change your filter.

The Filter Replacement Indicator monitors the filter life and tells you when to replace the filter cartridge, based on average water quality and filtered water usage by the average family of four.

The Filter Replacement Indicator will signal the need for replacement after approximately 100 gallons/378 liters or 4 months, whichever comes first.

Each time you begin filtering water, a light will illuminate to signal the filter status.

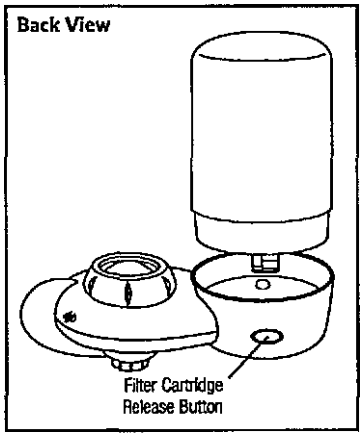
INDICATOR LIGHT	FILTER STATUS
Flashing Green	**Filter Working** When switched to the filtered Brita® water setting, the green light will flash to show your filter is working.
Flashing Amber	**Change Filter Soon** When switched to the filtered Brita® water setting, the amber light will flash when your filter has 2 weeks or approximately 20 gallons/75 liters of life left. Your filter is working, but it has entered the Replacement Warning Period signaling that the filter will need to be replaced soon.
Flashing Red	**Change Filter Now** When switched to the filtered Brita® water setting, the red light will flash to indicate that your filter cartridge has reached the end of its life and needs to be replaced now.

Replacing filter cartridge

Replacing the filter cartridge is easy. If the Filter Replacement Indicator flashes red when you switch to the filtered Brita® water setting, it is time to replace the filter cartridge. Prompt filter replacement assures you of healthier, great-tasting water.

To remove the old cartridge, turn water off, press the filter cartridge release button located at the back of the filter cup and pull cartridge up to remove it. To insert a new cartridge, follow the directions in Step 4.

Brita® Faucet Replacement Filters are available in white or chrome finish.



NOTE: *If the filter is removed for cleaning purposes (e.g., for rinsing or wiping off) while in green mode, please insert filter back into unit within 30 seconds to make sure the counter is not reset. However, once the Filter Replacement Indicator has begun to show a red light (indicating the Replacement Period), do not remove the cartridge unless you intend to replace it. Once the filter has entered the Replacement Warning Period, inserting a cartridge will automatically reset the Filter Replacement Indicator.*

NOTE: *Only the Brita® Faucet Replacement Filters will fit the Brita® Faucet Filtration System.*

Early filter replacement and manual reset of the Filter Replacement Indicator

Brita® Faucet Replacement Filters have an extra layer to help prevent premature clogging due to sediment buildup. However, it may still be possible that very high sediment in your tap water may cause your filter to prematurely clog with sediment. This may reduce the water flow from the system *and require an earlier filter change. If, for any reason, you need to replace your filter early* (before the red flashing signal from the indicator), remove the old cartridge (see directions on Replacing Filter Cartridge) and prepare to insert a new one (Step 4).

To manually reset the indicator for your new cartridge, wait at least 30 seconds after the old filter has been removed before inserting the new one. This allows the counter to reset properly.

For optimal use, care and safety

- The Brita® Faucet Filtration System is not intended to purify water. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected waters that may contain filterable cysts. Individuals requiring water of special microbiological purity should follow the advice of their doctor or local health officials regarding the use and consumption of their tap water *and Brita® water.*
- The system and installation must comply with state and local laws and regulations.
- Use with cold water only. Do not run hot water (above 100°F/38°C) through the filter, as it may damage the filter.
- *Do not push filter cartridge release button while filtering water.*
- Prior to each use, let water run through the filter for five seconds to activate the filter. If the filter has not been used for a few days, let the water run for 30 seconds before use.
- For optimal system performance and highest-quality filtered water, promptly replace the filter *cartridge when signaled by the Filter Replacement Indicator.*
- Clean the exterior of the Brita® Faucet Filtration System with a damp sponge or soft cloth. A mild dishwashing liquid may be used. Do not use abrasive cleaners or scouring pads to clean this product. DO NOT put any parts of this product in the dishwasher.
- *Only draw filtered water from filter port. All other water is unfiltered.*
- Do not use the Brita® Faucet Filtration System if incoming tap water exceeds 170°F/77°C. Very hot water will damage the system. (While most of the newer hot water heaters are preset to 120°F/49°C, temperatures vary from household to household. If you suspect your water temperature may be higher than 170°F/77°C, check the setting on your water heater.)

TROUBLESHOOTING

You are unable to attach the system to your faucet.	See Step 2 of Installation in Five Easy Steps to determine if you need to use an adapter. Check to see that you have correctly inserted the proper adapter and washer.
Adapters provided do not fit your faucet.	Call Brita Consumer Services at 1-800-24-BRITA (U.S.) or 1-800-387-6940 (Canada).
Water leaks or sprays from connection at faucet.	Check to see that you placed the washer between the faucet and the adapter. Check to see that the mounting collar is tight and the threading is aligned with the faucet or adapter threading. Only water from filter port is filtered. All other water is unfiltered.
Water leaks or sprays from the system itself.	Make sure the filter cartridge is locked into place. Water leaking or spraying from system may not be filtered. Only water from filter port is filtered. All other water is unfiltered.
Flow rate of filtered water slows.	Remove the system from the faucet and clean the sediment from the strainer in the mounting collar. If flow rate of filtered water remains slow, replace filter cartridge. Although Brita® Faucet Replacement Filters have an extra layer to reduce sediment buildup, very high sediment in your water may cause the system to prematurely clog before the typical end of filter life. The clogging means that your Brita® Faucet Replacement Filter is removing the sediment from your tap water. See directions for Early filter replacement and manual reset of the Filter Replacement Indicator on page 5.
Filter Replacement Indicator does not reset with new cartridge insertion.	Make sure the filter cartridge is locked into place. If you replaced the cartridge before the indicator light flashed red, you need to manually reset the Filter Replacement Indicator. See directions for Early filter replacement and manual reset of the filter replacement indicator on page 5.
Filter Replacement Indicator does not illuminate.	Call Brita Consumer Services at 1-800-24-BRITA (U.S.) or 1-800-387-6940 (Canada).

Performance testing conducted by NSF International. This system has been tested according to NSF/ANSI 42 and 53 for reduction of the substances listed. The concentration of each of the indicated substances in water entering the systems was reduced to a concentration less than or equal to the permissible limit for water leaving the system, as specified in NSF/ANSI 42 and 53.

System tested at 60 psig (414 kPa) using a minimum flow rate of 0.58 gpm (2.19 L/min).

Testing was performed under standard laboratory conditions. The contaminants or other substances removed or reduced by this water treatment system are not necessarily in all users' water. Filter performance may vary based on local water conditions.

The Brita® Faucet Filtration System is not intended to purify water. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected waters that may contain filterable cysts. Individuals requiring water of special microbiological purity should follow the advice of their doctor or local health officials regarding the use and consumption of their tap water and Brita water.

Brita® Faucet Filtration System Specifications Model FF-100 with Filter FR-200

Capacity:	Service Flow Rate:	Working Pressures (min./max.):	Filtered Water	*Electrical Requirements:*
100 gallons	0.58 gpm	20 psig/100 psig	Temperature (min./max.):	None
(378 liters)	(2.19 L/min)	(138 kPa/689 kPa)	34°F/100°F (1°C/38°C)	
		(1.4 kg/cm²/7.0 kg/cm²)		

Please refer elsewhere in this User's Guide for the proper installation, conditioning, use and care requirements and an explanation of how the filter replacement indicator functions. Maintenance according to the manufacturer's instructions is essential for proper filter performance. Filter life should not exceed 100 gallons. If a decrease in flow rate is noticed, replace the filter earlier. Replacement filters (model FR-200) are available in one-, two- and four-packs with an approximate retail price of US$15 per filter/CAN$18 per filter.

The Brita® Faucet Filtration System has been tested and certified by NSF International against NSF/ANSI Standards 42 and 53 for the reduction of the claims specified on the Performance Data Sheet.

The Brita® Faucet Filtration System has been tested and certified by the WQA against NSF/ANSI Standards 42 and 53 for the reduction of the claims specified on the Performance Data Sheet.

BRITA®

SYSTÈMES DE FILTRATION D'EAU

FRANÇAIS

GUIDE DE L'UTILISATEUR

Veuillez lire attentivement toutes les instructions avant de fixer et d'utiliser votre système de filtration d'eau sur robinet Brita® pour obtenir un rendement optimal.

Bienvenue!

Merci d'avoir choisi Brita®, la première marque de systèmes de filtration d'eau domestiques au monde. Les systèmes de filtration d'eau certifiés de Brita font de l'eau du robinet ordinaire une eau potable plus saine et qui a toujours bon goût. Il vous suffit de suivre les instructions toutes simples de ce livret pour installer rapidement votre système de filtration d'eau sur robinet Brita®. (Aucun outil supplémentaire n'est nécessaire!) Pour en savoir plus sur Brita, visitez notre site Web : www.brita.com.

Garantie limitée de un an

Brita LP (Garant) garantit le système de filtration d'eau sur robinet Brita® (FF-100) contre tout défaut de matériaux et de fabrication pendant une période de un an à partir de la date d'achat (sauf la cartouche-filtre qui est garantie pendant une période de 30 jours), à condition qu'il soit utilisé conformément aux instructions du guide de l'utilisateur. Si, pour quelque raison que ce soit, le produit s'avère défectueux dans l'année qui suit sa date d'achat, veuillez appeler le service à la clientèle de Brita, au 1 800 24-BRITA (É.-U.) ou au 1 800 387-6940 (Canada), ou expédiez le produit à l'adresse indiquée ci-dessous pour qu'il soit réparé ou remplacé sans frais. Veuillez emballer le produit avec soin afin d'éviter les dommages pendant le transport.

La présente garantie vous confère des droits légaux spécifiques, ainsi que d'autres droits qui peuvent varier selon les régions.

Le Garant n'assume aucune responsabilité quant aux dommages indirects ou accessoires ni quant aux dommages résultant d'une mauvaise utilisation du produit, de l'utilisation d'un accessoire non autorisé ou de l'utilisation du produit avec un robinet défectueux. Certains États ou territoires n'autorisent pas l'exclusion ou la limitation des dommages indirects ou accessoires, de sorte que l'exclusion ou la limitation ci-dessus peut ne pas s'appliquer dans votre cas.

Pour vous prévaloir du service après-vente pendant ou après la période de garantie, ou pour toute question sur l'utilisation de votre produit Brita, veuillez appeler le service à la clientèle de Brita, au 1 800 24-BRITA (É.-U.) ou au 1 800 387-6940 (Canada), du lundi au vendredi, entre 9 h et 17 h 30 (HNE).

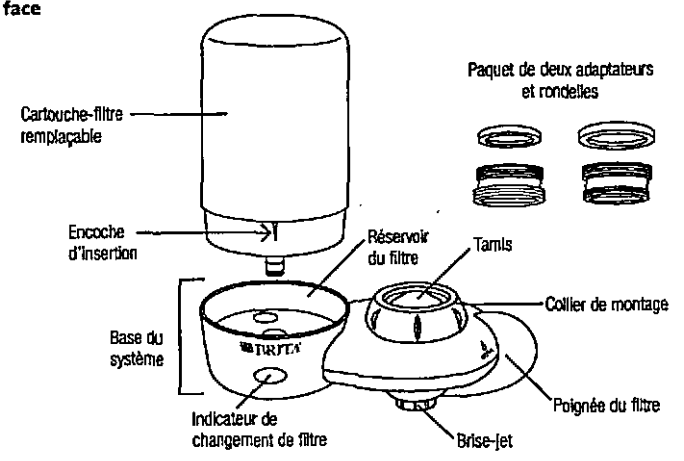
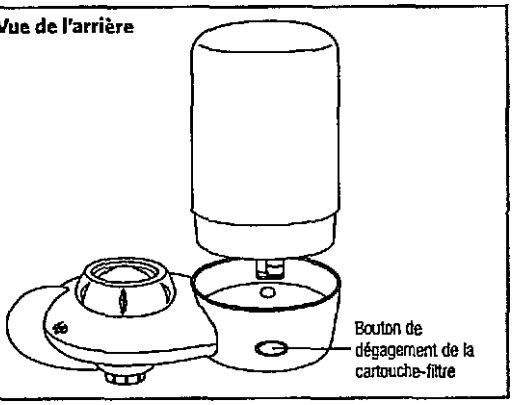
COMPOSANTS ET FONCTIONS

Vue de face



Vue de l'arrière



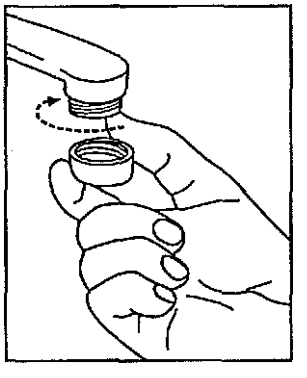
Si une pièce manque, ou pour connaître l'adresse d'un détaillant, veuillez appeler le service à la clientèle de BRITA au 1-800-24-BRITA (É.-U.) ou au 1-800-387-6940 (Canada).

NOTA : *Ce produit contient une batterie sans entretien qui n'est pas remplaçable. Les batteries et les parties électroniques sont logées dans un compartiment hermétique à l'intérieur du système de filtration d'eau sur robinet Brita® et n'entrent pas en contact avec l'eau. L'indicateur de changement de filtre est conçu pour fonctionner aussi longtemps que votre système de filtration d'eau sur robinet Brita® (environ cinq ans en fonction de l'utilisation).*

INSTALLATION EN CINQ ÉTAPES FACILES

ÉTAPE 1 : Enlevez le brise-jet de votre robinet.

Dévissez (dans le sens des aiguilles d'une montre) le brise-jet et enlevez toute les rondelles de caoutchouc d'origine. Si vous avez de la difficulté, utilisez une serviette sèche pour tenir le brise-jet. Nettoyez toute trace de rouille ou de tartre.



ÉTAPE 2 : Déterminez si vous avez besoin d'un adaptateur.

Si le robinet est fileté à l'extérieur :

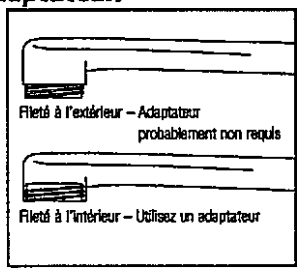
Vous n'aurez probablement pas besoin d'adaptateur. Essayez de fixer le système directement sur le robinet. Si vous n'y parvenez pas, communiquez avec le service à la clientèle de Brita (aux États-Unis, composez le 1 800 24-BRITA et au Canada, le 1 800 387-6940). **Passez à l'étape 3.**

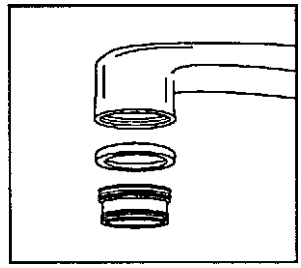
Si le robinet est fileté à l'intérieur :

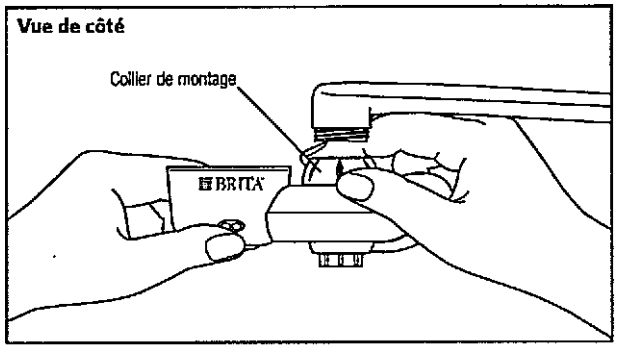
Vous aurez besoin d'utiliser l'un des adaptateurs fournis avec les rondelles correspondantes. Sélectionnez l'adaptateur et la rondelle qui s'adaptent à votre robinet. Si aucun des deux adaptateurs ne convient à votre robinet, communiquez avec le service à la clientèle de Brita (aux États-Unis, composez le 1 800 24-BRITA et au Canada, le 1 800 387-6940).

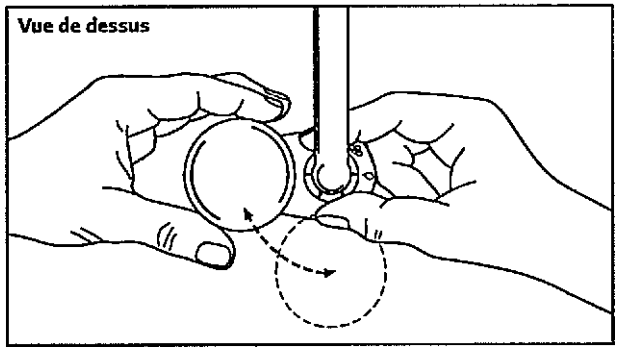
Placez la rondelle dans la partie en retrait de l'adaptateur. Vissez l'adaptateur (dans le sens inverse des aiguilles d'une montre) sur votre robinet et serrez bien à la main. Si vous avez de la difficulté à serrer, insérez une pièce de monnaie dans l'encoche au bas de l'adaptateur et serrez bien. Mise en garde : l'utilisation de pinces pour serrer l'adaptateur peut endommager le filetage.

NOTA : *Le système de filtration d'eau sur robinet Brita® ne peut pas être monté sur un robinet équipé d'une douchette incorporée.*









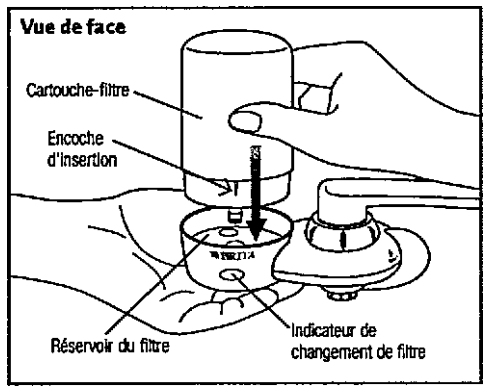
ÉTAPE 3: Fixez la base du système à votre robinet.

Placez la base de façon à ce que le réservoir du filtre se trouve du côté gauche du robinet, l'indicateur de changement de filtre face à vous. Vissez le collier de montage sur le robinet et serrez bien à la main. Ne pas serrer avec des pinces. Ne pas forcer.

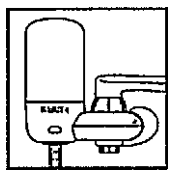
Si vous avez de la difficulté, faites pivoter la base d'avant en arrière tout en serrant le collier de montage.

ÉTAPE 4 : Insérez la cartouche-filtre dans le réservoir du filtre.

Placez une main sous le filtre pour le soutenir. Alignez l'encoche située sur la partie inférieure de la cartouche avec l'indicateur de changement de filtre à l'avant du réservoir. Insérez la cartouche dans le réservoir jusqu'à entendre un déclic. N'essayez pas de faire entrer de force la cartouche dans la base. Lorsque vous insérez une nouvelle cartouche-filtre, l'indicateur de changement de filtre est automatiquement remis à zéro et activé. Un témoin vert clignotera, indiquant que le filtre est bien installé.



ÉTAPE 5 : Faites couler de l'eau dans la nouvelle cartouche-filtre.



Faites tourner la poignée du filtre vers vous jusqu'au réglage d'eau filtrée Brita® : BRITA

Ouvrez le robinet et faites couler de l'eau dans la nouvelle cartouche-filtre pendant cinq minutes pour enlever la poussière de charbon et activer le filtre. Il est normal que de la poussière de charbon apparaisse. La durée de fonctionnement de la cartouche-filtre — 378 litres ou 100 gallons — est calculée à partir de la fin de la période de conditionnement de cinq minutes.

NOTA : *Ne l'utilisez qu'avec de l'eau froide. Ne faites pas couler d'eau chaude (plus de 38 °C/100 °F) dans la cartouche-filtre, car cela pourrait l'endommager.*

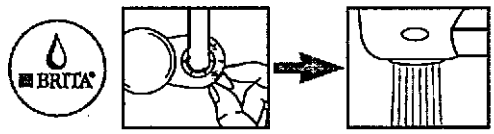
UTILISATION ET ENTRETIEN DU FILTRE

Votre système de filtration d'eau sur robinet Brita® est prêt!

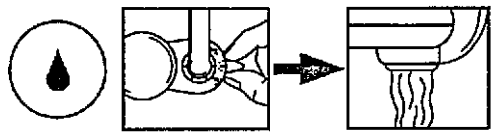
En réglant la poignée sur les positions suivantes, vous pourrez sélectionner le type d'eau voulu :

EAU FILTRÉE
Réglez la poignée du filtre sur la position avant...

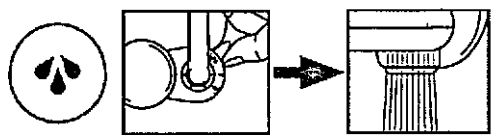
L'eau filtrée ne peut sortir que du port d'eau filtrée. Le reste de l'eau n'est pas filtrée.



ÉCOULEMENT D'EAU NON FILTRÉE
Réglez la poignée sur la position du milieu...



JET D'EAU NON FILTRÉE
Réglez la poignée du filtre sur la position arrière...



Indicateur de changement de filtre

Il est essentiel de remplacer la cartouche-filtre régulièrement pour bénéficier d'une eau plus saine, au goût agréable. Le système de filtration d'eau sur robinet Brita® vous permet de savoir facilement quand changer la cartouche-filtre.

L'indicateur de changement de filtre surveille la durée de fonctionnement de la cartouche-filtre et vous avertit lorsqu'il faut la remplacer. La durée est basée sur une qualité moyenne d'eau et sur la consommation moyenne d'eau filtrée d'une famille de quatre personnes.

L'indicateur de changement de filtre vous signalera qu'il faut changer la cartouche-filtre après environ 378 litres (100 gallons) d'eau ou 4 mois, selon la première de ces éventualités.

Chaque fois que vous commencerez à filtrer de l'eau, un témoin s'allumera pour vous indiquer l'état du filtre.

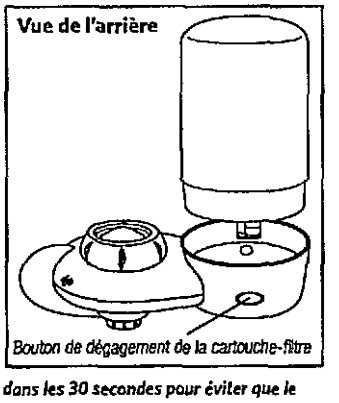
COULEUR DE L'INDICATEUR	ÉTAT DE LA CARTOUCHE-FILTRE
Vert clignotant	*Le filtre fonctionne* Lorsque le filtre est réglé sur eau filtrée Brita®, le témoin vert clignote pour vous signaler que le filtre fonctionne.
Ambré clignotant	**Changer le filtre bientôt** Lorsque le filtre est réglé sur eau filtrée Brita®, le témoin ambré clignote pour indiquer que la durée de fonctionnement restante du filtre est de deux semaines ou qu'il lui reste environ 75 litres (20 gallons) d'eau à filtrer. Votre filtre fonctionne, mais il est entrée dans sa Période de changement pour signaler qu'il doit bientôt être remplacé.
Rouge clignotant	**Changer le filtre immédiatement** *Lorsque le filtre est réglé sur eau filtrée* Brita®, le témoin rouge clignote pour signaler que le filtre est à la fin de sa durée de fonctionnement et qu'il doit être remplacé immédiatement.

Remplacement de la cartouche-filtre

Le remplacement de la cartouche-filtre est facile. Si le témoin rouge de l'indicateur de changement de filtre clignote lorsque le filtre est réglé sur eau filtrée Brita®, il est temps de remplacer la cartouche-filtre. Le remplacement régulier du filtre garantit une eau plus saine, au goût agréable.

Pour enlever l'ancienne cartouche, arrêtez l'eau, appuyez sur le bouton de dégagement de la cartouche-filtre situé à l'arrière du réservoir et tirez sur la cartouche pour l'enlever. Pour insérer une nouvelle cartouche-filtre, suivez les instructions de l'étape 4.

Les filtres de rechange pour système de filtration sur robinet Brita® sont offerts avec un fini blanc ou chromé.



NOTA : *Si vous retirez le filtre pour le nettoyer (par exemple pour le rincer ou l'essuyer), alors que l'indicateur de changement de filtre est vert, replacez-le dans les 30 secondes pour éviter que le compteur ne se remette à zéro. Cependant, lorsque l'indicateur de changement de filtre est rouge (indiquant que la période de changement de la cartouche-filtre est en cours), ne retirez la cartouche que pour la remplacer. Si vous insérez une cartouche-filtre pendant la période de changement, l'indicateur se remet automatiquement à zéro.*

NOTA : *Seules les cartouches-filtres de rechange Brita® convlennent au système de filtration d'eau sur robinet Brita®.*

Remplacement anticipé de la cartouche-filtre et remise à zéro manuelle de l'indicateur

Les filtres de remplacement du système de filtration sur robinet Brita® possèdent une couche supplémentaire pour réduire les risques d'obstruction dus à l'accumulation de sédiments. Cependant, il est possible que la cartouche-filtre s'obstrue avant la fin de sa durée de fonctionnement normale en raison d'une forte concentration de dépôts dans l'eau de votre robinet. Ceci peut réduire le débit d'eau du système et nécessiter le remplacement anticipé de la cartouche-filtre. Si, pour quelque raison que ce soit, vous devez remplacer le filtre prématurément (avant que l'indicateur ne soit rouge), retirez l'ancienne cartouche (voir les instructions relatives au remplacement de la cartouche-filtre) et reportez-vous à l'étape 4 pour insérer une nouvelle cartouche-filtre.

Pour remettre manuellement à zéro l'indicateur pour la nouvelle cartouche-filtre, attendez au moins trente secondes après le retrait de l'ancienne cartouche avant d'insérer la nouvelle. Le compteur pourra ainsi se remettre à zéro correctement.

Pour optimiser l'utilisation, l'entretien et la sécurité

- Le système de filtration d'eau sur robinet Brita® n'est pas destiné à purifier l'eau. Ne l'utilisez pas avec de l'eau qui n'est pas pure sur le plan microbiologique ou de qualité inconnue sans la désinfecter de façon adéquate avant ou après l'utilisation du système. Un système homologué pour la réduction des sporocystes peut être utilisé pour filtrer les eaux désinfectées susceptibles d'en contenir. Les personnes qui doivent boire une eau d'une certaine pureté microbiologique doivent suivre les conseils de leur médecin ou des autorités sanitaires locales en ce qui a trait à l'utilisation et à la consommation d'eau du robinet et d'eau Brita®.
- Le système et son installation doivent être conformes aux lois et à la réglementation locales.
- Ne l'utilisez qu'avec de l'eau froide. Ne faites pas couler d'eau chaude (plus de 38 °C/100 °F) dans la cartouche-filtre, car cela pourrait l'endommager.
- N'appuyez pas sur le bouton de dégagement de la cartouche-filtre pendant la filtration de l'eau.
- Avant chaque utilisation, laissez couler l'eau à travers la cartouche-filtre pendant cinq secondes pour l'activer. Si le filtre n'a pas été utilisé depuis quelques jours, laissez couler l'eau pendant 30 secondes.
- Pour obtenir des performances optimales et la meilleure qualité d'eau filtrée possible, remplacez rapidement la cartouche-filtre lorsque l'indicateur de changement de filtre en signale la nécessité.
- Nettoyez l'extérieur du système de filtration d'eau sur robinet Brita® avec une éponge ou un chiffon doux humide. Vous pouvez aussi utiliser un détergent à vaisselle doux. N'utilisez pas de détergent abrasif ni de tampon à récurer. Ne placez AUCUNE pièce de ce produit dans le lave-vaisselle.
- N'utilisez que l'eau filtrée sortant du port d'eau filtrée. Le reste de l'eau n'est pas filtrée.
- N'utilisez pas le système de filtration d'eau sur robinet Brita® si la température de l'eau du robinet dépasse 77 °C/170 °F. De l'eau très chaude risque d'endommager le système. (Bien que la plupart des chauffe-eau récents soient réglés pour fournir de l'eau à une température de 49 °C/120 °F, cette température peut varier d'un foyer à l'autre. Si vous pensez que la température de l'eau peut être supérieure à 77 °C/170 °F, vérifiez le réglage de votre chauffe-eau.)

DÉPANNAGE

Vous êtes incapable de fixer le système sur votre robinet.	Reportez-vous à l'étape 2 de la section Installation en cinq étapes faciles pour déterminer si vous avez besoin d'un adaptateur. Vérifiez si vous avez *correctement inséré le bon adaptateur et la bonne rondelle.*
Les adaptateurs fournis ne conviennent pas à votre robinet.	Appelez le service à la clientèle de BRITA (aux États-Unis, composez le 1 800 24-BRITA; au Canada, le 1 800 387-6940).
De l'eau fuit ou fuse du joint avec le robinet.	Vérifiez si vous avez bien placé la rondelle entre le robinet et l'adaptateur. Vérifiez si le collier de montage est bien serré et si le filetage est aligné avec celui du robinet ou de l'adaptateur. Seule l'eau qui sort du port d'eau filtrée est filtrée. Le reste de l'eau ne l'est pas.
De l'eau fuit ou fuse du système lui-même.	Assurez-vous que la cartouche-filtre est bien fixée en place. L'eau qui fuit ou qui fuse du système peut ne pas être filtrée. Seule l'eau qui sort du port d'eau filtrée est filtrée. Le reste de l'eau ne l'est pas.
Le débit de l'eau filtrée diminue.	Enlevez le système du robinet et retirez les dépôts de la crépine à l'intérieur du collier de montage. Si le problème persiste, remplacez la cartouche-filtre. Bien que les filtres de rechange pour système de filtration d'eau sur robinet Brita® possèdent une couche supplémentaire pour réduire l'accumulation de dépôts, une forte concentration en dépôts peut *obstruer le système et écourter la durée de fonctionnement théorique.* Cela signifie que votre cartouche-filtre de rechange Brita® élimine bien les dépôts de l'eau du robinet. Reportez-vous aux instructions sur le Remplacement anticipé de la cartouche-filtre et la remise à zéro manuelle de l'indicateur à la page 15.
L'indicateur de changement de filtre ne se remet pas à zéro lorsqu'on insère une nouvelle cartouche.	Assurez-vous que la cartouche-filtre est bien fixée en place. Si vous remplacez la cartouche avant que le voyant rouge ne clignote, vous devrez remettre à zéro manuellement l'indicateur de changement de filtre. Reportez-vous aux instructions sur le Remplacement anticipé de la cartouche-filtre et la remise à zéro manuelle de l'indicateur à la page 15.
L'indicateur de changement de filtre ne s'allume pas.	Appelez le service à la clientèle de BRITA (aux États-Unis, composez le 1 800 24-BRITA; au Canada, le 1 800 387-6940).

POUR LES ACHATS EFFECTUÉS EN IOWA : Le présent formulaire doit être signé et daté par l'acheteur et le vendeur avant l'exécution du présent contrat. Ce formulaire doit être conservé en dossier par le vendeur pendant un minimum de deux ans.

[a] Le chloroforme était utilisé comme produit chimique de substitution pour la réduction des composés organiques volatils (COV).

[b] Concentration maximale acceptée (CMA) par Santé Canada.

[b] Objectif de Santé Canada en ce qui concerne l'odeur et le goût.
S.O. = Sans objet.

Essais de rendement effectués par NSF International. Ce système a été testé conformément aux normes NSF/ANSI 42 et 53 pour la réduction des substances énumérées. La concentration de chacune des substances indiquées dans l'eau entrant dans le système a été réduite à une concentration inférieure ou égale à la limite autorisée dans l'eau quittant le système, conformément aux normes NSF/ANSI 42 et 53.

Essais effectués à 414 kPa (60 lb/po²) de pression avec un débit minimal de 2,19 L/min (0,58 gpm).

Les essais ont été effectués dans des conditions standard en laboratoire. Les contaminants et autres substances éliminés ou réduits par ce système de traitement ne sont pas nécessairement présents dans l'eau de tous les utilisateurs. Le rendement du filtre peut varier selon la qualité de l'eau dans la région.

Le système de filtration d'eau sur robinet Brita® n'est pas destiné à purifier l'eau. Ne l'utilisez pas avec de l'eau qui n'est pas pure sur le plan microbiologique ou de qualité inconnue sans la désinfecter de façon adéquate avant ou après l'utilisation du système. Un système homologué pour la réduction des sporocystes peut être utilisé pour filtrer les eaux désinfectées susceptibles d'en contenir. Les personnes qui doivent boire une eau d'une certaine pureté microbiologique doivent suivre les conseils de leur médecin ou des autorités sanitaires locales en ce qui a trait à l'utilisation et à la consommation de l'eau du robinet et de l'eau Brita.

Caractéristiques du système de filtration d'eau sur robinet Brita® Modèle FF-100 avec cartouche-filtre FR-200

Capacité :	Débit de service :	Pressions de fonctionnement (min./max.) :	Température de l'eau filtrée (min./max.) :	Exigences électriques :
378 litres (100 gallons)	2,19 L/min (0,58 gal/min)	138 kPa/689 kPa (1,4 kg/cm²/7,0 kg/cm²) (20 lb/po²/100 lb/po²)	1 °C/38 °C (34 °F/100 °F)	Aucune

Veuillez vous reporter à la section pertinente du présent guide de l'utilisateur pour ce qui est de l'installation, du conditionnement, de l'utilisation et de l'entretien, ainsi que pour savoir comment fonctionne l'indicateur de changement de filtre. Il est essentiel que l'appareil soit entretenu conformément aux instructions du fabricant pour bien fonctionner. La durée de fonctionnement de la cartouche-filtre ne devrait pas excéder 378 litres (100 gallons). Si le débit diminue, remplacez le filtre plus tôt. Les cartouches-filtres de rechange (modèle FR-200) sont offertes en paquets de une, deux ou quatre à un prix de détail approximatif de 15 $ US ou 18 $ CAN l'unité.

Le système de filtration d'eau sur robinet Brita® a été testé et certifié par NSF International, conformément aux normes NSF/ANSI 42 et 53 pour la réduction des substances spécifiées dans la fiche de données sur le rendement.

Le système de filtration d'eau sur robinet Brita® a été testé et certifié par la WQA, conformément aux normes NSF/ANSI 42 et 53 pour la réduction des substances spécifiées dans la fiche de données sur le rendement.

BRITA®

SISTEMAS DE FILTRACIÓN DE AGUA

ESPAÑOL

GUÍA DEL USUARIO

Para un óptimo rendimiento, lea todas las instrucciones cuidadosamente antes de ensamblar y utilizar el Sistema de Filtración Brita® para Grifos.

Estimado cliente:

Gracias por elegir Brita®, la marca líder en filtración de agua doméstica en todo el mundo. Los sistemas de filtración de agua certificados de Brita transforman el agua potable común en agua más saludable y de exquisito sabor. Basta con que siga las instrucciones de este folleto para instalar fácilmente el Sistema de Filtración Brita® para Grifos (no se necesita ninguna herramienta). Para ver más información sobre Brita, visite nuestro sitio web en www.brita.com.

Garantía limitada de un año

Brita LP (el Garante) garantiza su Sistema de Filtración Brita® para Grifos (FF-100) por un año a partir de la fecha de compra (excepto para el cartucho del filtro, que se garantiza por 30 días) contra todo tipo de defecto en los materiales o en la mano de obra, siempre y cuando cumpla con las instrucciones en la guía del usuario. Si por cualquier motivo el producto presentase *defectos dentro del año cubierto por la garantía, comuníquese con el servicio de atención al cliente de* BRITA, llamando al 1-800-24-BRITA (EE. UU.) o al 1-800-387-6940 (Canadá), o simplemente envíe la unidad a la dirección a continuación para que sea reparada o reemplazada sin cargo alguno. Embale la unidad cuidadosamente para evitar que se dañe durante el envío.

La presente garantía le brinda derechos legales específicos. Es posible que cuente con otros derechos dependiendo del estado donde resida.

El Garante no asume ninguna responsabilidad por daños indirectos o secundarios, daños por el uso indebido del producto o por el uso de accesorios no autorizados, o daños provocados por la instalación del sistema de filtración en grifos defectuosos. En algunos estados o jurisdicciones no se permite la exclusión o limitación de responsabilidad debido a daños indirectos o secundarios; por tanto, es posible que la limitación o exclusión anterior no corresponda en su caso.

En caso de que deba reparar el sistema de filtración durante o después del periodo cubierto por la garantía, o en caso de que tenga preguntas sobre cómo usar el dispositivo Brita, llame al servicio de atención al cliente de Brita al 1-800-24-BRITA (EE. UU.) o al 1-800-387-6940 (Canadá) de lunes a viernes de 09:00 a 17:30, hora del este.

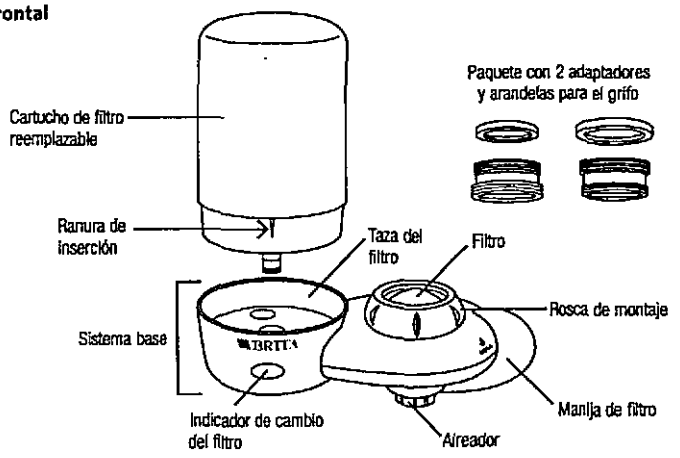
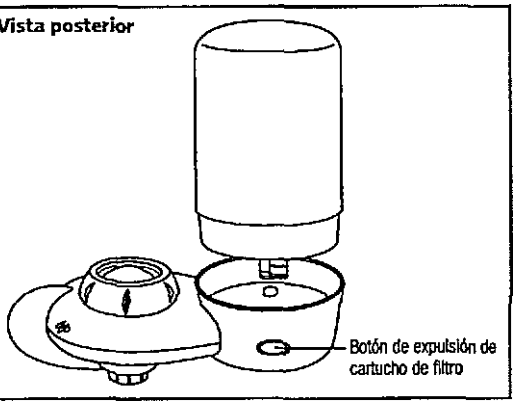
COMPONENTES Y CARACTERÍSTICAS

Vista frontal



Vista posterior



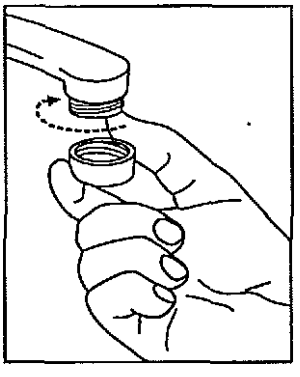
Si faltara alguna parte o para ubicar las tiendas minoristas, llame al servicio de atención al cliente de BRITA, al 1-800-24-BRITA (EE. UU.) o al 1-800-387-6940 (Canadá).

NOTE: *Este producto contiene una batería sellada no reemplazable. Las baterías y las partes electrónicas se sellan en un recinto a prueba de agua dentro del Sistema de Filtración Brita® para Grifos y no entran en contacto con el agua. El indicador de cambio de filtro se diseñó para durar todo el ciclo útil del Sistema de Filtración Brita® para Grifos (alrededor de 5 años, dependiendo del uso).*

INSTALACIÓN EN CINCO PASOS SIMPLES

Paso 1: Retire el aireador del grifo.

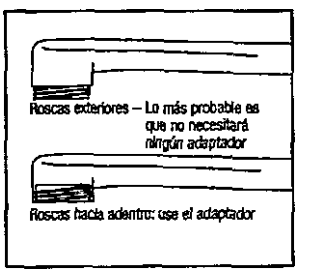
Desenrosque (hacia la derecha) el aireador y quite todas las arandelas de goma originales del grifo. Si estuviera atascado, use una toalla seca para tomar el aireador con más firmeza. Remueva los depósitos de herrumbre o sarro.



Paso 2: Determine si necesita usar un adaptador.

Si el grifo cuenta con roscas hacia afuera:

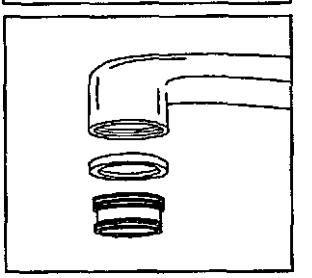
Probablemente no tenga que usar un adaptador. Intente conectar el sistema de filtración directamente al grifo. Si no calza, llame al servicio de atención al cliente de BRITA al 1-800-24-BRITA (EE. UU.) o al 1-800-387-6940 (Canadá). **Siga con el paso 3.**



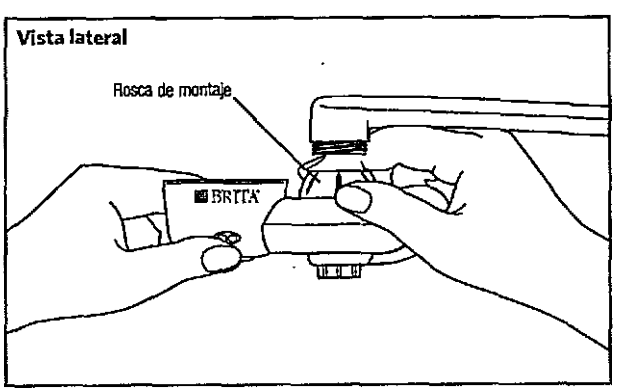
Si el grifo cuenta con roscas hacia adentro:

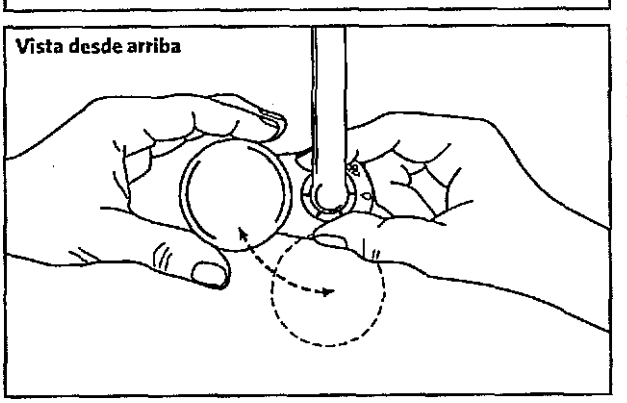
Deberá usar uno de los adaptadores y las arandelas correspondientes que se incluyen en el paquete. Elija el adaptador y arandela que se ajusten al grifo. Si ninguno de los adaptadores calza, llame al servicio de atención al cliente de BRITA al 1-800-24-BRITA (EE. UU.) o al 1-800-387-6940 (Canadá).

Coloque la arandela en el extremo hueco del adaptador. Enrosque el adaptador haciéndolo girar a la izquierda. Apriételo hasta que quede ajustado. Si no puede apretarlo, coloque una moneda en la muesca ubicada en la parte inferior del adaptador y hágalo girar hasta que quede firme. Cuidado: No use un alicate para afirmar el adaptador ya que podría dañar las rosas.



NOTA: *El Sistema de Filtración Brita® para Grifos no se puede usar en grifos que tengan un sistema rociador instalado.*



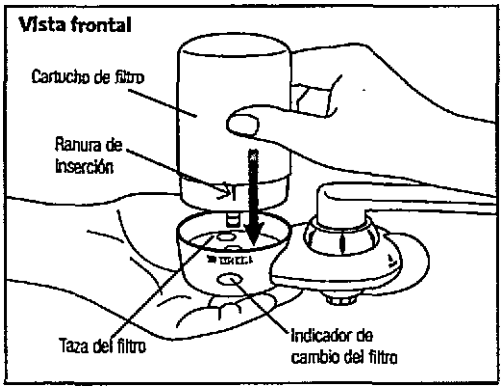


Paso 3: Conecte el sistema base al grifo.

Coloque el sistema base de modo que la taza del filtro esté en el lado izquierdo del grifo y el indicador de cambio del filtro esté mirando hacia usted. Enrosque el cuello de montaje en el grifo y ajústelo bien con la mano. No use un alicate para ajustar. No ajuste de más.

Si tiene problemas, haga girar el sistema base hacia adelante y hacia atrás al mismo tiempo que ajusta el cuello de montaje.

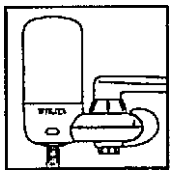
PASO 4: Inserte el cartucho del filtro en la taza del filtro.



Sostenga la base del sistema de filtro con una mano. Alinee la ranura de inserción en la parte inferior del cartucho con el indicador de cambio de filtro al frente de la taza del filtro. Inserte el cartucho del filtro en la taza del filtro hasta escuchar un chasquido. No ponga demasiada presión sobre el cartucho del filtro en la base del sistema. Al insertar el nuevo cartucho del filtro restablecerá y activará automáticamente el indicador electrónico de cambio de filtro. Una luz verde parpadeará para indicar que se activó el filtro.

PASO 5: Haga correr agua por el nuevo filtro.

Mueva el filtro hacia usted y colóquelo en el ajuste de agua Brita® filtrada: BRITA



Abra el grifo para dejar correr el agua por el nuevo filtro por 5 minutos para remover cualquier partícula de carbono que pueda tener y activar el filtro. Es normal que aparezcan partículas de carbono. El ciclo útil del filtro de 100 galones/378 litros de agua comenzará después de 5 minutos de acondicionamiento.

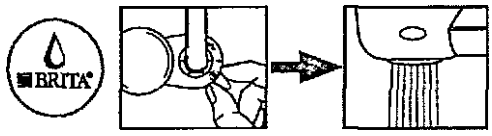
NOTA: *Use sólo con agua fría. No use agua caliente (más de 100° F/38° C) con el filtro ya que podría dañarlo.*

USO Y CUIDADO DEL FILTRO

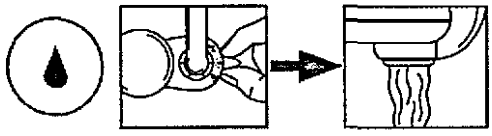
¡El Sistema de Filtración Brita® para Grifos viene listo para usar!

Con sólo mover el selector a las siguientes posiciones podrá elegir el agua que desee:

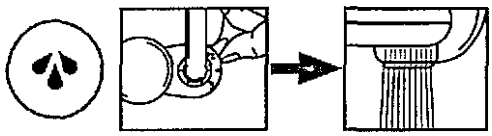
AGUA FILTRADA
Mueva la manija a la posición adelantada...
Sólo extraiga agua filtrada del puerto del filtro. El resto quedará sin filtrar.



CHORRO DE AGUA NO FILTRADA
Mueva la manija a la posición del medio...



ROCÍO DE AGUA NO FILTRADA
Mueva la manija a la posición de atrás...



Indicador de cambio del filtro

El cambio del filtro en forma regular es la clave para tomar agua más saludable y de sabor más exquisito. El Sistema de Filtración Brita® para Grifos le indica cuándo debe cambiar el filtro.

El indicador de cambio del filtro monitorea la duración del filtro y le indica cuándo cambiarlo, tomando como base una cantidad promedio de agua y el uso de agua filtrada de una familia de cuatro.

El indicador le mostrará que debe reemplazar el filtro después de que se hayan filtrado aproximadamente 100 galones/378 litros de agua (o unos 4 meses), *lo que ocurra primero.*

Cada vez que filtre agua se encenderá una luz para indicarle el estado del filtro.

LUZ DEL INDICADOR	ESTADO DEL FILTRO
Verde parpadeante	**El filtro funciona** Cuando se cambia al ajuste de agua Brita® filtrada, una luz verde parpadea para indicarle que el filtro está funcionando bien.
Ámbar parpadeante	**Cambiar filtro pronto** Cuando se cambia al ajuste de agua Brita® filtrada, la luz ámbar parpadea cuando al filtro le quedan 2 semanas o aproximadamente 20 galones/75 litros de vida útil. El filtro está funcionando, pero ahora indica el mensaje Periodo de advertencia de cambio porque será necesario cambiar el sistema pronto.
Rojo parpadeante	**Cambiar filtro ahora** Cuando se cambia al ajuste de agua Brita® filtrada, la luz roja parpadea para indicar que el cartucho del filtro llegó al fin de su ciclo útil y debe reemplazarse.

Reemplazo del cartucho

El cambio del cartucho del filtro es fácil. Si el Indicador de cambio del filtro parpadea con una luz roja cuando cambia al ajuste de agua Brita® *filtrada, debe cambiar el cartucho del filtro.* El cambio inmediato del filtro garantiza agua más saludable y de sabor más exquisito.

Para quitar el cartucho viejo, cierre el agua, presione el botón de expulsión del cartucho del filtro, ubicado en la parte posterior de la taza *del filtro y tire del cartucho para sacarlo. Para insertar* un nuevo cartucho, siga las instrucciones en el Paso 4.

Los Filtros de Repuesto Brita® para Grifos se ofrecen en color blanco o acabado en cromo.

NOTA: *Si el filtro se quita para su limpieza (por ej., para lavarlo o enjuagarlo) durante el modo de luz verde, vuelva a insertar el filtro en la unidad en 30 segundos para asegurarse de no restaurar el contador. Sin embargo, una vez que el indicador de cambio del filtro ha comenzado a mostrar una luz roja (indicando el periodo de cambio), no quite el cartucho, a menos que tenga intente reemplazarlo. Una vez que el filtro entre en el periodo de advertencia de cambio, la inserción de un cartucho restablecerá automáticamente el Indicador de cambio del filtro.*

NOTA: *Sólo los Filtros de Repuesto Brita® para Grifos encajarán en el Sistema de Filtración Brita® para Grifos.*

Cambio anticipado del filtro y restablecimiento manual del indicador de cambio de filtro

Los Filtros de Repuesto Brita® para Grifos tienen una capa adicional para prevenir el estancamiento prematuro debido a los depósitos de sedimento. Sin embargo, es posible que el sedimento excesivo del agua potable haga que el filtro se tape prematuramente con sedimento. Esto puede reducir el flujo de agua en el sistema y requiere que se cambie el filtro antes de tiempo. Si, por cualquier motivo, debe cambiar el filtro antes de tiempo, (antes de aparecer la señal roja parpadeante del indicador), *quite el cartucho viejo (vea las instrucciones en* Cambio del cartucho del filtro) y prepárese para insertar uno nuevo (Paso 4).

Para restablecer el indicador manualmente para el nuevo cartucho, espere por lo menos 30 segundos después de quitar el filtro viejo y antes de insertar el nuevo. Esto permite que el contador se restablezca correctamente.

Seguridad, cuidado y uso óptimo

- El Sistema de Filtración Brita® para Grifos no se ha fabricado para purificar el agua. No lo utilice con agua que no sea microbiológicamente segura o de calidad desconocida sin la correcta desinfección antes o después del sistema. Se pueden usar sistemas certificados para reducir quistes en aguas desinfectadas que contengan quistes filtrables. Las personas que necesitan agua con pureza microbiológica especial deben seguir los consejos del médico o de los funcionarios de salud locales sobre el uso y el consumo del agua potable y del agua Brita®.
- Tanto el sistema usado como su instalación deben ajustarse a las normas y leyes locales, del estado y de la jurisdicción.
- Sólo use agua fría. No use agua caliente (más de 100°F/38°C) con el filtro ya que podría dañarlo.
- No empuje el botón de expulsión del cartucho del filtro al filtrar el agua.
- *Antes de usar un cartucho nuevo, deje correr* agua por el filtro unos 5 minutos para así activar el filtro. Si el filtro no se usa por algunos días, deje correr el agua unos 30 segundos.
- Para un rendimiento óptimo y agua filtrada de la mejor calidad, cambie el cartucho lo antes posible después de que se encienda el indicador de cambio del filtro.
- Limpie el exterior del Sistema de Filtración Brita® para Grifos con una esponja o paño suave húmedos. Puede usar un detergente suave para vajilla. No use limpiadores abrasivos ni fibra esponjas para limpiar el producto. NO coloque las piezas del sistema de filtración en el lavaplatos.
- Sólo extraiga agua filtrada del puerto del filtro. El resto quedará sin filtrar.
- No utilice el Sistema de Filtración Brita® para Grifos si la temperatura del agua es de más de 170°F/77°C. El agua muy caliente dañará el sistema. (Si bien la mayoría de los calentadores de agua más nuevos vienen ya ajustados para 120°F/49°C, las temperaturas pueden variar de un hogar a otro. Si piensa que la temperatura del agua de su hogar es de más de 170°F/77°C, revise el ajuste en el calentador.)

SOLUCIÓN DE PROBLEMAS

No puede conectar el sistema de filtración al grifo.	Consulte el paso 2 de la sección Instalación en 5 pasos simples para ver si necesita usar un adaptador. Compruebe que haya insertado correctamente el adaptador y la arandela que corresponda.
Los adaptadores que vienen con el sistema de filtración no sirven para mi grifo.	Llame al servicio de atención al cliente de BRITA al 1-800-24-BRITA (EE. UU.) o al 1-800-387-6940 (Canadá).
Hay una pérdida de agua a través de la conexión del sistema con el grifo.	Compruebe que haya colocado la arandela entre el grifo y el adaptador. Compruebe que la rosca de montaje esté bien ajustada y que las roscas estén alineadas con las del grifo o del adaptador. Sólo se filtra agua que pasa por la entrada del filtro. El resto quedará sin filtrar.
Hay una pérdida de agua a través del sistema de filtración mismo.	Asegúrese de que el cartucho esté bien instalado. Es posible que el agua *de la pérdida no esté filtrada. Sólo se filtra agua que pasa por la entrada* del filtro. El resto quedará sin filtrar.
El flujo de agua filtrada es lento.	Desinstale el sistema de filtración y retire los sedimentos que se hayan acumulado en la rosca de montaje. Si el flujo de agua sigue siendo lento, cambie el cartucho. Aunque los Filtros de Repuesto Brita® para Grifos tienen una capa adicional para reducir el depósito de sedimentos, el alto contenido de sedimentos en el agua puede hacer que el sistema se tape prematuramente, antes de su ciclo útil normal. La acumulación de sedimentos significa que el Filtro de Repuesto Brita® para Grifos está extrayendo sedimentos del agua potable. Consulte la sección Cambio anticipado del filtro y restablecimiento manual del indicador de cambio del filtro en la página 25.
El indicador de cambio del filtro no se restablece al insertar un nuevo cartucho.	Asegúrese de que el cartucho esté bien instalado. Si cambió el cartucho antes de que el indicador parpadeara con una luz roja, deberá restablecer manualmente el Indicador de cambio del filtro. Consulte la sección Cambio anticipado del filtro y restablecimiento manual del indicador de cambio del filtro en la página 25.
El indicador de cambio del filtro no se enciende.	Llame al servicio de atención al cliente de BRITA al 1-800-24-BRITA (EE. UU.) o al 1-800-387-6940 (Canadá).

N.A. = No aplicable.

Prueba de rendimiento realizada por la NSF International. Este sistema se ha probado conforme a los estándares NSF/ANSI N° 42 y 53 para la reducción de las sustancias que aparecen en la lista. La concentración de cada una de las sustancias indicadas en el agua que entró al sistema se redujo a una concentración menor o igual al límite permitido para el agua que sale del sistema, según lo especificado en los estándares NSF/ANSI N° 42 y 53.

El sistema se probó a 60 psig (414 kPa) utilizando un flujo mínimo de 58 gpm (2.19 L/mín).

Las pruebas se realizaron bajo condiciones normales de laboratorio. Los contaminantes u otras sustancias que se eliminen o reduzcan con este sistema de tratamiento de agua no necesariamente se encuentran presentes en el agua disponible a todos los usuarios. El rendimiento del filtro puede variar según las condiciones del agua.

El Sistema de Filtración Brita® para Grifos no se ha fabricado para purificar el agua. No lo utilice con agua que no sea microbiológicamente segura o que se de calidad desconocida sin la correcta desinfección antes o después del sistema. Se pueden usar sistemas certificados para reducir quistes en aguas desinfectadas que contengan quistes filtrables. Las personas que necesitan agua con un nivel de pureza microbiológica especial deben seguir los consejos de su médico o de los funcionarios de salud locales sobre el uso y el consumo del agua potable y del agua Brita.

Especificaciones para el Sistema de Filtración Brita® para Grifos Modelo FF-100 con filtro FR-200

Capacidad: 100 galones (378 litros)	Velocidad de flujo de servicio: 0,58 gpm *(2,19 L/min)*	Presiones operativas (mín./máx.): 20 psig/100 psig (138 kPa/689 kPa) *(1,4 kg/cm²/7,0 kg/cm²)*	Agua filtrada Temperatura (mín./máx.): 34°F/100°F (1°C/38°C)	Requerimientos eléctricos: Ninguno

Consulte la guía del usuario para los requisitos para una correcta instalación, mantenimiento, uso y cuidado, y para ver información sobre el funcionamiento del indicador de cambio del filtro. Es fundamental seguir las instrucciones del fabricante para el mantenimiento del sistema para que el filtro funcione correctamente. El ciclo útil del filtro no debería exceder los 100 galones. Si observa una disminución del flujo de agua, cambie el filtro ante de tiempo. Los filtros de repuesto (modelo FR-200) están disponibles en paquetes unitarios o de dos y cuatro unidades a un precio aproximado de *$15 por filtro en los EE. UU. y $18 por litro en Canadá.*

La NSF ha sometido a pruebas y certificado el Sistema de Filtración Brita®, conforme a los estándares 42 y 53 de la NSF/ANSI respecto a la reducción de lo especificado en la hoja de datos de rendimiento.

La WQA ha sometido a pruebas y certificado el Sistema de Filtración Brita® conforme a los estándares 42 y 53 de la NSF/ANSI respecto a la reducción de lo especificado en la hoja de datos de rendimiento.

STATE OF MICHIGAN
EXECUTIVE OFFICE
LANSING

RICK SNYDER
GOVERNOR

BRIAN CALLEY
LT. GOVERNOR

EXECUTIVE ORDER
No. 2016 – 1

CREATION OF
FLINT WATER INTERAGENCY COORDINATING COMMITTEE

MICHIGAN DEPARTMENT OF STATE POLICE

WHEREAS, Section 1 of Article V of the Michigan Constitution of 1963 vests the executive power of the state of Michigan in the Governor; and

WHEREAS, Section 2 of Article V of the Michigan Constitution of 1963 empowers the Governor to make changes in the organization of the Executive Branch or in the assignment of functions among its units that he considers necessary for efficient administration; and

WHEREAS, municipal water in the City of Flint showed elevated lead levels after the City of Flint switched its water source to the Flint River; and

WHEREAS, the County of Genesee and the City of Flint have taken actions to cope with the situation, including but not limited to, switching back to the Detroit water system on October 16, 2016, declaring local states of emergency, activating the emergency response and recovery aspects of their emergency operations plan, marshaling and distributing required resources on a city-wide level, and issuing emergency public information and bulletins; and

WHEREAS, the Flint Water Advisory Task Force was formed as an independent advisory task force charged with reviewing actions regarding water use and testing in Flint; and

WHEREAS, the Flint Water Advisory Task Force has made an interim recommendation that the state government should coordinate a sustained, public-health focused response to remedy, to the fullest extent possible, the impacts on the Flint community; and

WHEREAS, on January 5, 2016, the Governor issued a proclamation declaring a state of emergency in the County of Genesee and the City of Flint; and

WHEREAS, multiple state departments and local authorities share the responsibility for ensuring safe drinking water and the coordination of efforts to address the consequences resulting from the presence of elevated lead levels in drinking water; and

WHEREAS, ensuring safe drinking water and addressing the consequences of elevated lead levels in drinking water will require collaboration and communication between state departments, local governments, and subject matter experts; and

WHEREAS, the establishment of a Flint Water Interagency Coordinating Committee within the Michigan Department of State Police will facilitate the collaboration and

communication between state departments, local governments, and subject matter experts necessary to effectively coordinate a response and recovery effort;

NOW, THEREFORE, I, Richard D. Snyder, Governor of the state of Michigan, by virtue of the power and authority vested in the Governor by the Michigan Constitution of 1963 and Michigan law, order the following:

I. CREATION OF THE FLINT WATER INTERAGENCY COORDINATING COMMITTEE

A. The Flint Water Interagency Coordinating Committee ("Coordinating Committee") is created as an advisory body within the Michigan Department of State Police (the "Department").

B. The Coordinating Committee shall be composed of the following seventeen (17) members who shall serve an initial term expiring on December 31, 2018.

- The Director of Office of Urban Initiatives within the Executive Office of the Governor;
- The Deputy State Director of Emergency Management and Homeland Security within the Michigan Department of State Police;
- The Director of the Department of Environmental Quality, or his or her designee;
- The Director of the Department of Health and Human Services, or his or her designee;
- The Director of the Department of Licensing and Regulatory Affairs, or his or her designee;
- The State Treasurer, or his or her designee;
- The Superintendent of Public Instruction, or his or her designee;
- The elected Mayor of the City of Flint who shall be appointed to the Coordinating Committee by the Governor;
- Three (3) additional representatives of the City of Flint who shall be submitted by the Mayor of the City of Flint and appointed to the Coordinating Committee by the Governor;
- Three (3) representatives of Genesee County who shall be submitted by the Genesee County Board of Commissioners and appointed to the Coordinating Committee by the Governor; and
- Three (3) subject matter experts who shall be appointed to the Coordinating Committee by the Governor.

After the initial appointments, members of the Coordinating Committee appointed under this subsection shall serve terms of three years.

C. A vacancy on the Coordinating Committee occurring other than by expiration of a term shall be filled in the same manner as the original appointment for the balance of the unexpired term. A member may continue serving until his or her successor is appointed. A member may serve successive terms if reappointed.

II. CHARGE TO THE COORDINATING COMMITTEE

A. The Coordinating Committee shall act in an advisory capacity to the Governor and subject to the Governor's review and approval, shall do all of the following:

1. Create an incident action plan designed to assist state and local authorities in ensuring safe drinking water for the residents of the City of Flint and addressing the consequences of elevated lead levels in drinking water.

2. Review recommendations made by the Flint Water Advisory Task Force and propose statutory, regulatory, or contractual actions necessary for implementation of such recommendations.

3. Identify staff with competencies in emergency planning, operations, logistics, and finance as outlined under the National Incident Management System (NIMS) to work with the Coordinating Committee to track resource requests and document progress on the incident action plan.

4. Establish a standard process for sharing pertinent information between all members including use of the NIMS and Unified/Incident Command as appropriate.

5. Establish routine communications protocols at the local, executive, and legislative levels as appropriate.

6. Establish a public information protocol to effectively inform the community.

7. Make recommendations for acceptable standards for potable water.

8. Make recommendations regarding the health impacts for the affected population.

9. Assess the status of infrastructure and determine feasible actions to upgrade the water system.

10. Establish subcommittees among its members to specifically address, at a minimum, each of the three following topic areas: Water Quality, Community Health, and Education.

11. Assist the Governor and the Department in implementing appropriate operations permitted under the Michigan Emergency Management Act or the federal Stafford Disaster Relief and Emergency Assistance Act, including local emergency operations plans and guides.

12. Explore any avenues of funding for response and recovery efforts including federal grants, legislative appropriations, and private partners.

B. The Coordinating Committee shall provide other information or advice as requested by the Governor or the Department.

III. OPERATIONS OF THE COORDINATING COMMITTEE

A. The Coordinating Committee shall be staffed and assisted by personnel from the Department as directed by the Department Director. Any budgeting, procurement, and related management functions of the Coordinating Committee shall be performed under the direction and supervision of the Department Director.

B. The Director of Office of Urban Initiatives within the Executive Office of the Governor and the Deputy State Director of Emergency Management and Homeland Security shall together serve as the Statewide Coordinators responsible for the administrative functions of the Coordinating Committee.

C. The Coordinating Committee may utilize subcommittees and advisory panels composed of its members to assist in completing the functions of the Coordinating Committee. The Coordinating Committee may request public participation on advisory panels as the Coordinating Committee deems necessary.

D. When making recommendations to the Governor, a majority of the serving members of the Coordinating Committee must concur.

E. The Coordinating Committee shall meet at the call of either of the Statewide Coordinators and as may be provided in procedures adopted by the Coordinating Committee.

F. The Coordinating Committee may, as appropriate to perform its duties, make inquiries, conduct studies, consult with outside experts and federal agencies, and receive comments from the public.

G. Members of the Coordinating Committee shall serve without compensation but may receive reimbursement for necessary travel and expenses according to relevant statutes and the rules and procedures of the Civil Service Commission, and the Department of Technology, Management and Budget, subject to available funding.

H. The Coordinating Committee may accept donations of labor, services, or other items of value from any public or private agency or person. Any donations shall be expended in accordance with applicable laws, rules, and procedures.

I. Members of the Coordinating Committee shall refer all legal, legislative, and media contacts to the Department.

J. A writing prepared, owned, used, in the possession of, or retained by the Coordinating Committee in the performance of an official function is subject to the Freedom of Information Act, 1976 PA 442, as amended, MCL 15.231 to 15.246.

IV. MISCELLANEOUS

A. All departments, committees, commissioners, or officers of this state or of any political subdivision of this state may give to the Coordinating Committee, or to any member or representative of the Coordinating Committee, any necessary assistance required by the

Coordinating Committee, or any member or representative of the Coordinating Committee, in the performance of the duties of the Coordinating Committee so far as is compatible with its, his or her duties.

B. Any suit, action, or other proceeding lawfully commenced by, against, or before any entity affected under this Order shall not abate by reason of the taking effect of this Order.

C. The invalidity of any portion of this Order shall not affect the validity of the remainder of the Order.

The Executive Order shall become effective upon filing.

Given under my hand and the Great Seal of the state of Michigan this 11th day of January, in the year of our Lord, Two Thousand Sixteen

LEAD IN FLINT WATER

GENERAL INFORMATION

- The amount of lead found in some Flint homes' drinking water could affect kids' health.
  - Even small amounts of lead can harm kids' health because they are still growing.
  - Adults are less likely to be harmed by the levels found in the water.
- Filter your drinking water using a National Sanitation Foundation (NSF)-approved filter.
  - You can receive a free a NSF-approved filter if you use City of Flint water.
  - Call 2-1-1 to find out where you can pick up a free water filter.
- Some filters can remove up to 99 percent of the lead in water when used properly. To be sure your filter is removing as much lead as it can, carefully follow the instructions that came with it.
  - Run only cold water through the filter.
  - Change the filter cartridge as often as the instructions say.
- Even after changes to the water system, it may take a while before lead levels in your home's water drop.
- Lead is hard to avoid completely. It can be found in water pipes and brass water faucets, old paint, in dirt, at some job sites, and in metal used for some hobbies.

There are a number of steps you can take to keep yourself and your family healthy. Use the tips below to learn more about how to stay healthy:

LEAD IN WATER

Although your water may be a different color sometimes, it is not caused by lead. It's important to remember:

- You can't see, smell, or taste lead in water.
- Lead won't change the color of your water.
- The only way to know what your home's lead levels are is by having your water tested.

LEAD IN BLOOD

- If your children live in Flint or go to school or childcare in the City of Flint, their blood-lead level should be tested.
- You should contact your doctor about testing.
- Testing is available for free at the Genesee County Health Department. Call 2-1-1 if you need help getting there.
- If you are pregnant or nursing, and you have tested negative for high blood-lead levels, it is safe to breastfeed.
- If you are pregnant or nursing and have tested positive for high blood-lead levels, talk to your doctor about the safety of breastfeeding.

TIPS TO KEEP YOUR HOME SAFE FROM LEAD

WATER FILTERS

- Get your water tested. It's free. Call 2-1-1.
- Use a water filter. Call 2-1-1 for a free filter.
- If you do not have a water filter, use bottled water for drinking and mixing formula.
- Use cold, filtered water for cooking.
- Wash fruits and vegetables with filtered water.
- If you must use unfiltered water, run the water for at least five minutes before you use it. To save time and water in the future, it's a good idea to fill up as many containers as you can once you've run your water for five minutes.

CLEANING

- Wash dishes, bottles and toys with unfiltered soapy water and dry before use.
- It is safe to use unfiltered tap water to mop floors and wipe down countertops.
- It is safe to wash clothes in your washer and dryer.
- Use door mats. Take your shoes off when indoors.
- Vacuuming carpets may pull more lead dust to the surface. Use a non-motorized sweeper to clean carpets.
- Clean windowsills and play areas often with paper towels and soapy water.

TIPS TO KEEP YOUR HOME SAFE FROM LEAD

IN THE BATHROOM

- Use filtered tap water to brush your kids' teeth.
- Adults can use unfiltered tap water to brush their teeth.
- You can use unfiltered tap water to shower or bathe, but don't let kids drink the water when they play in the tub.
- Studies done by the Centers for Disease Control and Prevention show that parents can continue bathing their children in the tub but bath time should be used for bathing only, rather than allowing children to play in the water for a long time.
- Lead will not cause rashes or other skin problems. However, if levels of chlorine or other cleaners are high in the water, it may cause itchy or dry skin (similar to what can happen when you swim in a pool).

CARING FOR PETS

- Use filtered tap water for your family pets' water bowls.
- You can use unfiltered tap water to bathe your pets.
- If you notice your pet acting differently than normal, contact your vet.

HEALTHY DIET

- Eat foods high in iron, calcium and vitamin C.
- Wash hands with soap and warm water before eating.
- If you need fresh and healthy food, call the WIC office at 810-237-4537, or for SNAP food assistance apply at www.michigan.gov/mibridges or visit your local Michigan Department of Health and Human Services office.

GOOD SOURCES OF IRON INCLUDE:

- Lean red meats, fish, and chicken
- Cereals with added iron
- Dried fruits (raisins, prunes)

GOOD SOURCES OF CALCIUM INCLUDE:

- Milk
- Yogurt
- Cheese
- Green leafy vegetables (spinach, kale, collard greens)

GOOD SOURCES OF VITAMIN C INCLUDE:

- Oranges, orange juice
- Grapefruit, grapefruit juice
- Tomatoes, tomato juice
- Green peppers

LEAD INFO

The Flint water response team is focused on the lead in water crisis. In additon to water, scientists have long been concerned about all sources of lead including lead paint, dust, soil, etc.

LEAD PAINT

- Homes built before 1978 likely have lead paint, both inside and outside.
- Old paint is the most common way that kids are exposed to lead.

DIRT

- If you live in the city, there may be lead in the dirt outside your home.
- Before 1996, gas and the exhaust from cars contained lead. More lead will be found in dirt in busy traffic areas.

DUST

- The dust in your home can have tiny amounts of lead from paint and dirt.

HOBBIES AND JOBS

- Solder, fishing sinkers, bullets, and stained glass framing materials are some items that may contain lead. You could also track home lead dust from your job site.

HAVE QUESTIONS?

- For more information about protecting yourself and your family from lead, visit www.michigan.gov/flintwater.
- To find out where you can get a free water filter, call 2-1-1.
- For a free water test, call 2-1-1.
- For more information about lead in your home and what you can do, call the Michigan Department of Health and Human Services at 1-800-648-6942.
- For information on how to help, visit www.helpforflint.com.

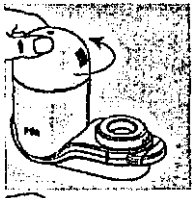
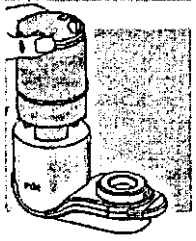
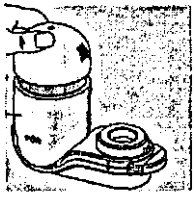
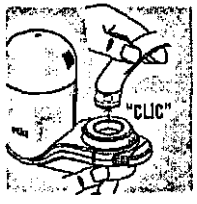
• Cómo Usar

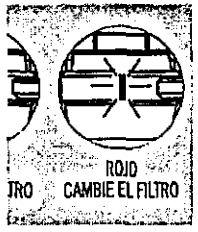
stema Vertical











ANTES DEL PRIMER USO, DEJE CORRER AGUA FRÍA DURANTE 5 MINUTOS EN LA POSICIÓN DE AGUA FILTRADA. NO DEJE CORRER AGUA CALIENTE POR EL FILTRO. .
Durante el lavado del filtro, es normal ver agua turbia y escuchar el sonido del agua expulsando el aire fuera del cartucho del filtro. Esta limpieza elimina cualquier particular suelta, lo que es normal.

Presione la palanca hacia abajo para obtener agua filtrada.

Si necesita más espacio en su lavabo o necesita cambiar el filtro, retire el dispositivo del grifo utilizando los botones blancos de Liberación Rápida. Para obtener más información, vea nuestro video instructivo en www.pur.com/install.

Para Seguridad, Cuidado y Uso Óptimos

No utilice con agua que sobrepase los 100°F/38°C, ya que esto podría dañar el filtro. Utilice solo con agua fría. Después de instalar un nuevo cartucho de filtro, deje correr el agua durante 5 minutos para lavarlo. Después, antes de cada uso, deje correr el agua a través del filtro durante 5 segundos para activar el filtro. Limpie el exterior de la cubierta del montaje del filtro con una esponja húmeda o paño suave. También puede utilizar un detergente suave. Utilizar cualquier otra cosa para limpiar el montaje del filtro podría resultar en daños a la unidad. Cambie su filtro cada 3 meses para un mayor rendimiento.

Garantía de Dos Años

Kaz (el Garante), garantiza su Unidad de Montaje para Grifo PUR para Filtrar Agua (FM-2000B, FM-3333B, FM-3333BNM, FM-3400B, FM-3500B, FM-3700B, FM-4000B, FM-4100B, FM-9000B, FM-9100B, FM-9400B, FM-9600B) por dos (2) años a partir de la fecha de compra (excepto para el cartucho de filtro el cual está garantizado por 30 días) contra todos los defectos en materiales y mano de obra, cuando se utilice en conformidad con el manual de usuario.

Si el producto resultara defectuoso dentro de dos años a partir de la fecha de compra, llame al 1-800-787-5463. El garante no asume ninguna responsabilidad por daños accidentales o consecuentes; por daños causados por uso indebido del producto o uso de cualquier accesorio no autorizado; ni de los daños resultantes del uso del producto con un grifo de agua defectuoso. En algunos estados no se permite la exclusión o limitación de daños incidentales o consecuentes; así que la limitación o exclusión anterior puede no aplicar a usted.

Esta garantía le otorga derechos legales específicos, y puede tener otros derechos legales que varían de un estado a otro. El sistema cumple con las regulaciones locales y estatales correspondientes.

En caso de necesitar servicio técnico o tener alguna pregunta sobre cómo utilizar su producto PUR, por favor contacte Servicio al Consumidor PUR llamando al 1-800-787-5463, o si reside en EE.UU. visite nuestro sitio web en www.pur.com.

TERRACYCLE

Puede reciclar completamente todos sus productos y empaquetado PUR, de manera gratuita a través de nuestra alianza con TerraCycle®. Únase a PUR Brigade® para reciclar sus productos viejos y ayúdarnos a crear un futuro más limpio. Por favor visite www.pur.com/recycle para obtener más información.

• Solución de Problemas

Los adaptadores no encajan / no permanecen conectados / se siguen cayendo.	• Verifique para asegurar que haya quitado la antigua arandela del aereador y que solo esté colocada la nueva arandela del adaptador. • Si los adaptadores incluidos no encajan bien, contacte Servicio al Consumidor PUR al 1-800-PUR-LINE (1-800-787-5463).
El agua se filtra alrededor de la tapa del filtro.	• Retire el cartucho de filtro y vuelva a instalarlo.
Flujo lento de agua en la posición de filtrado.	• Reemplace el cartucho del filtro.
El agua se filtra alrededor del adaptador y del grifo.	• Verifique que la arandela fue colocada sobre el adaptador del grifo instalado. • Asegúrese que el adaptador esté bien ajustado al grifo. • Asegúrese que la unidad esté bien ajustada al adaptador del grifo.
Dificultad para extraer el cartucho de filtro viejo al reemplazar el filtro.	• Retire la unidad del sistema de filtro del grifo al oprimir los botones de liberación rápida. • Retire la tapa. • Gire o tuerza lentamente el cartucho de filtro. Esto ayudara a aflojar el filtro

Especificaciones Técnicas:

CAPACIDAD DEL FILTRO:	100 galones (378 litros)/hasta 3 meses
FLUJO NOMINAL DE SERVICIO:	0.52 galones/minuto (2.0 litros/minuto) a 60 psig
TEMPERATURA MÁXIMA:	100°F (38°C)
TEMPERATURA MÍNIMA:	34°F (1°C)
PRESIÓN DE TRABAJO MÁXIMA:	100 psig (690 kPa)
PRESIÓN DE TRABAJO MÍNIMA:	20 psig (138 kPa)

Para que el sistema se desempeñe como se muestra en la Hoja de Datos de Rendimiento, es necesario reemplazar el filtro cuando exceda la capacidad del filtro (100 galones).

La prueba fue realizada bajo condiciones normales de laboratorio, el rendimiento real puede variar.

Los contaminantes u otras substancias eliminadas o reducidas por este filtro de agua no están necesariamente en el agua de todos los usuarios. No utilice con agua que sea microbiológicamente insegura, o de calidad desconocida, sin una desinfección adecuada antes o después de su paso por el sistema. Los sistemas certificados para la reducción de quistes se pueden utilizar en agua desinfectada que pueda contener quistes filtrables. Las personas que requieran agua de cierta pureza microbiológica deben consultar con su médico.
Los filtros de reemplazo pueden comprarse en la mayoría de las tiendas o en purwater.com.

Los Sistemas FM-2000B, FM-3333B, FM-3333BNM, FM-3400B, FM-3500B, FM-3700B, FM-4000B, FM-4100B, FM-9000B, FM-9100B, FM-9400B, FM-9600B han sido Probados y Certificados por NSF International conforme a las Normas 42, 53 y 401 NSF/ANSI para la reducción de declaraciones especificadas en la Hoja de Datos de Rendimiento.

2/2/16

- Team going back out to Sunridge apartments because they are receiving reports that not all tenants have received filters yet.
- NCCC are coordinated through the United Way.
- SBA #'s must be 40% or more and current information does not meet this threshold. Local EOC will contact chamber of commerce to review numbers and ensure nothing was missed.
- Still need filter replacement plan and POD transition plan.
- Need to account for water donations in our distribution numbers to ensure we are projecting enough for sustained distribution and have a realistic number for needs.
- Still around 2,400 homes without contact (this number is different from the numbers on the local call). Need to determine what efforts have been made to make contact, including actions and dates.
- Local EOC has all donation information (e.g. food bank, etc.).

517-420-2714

2/4/16 – evening

- MDOT making permanent signs for stations 3 & 6 (both portables at 6 were out of service).
- DHHS trying to establish plan for individuals whose homes tested at or above the action lead level and who do not have transportation to get a lead blood test. Local EOC was contacted to see if they could get in touch with bus system to ask about obtaining bus passes for the teams to carry and provided to individuals without transportation. Jay provided update at Distribution meeting stating that he was going to wait until the next morning to speak with Jamie from the United Way because he thinks they have already purchased bus vouchers and may be able to help. If not, Jay will contact MTA himself.
- Email from governor's office with three questions which still need to be addressed. Email initially went to the SEOC and the JIC. Kyle was going to follow up with the JIC to see if they are addressing the email. The email was also forwarded to DHHS (DCH) who sent it to their CHECC for a response, but one hasn't be received yet.

2/6/16

- Received email from Chris DeVriendt regarding MDARD stating that they are being passive in relation to animal response activities, among other issues. Forwarded email to MDARD for response. Response provided.
- Received response back for DHHS on the Tele-town hall questions from the governor's office. The third question remains unanswered, but a response to the first two was provided.
- Received email from Karen Town regarding a potential scam in Flint. Forwarded email to Operations. Asked Karen to provide an update when she receives additional info. Operations decided to wait to forward the information until additional information received that confirms it as a scam.

City of Flint Water Department

BOIL WATER ADVISORY NOTICE LIFTED

February 12, 2016

It is no longer necessary to use boiled filtered water for drinking or cooking. Under the current water issues involving lead, all residents should continue using filtered water or bottled water for drinking, cooking, washing dishes, making ice, brushing teeth, and preparing food.

As a precautionary measure, on February 9, 2016 you were notified of the need to boil water used for consumption. A transmission water main break caused issues with water system pressures, which provided an opportunity for a large portion of the system to become contaminated with bacteria. The water main break was isolated, and system pressures were restored to operational levels in the early evening on February 9, 2016. Bacteria samples were collected from several locations located within the area of the boil water advisory on February 10th and 11th. All samples collected were absent of coliform bacteria, and as a result the boil water advisory has been lifted.

Individuals in the area affected by the boil water notice should replace their filter cartridges. Trapped air and sediment were likely introduced to the water system, and these issues can affect the performance of the filter to reduce lead.

Please share this information with all other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand.

For more information please contact the City of Flint Water Department at 810-766-7202.

Just a follow up. Attached (in MiCIMS) is the 2016 Flint Water Response MDHHS Request List. This matrix is utilized by UCG to track these request. Michelle K. has created RESOURCE/TASK (several) request based on the IAP Objectives, which is attached and also in MICIMS. It was decided yesterday to take the updates from the comment section off the Matrix, and add them to the appropriate RESOURCE REQUESTs in the comment section. The purpose is to provide you with the status of the request, not to request action. Hopefully this did not cause any confusion. We will continue to update these. Our next Matrix review is tomorrow.

Subject: Daily Summary

Capt. Kelenske,

Below is a summary of events for today. Peter Manning has reviewed the Sit Rep. Ben and Nat are working on an updated version to today's Governors Report and will pass it along once it is available.

Update 2/16/16 – 43rd Day (42nd Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Ensure adequate quantities of supplies to support operations.
- Continue door to door/Flint Water Response Teams (FWRTs), ARC only.
- Prepare appeal on denial of Category B under the Presidential Emergency Declaration.
- Shift Water Response Teams operations to a targeted effort to provide filters into homes where data shows filters have not been provided.
- Work on plan for Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery - recovery plan/transition of PODs.

Status on Governor's request letter to the President:

- Appeal denial received on the Major Disaster Declaration. Nothing more can be done on this.
- Denial of Individual Household Program and Category B under the Emergency Declaration received January 22, 2016. We have 30 days to appeal and EMHSD staff is gathering information for the appeal.

Attached:

1. Sit Rep #42.

Key items for tomorrow to note are:

- Team Priority Scheduled Tomorrow: Water distribution and supplies requested.
- 5 American Red Cross Teams scheduled for Wednesday, February 17, 2016.

Items to Note

- A Congressional/Legislative conference call was held today at 2:30 PM.

- MDEQ commenced development of a plan to re-deploy the Sentinel water sampling collection crews to achieve 402 sampled sites and 60 lead service lines.
- Southern Baptist Disaster Relief took over rapid response deliveries from NCCC on 02/16/2016 with five teams in the field.
- Local EOC IC is coordinating with MSU College of Veterinary Medicine and MDARD for development of blood lead level testing program for companion animals.
- GIS is generating a list of apartment buildings receiving water from the City of Flint and how many times each building has been visited.
- GIS generating a list of total residences that potentially will be using a water filter that use water from the City of Flint.
- DTMB Real Estate researching options for a 200,000 sq. ft. warehouse for long term distribution plan, preferably on the bus line.

Unified Coordination Group (UCG):

- CDC will meet with state on rash complaints/test results.
- Attended Command/Control subgroup this afternoon. Group would like to change the name to coordination.
- Important to include state reps on each subgroup.

Local EOC:

- Sentinel monitoring teams collected 273 water samples at yesterday.
- Elevated lead and copper task force were out in the field today.
- Local EOC IC attended Community Stakeholders meeting.
- Local EOC Liaison attended Community Stakeholders and long term distribution process meeting.

Subject: FW: Water Distribution Site

All,

This information needs to completed as soon as possible, the secretary needs the information by 7:15 tomorrow.

--Name and title of the lead person at the distribution site. We're looking to identify a point person to explain the distribution operation to the Secretary and answer any questions she has.

--How many National Guard troops are working at water distribution sites across town.

--Number of water distribution sites

--Why fire stations are the preferred distribution site

--Data, including the number of palates of water (or water bottles) available at that site for distribution, number of filters available for distribution

--Any limitation on distribution? We're aware of the 1 case of water/person/day rule, but want to know of any others

Subject: RE: Water Distribution Site

Kate and Earl,

Thanks for your help on this. I talked with the Secretary's staff and we're looking to confirm this visit from 11:35 - 12:10pm. Its totally ok if it takes less time. Along with the address, we're looking to get the following answered today, by 4:30pm at the latest please:

--Name and title of the lead person at the distribution site. We're looking to identify a point person to explain the distribution operation to the Secretary and answer any questions she has.

--How many National Guard troops are working at water distribution sites across town.

--Number of water distribution sites

--Why fire stations are the preferred distribution site

--Data, including the number of palates of water (or water bottles) available at that site for distribution, number of filters available for distribution

--Any limitation on distribution? We're aware of the 1 case of water/person/day rule, but want to know of any others

The lead person should also be able to answer questions about resident feedback and reactions to the water distribution program.

Thanks,

Lauren Underwood

Subject: 2-1-1 Update Flint Water Response for Tuesday, February 16, 2016

This is the daily 2-1-1 summary on the Flint Water Response for Tuesday, February 16, 2016

GENERAL INFORMATION:

- **Invitation to visit the Central Michigan 2-1-1 Center: Jennie Pollak, Manager of Central Michigan 2-1-1 at LifeWays Community Mental Health in Jackson, is extending an invitation for Flint Water Response partners to visit the center and have a first-hand experience observing 2-1-1 in action. If you are interested, please email Tom Page at tpage@uwmich.org.**

- **US Surgeon General Vice Admiral Vivek Murthy is in Flint this week to meet with officials and community members. MLIVE reports there will be a meeting tonight (2/16) at 6 pm at Mount Carmel Baptist Church, 1619 W. Pierson Road at to talk to residents. The session will include education on the effects of lead on the body and there will be an opportunity for residents to ask questions.**
  Full news story at:

http://www.mlive.com/news/flint/index.ssf/2016/02/us_surgeon_general_talks_flint.html#incart_river_index

- ***There is an informational meeting on one of the class action lawsuits tonight, Tuesday, February 16, from 6:30 pm – 8:30 pm at 432 N. Saginaw Street, Flint, MI in the North Bank Grand Ballroom at University of Michigan Flint Campus. More information at www.flintwaterclassaction.com. The web site is operated by one of the law firms filing a suit.***

CALL VOLUME:

Central Michigan 2-1-1 was able to handle entire volume of Flint calls today with support from management and supervisory staff during the few peaks of high call volume.

SPECIAL NEEDS/REQUESTS

☐ **A private donor organized the distribution of 200 FlowTec shower filters at Berston Field House. Demand was extremely high and all filters were taken within 15 minutes. The distribution spurred a large number of calls to 2-1-1 and affirmed the unmet demand for shower filters. At least one from a homebound resident asking to have a shower filter delivered. Callers are expressing tremendous frustration about not feeling safe to bathe, one caller said, *"You can't boil enough bottled water to take a hot bath."* As noted in past updates, Good360 has identified a corporate donor that is willing to provide shower filters below cost if there is interest in addressing this demand.**

RUMOR/SCAM CONTROL

☐ Michigan 2-1-1 received a report that DHHS is looking at rehousing options for residents in housing that 'environmental investigators' HAVE deemed hazardous for human habitation. CAN A CONTACT AT DHHS INVESTIGATE AND REPORT BACK TO MICHIGAN 2-1-1 ON THE VERACITY OF THIS RUMOR?

☐ The Attorney General's Office is contacting organizations that are soliciting support for Flint, according to one community partner, to verify their legitimacy and prevent scams or misuse of funds. Is there a contact at the AG's office who can provide a list of vetted organizations to answer questions about the legitimacy of suspect organizations?

☑ A community agency in Flint notified Michigan 2-1-1 that a client said they received a referral from 2-1-1 to a clinic asking for payment to do a child lead screening test. Central Michigan 2-1-1 verified there are no children's lead testing clinics in the database that charge a fee. The only locations in the 2-1-1 database are coordinated by the Health Department, either onsite or at various community locations. As of this time adults are charged a fee for lead testing. 2-1-1 has asked the community agency to seek additional information to assist with 2-1-1's investigation.
UPDATE: 2-1-1 has clarified that, while lead testing for children is free, clinics may ask for insurance information in order to bill the insurer for testing, but there should be no cost to the patient.

UNRESOLVED

☐ From 1/18/16: One of the top questions is when will canvassers be in specific neighborhoods. Callers would like to know so they can arrange their schedules. Is this information available for 2-1-1 to share?

☐ From 1/26/26: There is high demand for shower filters due to reports of rashes and potential lead risk to children from using water to bathe. 2-1-1 is telling callers that shower filters are available for purchase through home improvement stores, based on a google search. Are shower filter donations a request that can be coordinated through Good360 or another supplier?
1/28/16 UPDATE: The Michigan 2-1-1 office passed on the demand for shower filters to Good360, which is looking into options to meet this need.
2/10/16 UPDATE: Per DHHS, currently there are no direct efforts by the state to begin coordinating shower filters as the current guidance continues to indicate that it is safe to bathe and shower in unfiltered water.

☐ From 2/11/16: Dentists concerned about impact of drinking unfluoridated bottled water on the long term dental health of Flint children. Michigan Association of United Ways reported hearing this issue at a meeting with pediatricians and dentists. One suggestion to address this was providing the school-based fluoride treatments.

☑ From 2/11/16: Community partners report Flint residents concerned about 2-1-1 sharing their personal information. Service agencies in Flint report some residents are afraid to call 2-1-1 or choose the Flint Water prompt due to concerns that 2-1-1 is tracking and reporting their needs and personal information to government agencies.
Update 2/12/16: 2-1-1 is reviewing the language of the phone prompts and hold messages to determine the best way to reassure callers that 2-1-1 calls are confidential and 2-1-1 will *never* release information without first receiving permission from the caller.

☐ From 2/12/16: 2-1-1 has received several calls from residents seeking information about the safety of produce they canned at home using unfiltered city water prior to the emergency declaration. Losing this food could affect household food security. CAN SEOC or MDHHS provide guidance about whether this food is safe to consume?

☐ From 2/15/16: Good360, a 501(c)(3) nonprofit that coordinates bulk donations from corporate partners, has identified a potential source of high-capacity water filters for restaurants, churches, shelters and other businesses that are not currently eligible for free water filters. These are filtering systems, not faucet filters. *Good360 is working to verify these filters meet NSF standards for lead and copper, but is asking for feedback if there is a need by local businesses and agencies for this kind of filtering option.*

☐ **From 12/15/16: Callers continue to ask about relocation assistance. 2-1-1 is informing residents that there is no government relocation assistance available at this time. We have identified several private initiatives to assist with relocation, but have been unable to verify the legitimacy of any of these efforts. Can the Attorney General's office or another agency help investigate if any of these efforts are legal and legitimate?**

Subject: 2-1-1 Update Flint Water Response for Monday, February 15, 2016

This is the daily 2-1-1 summary on the Flint Water Response for Monday, February 15, 2016

NOTE: Attached to today's summary is a copy of the PDF reference document 2-1-1 partners use for Flint Water calls. This document is updated daily, sometimes several times a day. 2-1-1 agents access this through a shared DropBox file that ensures all 2-1-1 staff have immediate access to the most current information.

GENERAL INFORMATION:

- **There will be an informational meeting one of the class action lawsuits** on Tuesday, February 16, 2016 from 6:30 pm – 8:30 pm at 432 N. Saginaw Street, Flint, MI in the North Bank Grand Ballroom at University of Michigan Flint Campus. More information at www.flintwaterclassaction.com. The web site is operated by one of the law firms filing a suit.
- **United Way Worldwide announces details of Beyoncé's Formation World Tour benefitting Flint** with proceeds to support United Way of Genesee County's work to help the people of Flint dealing with the Flint Water Crisis. Fans will have an opportunity to donate to the Flint Water Fund after purchasing their tickets. Every $10 donated is an entry for an upgrade to the best house seats at each concert. US Tour tickets go on sale February 22nd.

CALL VOLUME:

Central Michigan 2-1- 1was closed today for the Presidents' Day holiday. SW Michigan 2-1-1 partner, which regularly handles after hours and weekend calls for Central Michigan, reported a few waves of calls that pushed wait times to approximately 10 minutes for short periods.

Call summary for the week of February 8-14

- 777 callers used the Flint Water prompt to reach a 2-1-1 agent.
- 1009 referrals were provided (1.3/caller) and there were 30 unmet needs recorded.
    - The majority of calls came from zip codes 48504 and 48505
    - The most common requests were for Drinking (Bottled) Water, Water Filters, and Tap Water Testing.
    - 17 calls were to donate or volunteer.

SPECIAL NEEDS/REQUESTS

- **American Sign Language interpretation may be available for Flint-area events** through a professor at Mott Community College. Email Tom Page at Michigan 2-1-1 for contact information: tpage@uwmich.org.

☐ **Good360, a 501(c)(3) nonprofit that coordinates bulk donations from corporate partners, has identified a potential source of high-capacity water filters** for restaurants, churches, shelters and other businesses that are not currently eligible for free water filters. These are filtering systems, not faucet filters. ***Good360 is working to verify these filters meet NSF standards for lead and copper, but is asking for feedback if there is a need by local businesses and agencies for this kind of filtering option.***

RUMOR/SCAM CONTROL

- A community agency in Flint notified Michigan 2-1-1 that a client said they received a referral from 2-1-1 to a clinic asking for payment to do a child lead screening test. Central Michigan 2-1-1 verified there are no children's lead testing clinics in the database that charge a fee. The only locations in the 2-1-1 database are coordinated by the Health Department, either onsite or at various community locations. As of this time adults are charged a fee for lead testing. 2-1-1 has asked the community agency to seek additional information to assist with 2-1-1's investigation.

☐ Callers continue to ask about relocation assistance. 2-1-1 is informing residents that there is no government relocation assistance available at this time. We have identified several private initiatives to assist with relocation, but have been unable to verify the legitimacy of any of these efforts. **Can the Attorney General's office or another agency help investigate if any of these efforts are legal and legitimate?**

- https://www.facebook.com/IamShiftingParadigms/posts/821354508011097
- https://pages.giveforward.com/emergency/page-42jxcw4/
- http://www.plumfund.com/charity-fundraising/help-flint-mi-residents-relocate

UNRESOLVED

☐ **From 1/18/16:** One of the top questions is when will canvassers be in specific neighborhoods. Callers would like to know so they can arrange their schedules. Is this information available for 2-1-1 to share?

☐ **From 1/26/26:** There is high demand for shower filters due to reports of rashes and potential lead risk to children from using water to bathe. 2-1-1 is telling callers that shower filters are available for purchase through home improvement stores, based on a google search. **Are shower filter donations a request that can be coordinated through Good360 or another supplier?**

1/28/16 UPDATE: The Michigan 2-1-1 office passed on the demand for shower filters to Good360, which is looking into options to meet this need.

2/10/16 UPDATE: Per DHHS, currently there are no direct efforts by the state to begin coordinating shower filters as the current guidance continues to indicate that it is safe to bathe and shower in unfiltered water.

☐ **From 2/11/16: Dentists concerned about impact of drinking unfluoridated bottled water** on the long term dental health of Flint children. Michigan Association of United Ways reported hearing this issue at a meeting with pediatricians and dentists. One suggestion to address this was providing the school-based fluoride treatments.

☐ **From 2/11/16: Community partners report Flint residents concerned about 2-1-1 sharing their personal information.** Service agencies in Flint report some residents are afraid to call 2-1-1 or choose the Flint Water prompt due to concerns that 2-1-1 is tracking and reporting their needs and personal information to government agencies.

Update 2/12/16: 2-1-1 is reviewing the language of the phone prompts and hold messages to determine the best way to reassure callers that **2-1-1 calls are confidential and 2-1-1 will *never* release information without first receiving permission from the caller.**

☐ **From 2/12/16:** 2-1-1 has received several calls from residents seeking information about the safety of produce they canned at home using unfiltered city water prior to the emergency declaration. Losing this food could affect household food security. **CAN SEOC or MDHHS provide guidance about whether this food is safe to consume?**

SEOC FOIA Print Plan
Tips for Printing

Print Plan – Thru Friday, February 19

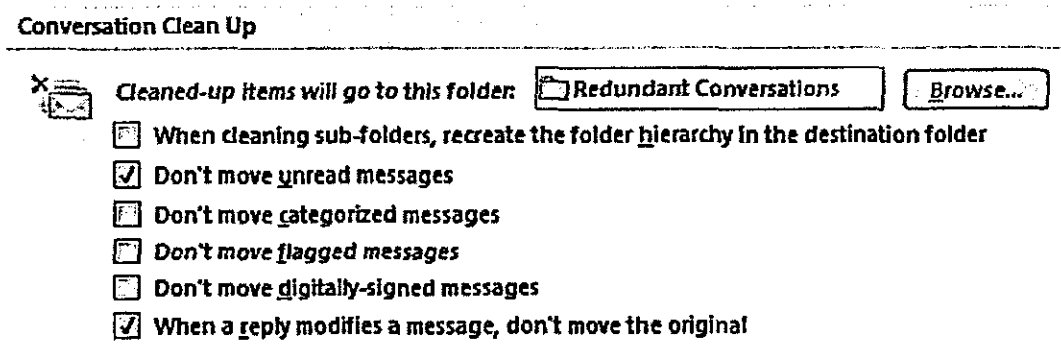
- When printing emails/documents, make sure to **change your default printer** to the following printer:
  - EOC_F1COMM_RI3054 on EOC084M1OAPF502 (located in the Communications Room)
  - Additional helpful hints for each document type below
- SEOC IT staff will set up to "Print to Hold" for each PC in the SEOC.
- Be sure to print/copy all documents **Single Sided.**
- Advise the SEOC Operations Section Chief prior to printing. **Do not interrupt someone else's print job.** The SEOC Operations Section Chief will ensure coordinated printing efforts.
- When at the printer, select Print > Select your agency name > Select All > Print.
- Test printing a couple of emails before printing out a large quantity.
- Once all items have been printed/copied, give all to Oralya Garza or Jodie Frese (daily staff) located just outside Governor's Conference Room A in the SEOC. **Do not go direct to FOIA Unit staff working in the conference room.** They will reach out if they have any questions.
- Make sure to clip or rubber band your information to keep separate from others information being turned in.
- Sources: Emails, Documents, S drive, Desktop, Cell phone/text messages, Copies of handwritten notes, DCDS, Invoices, Photos
- SEOC IT Staff will be responsible for printing all documentation from MI CIMS.
- For any IT issues, contact IT Staff in the SEOC. This is usually Jaclyn Barcroft or Rich Law. GIS staff should be contacted only if both of them are unavailable.

How to Recover Deleted Emails

- In Outlook, select the Folder Tab.
- On the top, select Recover Deleted Items.
- Recover any items pertinent to the Flint Water response.
- You may need to select various folders on the left side in order to recover everything possible.

How to Clean up Redundant Email Conversations

- In Outlook, click on the File tab.
- Click Options.
- Click Mail.
- Under the Conversation Clean Up section, change the location where conversations will go. Select Browse. Click on "Cabinet" in the list. Select "New Folder" and name it "Redundant Conversations." Ensure the options are identical to the below:



- In Outlook, on the Home tab, in the Delete group, click Clean Up.
- Select Clean Up Folder. Click Clean Up Folder.

SEOC FOIA Print Plan
Tips for Printing

Tips for Printing Emails

- For State Agency SEOC personnel, **only** print emails from your SEOC email address.
- Print emails by selecting **up to 100 at a time** (select one, hold shift, click on the last one).
    - Select the File Tab > Print > Click Print Options button > Select Memo Style and Check Box for "Print Attached Files" (bottom left corner of pop up) > Select Print
- Attachments will not show up in the preview, but will print out with the emails

Tips for Printing Documents from Desktop, S Drive, My Documents (wherever files are saved)

- Make sure documents are formatted correctly for printing prior to moving to the next steps (Excel files tend to be the most troublesome).
- Sort documents in folders by "Type".
- Highlight "like" file types (Adobe Acrobat Document, Microsoft Excel Worksheet, etc.).
- Right click, select Print.

Tips for Printing Text Messages

- Android
- iPhone

Email – After All Your Files are Printed

- Send a CC to the following email address when sending items from the SEOC:
    - MSP-FOIAProject@michigan.gov
    - For State Agency SEOC personnel, **only** CC emails from your SEOC email address
- Send all documents created to the same email address

Subject: Field team statistics for February 16, 2016

AS OF **February 16, 2016** AT 1700 USING DATA FROM FLINT WATER RESPONSE TEAMS, POD DISTRIBUTIONS, AND GENESEE COUNTY HEALTH DISTRIBUTION DATA.

NOTE: PLEASE REMEMBER THAT PAPER DATA AND DATA ENTRY FROM PREVIOUS DAYS CONTINUES TO COME IN AND WILL BE INCLUDED IN THE TOTALS AS IT IS RECEIVED.

We are tracking **38730** residential parcels that the City of Flint has identified as non-vacant (including Franchise). Of those:

- **38447 (99.3%)** of the parcels have been engaged as part of response efforts
- **30045 (77.5%)** of the parcels have been confirmed have some form of filter
- **12311 (31.8%)** of the parcels have volunteered for water testing

We are also tracking that there are 30188 active water subscribers (metered service lines) in the city. When consolidated down and filtering out only residential there are **27168** residential parcels that have the ability to use the Flint Water System. Of these

- **27088 (99.7%)** of of the parcels have been engaged as part of response efforts
- **24087 (88.6%)** of the parcels have been confirmed have some form of filter
- **10937 (40.3%)** of the parcels have volunteered for water testing

Please let me know if you need anything else.

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	02/09/2016 08:00:00
Operational Period End:	02/16/2016 08:00:00
Situation Report No.	42
SEOC Status:	Full
SEOC Hours of Operation Begin:	02/16/2016 08:00:00
SEOC Hours of Operation End:	02/16/2016 20:00:00

Executive Summary

SEOC Update:
Accomplished today (February 16, 2016):

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Resources.
- Public information control.

Logistics:
- Fielded resource requests.
- Fielded Rapid Response requests.
- Fielded Governor's office request.
- Facilitated distribution team calls.
- Worked on potential donated warehouse opportunities.

JIC:
- Created a media monitoring report and looked for misinformation.
- Updated a Daily JIC Activities log to catalog actions completed for the day and planned news release strategies for the week.
- Drafted and intended to issue a news release about the National Guard rotating soldiers in the city of Flint.
- Continued routing public information materials for approval, including fact sheets on recycling, testing water, and keeping Flint kids safe.
- Additional translated news releases were received and routed.
- Created a community outreach spreadsheet to keep track of meetings occurring in the city of Flint.

Recovery Branch:
- Attended UCG Brief, SEOC State Agency Briefing Meetings, Distribution Process Meetings.
- Continued identifying addresses that are unable to be matched with parcels in city's parcel data set.
- Team Priority Visited Today: 5 teams in the field - Water Distribution – turned 211 information over to local EOC and Southern Baptist Teams.
- Team Priority Scheduled Tomorrow: Water distribution and supplies requested.
- 5 American Red Cross Teams scheduled for Wednesday, February 17, 2016.
- Total homes visited:
  - 24,879 (round 3 total)*
  - 1,023 (today).
- Water cases (liters calculated by multiplying # of cases x 12):
  - 178,116 liters or 14,843 cases (round 3 total)*
  - 8,076 liters or 673 cases (today).
- Replacement cartridges:
  - 6,331 (round 3 total)*
  - 609 (today).
- Faucet filters:
  - 7,792 (round 3 total)*
  - 90 (today).

*Totals updated due to changes in previous data.

Planning Section:
- Developed and approved Sit Rep #42.
- Updated burn rates and projection costs, per request.
- Participated in daily UCG, state agency, and distribution process meetings.
- Developed daily Governor's Report.

Operations Section:
- Participated in Long Term Recovery planning meeting.
- Participated in Unified Coordination Group briefing.
- Facilitated Command/General Staff/SEOC briefing.
- Participated in Distribution Process meeting.
- Assisted in developing print plan for FOIA request.
- Assisted state agencies in handling requests from Governor's office, media, etc.
- Warehouse Numbers as of 1800:

□ Water (liters):
• 828,374 liters or 69,031 cases.
□ Filters (faucet):
• 47,132.
□ Replacement cartridges:
• 402,782.
□ Test Kits (prepped):
• 35,854.
• PODs (Number as of 1700 2/15):
□ Water (cases):
• 59,184 liters or 4,932 cases.
□ Filters (faucet):
• 162.
□ Replacement Cartridges:
• 453.
□ Test kits:
• 131.

Finance Section:
• Gathering information for meeting with State Budget Office.
• Update Category B Financial Spreadsheet.
• Reviewing donation information for potential as future match.

GIS Branch Updates:
• Update MDEQ water testing layer.
• Generate a list of apartment buildings receiving water from the City of Flint and how many times each building has been visited.
• Generate a list of total residences that potentially will be using a water filter that use water from the City of Flint.
• Compare and contrast 2016 Flint parcel layer with 2015 Flint parcel layer.
• Edit Flint Water Resource Team field data to parcel.

DTMB:
• Provided a dumpster for the Pierson Rd. Warehouse.
• Provided seven (7) iPads for DEQ sampling teams.
• DTMB to provide a truck and driver for the Food Bank for Thursday through Saturday.
• Procured a replacement fork lift battery for the Pierson Rd. Warehouse.
• Addressing issues with Pierson Rd. Warehouse with landlord, MDOC and 7th Day Adventist.
• DTMB Real Estate researching options for a 200,000 sq. ft. warehouse for long term distribution plan, preferably on the bus line.

DHHS-CH (weekly):
• The CHECC remains activated at a Level 2, and continue to staff the hotline Monday through Friday to answer any lead health-related questions referred by 2-1-1 in support of the GCHD. The CHECC continues to provide representation to the UCG to facilitate communication with federal partners.
• The CHECC met with senior MDHHS leadership, UCG representatives and team members that have been supporting GCHD Case Management efforts today to continue planning efforts for lead testing and case management activities going forward.

DEQ:
• Continued documenting compliance with EPA Emergency Administrative Order and second EPA request.
• Reviewed incident objectives to reflect Director's priorities for upcoming week.
• Began developing a plan to re-deploy the Sentinel water sampling collection crews to achieve 402 sampled sites and 60 lead service lines.
• Continued monitoring and mapping of school fixture upgrade/replacements.
• Began planning for next phase of testing and data collections.

Unified Coordination Group (UCG):
• CDC will meet with state on rash complaints/test results.
• Attended Command/Control subgroup this afternoon. Group would like to change the name to coordination.
• Important to include state reps on each subgroup.

Local EOC:
• Sentinel monitoring teams collected 273 water samples at yesterday.
• Elevated lead and copper task force were out in the field today.
• Local EOC IC attended Community Stakeholders meeting.
• Local EOC Liaison attended Community Stakeholders and long term distribution process meeting.

Injuries:
• None reported today.

Incident Response/Recovery Priorities/Objectives

(Objectives are in order of priority with original objective number attached)

1. Ensure all households within impacted community have required resources and are included in DEQ water sampling plan.
12. Approve and begin implementation of a comprehensive long term recovery and transition plan.
11. Ensure accurate tracking and accounting of all donations and expenditures.
2. Ensure accurate tracking and accounting of all commodities.
3. Continue to improve and maintain public information processes and strategies with all partner agencies.
8. Maintain coordination between partner agencies and organizations to include FEMA IMAT, FWICC, and the US Department of Health and Human Services Unified Coordination Group (UGC).
9. Continue to enhance situational awareness and common operating picture of all activities.
7. Gather, analyze, and disseminate GIS data to develop products for future planning.

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Feb. 16.

State agencies at the JIC included the Michigan State Police, Michigan National Guard, and Departments of Environmental Quality, Health and Human Services and Natural Resources. The Genesee County Sheriff's Office and American Red Cross were also present.

Tasks accomplished:
• Media hotline staff answered less than 10 emails and phone calls, ranging from commodity distribution trends at the Water Response Sites to inquiries about volunteering in the city of Flint.

- Created a media monitoring report and looked for misinformation.
- Updated a Daily JIC Activities log to catalog actions completed for the day and planned news release strategies for the week.
- Drafted and intended to issue a news release about the National Guard rotating soldiers in the city of Flint.
- Continued routing public information materials for approval, including fact sheets on recycling, testing water, and keeping Flint kids safe. Additional translated news releases were received and routed.
- Created a community outreach spreadsheet to keep track of meetings occurring in the city of Flint.

Agriculture and Rural Development (MDARD)

MDARD's field activities for 2/12/16 included:
- 15 assessments conducted (6 initial, 9 follow-up and 2 second follow-up).
- 5 water samples collected.
- 6 water sample requests/appointments were scheduled.

As of 2/5/16, MDARD has completed initial water assessments at all food businesses in the high risk area and has conducted a total of 371 assessments (280 initial/ 91Follow-up). The compliance rate is 77.63%. 242 water samples have been collected and 41 are currently scheduled.

Also followed up with general information regarding testing of Pb in companion animals in response to question from DEQ desk.

Completed request from MSP planning regarding closures of food establishments as result of non compliance, see below:

I will be at the SEOC on Wednesday and follow up with Drs. Averill and Frank regarding Genesee county companion animal information.

American Red Cross (ARC)

The American Red Cross deployed 5 Water Response Teams on Tuesday, 2/16/16.

The Volunteer Reception Center was operating today from 9am to 5pm, and the plan is for those hours to continue daily, through Sunday.

A limited number of water bottle recycling kits were assembled today.

Civil Rights (MDCR)

Continue to monitor media and state agency activities for issues impacting underrepresented, at-risk, and populations with barriers to services and information. Informed senior leadership of current activities and concerns.

Community Health (MDCH)

The CHECC remains activated at a Level 2, and continues to staff the hotline Monday through Friday to answer any lead health-related questions referred by 2-1-1 in support of the GCHD. The CHECC continues to provide representation to the UCG to facilitate communication with federal partners.

Dr. McFadden reported that to date there is no conclusion regarding the cause of rashes that have been reported, no common presentations on interview. Epidemiological investigations are on-going. A dermatologist has offered to do evaluations of individuals with rashes at no charge. Dr. McFadden's team will schedule the appointments and MDHHS -Human Services Representative is working with the local EOC to determine a transportation plan for these individuals if required. EPA test results of the water from the individuals' homes are expected today.

Shower filters are only NSF/ANSI certified for chlorine. Contacted makers of the KDF filters which are used on showers and was informed that due to the high flow rate of showers, the water is not in contact with filters long enough so they are not really designed for more than cosmetic purposes.

MDHHS continues to provide volunteers to accompany the MDEQ High Lead Home Teams.

Corrections (MDOC)

MDOC began staffing the second warehouse 7 days/week 10-6 effective today. MDOT is dedicating 2 employees to the effort. DTMB continues to dedicate 2 trucks with drivers.

The building owner of Warehouse 2 restricted access to an unsafe area (compressor room). A padlock w/chain and signage was used.

MSP dispatched a unit to Warehouse 2 for an abandoned vehicle with busted windows in the parking lot. The vehicle was not stolen and the issue was turned over to the city PD for disposition.

A temporary replacement battery will be delivered tomorrow for the forklift at Warehouse 2 until the permanent replacement arrives Thursday or Friday.

Met with FEMA VAL regarding safety concerns at Warehouse 1.
-Security staff to restrict access
-Propane storage areas
-Exhaust fumes in warehouse
-Safety Vests
-Floor tape designating machine and pedestrian areas
-First Aid and AED
-Dust Masks

We are addressing the issues and will correct them. A follow up will be in the next Sit-Rep.

MDOC will provide a Truck and Driver for the Flint Food Bank for Wednesday, February 17, 2016.

MDOC continues to keep trucks dedicated to delivering to individual POD's and covering Rapid Responses for PODs that get to a critical level. PODs remained well supplied throughout day and will continue to be well supplied moving forward.

We are continuing to work with Finance and MDOC assets to capture total employee payroll information and expenditures.

MDOC continue to staff the SEOC from 0800-2000, 7 days/week. Mike Farmer and Bridget Spencer are managing the Recovery Branch of the SEOC.

403 DEQ and 0 MDARD test kits were delivered from Flint to Lansing today.

Education (MDE)

MDE has a request from Planning to determine if any school days or instructional time has been lost due to the Flint water situation. We have reached out to GISD with a request for this information. MDE has received a request from the MEA Region Director for training of teachers of students impacted by Flint water situation.

MDE continues to work with MSD on faucet replacement and re-replacement with a new target date of 24 February for completion.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities today:

Continued documenting compliance with EPA Emergency Administrative Order and second EPA request.

Reviewed incident objectives to reflect Director's priorities for upcoming week.

Began developing a plan to re-deploy the Sentinel water sampling collection crews to achieve 402 sampled sites and 60 lead service lines.

Continued monitoring and mapping of school fixture upgrade/replacements.

Began planning for next phase of testing and data collections.

Licensing and Regulatory Affairs (LARA)

Participated in briefings and updated the LARA Executive Team.

LARA continues to monitor DEQ's test results for Health Care, Child Care, Adult Foster Care, HHS and MDE facilities and Schools.

Faucet Project information is being prepared for the affected facilities. LARA continuing efforts to plan and schedule faucet replacements for Flint facilities.

LARA is working with MDOC to track and store incoming material at the warehouse.

Translation services for various documents continue to be provided as needed - these include Spanish, Arabic, Mandarin, Hmong and American Sign Language.

Ongoing discussion regarding coverage of state regulated facilities and elimination of duplication of effort with state agencies.

Arrangements in progress for assistance to various ethnic communities to provide services.

Military and Veterans Affairs (DMVA)

Commanders Situation Report (SITREP)

1. DTG: 1612002016.

2. UNIT: Points of Distribution (PODs), TF FLINT (1-125 IN).

3. POC: Ssg Gazzeny, Darryl L ; Email: armyinfantry31@yahoo.com.

4. PRESENT LOCATION: Genesee County Local EOC, 1101 Beach St., Flint, MI, 48502.

5. SITUATION OVERVIEW: 1-125 IN has Soldiers deployed to the Flint Water Crisis in support of Distribution Operations at the Points of Distributions (PODs). Daily operations consist of receiving, tracking, and issuing out water, filters, replacement filters, and water test kits.

6. OWN SITUATION DISPOSITION /STATUS: Currently 1-125 IN has Soldiers on ground supporting the mission.

7. OPERATIONS: Operations for the next 24 hours are to sustain water/filter distributions throughout the 5 designated fire stations and track all distribution incoming and outgoing through the PODs.

a. Signs have been printed off for the POD Buildings. Requesting approval to get the signs laminated from the purchasing office.

1.) TF Flint OIC, 2LT Benke has a meeting on 16FEB2016 with Calix Martinez in the city of Flint Plans and Marketing office to have signs designed and printed.

b. Soldiers are preparing for the unit change at the PODs.

1.) 1-125 IN conducting relief in place within next 24 hours.

8. PERSONNEL: Soldiers are currently assigned to the POD operations. ; Soldiers are assigned in five teams at Fire Stations 1, 3, 5, 6 and 8.

9. INTELLIGENCE / FORCE PROTECTION:

10. LOGISTICS: In support of TF Flint

a. 60 cases of recycle bags have been placed at POD locations.

b. Recycling trailers are being assessed by schupon on frequency of pickup.

11. COMMUNICATIONS: No communications issues at this time.

P: RRF cell phones alternate for WRTs.
A: Personal cell phone.
C: 800 MHz radios issued to PODs and WRTs.
E: Runner.

12. NARRATIVE: N/A

13. COMMANDER'S EVALUATION:
• AAR and operational notes are being consolidated into SOP's to send to JOC to assist in updating the All Hazards Plan.
• An operational handoff packet including SOP's, POC's, POD sector sketches, hand-receipts, and other operational notes is being built to assist the incoming unit.
• POC needed for incoming unit
• OUT (last 24 hours)
Bottled water-3733 Water (Gallons)-2020 Lead Testing Kits-131
Pitcher (23 cup)-0 Brita Faucet Filter-34 Brita Replacement Cartridge-128
Pur Filter-76 Pur Replacement Filter-243

National Weather Service (NWS)

NWS Detroit providing morning SEOC brief and Activity Log posts. Jim Maczko from NWS Grand Rapids will be the contact point for any changes in NWS Support and will also continue to update the Sit Rep Executive Summary as needed.

Participation in afternoon SEOC briefings is planned only if significant changes in the forecast occur.

Natural Resources (MDNR)

MDNR LED continues to support its QOL partners with staffing at the SEOC.

Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging (VAAA) continues to receive phone calls from concerned seniors in Flint and continues to make referrals to the Genesee Co. EOC for water and filter follow-up.

VAAA's local Nursing Home Ombudsman continues to monitor Flint area Nursing Homes to ensure residents have access to safe water.

Contact info for VAAA Executive Director is:
Kathryn C. Boles
President, CEO
Valley Area Agency on Aging
225 E. Fifth Street, Suite 200
Flint, MI 48502
(810) 239-7671
(810) 239-8869 fax

State Police (MSP)

The MSP position within the SEOC will be staffed at MSP Operations at HQ. All e-mails to MSP-EOC-MDSP@michigan.gov are being forwarded to the Operations Lt. The phone number for the on duty Operations Lieutenant is 517-241-8000.

Technology, Management and Budget (MDTMB)

Continue to provide DTMB management SEOC updates and expenditures to-date.

Provided a dumpster for the Pierson Rd. Warehouse.
Provided seven (7) iPads for DEQ sampling teams.
DTMB to provide a truck and driver for the Food Bank for Thursday through Saturday.
Procured a replacement fork lift battery for the Pierson Rd. Warehouse.
DTMB Print & Graphics printing multiple print jobs.
Added calendar access to two additional DEQ employees.
Addressing issues with Pierson Rd. Warehouse with landlord, MDOC and 7th Day Adventist.
DTMB Real Estate researching options for a 200,000 sq. ft. warehouse for long term distribution plan, preferably on the bus line.

Transportation (MDOT)

Continuing to maintain situational awareness and responding to issues regarding equipment and road conditions.

Incident Related Images

- Point of Distribution that would be suitable for visit.
The National Guard Liaison at the Genesee County EOC advised that the Point of Distribution at Fire Station 5, 3402 Western Rd, Flint, MI 48506, would be the best location for the visit of Secretary Burwell.

--Name and title of the lead person at the distribution site. We're looking to identify a point person to explain the distribution operation to the Secretary and answer any questions she has.
A Non-Commissioned Officer in Charge (NCOIC) was assigned to each Point of Distribution. NCOIC at Fire Station 5 Point of Distribution is Sgt. Allen Thorpe (517-242-5675).

--How many National Guard troops are working at water distribution sites across town.
Currently, 56 National Guard personnel are distributing supplies at the Points of Distributions. With the transition to a new unit, this number will rise to 60 by Friday.

--Number of water distribution sites
There are five Points of Distributions located at Fire Stations in the City of Flint.

--Why fire stations are the preferred distribution site
The Fire Stations were chosen as locations for the Points of Distributions by Mayor Karen Weaver.

--Data, including the number of pallets of water (or water bottles) available at that site for distribution, number of filters available for distribution
The following data was recorded for supplies on hand for distribution at Fire Station 5 on 02/16/2016 at 1700:

Bottled Water (Cases)	**1801**
Water (Gallons)	**36**
Lead Testing Kits	**200**
Brita Faucet Filters	**626**
Brita Replacement Filter Cartridges	**1005**
Pur Faucet Filters	**228**
Pur Replacement Filter Cartridges	**11174**

Maximum capacity for bottled water at Fire Station 5 is 2,160 cases (approximately 30 pallets).

--Any limitation on distribution? We're aware of the 1 case of water/person/day rule, but want to know of any others
The same limitations (one unit per household) exist for filters and replacement filter cartridges. Needs of residents that request additional supplies because of specific hardships (e.g., larger families, limited mobility, etc.) are accommodated at the Points of Distributions.

Residents with faucets that do not allow the installation of faucet filters can request water pitchers with certified filters, and appropriate replacement filters. However, due to the limited quantities and cost of these filter systems, they are not available at the Points of Distributions, and residents need to request delivery via the phone.

Residents can also receive recycling bags at the Points of Distributions. They can return used filter cartridges at all Points of Distributions, and empty water bottles at three of the five Points of Distributions.

This is the daily 2-1-1 summary on the Flint Water Response for Tuesday, February 16, 2016

GENERAL INFORMATION:

- ***Invitation to visit the Central Michigan 2-1-1 Center:*** Jennie Pollak, Manager of Central Michigan 2-1-1 at LifeWays Community Mental Health in Jackson, is extending an invitation for Flint Water Response partners to visit the center and have a first-hand experience observing 2-1-1 in action. If you are interested, please email Tom Page at tpage@uwmich.org.
- ***US Surgeon General Vice Admiral Vivek Murthy is in Flint this week*** to meet with officials and community members. MLIVE reports there will be a meeting tonight (2/16) at 6 pm at Mount Carmel Baptist Church, 1619 W. Pierson Road at to talk to residents. The session will include education on the effects of lead on the body and there will be an opportunity for residents to ask questions.

  Full news story at:
  http://www.mlive.com/news/flint/index.ssf/2016/02/us_surgeon_general_talks_flint.html#incart_river_index
- **There is an informational meeting on one of the class action lawsuits** tonight, Tuesday, February 16, from 6:30 pm – 8:30 pm at 432 N. Saginaw Street, Flint, MI in the North Bank Grand Ballroom at University of Michigan Flint Campus. More information at www.flintwaterclassaction.com. The web site is operated by one of the law firms filing a suit.

CALL VOLUME:

Central Michigan 2-1-1 was able to handle entire volume of Flint calls today with support from management and supervisory staff during the few peaks of high call volume.

SPECIAL NEEDS/REQUESTS

☐ ***A private donor organized the distribution of 200 FlowTec shower filters*** at Berston Field House. Demand was extremely high and all filters were taken within 15 minutes. The distribution spurred a large number of calls to 2-1-1 and affirmed the unmet demand for shower filters. At least one from a homebound resident asking to have a shower filter delivered. Callers are expressing tremendous frustration about not feeling safe to bathe, one caller said, ***"You can't boil enough bottled water to take a hot bath."*** As noted in past updates, Good360 has identified a corporate donor that is willing to provide shower filters below cost if there is interest in addressing this demand.

RUMOR/SCAM CONTROL

☐ **Michigan 2-1-1 received a report that DHHS is looking at rehousing options** for residents in housing that 'environmental investigators' HAVE deemed hazardous for human habitation. **CAN A CONTACT AT DHHS INVESTIGATE AND REPORT BACK TO MICHIGAN 2-1-1 ON THE VERACITY OF THIS RUMOR?**

☐ **The Attorney General's Office is contacting organizations that are soliciting support for Flint,** according to one community partner, to verify their legitimacy and prevent scams or misuse of funds. **Is there a contact at the AG's office who can provide a list of vetted organizations to answer questions about the legitimacy of suspect organizations?**

☑ A community agency in Flint notified Michigan 2-1-1 that a client said they received a referral from 2-1-1 to a clinic asking for payment to do a child lead screening test. Central Michigan 2-1-1 verified there are no children's lead testing clinics in the database that charge a fee. The only locations in the 2-1-1 database are coordinated by the Health Department, either onsite or at various community

locations. As of this time adults are charged a fee for lead testing. 2-1-1 has asked the community agency to seek additional information to assist with 2-1-1's investigation.
UPDATE: 2-1-1 has clarified that, while lead testing for children is free, clinics may ask for insurance information in order to bill the insurer for testing, but there should be no cost to the patient.

UNRESOLVED

☐ **From 1/18/16:** One of the top questions is when will canvassers be in specific neighborhoods. Callers would like to know so they can arrange their schedules. Is this information available for 2-1-1 to share?

☐ **From 1/26/26:** There is high demand for shower filters due to reports of rashes and potential lead risk to children from using water to bathe. 2-1-1 is telling callers that shower filters are available for purchase through home improvement stores, based on a google search. **Are shower filter donations a request that can be coordinated through Good360 or another supplier?**

1/28/16 UPDATE: The Michigan 2-1-1 office passed on the demand for shower filters to Good360, which is looking into options to meet this need.

☐ **2/10/16 UPDATE:** Per DHHS, currently there are no direct efforts by the state to begin coordinating shower filters as the current guidance continues to indicate that it is safe to bathe and shower in unfiltered water.

☐ **From 2/11/16: Dentists concerned about impact of drinking unfluoridated bottled water** on the long term dental health of Flint children. Michigan Association of United Ways reported hearing this issue at a meeting with pediatricians and dentists. One suggestion to address this was providing the school-based fluoride treatments.

☑ **From 2/11/16: Community partners report Flint residents concerned about 2-1-1 sharing their personal information.** Service agencies in Flint report some residents are afraid to call 2-1-1 or choose the Flint Water prompt due to concerns that 2-1-1 is tracking and reporting their needs and personal information to government agencies.
Update 2/12/16: 2-1-1 is reviewing the language of the phone prompts and hold messages to determine the best way to reassure callers that **2-1-1 calls are confidential and 2-1-1 will *never* release information without first receiving permission from the caller.**

☐ **From 2/12/16:** 2-1-1 has received several calls from residents seeking information about the safety of produce they canned at home using unfiltered city water prior to the emergency declaration. Losing this food could affect household food security. **CAN SEOC or MDHHS provide guidance about whether this food is safe to consume?**

☐ **From 2/15/16: Good360, a 501(c)(3) nonprofit that coordinates bulk donations from corporate partners, has identified a potential source of high-capacity water filters** for restaurants, churches, shelters and other businesses that are not currently eligible for free water filters. These are filtering systems, not faucet filters. ***Good360 is working to verify these filters meet NSF standards for lead and copper, but is asking for feedback if there is a need by local businesses and agencies for this kind of filtering option.***

- ☐ **From 12/15/16:** Callers continue to ask about relocation assistance. 2-1-1 is informing residents that there is no government relocation assistance available at this time. We have identified several private initiatives to assist with relocation, but have been unable to verify the legitimacy of any of these efforts. **Can the Attorney General's office or another agency help investigate if any of these efforts are legal and legitimate?**

This is the daily 2-1-1 summary on the Flint Water Response for Monday, February 15, 2016

GENERAL INFORMATION:

- **There will be an informational meeting one of the class action lawsuits** on Tuesday, February 16, 2016 from 6:30 pm – 8:30 pm at 432 N. Saginaw Street, Flint, MI in the North Bank Grand Ballroom at University of Michigan Flint Campus. More information at www.flintwaterclassaction.com. The web site is operated by one of the law firms filing a suit.
- **United Way Worldwide announces details of Beyoncé's Formation World Tour benefitting Flint** with proceeds to support United Way of Genesee County's work to help the people of Flint dealing with the Flint Water Crisis. Fans will have an opportunity to donate to the Flint Water Fund after purchasing their tickets. Every $10 donated is an entry for an upgrade to the best house seats at each concert. US Tour tickets go on sale February 22nd.

CALL VOLUME:

Central Michigan 2-1- 1was closed today for the Presidents' Day holiday. SW Michigan 2-1-1 partner, which regularly handles after hours and weekend calls for Central Michigan, reported a few waves of calls that pushed wait times to approximately 10 minutes for short periods.

Call summary for the week of February 8-14

- 777 callers used the Flint Water prompt to reach a 2-1-1 agent.
- 1009 referrals were provided (1.3/caller) and there were 30 unmet needs recorded.
  - The majority of calls came from zip codes 48504 and 48505
  - The most common requests were for Drinking (Bottled) Water, Water Filters, and Tap Water Testing.
  - 17 calls were to donate or volunteer.

SPECIAL NEEDS/REQUESTS

- ☐ **American Sign Language interpretation may be available for Flint-area events** through a professor at Mott Community College. Email Tom Page at Michigan 2-1-1 for contact information: tpage@uwmich.org.
- ☐ **Good360, a 501(c)(3) nonprofit that coordinates bulk donations from corporate partners, has identified a potential source of high-capacity water filters** for restaurants, churches, shelters and other businesses that are not currently eligible for free water filters. These are filtering systems, not faucet filters. ***Good360 is working to verify these filters meet NSF standards for lead and copper, but is asking for feedback if there is a need by local businesses and agencies for this kind of filtering option.***

RUMOR/SCAM CONTROL

- A community agency in Flint notified Michigan 2-1-1 that a client said they received a referral from 2-1-1 to a clinic asking for payment to do a child lead screening test. Central Michigan 2-1-1 verified there are no children's lead testing clinics in the database that charge a fee. The only locations in the 2-1-1 database are coordinated by the Health Department, either onsite or at various community locations. As of this time adults are charged a fee for lead testing. 2-1-1 has asked the community agency to seek additional information to assist with 2-1-1's investigation.

- ☐ Callers continue to ask about relocation assistance. 2-1-1 is informing residents that there is no government relocation assistance available at this time. We have identified several private initiatives to assist with relocation, but have been unable to verify the legitimacy of any of these

efforts. **Can the Attorney General's office or another agency help investigate if any of these efforts are legal and legitimate?**

- https://www.facebook.com/IamShiftingParadigms/posts/821354508011097

- https://pages.giveforward.com/emergency/page-42jxcw4/
- http://www.plumfund.com/charity-fundraising/help-flint-mi-residents-relocate

UNRESOLVED

☐ **From 1/18/16:** One of the top questions is when will canvassers be in specific neighborhoods. Callers would like to know so they can arrange their schedules. Is this information available for 2-1-1 to share?

☐ **From 1/26/26:** There is high demand for shower filters due to reports of rashes and potential lead risk to children from using water to bathe. 2-1-1 is telling callers that shower filters are available for purchase through home improvement stores, based on a google search. **Are shower filter donations a request that can be coordinated through Good360 or another supplier?**

1/28/16 UPDATE: The Michigan 2-1-1 office passed on the demand for shower filters to Good360, which is looking into options to meet this need.

☐ **2/10/16 UPDATE:** Per DHHS, currently there are no direct efforts by the state to begin coordinating shower filters as the current guidance continues to indicate that it is safe to bathe and shower in unfiltered water.

☐ **From 2/11/16: Dentists concerned about impact of drinking unfluoridated bottled water on the** long term dental health of Flint children. Michigan Association of United Ways reported hearing this issue at a meeting with pediatricians and dentists. One suggestion to address this was providing the school-based fluoride treatments.

☐ **From 2/11/16: Community partners report Flint residents concerned about 2-1-1 sharing their personal information.** Service agencies in Flint report some residents are afraid to call 2-1-1 or choose the Flint Water prompt due to concerns that 2-1-1 is tracking and reporting their needs and personal information to government agencies.
Update 2/12/16: 2-1-1 is reviewing the language of the phone prompts and hold messages to determine the best way to reassure callers that **2-1-1 calls are confidential and 2-1-1 will *never* release information without first receiving permission from the caller.**

☐ **From 2/12/16:** 2-1-1 has received several calls from residents seeking information about the safety of produce they canned at home using unfiltered city water prior to the emergency declaration. Losing this food could affect household food security. **CAN SEOC or MDHHS provide guidance about whether this food is safe to consume?**

Rumor Control | Health & Water Quality/Safety Concerns | Taxonomy Terms |Q&A | Printed Materials

Background Information:

Early January, Flint Water situation has been declared a State of Emergency and the Governor's Office got involved to set up resources. The concern is the lead and general quality of the water, piping, lead poisoning risk and health impacts. January 17, President Obama Signed a Declaration of Emergency releasing FEMA assistance for 90 days. Here's the press release. 2-1-1 is being advertised as the place to give and get help.

Many residents are upset at the situation and lack of steps being taken to fix the situation and the government is hopeful the partnership with us to get information to people and help assess the situation from people (unmet needs, trends, etc) will help them take steps – certainly along with other things they're doing! ***It's really important we express empathy and compassion to these callers, take time to listen, offer the help we can, record unique situations and report them to the partners – please email Jennie Pollak (jennifer.pollak@lifewayscmh.org) and I'll pass them up!***

The relief efforts include bottled water giveaway sites, water testing giveaways sites, water filter sites, homebound delivery of supplies, recycling centers, lead poison testing, as well as organized bottled water & monetary donation sites and volunteer organization.

Rebuild efforts have begun being announced. A lead pipe removal plan was announced on 2/9/16 by Flint Mayor Karen Weaver and will be led by retired Brigadier General Michael McDaniels. The plan will replace **residential** lead pipes with copper and is expected to begin by the end of March. There's no cost to homeowners. State Funding requests have been proposed.
www.detroitnews.com/story/news/michigan/flint-water-crisis/2016/02/09/flint-mayor-announces-lead-pipe-removal-plan/80052634/

Canvas efforts are in place to visit all residents, door to door in the City of Flint, providing filters, testing kits & drinking water. Teams are starting in neighborhoods with the highest lead concentration first. If the resident is not home, a flyer will be left instructing them to call 2-1-1. Treat these caller as a new caller, assessing their ability to pick up supplies or need for delivery. Canvas teams will make a second pass to reach residents.

Rumor Control – Record Referrals as OOD Disaster Related Rumor Control

Niagara Bottle E.Coli Rumor – Refer callers to Niagra Bottle Company website or the Consumer Affairs Dept to see if the bottles they've received were recalled. The recall was issued Summer 2015 from 2 Pennsylvania plants. www.niagarawater.com/consumer-notice/ Save OOD Referral for **Disaster Related Rumor Control** and Agency: **Niagara Bottling Company**

Revised 2.15.16_JP

Lead found in Bottled Water Received by Fire Stations – See official press release of <Dept of Environmental Quality Total Dissolved Solids> testing performed of bottled water. There's over 21 bottles of water that were tested – Sparklettes and Star Wars are some of the brands. Save OOD Referral for **Disaster Related Rumor Control** and Agency: **Joint Information Center**.

FEMA Relocation Assistance – There is no relocation assistance currently being provided as this is a Declared Emergency, not Declared Disaster. Please let residents know relief efforts are focused on water resources, testing and health support. Save OOD Referral for **Disaster Related Rumor Control** and Agency: **FEMA**.

Health and Water Quality/Safety Concerns; several questions and concerns have been reported – safe to bathe, cook, etc. Refer to <WATER SAFETY FLYER> for basic information or refer for additional questions/concerns. Save referral for **Water Quality Assurance** for **Central Michigan 2-1-1** when basic information is provided and to another agency when referral is provided.

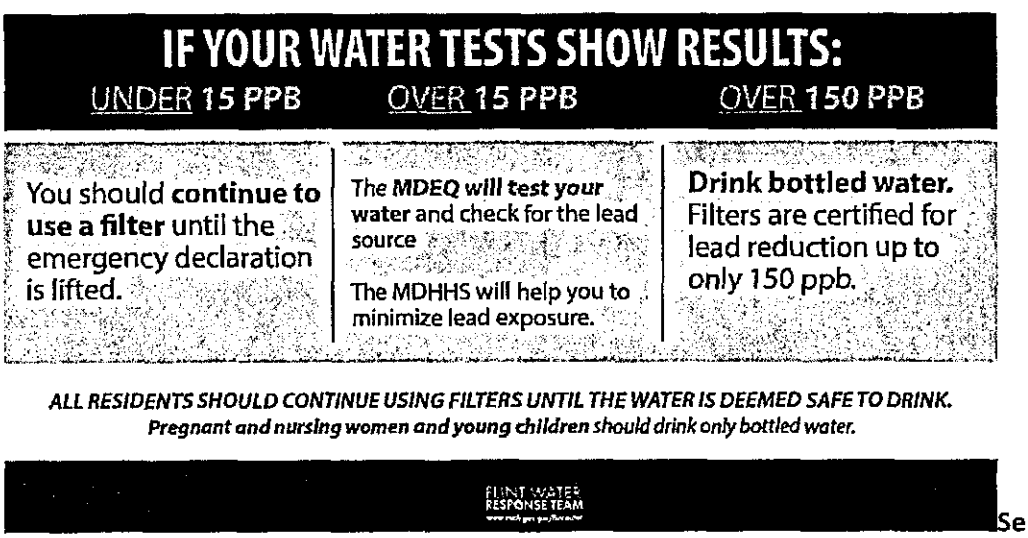
- Disaster Related Monetary Fund Management
- Drinking Water Donation Programs

Q&A:

Lead Test Results Received: Several residents have called asking what to do after receiving their test results. Please advise as directed below. Residents will receive their results in the mail (we're hearing 3-4 weeks) after returning the sample, and results will be posted online to www.michigan.gov/flintwater as soon as they're processed. *Click "Testing Results" to see residential results. Please do not share* individual household results, but instead direct them to find the file online. We are not lead testing experts! Please record this call as Water Testing Information (saved in OOD box). If you're able to answer their question, save the agency as Central Michigan 2-1-1 (saved in dropdown list). If you refer to the website, save agency as www.michigan.gov/flintwater (saved in dropdown list).



Se

Class Action Lawsuits – An informational meeting about the Class Action Suits will be held at UofM Flint Tuesday, February 16th. Information is noted in the ACLU record. A few lawsuits have been filed against the City of Flint and Governor Snyder, etc. regarding the Water Situation. *If callers want more* information or to join, refer them to the ACLU by Taxonomy term: **Class Action Litigation.**

Lead Poisoning Results – Lead poisoning results will be received by the clinic or doctor that performed the bloodwork and follow up will be arranged; however if a family is concerned about positive lead *poisoning test results for their child,* please refer to **Case/Care Management** programs. If the child has Medicaid, refer to CHAP through the Greater Flint Health Coalition **(Case/Care Management)**. If another form of insurance, please refer the Genesee County Health Department **(Case/Care Management*Lead Poisoning)**.

Governor Constituent Services – Constituent Services is available for residents to share concerns, complaints, etc. Many Flint callers are upset, remember to be empathetic and understanding for what they are experiencing, but if we are not able to resolve their concern, or provide referrals, or if they are

calling only to share their opinion, please direct them to Constituent Services. Taxonomy term: **Government Complaints/Government Ombudsman Offices.**

Skin Rashes – Health information is available for those with questions about skin rashes that may be attributed to the water conditions. A physician is on duty that can help answer questions. Taxonomy term is **Medical Information Lines.**

Questions about Lead: EPA has developed a hotline to answer specific questions about the effects of lead and lead poisoning. Taxonomy term: **Lead Information.**

Questions about Water Safety: EPA has developed a hotline to Answer questions about drinking water safety and also can refer residents to the free testing kits. Taxonomy term: **Water Quality Assurance.**

Loans for Small Businesses – Economic Injury Disaster Loans have been approved for businesses in Genesee County and City of Flint. Business owners must apply by Nov 7, 2016. Taxonomy term: Disaster Business Loans.

Information for Visually Impaired Residents –Bureau of Services for Blind Persons is helping provide resources for blind or visually impaired residents. Taxonomy term: Disaster Preparedness Information

Water Main Break/Water Shut Off – The boil water advisory was lifted and no bacteria was found 2.12. During a water main break, residents may experience a drop in pressure or no water in their tap. This was confused with residents thinking the City shut off their water. Be advised, there have been no water bill shut off notices issued since around December 2015. When service is restored, it may have an odor or be discolored-let the water run for a few minutes to clear the line. As water main breaks do occur, this may happen again.

Water for Pets - Official statements state filtered water is safe for pets to drink, although the Humane Society is providing water for pet owners. Taxonomy term: **Disaster Related Drinking Water.**

Water Resources for Business, Nonprofits, Nursing Homes, Churches –Commercial food/beverage business may receive up to 10 cases/day and non-food business may receive up to 5/day. Taxonomy term: **Disaster Related Drinking Water.** Schools should contact Food Bank of Eastern Michigan if they are not already a distribution site. Licensed daycare/foster care providers should contact DHHS if they do not have resources.

Agencies offering to be a distribution site - Water resource distribution is a coordinated effort and please refer organizations that are a 501c3 to the Food Bank of Eastern Michigan to set up directly.

Ages 0-6 and Pregnant Women Advised not to Drink Water – Some homes are testing very high for lead (higher than the current water filters are certified to remove lead) and officials are warning people, especially those with kids 0-6 or pregnant to not drink tap water, even with a filter until they get their tap water tested and know their levels. There are no specific water distribution centers set up for this population. Refer callers to **Tap Water Testing** and **Disaster Related Drinking Water** as appropriate. *Here's an article about the situation:*
http://www.mlive.com/news/flint/index.ssf/2016/01/flint_water_crisis_filter.html

Revised 2.15.16_JP

CHAP – Families have trouble accessing health care, with their health care provider or transportation. Until the CHAP Screening process is in place, please refer directly to the Genesee County CHAP. Taxonomy term: **Case/Care Management.**

Emotional/Mental Health Support – Genesee Health System (CMH) is offering a weekly workshop for those seeking support, prayer, relaxation, crisis management, mental health resources, blood pressure checks, etc. Taxonomy term: **Workshops/Symposiums*Disaster or Emergency Issues.**

Hair Care – Creative Hair School of Cosmetology will provide monthly shampoo, condition and style for those affected by the Flint Water Crisis. Taxonomy term: **Hairdressing/Nail Care**

Pitcher Water Filters – Pitcher filters are no longer stocked at the Fire Stations; instead they're provided to residents who have tried the faucet filters. Please offer a plumber/pipefitter to try to install the faucet filter first; Taxonomy term: **Disaster Specific Home Repair.** The plumber/pipefitter will alert the team for the need of a pitcher filter. If the person is sure a faucet filter won't fit (sprayer faucet), please email Jennie Pollak the caller's name and need for pitcher filter (Jennifer.pollak@lifewayscmh.org) to make note on the referral list.

New Faucet – Donated faucets have been secured for residents that have been identified to need a new faucet to fit the faucet filter. Taxonomy term: **Disaster Specific Home Repair.** The plumber/pipefitter will alert the team for the need of a new faucet.

Recycling – Water bottles and water filter cartridges can be recycled at various locations in Flint. Taxonomy term is **Residential Recycling Programs.** Please see <Flint_Recycling_Information_Handout>

Fraud Reporting – There have been reports of frauds or scams. If a resident is concerned, please direct them to report to FEMA or LARA. Taxonomy term is **Disaster Related Fraud Reporting.**

Volunteer Uniform: If callers have questions/concerns about those distributing resources, it's helpful to know which team. Red Cross volunteers have red vests, plumbers have neon yellow sweat shirts, and police and National Guard are in uniform.

Concerns about Treatment by National Guard: We've received concerns and complaints about how residents are treated at Fire Stations by National Guardsman. Please email Jennie Pollak at Jennifer.pollak@lifewayscmh.org an overview of situation including the caller's name and phone number (if interested) and she will send forward to a contact at the Michigan State Police.

Assisting agency call volume - Do not provide the phone number to Fire Stations, Genesee County Sheriff (*except to Apartment/Group Home Managers*) and Red Cross to help manage their call volume so they focus on relief efforts.

Filter doesn't fit faucet – All faucet filter kits come with several adaptions. Offer to have someone help install the faucet filter or suggest they get a pitcher filter if they're sure a faucet filter won't fit (sprayer faucets, etc).

Fire Station Resource Supply – The supply at the Fire Stations are being checked on an hourly basis. We've heard reports that they may temporarily run out of supplies; they will be replenished. We are not receiving updates when they are out or have supplies back in.

Revised 2.15.16_JP

Picking up filters for family members - People are no longer able to pick up water resources for another person. As of 1.22 People no longer need to bring ID to pick up supplies. Those unable to pick up supplies (homebound residents) may have them delivered by the Genesee County Sheriff's Office.

How Often? – People can pick up cases of water daily, replacement filter cartridges as needed and homebound residents can call as they need supplies delivered. There's one filter per household.

Township/nearby other city residents that receive City Water: if someone isn't a City of Flint resident but receives City of Flint water, they're called a "franchise customer" and it should be noted on their water bill (through Flint Township, etc). Direct callers to check their water bill or with their Township/Apartment manager to learn if their household is affected (if they are a franchise customer). They should be eligible for water filters, bottled water, etc. The canvas teams know about these residents and will be sure to deliver even though they are outside the City limits. Water filters will be mailed to franchise customers beginning 1/25. *Still waiting to hear about Delivery for homebound Franchise customers.*

Blood Lead Tests – Concerns for lead poisoning have shown need for Blood Lead testing sites. Children are at highest risk of developing lead poisoning, and the target of free community based lead testing clinics, though adult testing is available for a fee at the Health Department Saginaw St Clinic or their Primary Care Physician.

Water Bill Payment – Currently residents are obligated to pay their water bill since the courts have settled the disputes. If they have questions or concerns about their water bill, direct them to call the City of Flint Water Department for billing questions. The Governor did mention to provide aid to the City for utilities in his State of the State address but we are not aware that programs have been set to pay for resident's bills. Direct callers facing shut off to current resources, Taxonomy term: **Water Bill Payment Assistance.**

Apartment/Group home Managers picking up for residents - Public/Private housing unit apartment managers should be directed to call the Sheriff's Department water line, 810-257-3600 to coordinate pick up of water supplies for the units in their care. Residents may pick up resources for themselves, but Apartment/Nonprofit Group Home complexes may pick up water filters for their residents too.

Residents hired for Water Testing – Governor Snyder announced 2/8 partners were hiring 50 residents to assist with water testing. That opportunity was filled 2/9 so not entered into the database. Here's the article, FYI: www.mlive.com/news/flint/index.ssf/2016/02/flint_residents_being_hired_to.html

Water Resources for Business, Nonprofits, Nursing Homes, Churches –Commercial food/beverage business may receive up to 10 cases/day and non-food business may receive up to 5/day. Taxonomy term: **Disaster Related Drinking Water.** Schools should contact Food Bank of Eastern Michigan if they are not already a distribution site. Licensed daycare/foster care providers should contact DHHS if they do not have resources.

Eroded Hot Water heater - Refer to current resources (DHHS SER Program), but also record their name, address and phone number with a client note saying the cause is believed to be from the City Water in case specific assistance does become available

Revised 2.15.16_JP

Free Bus Transportation to Fire Stations - MTA (public transportation) is waiving the fare for people getting off at the Fire Station Water Resource Centers

Water filter scams - There have been reports of people selling water filters. If you hear of someone selling water filters, avoid that situation and call non-emergency Genesee County Sheriff's Office at 810-257-3407. All water filters are being provided free.

Water Testing Sample Questions – Instructions and an application form were provided with the water sample kit. There's also an instructional video online at www.michigan.gov/flintwater. Test Samples should be dropped off at Fire Stations, City Hall or Water Department (Taxonomy term **Tap Water Testing**). If homebound resident needs sample picked up, please save as Unmet Need **Tap Water Testing Drop Off** and Service Inaccessible/transportation. They'll work to get a volunteer pick it up. Also reference <DW Flint Sampling> document.

How to read water filters: If the indicator says the filter needs to be replaced, another filtration or drinking source should be identified. Images of filters are available at www.michigan.gov/flintwater

- The PUR Faucet Filter has a Red/Yellow/Green reading. Yellow is a warning the filter should be replaced soon. Red Means the filter needs replacement
- The Pitcher Filters have a thermometer style reading. There are instructions that tell when the filter needs to be changed. Waiting for more information. Replacement cartridges should be in later this week (week of 1/18).

Attached please find the local information requested for the site visit of Secretary Burwell. The National Guard suggests that Fire Station 5 would be the most suitable location for the visit.

All,

This information needs to completed as soon as possible, the secretary needs the information by 7:15 tomorrow.

--Name and title of the lead person at the distribution site. We're looking to identify a point person to explain the distribution operation to the Secretary and answer any questions she has.

--How many National Guard troops are working at water distribution sites across town.

--Number of water distribution sites

--Why fire stations are the preferred distribution site

--Data, including the number of palates of water (or water bottles) available at that site for distribution, number of filters available for distribution

--Any limitation on distribution? We're aware of the 1 case of water/person/day rule, but want to know of any others

Subject: RE: Water Distribution Site

Kate and Earl,

Thanks for your help on this. I talked with the Secretary's staff and we're looking to confirm this visit from 11:35 - 12:10pm. Its totally ok if it takes less time. Along with the address, we're looking to get the following answered today, by 4:30pm at the latest please:

--Name and title of the lead person at the distribution site. We're looking to identify a point person to explain the distribution operation to the Secretary and answer any questions she has.

--How many National Guard troops are working at water distribution sites across town.

--Number of water distribution sites

--Why fire stations are the preferred distribution site

--Data, including the number of palates of water (or water bottles) available at that site for distribution, number of filters available for distribution

--Any limitation on distribution? We're aware of the 1 case of water/person/day rule, but want to know of any others

The lead person should also be able to answer questions about resident feedback and reactions to the water distribution program.

Thanks,

Lauren Underwood

Cc: Leece, James (MSP)
Subject: City of Flint Loaner Radio Deployment (2/8/16 - TBD)

All,

Attached is the loaner pool list of radios that the MSP Communication Section has loaned to Lt. Roach for the Flint Water Response. As a result of last night's emergency alert of radio #1331368 that took operations an hour to track down, please ensure that when MSP Radios are "loaned" out for the day/shift, that each person signs for the respective radio to also include their cell phone number. This will aid us in two ways; 1st, we know who to call when we receive an emergency alert. 2nd, we know who to talk to when a radio is "lost" or misplaced... They currently cost about $5,000.00 depending on the options.

Should you have any questions, please feel free to contact myself or Sgt. Leece (mobile:) from the MSP Communications Section.

V/R,

M

Subject: A news media question

Hello,

I'm not sure who to send this question to.

I was wondering have you seen any trends in bottled water, water filter or lead testing distribution.

Are people in Flint picking up the same amount of bottled water every day since the start of the city wide distribution?

Are people asking for more water filters? Was there a spike in demand after the water main break this month near Dort Highway?

What about demand for lead testing kits?

Steve Carmody

SEOC FOIA Print Plan
Tips for Printing

Print Plan – Thru Friday, February 19

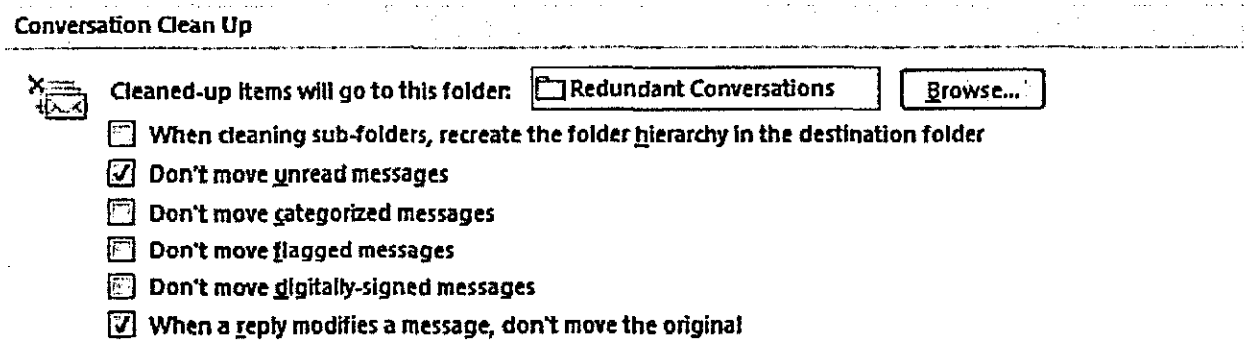
- When printing emails/documents, make sure to change **your default printer** to the following printer:
  - EOC_F1COMM_RI3054 on EOC084M1OAPF502 (located in the Communications Room)
  - Additional helpful hints for each document type below
- SEOC IT staff will set up to "Print to Hold" for each PC in the SEOC.
- Be sure to print/copy all documents **Single Sided**.
- Advise the SEOC Operations Section Chief prior to printing. **Do not interrupt someone else's print job.** The SEOC Operations Section Chief will ensure coordinated printing efforts.
- When at the printer, select Print > Select your agency name > Select All > Print.
- Test printing a couple of emails before printing out a large quantity.
- Once all items have been printed/copied, give all to Oralya Garza or Jodie Frese (daily staff) located just outside Governor's Conference Room A in the SEOC. **Do not go direct to FOIA Unit staff working in the conference room.** They will reach out if they have any questions.
- Make sure to clip or rubber band your information to keep separate from others information being turned in.
- Sources: Emails, Documents, S drive, Desktop, Cell phone/text messages, Copies of handwritten notes, DCDS, Invoices, Photos
- SEOC IT Staff will be responsible for printing all documentation from MI CIMS.
- For any IT issues, contact IT Staff in the SEOC. This is usually Jaclyn Barcroft or Rich Law. GIS staff should be contacted only if both of them are unavailable.

How to Recover Deleted Emails

- In Outlook, select the Folder Tab.
- On the top, select Recover Deleted Items.
- Recover any items pertinent to the Flint Water response.
- You may need to select various folders on the left side in order to recover everything possible.

How to Clean up Redundant Email Conversations

- In Outlook, click on the File tab.
- Click Options.
- Click Mail.
- Under the Conversation Clean Up section, change the location where conversations will go. Select Browse. Click on "Cabinet" in the list. Select "New Folder" and name it "Redundant Conversations." Ensure the options are identical to the below:



- In Outlook, on the Home tab, in the Delete group, click Clean Up.
- Select Clean Up Folder. Click Clean Up Folder.

SEOC FOIA Print Plan
Tips for Printing

Tips for Printing Emails

- For State Agency SEOC personnel, **only** print emails from your SEOC email address.
- Print emails by selecting **up to 100 at a time** (select one, hold shift, click on the last one).
    - Select the File Tab > Print > Click Print Options button > Select Memo Style and Check Box for "Print Attached Files" (bottom left corner of pop up) > Select Print
- Attachments will not show up in the preview, but will print out with the emails

Tips for Printing Documents from Desktop, S Drive, My Documents (wherever files are saved)

- Make sure documents are formatted correctly for printing prior to moving to the next steps (Excel files tend to be the most troublesome).
- Sort documents in folders by "Type".
- Highlight "like" file types (Adobe Acrobat Document, Microsoft Excel Worksheet, etc.).
- Right click, select Print.

Tips for Printing Text Messages

- Android
- iPhone

Email – After All Your Files are Printed

- Send a CC to the following email address when sending items from the SEOC:
    - MSP-FOIAProject@michigan.gov
    - For State Agency SEOC personnel, **only** CC emails from your SEOC email address
- Send all documents created to the same email address

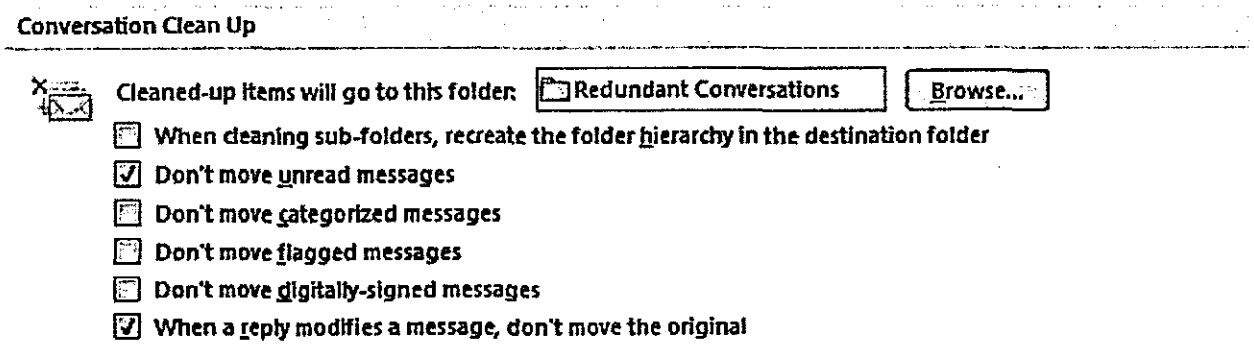
- Test printing a couple of emails before printing out a large quantity.
- Once all items have been printed/copied, give all to Oralya Garza or Jodie Frese (daily staff) located just outside Governor's Conference Room A in the SEOC. **Do not go direct to FOIA Unit staff working in the conference room.** They will reach out if they have any questions.
- Make sure to clip or rubber band your information to keep separate from others information being turned in.
- Sources: Emails, Documents, S drive, Desktop, Cell phone/text messages, Copies of handwritten notes, DCDS, Invoices, Photos
- SEOC IT Staff will be responsible for printing all documentation from MI CIMS.
- For any IT issues, contact IT Staff in the SEOC. This is usually Jaclyn Barcroft or Rich Law. GIS staff should be contacted only if both of them are unavailable.

How to Recover Deleted Emails

- In Outlook, select the Folder Tab.
- On the top, select Recover Deleted Items.
- Recover any items pertinent to the Flint Water response.
- You may need to select various folders on the left side in order to recover everything possible.

How to Clean up Redundant Email Conversations

- In Outlook, click on the File tab.
- Click Options.
- Click Mail.
- Under the Conversation Clean Up section, change the location where conversations will go. Select Browse. Click on "Cabinet" in the list. Select "New Folder" and name it "Redundant Conversations." Ensure the options are identical to the below:



- In Outlook, on the Home tab, in the Delete group, click Clean Up.
- Select Clean Up Folder. Click Clean Up Folder.

SEOC FOIA Print Plan
Tips for Printing

Tips for Printing Emails

- For State Agency SEOC personnel, **only** print emails from your SEOC email address.
- Print emails by selecting **up to 100 at a time** (select one, hold shift, click on the last one).
    - Select the File Tab > Print > Click Print Options button > Select Memo Style and Check Box for "Print Attached Files" (bottom left corner of pop up) > Select Print
- Attachments will not show up in the preview, but will print out with the emails

Tips for Printing Documents from Desktop, S Drive, My Documents (wherever files are saved)

- Make sure documents are formatted correctly for printing prior to moving to the next steps (Excel files tend to be the most troublesome).
- Sort documents in folders by "Type".
- Highlight "like" file types (Adobe Acrobat Document, Microsoft Excel Worksheet, etc.).
- Right click, select Print.

Tips for Printing Text Messages

- Android
- iPhone

Email – After All Your Files are Printed

- Send a CC to the following email address when sending items from the SEOC:
    - MSP-FOIAProject@michigan.gov
    - For State Agency SEOC personnel, **only** CC emails from your SEOC email address
- Send all documents created to the same email address

- Point of Distribution that would be suitable for visit.
The National Guard Liaison at the Genesee County EOC advised that the Point of Distribution at Fire Station 5, 3402 Western Rd, Flint, MI 48506, would be the best location for the visit of Secretary Burwell.

--Name and title of the lead person at the distribution site. We're looking to identify a point person to explain the distribution operation to the Secretary and answer any questions she has.
A Non-Commissioned Officer in Charge (NCOIC) was assigned to each Point of Distribution. NCOIC at Fire Station 5 Point of Distribution is Sgt. Allen Thorpe

--How many National Guard troops are working at water distribution sites across town.
Currently, 56 National Guard personnel are distributing supplies at the Points of Distributions. With the transition to a new unit, this number will rise to 60 by Friday.

--Number of water distribution sites
There are five Points of Distributions located at Fire Stations in the City of Flint.

--Why fire stations are the preferred distribution site
The Fire Stations were chosen as locations for the Points of Distributions by Mayor Karen Weaver.

--Data, including the number of pallets of water (or water bottles) available at that site for distribution, number of filters available for distribution
The following data was recorded for supplies on hand for distribution at Fire Station 5 on 02/16/2016 at 1700:

Bottled Water (Cases)	**1801**
Water (Gallons)	**36**
Lead Testing Kits	***200***
Brita Faucet Filters	**626**
Brita Replacement Filter Cartridges	**1005**
Pur Faucet Filters	**228**
Pur Replacement Filter Cartridges	**11174**

Maximum capacity for bottled water at Fire Station 5 is 2,160 cases (approximately 30 pallets).

--Any limitation on distribution? We're aware of the 1 case of water/person/day rule, but want to know of any others
The same limitations (one unit per household) exist for filters and replacement filter cartridges. Needs of residents that request additional supplies because of specific hardships (e.g., larger families, limited mobility, etc.) are accommodated at the Points of Distributions.

Residents with faucets that do not allow the installation of faucet filters can request water pitchers with certified filters, and appropriate replacement filters. However, due to the limited quantities and cost of these filter systems, they are not available at the Points of Distributions, and residents need to request delivery via the phone.

Residents can also receive recycling bags at the Points of Distributions. They can return used filter cartridges at all Points of Distributions, and empty water bottles at three of the five Points of Distributions.

Attachments: Day to Day POD Comparision for FEMA 2-15-16.xlsx

Attached is the data you requested through the end of yesterday. If you have any questions please let me know.

Samuel Jonker-Burke
Resource Unit Leader, State Emergency Operations Center
Michigan State Police/Emergency Management and Homeland Security
(This email is monitored only when the SEOC is activated)

Bullet Points on Long Term Distribution Course of Action
Direct Delivery and PODs Approach

Scope

- Direct delivery of filters, cartridges, and pitchers to residences.
- DTMB will go through an RFP process to secure contractor for direct deliveries.
- Utilize PODs primarily for water distribution and recycling.
    - 1 POD per Ward = 9 total PODs
    - *Fixed Location: Parking lot next to bus route and/or transportation route based on* FEMA IS26 compliant checklist
    - Box truck with just in time commodities
    - Staffing would be provided all or in part by workforce development grants
    - 9 per POD for a total of 81 personnel
- Rapid Response Teams for Access and Functional Needs (AFN)
    - 1 Rapid Response Team per Ward = 9 total Rapid Response Teams
    - 1 Rapid Response Team = 1 Box Truck and 2 personnel
    - Staffing would be provided all or in part by workforce development grants
    - Approximately 3,000 AFN in affected area
- Designated officials will coordinate pickup for franchise customers.

Strengths

- Tracking and protection of personally identifiable information is the contractor's responsibility.
- Places tracking and accounting aspects in the hands of the contractor.
- Provides a convenient and citizen/survivor centric solution.
- *This COA may be supplemented by faith and community based distribution centers* at their discretion (account for undocumented workers).
- Allows a phased approach transition to community pods for water distribution.
- Scalable PODs operations based on the overall demand for water.
- Follows FEMA approved guidelines for operation of a POD.
- PODs are Ward based, giving local government more visibility of the operation.

Weaknesses

- Increases the cost of the response, at least initially.
- Burn rates and other data will not be readily available.
- May require an MOU for the PODs locations.
- Increased possibility for retail fraud.
- Initial setup time will be more extensive.

Other COA Weaknesses

- Faith based courses of action
    - Require excessive number of volunteers to sustain operations
    - Unmanageable number of distribution points
    - Religious sensitivities

Subject: 2-1-1 Update Flint Water Response for Monday, February 15, 2016

This is the daily 2-1-1 summary on the Flint Water Response for Monday, February 15, 2016

NOTE: Attached to today's summary is a copy of the PDF reference document 2-1-1 partners use for Flint Water calls. This document is updated daily, sometimes several times a day. 2-1-1 agents access this through a shared DropBox file that ensures all 2-1-1 staff have immediate access to the most current information about the response.

GENERAL INFORMATION:

- **There will be an informational meeting one of the class action lawsuits** on Tuesday, February 16, 2016 from 6:30 pm – 8:30 pm at 432 N. Saginaw Street, Flint, MI in the North Bank Grand Ballroom at University of Michigan Flint Campus. More information at www.flintwaterclassaction.com. The web site is operated by one of the law firms filing a suit.
- **United Way Worldwide announces details of Beyoncé's Formation World Tour benefitting Flint** with proceeds to support United Way of Genesee County's work to help the people of Flint dealing with the Flint Water Crisis. Fans will have an opportunity to donate to the Flint Water Fund after purchasing their tickets. Every $10 donated is an entry for an upgrade to the best house seats at each concert. US Tour tickets go on sale February 22nd.

CALL VOLUME:

Central Michigan 2-1- 1was closed today for the Presidents' Day holiday. SW Michigan 2-1-1 partner, which regularly handles after hours and weekend calls for Central Michigan, reported a few waves of calls that pushed wait times to approximately 10 minutes for short periods.

Call summary for the week of February 8-14

- 777 callers used the Flint Water prompt to reach a 2-1-1 agent.
- 1009 referrals were provided (1.3/caller) and there were 30 unmet needs recorded.
    - The majority of calls came from zip codes 48504 and 48505
    - The most common requests were for Drinking (Bottled) Water, Water Filters, and Tap Water Testing.
    - 17 calls were to donate or volunteer.

SPECIAL NEEDS/REQUESTS

- **American Sign Language interpretation may be available for Flint-area events** through a professor at Mott Community College. Email Tom Page at Michigan 2-1-1 for contact information: tpage@uwmich.org.

☐ **Good360, a 501(c)(3) nonprofit that coordinates bulk donations from corporate partners, has identified a potential source of high-capacity water filters** for restaurants, churches, shelters and other businesses that are not currently eligible for free water filters. These are filtering systems, not faucet filters. ***Good360 is working to verify these filters meet NSF standards for lead and copper, but is asking for feedback if there is a need by local businesses and agencies for this kind of filtering option.***

RUMOR/SCAM CONTROL

- A community agency in Flint notified Michigan 2-1-1 that a client said they received a referral from 2-1-1 to a clinic asking for payment to do a child lead screening test. Central Michigan 2-1-1 verified there are no children's lead testing clinics in the database that charge a fee. The only locations in the 2-1-1 database are coordinated by the Health Department, either onsite or at various community locations. As of this time adults are charged a fee for lead testing. 2-1-1 has asked the community agency to seek additional information to assist with 2-1-1's investigation.

☐ Callers continue to ask about relocation assistance. 2-1-1 is informing residents that there is no government relocation assistance available at this time. We have identified several private initiatives to assist with relocation, but have been unable to verify the legitimacy of any of these efforts. **Can the Attorney General's office or another agency help investigate if any of these efforts are legal and legitimate?**

- https://www.facebook.com/IamShiftingParadigms/posts/821354508011097
- https://pages.giveforward.com/emergency/page-42jxcw4/
- http://www.plumfund.com/charity-fundraising/help-flint-mi-residents-relocate

UNRESOLVED

☐ **From 1/18/16:** One of the top questions is when will canvassers be in specific neighborhoods. Callers would like to know so they can arrange their schedules. Is this information available for 2-1-1 to share?

☐ **From 1/26/26:** There is high demand for shower filters due to reports of rashes and potential lead risk to children from using water to bathe. 2-1-1 is telling callers that shower filters are available for purchase through home improvement stores, based on a google search. **Are shower filter donations a request that can be coordinated through Good360 or another supplier?**

1/28/16 UPDATE: The Michigan 2-1-1 office passed on the demand for shower filters to Good360, which is looking into options to meet this need.

2/10/16 UPDATE: Per DHHS, currently there are no direct efforts by the state to begin coordinating shower filters as the current guidance continues to indicate that it is safe to bathe and shower in unfiltered water.

☐ **From 2/11/16: Dentists concerned about impact of drinking unfluoridated bottled water** on the long term dental health of Flint children. Michigan Association of United Ways reported hearing this issue at a meeting with pediatricians and dentists. One suggestion to address this was providing the school-based fluoride treatments.

☐ **From 2/11/16: Community partners report Flint residents concerned about 2-1-1 sharing their personal information.** Service agencies in Flint report some residents are afraid to call 2-1-1 or choose the Flint Water prompt due to concerns that 2-1-1 is tracking and reporting their needs and personal information to government agencies.

Update 2/12/16: 2-1-1 is reviewing the language of the phone prompts and hold messages to determine the best way to reassure callers that **2-1-1 calls are confidential and 2-1-1 will *never* release information without first receiving permission from the caller.**

☐ **From 2/12/16:** 2-1-1 has received several calls from residents seeking information about the safety of produce they canned at home using unfiltered city water prior to the emergency declaration. Losing this food could affect household food security. **CAN SEOC or MDHHS provide guidance about whether this food is safe to consume?**

From: McFadden, Jevon (DHHS)
Sent: Monday, February 15, 2016 7:02 PM
To: Baird, Richard (GOV)
Cc: MSP-EOC-MDCH
Subject: Re: Rash investigation

Please see the attached addresses for those who have reported rash. There are 3 tabs in the spreedsheet:
1. All rash reports that we have addresses for
2. All rash reports referred to EPA for testing
3. All individuals with rash reports who meet the MDHHS case definition for active rash

Here are the total numbers since 1/28/16:
Total rash-related calls/reports: 49
Total rash-related calls/reports with addresses known: 33 (31 are unique)
Total rash-related calls referred to EPA: 23
Total number of rash-related reports with EPA water samples taken: 15
Total number of rash-related reports with EPA water tests completed: 7 (we do not yet have those results)
Total rash-related reports that meet MDHHS case definition for active rash: 23 (17 with addresses, 16 unique)
Total rash-related reports meeting MDHHS case definition for active rash and with standardized questionnaire completed: 13

-We do not yet have enough information to conclude whether or not the rashes are above what would be expected for the general population.
-We cannot make any conclusions regarding what's causing the reported rashes
-There are no common presentations on interview.

-We do not yet have any EPA water testing results from homes of individuals with active rash, but we anticipate having those results sometime early this week.
-The one common finding among all those interviewed is that nearly all have changed their bathing/showering habits significantly because of their concern about the water causes their rashes. Some have stopped showering altogether, some use bottled water, some are using baby wipes rather than showering, some are using city water but are taking baths/showers much less frequently and for shorter duration.

Let me know if there are any questions.

There is a CDC CEFO (Career Epidemiology Field Officer) with in the state of MI that has been working on the rash investigation. Since he is tied into the state health department he is probably a good contact to start with for questions.

The contact is:
Jevon McFadden
CDC Career Epidemiology Field Officer
Work Tel: 517-335-9085

Work Fax: 517-338-8263
Mcfadddenj1@michigan.gov

Hope that is helpful.

To: Baird, Richard (GOV)
Cc: MSP-EOC-MDCH
Subject: Re: Rash investigation

Please see the attached addresses for those who have reported rash. There are 3 tabs in the spreedsheet:
1. All rash reports that we have addresses for
2. All rash reports referred to EPA for testing
3. All individuals with rash reports who meet the MDHHS case definition for active rash

Here are the total numbers since 1/28/16:
Total rash-related calls/reports: 49
Total rash-related calls/reports with addresses known: 33 (31 are unique)
Total rash-related calls referred to EPA: 23
Total number of rash-related reports with EPA water samples taken: 15
Total number of rash-related reports with EPA water tests completed: 7 (we do not yet have those results)
Total rash-related reports that meet MDHHS case definition for active rash: 23 (17 with addresses, 16 unique)
Total rash-related reports meeting MDHHS case definition for active rash and with standardized questionnaire completed: 13

-We do not yet have enough information to conclude whether or not the rashes are above what would be expected for the general population.
-We cannot make any conclusions regarding what's causing the reported rashes
-There are no common presentations on interview.
-We do not yet have any EPA water testing results from homes of individuals with active rash, but we anticipate having those results sometime early this week.
-The one common finding among all those interviewed is that nearly all have changed their bathing/showering habits significantly because of their concern about the water causes their rashes. Some have stopped showering altogether, some use bottled water, some are using baby wipes rather than showering, some are using city water but are taking baths/showers much less frequently and for shorter duration.

Let me know if there are any questions.

There is a CDC CEFO (Career Epidemiology Field Officer) with in the state of MI that has been working on the rash investigation. Since he is tied into the state health department he is probably a good contact to start with for questions.

The contact is:
Jevon McFadden
CDC Career Epidemiology Field Officer
Work Tel: 517-335-9085
Work Fax: 517-338-8263
Mcfadddenj1@michigan.gov

Hope that is helpful.

Subject: RE: Sentinel Sites

Jen,

Below are excerpts from the explanation provided for the selection of the sentinel sites in Flint. The edits in red font are mine that I added for your benefit.

I have also attached the map identifying the 402 sites.

I understand the sampling teams were only able to get about 260 of these sites to agree to participate. Some sites were vacant or did not have homes on them. At other sites, no one was home when we visited and the residents did not contact us as requested. And as we suspected, some residents declined to participate.

If someone reads this information and they have more questions, they can contact Bryce Feighner or me. I believe this request probably should have come through the MDEQ-ECC-IMT, but I am responding directly in hopes of minimizing additional messages.

Richard Benzie, P.E., Chief
Field Operations Section
Office of Drinking Water and Municipal Assistance, MDEQ
517-284-6512 desk

Principles for establishing sentinel sites:
1. A number of sentinel sites will be established for ongoing lead and copper monitoring, and perhaps *other water quality monitoring*.
2. These sites will be resampled periodically to help determine when areas of the City may be "cleared" and the drinking water advisory discontinued. These sites will also be used to help determine when and where corrosion control treatment is effective. (They may also be used for LCR compliance monitoring if the sampling site meets the high risk Tier 1 criteria necessary to be included in the compliance sampling pool)
3. DEQ will propose the specific sentinel sites based on the criteria described below by January 31, 2016.

4. DEQ will share these proposed sentinel sites with EPA and the City in a meeting on February 1, 2016 for the purposes of coordination and concurrence. Points of contact for this coordination meeting will include Bryce Feighner (DEQ), Richard Benzie (DEQ), Jim Sygo (DEQ), Bob Kaplan (EPA), Miguel Deltoral (EPA), Mike Glasgow (City), Natasha Henderson (City), Mayor Weaver (City).

Criteria utilized by DEQ for selection of proposed sentinel sites:
1. During the door to door water distribution, many residents (1,951) volunteered to participate in ongoing monitoring. Sentinel sites will be selected from those 1,951 residences.
2. Previous documents have indicated the need to identify 200 residences for the ongoing sentinel site monitoring. Since many sites will not be available for ongoing monitoring based on the initial inspection, residents subsequently choosing not to participate, etc., approximately 400 sentinel sites will be selected for the initial sentinel site sampling pool. (402 sites were ultimately identified as possible sampling sites in hopes of having at least 200 residents participate in this program)
3. All lead and lead combination service lines identified by the City that are also included in the 1,951 volunteer sampling sites pool will be included in the initial sentinel site sampling pool (156).
4. Additional sites will be selected based on spatial distribution assuring all 9 wards of the City are adequately covered. (The desire to have sites dispersed in all 9 wards was the final factor used to fill out the 400+ sites.)
5. Additional sites will be selected in areas identified by Dr. Mona Hanna-Attisha as having high blood levels and based on hydraulic indicators of water age. (This criteria was given the second highest priority after the initial selection of all volunteer sites identified as having lead service lines)
6. Additional sites will be selected based on Environmental Justice considerations; specifically, lead paint indicators, minority population, and low (Neighborhoods identified as having a higher percentage of homes likely to contain lead paint were given the third highest priority when selecting sentinel sites.)

American Red Cross (ARC)

MI-CIMS Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Back | Archive | Create PDF

EXECUTIVE SUMMARY

The American Red Cross deployed 8 Water Response Teams on Friday, 2/12/16.

The Volunteer Reception Center is operating from 9-5 on Friday. The VRC will operate on the same schedule tomorrow.

AGENCY INCIDENT OBJECTIVES

Current Operational Period

List 3 Major Objectives

stage and support 8 teams for Water Response and Rapid Response

operate the Volunteer Reception Center (VRC)

assemble water test kits

Upcoming Operational Period

List 3 Major Objectives

continue operation of the Volunteer Reception Center (VRC)

deploy Water Response Teams

assemble water test kits, if materials are available

American Red Cross (ARC)

MI-CIMS Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

The American Red Cross deployed 6 Water Response Teams on Thursday, 2/11/16, to deliver bottled water, and 3 Rapid Response Teams responding to calls from individuals needing additional support.

The Volunteer Reception Center was operating from 9-5 on Thursday. The VRC will operate on the same schedule tomorrow.

Water test kits are being assembled today. We anticipate that about 3,000 will have been completed by the end of the day.

AGENCY INCIDENT OBJECTIVES

Current Operational Period

List 3 Major Objectives

stage and support 9 teams for Water Response and Rapid Response

operate the Volunteer Reception Center (VRC)

assemble water test kits

Upcoming Operational Period

List 3 Major Objectives

continue operation of the Volunteer Reception Center (VRC)

deploy Water Response Teams

assemble water test kits, if materials are available

American Red Cross (ARC)

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

The American Red Cross deployed 10 Water Response Teams on Wednesday, 2/10/16, to attempt contact at those residences where no one had yet answered the door.

The Volunteer Reception Center (VRC) processed 15 new event-based volunteers (EVB) on Tuesday, and was able to provide a total of 17 EVBs on Tuesday to projects supervised by the ARC, MDEQ, and Catholic Charities. The VRC was in operation today, from 9am to 5pm. The VRC will be operating from 9-5 again on Thursday.

Event-based volunteers assembled 1,800 water test kits yesterday, and expect to have completed an additional 3,600 by the time they stop today.

MI-CIMS Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

The American Red Cross deployed and supported 10 Water Response Teams on Thursday, 2/4/16. It's anticipated that 10 teams will deploy tomorrow.
The Volunteer Reception Center (VRC) was in operation today, from 9am to 5pm. A total of 140 volunteers were processed today. That was 6 individual event-based volunteers and 4 groups totaling 134 volunteers. We assigned 88 to water test kit assembly, 46 to the Water Resource Teams, 2 to Catholic Charities, and one each to the Food Bank and the City of Flint.
Assembly of water test kits has resumed.

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

The American Red Cross will be standing up a 'limited' Disaster Relief Operation by the end of today. This will enable us to provide a more comprehensive response to community needs in Flint as they are made known. We will now be more readily able to bring in resources from outside the Flint area.

Back | Create PDF

EXECUTIVE SUMMARY

AGENCY INCIDENT OBJECTIVES

Current Operational Period

List 3 Major Objectives

Emphasize volunteer safety

Be alert for opportunities to assist

Keep staff and local program up to date

Upcoming Operational Period

List 3 Major Objectives

Emphasize volunteer safety

Keep staff and local program up to date

Continue to follow briefings, monitor MI-CIMS

CONCERNS / ISSUES

Concerns / Issues:

Major concern is safety of ARES/RACES members should field operations commence.

New EMC, EC has not yet had a chance to develop a relationship

Genesee has been problematic for a number of years, separate ARES and RACES programs initiated by previous EMC have only served to exacerbate the problem

Is the agency ECC Activated?	No
Agency facilities/operations impacted?

RACES SITUATION UPDATES

ARES EC has offered to assist EMC with staff types of activities during this busy time. He indicated EMC seemed enthusiastic about the idea, but so far, no activity reported.

D3 EC continuing to keep neighboring counties updated in case assistance needed.

Investigated CERT capacity in the area and it is unlikely they could provide much help again for safety concerns.

Advised Paul Spata (via MI-CIMS) that Genesee ARES may be able to provide additional volunteers for fire departments and churches.

DEC concerned that even churches and fire stations might not be safe in all cases.

EC advised he has a few volunteers standing by who would be available during the week. No activation currently planned, simply standing by. Similarly, DEC3 has notified Saginaw and Lapeer that assistance might be required but improbable.

Considering getting an alternate to take an occasional operational period. However, has no MI-CIMS credentials and is burdened by work. That leaves and will be busy with the move to the new SEOC.

DEC3 suggested Dow Water Solutions for filtering. A quick review of their products indicates they have some products that might be good for institutions, but I could find no data on lead removal.

Sent comments up the chain of command on:
- Vacant houses
- Dow Water Solutions
- Need for Federal comment on filter effectiveness

- Demonstrations interfering with helping people

DEC3 reminded me there are a small number of ARES resources in Genesee that might be able to assist, in addition to support from neighboring counties. Genesee has additional resources that work, but could be available off-hours. These are trained, background checked communicators. Unfortunately, there are few, if any, with MI-CIMS credentials.

Gave a rather detailed update on MIARPSC, especially WRT history of the incident.

Reminded staff to be judicious in sharing any information they get from me or the EOC.

EC Genesee reminded members against self-deployment.

Considering cutting back on attending briefings as we transition to a longer term operation. Auxcomm involvement seems unlikely going forward.

So far, continuing to attend briefings but updates to local leaders only every other day (instead of twice a day) and very high level only touching on major points.

Left message with Logistics chief inquiring whether ARES resources might assist with donations management need for manpower.

No response from Logistics chief. Most likely lost during telephone move. Need is past now.

Spoke with James Warfield of SATERN - he indicated that SATERN is involved in response, but had little detail since he is from the western division and Flint is in the eastern.

MARS SITUATION UPDATES

No MARS activity reported or anticipated.

CAP SITUATION UPDATES

No CAP activity reported or anticipated.

SATERN SITUATION UPDATES

No SATERN activity reported. Possible that SATERN will be involved if Salvation Army gets tapped to assist in nutrition activities. Asked Tim Jurmo, SATERN Auxcomm rep to be sure to notify me if any activity so I can record it in the SitRep.

EXECUTIVE SUMMARY

AGENCY INCIDENT OBJECTIVES

Current Operational Period

List 3 Major Objectives

Emphasize volunteer safety

Be alert for opportunities to assist

Keep staff and local program up to date

Upcoming Operational Period

List 3 Major Objectives

Emphasize volunteer safety

Keep staff and local program up to date

Continue to follow briefings, monitor MI-CIMS

CONCERNS / ISSUES

Concerns / Issues:

Major concern is safety of ARES/RACES members should field operations commence.

New EMC, EC has not yet had a chance to develop a relationship

Genesee has been problematic for a number of years, separate ARES and RACES programs initiated by previous EMC have only served to exacerbate the problem

Is the agency ECC Activated?	No
Agency facilities/operations impacted?

MI-GIMS Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Back | Archive | Create PDF

EXECUTIVE SUMMARY

Commanders Situation Report (SITREP)

1. DTG: 1112002016

2. UNIT: Points of Distribution (PODs), TF FLINT (1-125 IN)

3. POC:Ssg Gazzeny, Darryl L. Email: armyinfantry31@yahoo.com

4. PRESENT LOCATION: Genesee County Local EOC, 1101 Beach St., Flint, MI, 48502

5. SITUATION OVERVIEW: 1-125 IN has Soldiers deployed to the Flint Water Crisis in support of Distribution Operations at the Points of Distributions (PODs). Daily operations consist of receiving, tracking, and issuing out water, filters, replacement filters, and water test kits.

6. OWN SITUATION DISPOSITION /STATUS: Currently 1-125 IN has Soldiers on ground supporting the mission.

7. OPERATIONS: Operations for the next 24 hours are to sustain water/filter distributions throughout the 5 designated fire stations and track all distribution incoming and outgoing through the PODs.

a. POD 5 has two generator lighting units from MDOT. All PODs now have sufficient lighting.

1. Station 5 received a key and key code to utilize the fuel pump at station 5. A fuel can was purchased locally.

b. Signs have been printed off for the POD Buildings. Requesting approval to get the signs laminated from the purchasing office.

1.) TF Flint OIC, 2LT Benke, will be seeking approval from CPT Bowles and Dana and/or Kim at the purchasing office for laminating.

8. PERSONNEL: Soldiers are currently assigned to the POD operations. Soldiers are assigned in eams at Fire Stations 1, 3, 5, 6 and 8.

9. INTELLIGENCE / FORCE PROTECTION: More firefighter units will respond to emergencies to equalize pressure in the water lines, due to the water main damage.

10. LOGISTICS: In support of TF Flint

a. Schupon has placed an order for more instruction cards attached to recycle bags.

11. COMMUNICATIONS: No communications issues at this time.

P: RRF cell phones alternate for WRTs.
A: Personal cell phone
C: 800 MHz radios issued to PODs and WRTs.
E: Runner

12. NARRATIVE: N/A

13. COMMANDER'S EVALUATION:
- AAR and operational notes are being consolidated into SOP's to send to JOC to assist in updating the All Hazards Plan.
- An operational handoff packet including SOP's, POC's, POD sector sketches, hand-receipts, and other operational notes is being built to assist the incoming unit.
- OUT (last 24 hours)

Bottled water-4615 Water (Gallons)218 Lead Testing Kits-121
Pitcher (23 cup)-0 Brita Faucet Filter-96 Brita Replacement Cartridge-131
Pur Filter-61 Pur Replacement Filter-244

AGENCY INCIDENT OBJECTIVES

Current Operational Period
List 3 Major Objectives
Distributed water, water filters, and water test kits and collected water samples for analysis from the PODs
Improve POD distribution operations
Report timely and accurate logistics information to sustain distribution operations
Upcoming Operational Period
List 3 Major Objectives

Distribute water, water filters, water test kits and collect water samples for analysis from the PODs
Improve POD distribution operations. Maintain police presence at PODS 3 and 6.
Report timely and accurate logistics information to sustain distribution operations

CONCERNS / ISSUES

Concerns / Issues:
Packaging residue from water and water filter bulk shipment over the course of daily operation has exceeded trash storage at the PODS. Request increase in frequency to trash collection to reduce building rubbish piles.

Is the agency ECC Activated?	Yes
Agency facilities/operations impacted?	No

EXECUTIVE SUMMARY

Commanders Situation Report (SITREP)

1. DTG: 0315302016

2. UNIT: Points of Distribution (PODs), TF FLINT (1-125 IN)

3. POC: 1LT Roland, John G. Email: john.g.roland2.mil@mail.mil

4. PRESENT LOCATION: Genesee County Local EOC, 1101 Beach St., Flint, MI, 48502

5. SITUATION OVERVIEW: 1-125 IN ha: Soldiers deployed to the Flint Water Crisis in support of Distribution Operations at the Points of Distributions (PODs).Daily operations consist of receiving, tracking, and issuing out water, filters, replacement filters, and water test kits.

6. OWN SITUATION DISPOSITION /STATUS: Currently 1-125 IN has ; Soldiers on ground supporting the mission.

7. OPERATIONS: Operations for the next 24 hours are to sustain water/filter distributions throughout the 5 designated fire stations and track all distribution incoming and outgoing through the PODs.

a. Traffic outside of Stations 1, 5, and 8 still remains an issue.

1.) LT Benke met with MDOT and Flint City Engineering today. All traffic signs should be in place within the next 48hrs.

b. Flint City Electricians have fixed the lighting issue at Station 8. POD 5 is still waiting for an update on the capabilities of additional lighting at Station 5.

8. PERSONNEL: Soldiers are currently assigned to the POD operations. Soldiers are assigned in five teams at Fire Stations 1, 3, 5, 6 and 8.

9. INTELLIGENCE / FORCE PROTECTION: Michigan militia did establish a presence within the AO. The intentions were not harmful and in support of efforts made to resolving issues to residents of Flint.

10. LOGISTICS: In support of recycle project sponsored by Schupon, the special purpose recycle bags have not been distributed to POD operations. Logistics is expecting the recycle bags to be on the PODs for distribution within the next 48hrs.

11. COMMUNICATIONS: No communications issues at this time.

P: 800 MHz radios issued to PODs and WRTs.
A: RRF cell phones alternate for WRTs.
C: Personal cell phone
E: Runner

12. NARRATIVE: N/A

13. COMMANDER'S EVALUATION:
• MING resources on ground help bring to light an issue in supply distribution and provide information in regards to the issue to the LEOC to assist in ensuring all of the supplies from the Clio road warehouse are being handled and distributed properly. Overall, I believe the LEOC is very pleased with our operation and assistance in all water & filter distribution operations.
• I received and reviewed FRAGORD 9. I sent up a current roster to the JOC to assist in updating the FRAGORD products.
• Recycling:
LEOC is working to get more Schupan trash bags to fire stations 1, 5, & 8 for their water bottle recycling trailers. Additionally, they are trying to get the trailers at station 1 & 8 switched.
New public awareness sheets were distributed to the fire stations in regards to water bottle recycling curb side pick-up.
• We received cold medication from the 126 CAV per my request.Consolidated Station Report OUT (last 24 hours)
Bottled water-4362 Water (Gallons)-214 Lead Testing Kits-458
Pitcher (23 cup)-0 Brita Faucet Filter-359 Brita Replacement Cartridge-338

Military and Veterans Affairs (DMVA)

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

Commanders Situation Report (SITREP)

1. DTG: 0212002016

2. UNIT: Points of Distribution (PODs), TF FLINT (1-125 IN)

3. POC: 1LT Roland, John G. Email: john.g.roland2.mil@mail.mil

4. PRESENT LOCATION: Genesee County Local EOC, 1101 Beach St., Flint, MI, 48502

5. SITUATION OVERVIEW: 1-125 IN has Soldiers deployed to the Flint Water Crisis in support of Distribution Operations at the Points of Distributions (PODs).Daily operations consist of receiving, tracking, and issuing out water, filters, replacement filters, and water test kits.

6. OWN SITUATION DISPOSITION /STATUS: Currently 1-125 IN has Soldiers on ground supporting the mission.

7. OPERATIONS: Operations for the next 24 hours are to sustain water/filter distributions throughout the 5 designated fire stations and track all distribution incoming and outgoing through the PODs.

a. Traffic outside of Stations 1, 5, and 8 still remains an issue.

1.) No response has been given to the request to have traffic signs in place at 3 of the POD locations. There have been 2 vehicle accidents in front of Station 8 over that last 48hrs.

b. Flint City Electricians have fixed the lighting issue at Station 8. POD 5 is still waiting for an update on the capabilities of additional lighting at Station 5.

8. PERSONNEL: Soldiers are currently assigned to the POD operations. Soldiers are assigned in five teams at Fire Stations 1, 3, 5, 6 and 8.

9. INTELLIGENCE / FORCE PROTECTION: Michigan militia did establish a presence within the AO. The intentions were not harmful and in support of efforts made to resolving issues to residents of Flint.

10. LOGISTICS: In support of recycle project sponsored by Schupon, the special purpose recycle bags have not been distributed to

POD operations. Logistics is expecting the recycle bags to be on the PODs for distribution within the next 48hrs.

C: Personal cell phone
E: Runner

12. NARRATIVE: N/A

13. COMMANDER'S EVALUATION:
• SPC Colwell at Station 1 tended to a Flint citizen who approached the fire station and was having an asthma attack. SPC Colwell successfully treated and stabilized her until local EMS could respond.
• There have been (2) car accidents at fire station 8 over the last 2 days. Neither was directly caused by our operation but the need for MDOT assistance to ensure worksite safety is becoming more critical.
• Consolidated Station Report OUT (last 24 hours)
Bottled water-5765 Water (Gallons)-33 Lead Testing Kits-889 (432 were returned to the warehouse to be reassembled correctly)

EXECUTIVE SUMMARY

1. DTG: 0113002016

2. UNIT: Points of Distribution (PODs), TF FLINT (1-125 IN)

3. POC:Ssg Gazzeny, Darryl L. Email: armyinfantry31@yahoo.com

4. PRESENT LOCATION: Genesee County Local EOC, 1101 Beach St., Flint, MI, 48502

5. SITUATION OVERVIEW: 1-125 IN has Soldiers deployed to the Flint Water Crisis in support of Distribution Operations at the Points of Distributions (PODs).Daily operations consist of receiving, tracking, and issuing out water, filters, replacement filters, and water test kits.

6. OWN SITUATION DISPOSITION /STATUS: Currently 1-125 IN has Soldiers on ground supporting the mission.

7. OPERATIONS: Operations for the next 24 hours are to sustain water/filter distributions throughout the 5 designated fire stations and track all distribution incoming and outgoing through the PODs.

a. SEOC has the POC with MDOT. Lt. Benke will be linking up with MDOT technician to do a visual reconnaissance.

1.) Workers from the City of Flint determined that they do not have the capabilities to support the road sign warnings. Local EOC was working through the Genesee County Road Commission and determined that they do not have the recourses to sustain our long term operations.

b. Flint City Electricians have assessed outside lighting issue at station 5 and 8. In addition, they will be fulfilling long requested work order for maintenance on all lighting at those stations. Station 8 work order to be initiated NLT 01FEB2016 0730.

8. PERSONNEL: Soldiers are currently assigned to the POD operations. Soldiers are assigned in five teams at Fire Stations 1, 3, 5, 6 and 8. 12 Soldiers were released and conducted reverse RSOI. new Soldiers will report 2JAN2016 in support of TF Flint.

9. INTELLIGENCE / FORCE PROTECTION: Michigan militia did establish a presence within the AO. The intentions were not harmful and in support of efforts made to resolving issues to residents of Flint.

10. LOGISTICS: In support of recycle project sponsored by Schupon, the special purpose recycle bags have not been distributed to POD operations.

13. COMMANDER'S EVALUATION:
• POD operations are still functioning well. We are trying to improve the efficiency, professional appearance, and long-term establishment of the POD's, but, overall the POD's operations are remaining successful.
• We have about half of the current 1-125 IN BN soldiers who would like to stay on the TF Flint mission orders. For continuity purposes, my recommendation is to utilize these as long as possible.
• Flint water response team badges were provided to the POD's to ensure each soldier was a credentialed member of the Flint water response team.
• MSU football is planning on sending (20) football players to assist in POD operations. The LEOC is working in acquiring a roster so we can establish a plan to have them assist in the operation. Orange reflective vests and Flint water response badges will need to be acquired from the LEOC for these volunteers.

MI-CIMS Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

Commanders Situation Report (SITREP)

1. DTG: 2712002016

2. UNIT: Points of Distribution (PODs), TF FLINT (1-125 IN)

3. POC: 1LT Roland, John G. Email: john.g.roland1.mil@mail.mil.com

4. PRESENT LOCATION: Genesee County Local EOC, 1101 Beach St., Flint, MI, 48502

5. SITUATION OVERVIEW: 1-125 IN has Soldiers deployed to the Flint Water Crisis in support of Distribution Operations at the Points of Distributions (PODs).Daily operations consist of receiving, tracking, and issuing out water, filters, replacement filters, and water test kits.

6. OWN SITUATION DISPOSITION /STATUS: Currently 1-125 IN has Soldiers on ground supporting the mission.

7. OPERATIONS: Operations for the next 24 hours are to sustain water/filter distributions throughout the 5 designated fire stations and track all distribution incoming and outgoing through the PODs.

a. LT Benke is meeting with local city engineering today in response to traffic signage at the PODs.

b. Yesterday evening Flint City Electricians assessed lighting around the outside areas of the PODs IOT fix lighting issues.

c. There will be a press conference at station #1 on Thursday 28JAN16 including the Governor and Mayor of Flint. All major agencies are sending a representative.

8. PERSONNEL: oldiers are currently assigned to the POD operations. Soldiers are assigned in five teams at Fire Stations 1, 3, 5, 6 and 8.

9. INTELLIGENCE / FORCE PROTECTION: No force threats have been identified.

10. LOGISTICS: PODs are short on pallet jacks. Pallet jackets should be arriving from the warehouse to the PODs today.

a. The distribution drives will also transport the broken pallet jacks from the PODs back to the warehouse.

b. (3) dollies/handcarts were delivered to station 3 and (2) dollies/handcarts were delivered to station 5, thus resolving the dolly/handcart issue.

11. COMMUNICATIONS: No communications issues at this time.

P: 800 MHz radios issued to PODs and WRTs.
A: RRF cell phones alternate for WRTs.
C: Personal cell phone
E: Runner

12. NARRATIVE: N/A

13. COMMANDER'S EVALUATION:
• POD operations are still functioning well. We are trying to improve the efficiency, professional appearance, and long-term establishment of the POD's, but, overall the POD's operations are remaining successful.
• More recycling assets have been/are being dropped off at the fire stations for empty water bottles and used water filter cartridges.
• Consolidated Station Report OUT (last 24 hours)
Bottled water-6206 Water (Gallons)-55 Lead Testing Kits-435
Pitcher (23 cup)-18 Brita Faucet Filter-409 Brita Replacement Cartridge-300
Pur Filter-201 Pur Replacement Filter-559

AGENCY INCIDENT OBJECTIVES
Current Operational Period
List 3 Major Objectives
Distributed water, water filters, and water test kits and collected water samples for analysis from the PODs
Improve POD distribution operations
Report timely and accurate logistics information to sustain distribution operations
Upcoming Operational Period
List 3 Major Objectives
Distribute water, water filters, water test kits and collect water samples for analysis from the PODs
Improve POD distribution operations. Maintain police presence at PODS
Report timely and accurate logistics information to sustain distribution operations

CONCERNS / ISSUES	
Concerns / Issues:	
Packaging residue from water and water filter bulk shipment over the course of daily operation has exceeded trash storage at the PODS. Request increase in frequency to trash collection to reduce building rubbish piles.	
Is the agency ECC Activated?	Yes
Agency facilities/operations impacted?	No

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

1. DTG: 2516002016

2. UNIT: Points of Distribution (PODs), TF FLINT (1-125 IN)

3. POC: 1LT Roland, John G. Email: john.g.roland2.mil@mail.mil

4. PRESENT LOCATION: Genesee County Local EOC, 1101 Beach St., Flint, MI, 48502

5. SITUATION OVERVIEW: 1-125 IN has Soldiers deployed to the Flint Water Crisis in support of Distribution Operations at the Points of Distributions (PODs). Daily operations consist of receiving, tracking, and issuing out water, filters, replacement filters, and water test kits.

6. OWN SITUATION DISPOSITION /STATUS: Currently 1-125 IN has Soldiers on ground supporting the mission.

7. OPERATIONS: Operations for the next 24 hours are to sustain water/filter distributions throughout the 5 designated fire stations and track all distribution incoming and outgoing through the PODs.

8. PERSONNEL: Soldiers are currently assigned to the POD operations. Soldiers are assigned in five teams at Fire Stations 1, 3, 5, 6 and 8.

9. INTELLIGENCE / FORCE PROTECTION: No force threats have been identified.

10. LOGISTICS: PODs are short on pallet jacks.

11. *COMMUNICATIONS: No communications issues at this time.*

P: 800 MHz radios issued to PODs and WRTs.
A: RRF cell phones alternate for WRTs.
C: Personal cell phone
E: Runner

12. NARRATIVE: N/A

13. COMMANDER'S EVALUATION:
• Changes to water distribution guidelines have been implemented seamlessly with each change. Proficiency and efficiency in reporting procedures for filter/water distribution and tracking has improved the logistics of keeping water in stock at the PODs.

AGENCY INCIDENT OBJECTIVES
Current Operational Period
List 3 Major Objectives
Distributed water, water filters, and water test kits and collected water samples for analysis
Improve POD distribution operations
Report timely and accurate logistics information to sustain distribution operations
Upcoming Operational Period
List 3 Major Objectives
Distribute water, water filters, water test kits and collect water samples for analysis (and relieve Red Cross)
Improve POD distribution operations. Maintain police presence at PODS
Report timely and accurate logistics information to sustain distribution operations

CONCERNS / ISSUES
Concerns / Issues:
Packaging residue from water and water filter bulk shipment over the course of daily operation has exceeded trash storage at the PODS. Request increase in frequency to trash collection to reduce building rubbish piles. Having police presence at PODS has helped diminish altercations.

EXECUTIVE SUMMARY

Commanders Situation Report (SITREP)

1. DTG: 2313002016

2. UNIT: Points of Distribution (PODs), TF FLINT (1-125 IN)

3. POC: SFC Witgen, Robert · Email: robert.d.witgen.mil@mail.mil

4. PRESENT LOCATION: Genesee County Local EOC, 1101 Beach St., Flint, MI, 48502

5. SITUATION OVERVIEW: 1-125 IN has Soldiers deployed to the Flint Water Crisis in support of Distribution Operations at the Points of Distributions (PODs). Daily operations consist of receiving, tracking, and issuing out water, filters, replacement filters, and water test kits.

a. Traffic issues have been resolved at stations 3 & 6 via new traffic equipment/set-up via MDOT.

b. Security issues have been addressed. The station NCOIC's will contact 1Lt Roland in the EOC for police assistance when needed. Additionally, they have POC's within the Genesee County Sheriff's Department as well as the phone numbers for the Flint PD's sergeants and patrol desk.
6. OWN SITUATION DISPOSITION /STATUS: Currently 1-125 IN has Soldiers on ground supporting the mission.

a. Soldiers are assigned and divided to man (5) Pods. assigned to be the Supply NCO. to the Genesee County EOC. ssigned as the Public Affairs NCOIC.

7. OPERATIONS: Operations for the next 24 hours are to continue water/filter distributions throughout the 5 designated fire stations.

8. PERSONNEL: Soldiers are currently assigned to the POD operations. in five teams at Fire Stations 1, 3, 5, 6 and 8.

a. reverse RSOI on 20160122 (Military Technician issue)

9. INTELLIGENCE / FORCE PROTECTION: No force threats have been identified. Traffic is a force pro measure.

10. LOGISTICS:

a. Pallet-jack – the station 8 delivery driver said he needs to take back his pallet-jack. He will be taking his pallet-jack back COB on Saturday 23JAN16. Additionally, station 6's pallet-jack is no longer working. Solution – request (2) pallet-jacks; (1) for station 6 and (1) for station 8
11. COMMUNICATIONS: No communications issues at this time.

P: 800 MHz radios issued to PODs and WRTs.
A: RRF cell phones alternate for WRTs.
C: Personal cell phone
E: Runner

12. NARRATIVE: N/A

13. COMMANDER'S EVALUATION:
• Briefing and sensing session held with all the Soldiers on the POD mission 222130RJAN16 to ensure that the most current SOP's for water & filter distribution was known to everyone as well as to allow any of the POD soldiers to express any questions, concerns, or issues they had in regards to the POD mission. Overall, there are no significant issues remaining; both the assistance and resources provided by the SEOC, Genesee County EOC, and TASK FORCE FLINT command cell have ultimately resolved the issues pushed up through the proper channels. Another main theme for the meeting was keeping up a professional appearance and maintaining military bearing both in front of the citizens of Flint and the media. All of the POD mission soldiers were reminded that the National Guard is the main source of hope for the city of Flint and that keeping up a popular public opinion and media image via professionalism and remaining positive in all aspects of the mission is essential to our continued success. The Soldiers were reminded NOT to speculate when talking with the media; talking points were reviewed.
• I explained about the twitter feed with the series of posts that drove the new policy for product distribution. We discussed all of the issues that the people of Flint have with the POD operation, how the new policies implemented should resolve them, and also how to reassure the citizens of Flint that we are simply here to help them in their time of need.
• The laundry issues have been resolved through local contact.

AGENCY INCIDENT OBJECTIVES

Current Operational Period

List 3 Major Objectives

Distributed water, water filters, and water test kits and collected water samples for analysis

Improve POD distribution operations
Report timely and accurate logistics information to sustain distribution operations
Upcoming Operational Period

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

Commanders Situation Report (SITREP)

1. DTG: 221300012016

2. UNIT: TASK FORCE FLINT

3. POC: CPT Shuster, Stephen M. Email: stephen.m.shuster.civ@mail.mil

4. PRESENT LOCATION: 1101 Beach St., Flint, MI 48502. Room G51.

5. SITUATION OVERVIEW: TF FLINT has Soldiers deployed to the Flint Water Crisis in support of DSCA Operations. In the last 24 hours, TF Flint conducted WRT operations with teams and made 6,300 contacts throughout the City of Flint, MI. The Point of Distribution (POD) continued receiving, tracking, and issuing out water, filters, replacement filters, and water test kits and receiving water test samples from the citizens of Flint, MI.

6. OWN SITUATION DISPOSITION /STATUS: TASK FORCE FLINT currently has Soldiers deployed in support of the Flint Water Crisis.

a. Soldiers conducting Mission Command operations out of Room G51, Genesee County EOC.

b. Soldiers assigned to POD operations. Breakdown as follows; Soldiers are assigned and divided to man (5) Pods. assigned to be the Supply NCO. assigned to the Genesee County EOC. assigned as the Public Affairs NCOIC.

c. Soldiers assigned to WRT operations divided into Teams, operation out of the Genesee County EOC.

d. Soldiers assigned to warehouse operations at the AMR run Clio Rd. water resource distribution warehouse.

7. OPERATIONS: Next 24 consists of deploying WRTs (PAX) with MSP and Genesee County Sheriff Department. PODs continue water/filter distributions throughout the 5 designated fire stations. Soldiers conduct warehouse operations at the AMR operated Clio Rd. water resource distribution warehouse. TF FLINT Mission Command conducts battle tracking and completes/issues OPORD 16-002 (OPERATION FLINT WATER RESPONSE).

8. PERSONNEL: Soldiers currently assigned to the Flint Water Crisis. Composition as follows: conducting Command and Control, conducting water distribution from the PODs, conducting water distribution as WRTs, and conducting warehouse operations at the AMR operated Clio Rd. water resource distribution warehouse.

9. INTELLIGENCE / FORCE PROTECTION: The PODs have been experiencing 2-4 daily occurrences of above average aggravation from citizens. No force protection measures have been taken at this time. Genesee County Sheriff's Department and the Michigan State Police have been notified of said incidents and are offering assistance when available. WRTs receiving daily weather reports during their morning brief.

10. LOGISTICS: See below.

a. Accountability of units from the Clio Rd. water resource distribution warehouse is being addressed with the addition of a five (5) Soldier logistics element.

11. COMMUNICATIONS: No communications issues at this time.

P: 800 MHz radios issued to PODs and WRTs.
A: RRF cell phones alternate for WRTs.
C: Personal cell phone
E: Runner

12. NARRATIVE: Not used.

13. COMMANDER'S EVALUATION:
- Talking points from the state JIC CUB slides have been disseminated to all Soldiers ISO POD operations. In conjunction with the media talking points provided by the RSOI, all of the Soldiers are well prepared to handle the increased media coverage and presence at the fire stations.
- Test kits that are returned to the PODs are being picked up no less than every other day by Mark
- FEMA is scheduled to conduct daily inventories of the supplies at the PODs.
- CPT Betz, TF FLINT S4, took receipt of laundry bags from mobile 220730R January 2016. The bags are in the process of being distributed to the soldiers.
- Total of all items at POD as of COB 21 January 2016 currently being calculated.
- TF FLINT WRTs made 6,300 contacts on 20 January 2016. Since doubling the number of PDAs issued to the teams, resource distribution has increased dramatically. As of 1230 today, over 8,000 contacts have been made on 22 January 2016.

AGENCY INCIDENT OBJECTIVES
Current Operational Period
List 3 Major Objectives
Distributed water, water filters, and water test kits and collected water samples for analysis
Improve POD distribution operations
Report timely and accurate logistics information to sustain distribution operations
Upcoming Operational Period
List 3 Major Objectives
Distribute water, water filters, water test kits and collect water samples for analysis (and relieve Red Cross)
Improve POD distribution operations. Maintain police presence at PODS
Report timely and accurate logistics information to sustain distribution operations

CONCERNS / ISSUES
Concerns / Issues:
Packaging residue from water and water filter bulk shipment over the course of daily operation has exceeded trash storage at the PODS. Request increase in frequency to trash collection to reduce building rubbish piles. Having police presence at PODS has helped diminish altercations.

Is the agency ECC Activated?	Yes

Joint Information Center / Public Information Officer

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Back | Archive | Create PDF

EXECUTIVE SUMMARY

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Feb. 11. The JIC was operational until 10 p.m. on Feb. 10.

State agencies at the JIC included the Michigan State Police, Michigan National Guard, and Departments of Environmental Quality and Health and Human Services. The Genesee County Sheriff's Office and American Red Cross were also present.

Tasks accomplished:

- Media hotline staff answered less than 10 emails and phone calls, ranging from the news media asking to embed with sentinel teams to inquiries about the city of Flint's boil water advisory.
- MDHHS Chief Medical Executive Dr. Eden Wells attended a Great Lakes Health Connect press conference, announcing the donation of $250,000 to connect various health care providers in the Flint area so they can easily share information about patients affected by lead exposure. Dr. Well was interviewed by the Associated Press and gave an update about children blood-level testing in Flint. Dr. Wells also conducted an interview with Michigan Radio about the boil water advisory in Flint.
- Created a morning and afternoon media monitoring report.
- Updated a Daily JIC Activities log to catalog actions completed for the day and planned for the week to keep all key agency PIOs aware of actions.
- Key state agency PIOs attended Gov. Rick Snyder's media availability at the Food Bank of Eastern Michigan. More than 10 news media members were at the event, representing local and regional outlets.
- Drafted talking points for Capt. Chris Kelenske for a 2:30 p.m. TeleTown Hall meeting hosted by the Governor's Office.
- The National Guard PIO conducted on-camera interview with a media outlet at Flint Fire Station No. 6, updating the reporter about ongoing operations and community relations.
- Continued routing public information materials for approval, including an updated recycling flier and a breast feeding and lead exposure fact sheet from MDHHS.
- Drafted a news release about a National Guard soldier saving a Flint resident's life. The JIC plans to issue the news release this afternoon.
- Drafted a media advisory about holding a media availability at the Genesee County Emergency Operations Center to give the news media access to a sentinel team briefing prior to disbursing throughout Flint.
- Drafted a follow-up news release to issue after the city of Flint's water warning is lifted.
- Continued working to have staffing for Feb. 16-26 by Thursday. Staffing has become difficult.
- Drafted and issued social media posts about ongoing Flint water emergency, including daily numbers and links to Oral Heath and Adult Lead Exposure fact sheets.

Joint Information Center / Public Information Officer

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Feb. 10. The JIC was operational until 8:30 p.m. on Feb. 9.

State agencies at the JIC included the Michigan State Police, Michigan National Guard, and Departments of Agriculture and Rural Development, Environmental Quality, and Health and Human Services. The Genesee County Sheriff's Office and the American Red Cross were also present.

Tasks accomplished:

- Media hotline staff answered less than 10 emails and phone calls, ranging from the news media asking to embed with sentinel teams to inquiries about why schools in Flint were not tested for lead until Oct. 2015.
- Created a morning and afternoon media monitoring report.
- Created a Daily JIC Activities email to catalog actions completed for the day and planned for the week to keep all key agency PIOs aware of actions.
- Key state agency PIOs attended the Governor's proposed FY2017 budget and a Gov. Rick Snyder media roundtable in Lansing.
- Continued updating and revising internal and general talking points to better reflect ongoing information.
- Continued routing public information materials for approval, including an updated recycling flier and a breast feeding and lead exposure fact sheet from MDHHS.
- Issued a press release about the state of Michigan launching new streamlined services for residents, with new testing sites to help confirm water quality.
- Drafted a press release about the next steps to take after the city of Flint issued a water warning on Feb. 9.
- Continued working to have staffing for Feb. 16-26 by Thursday.
- Began planning for a video shoot and news release about the Flint Farmer's Market being open for business.
- Drafted social media posts about ongoing Flint water emergency, including U.S. Small Business Administration's Flint Business Recovery Center and the American Red Cross and United Way playing a crucial role coordinating volunteer effort.

Joint Information Center / Public Information Officer

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Feb. 9. The JIC was operational until 9 p.m. on Feb. 8.

State agencies at the JIC included the Michigan State Police, Michigan National Guard, and Departments of Agriculture and Rural Development, Environmental Quality, Health and Human Services, and Natural Resources. The Genesee County Sheriff's Office was also present.

Tasks accomplished:

- Media hotline staff answered less than 10 emails and phone calls, ranging from inquiries about state costs incurred due to the Flint water emergency to testing dogs for lead toxicity. Media inquiries have continued to decline.
- Created a morning and afternoon media monitoring report.
- Created a Daily JIC Activities email to catalog actions completed for the day and planned for the week to keep all key agency PIOs aware of actions.
- Issued a news release about the role of the American Red Cross and United Way in coordinating volunteers.
- Issue a news release about the state's outreach to blind residents to help ensure access to information and resources.
- Shared the updated resource guides for water donations and recycling with 211.
- Continued updating and revising internal and general talking points to better reflect ongoing information.
- Continued routing public information materials for approval, including a newsletter article from the Michigan Department of Corrections and a Lead Toxicity fact sheet from MDARD.
- Continued discussions on drafting a news release to announce high-lead and copper teams that are beginning operations this week.
- Continued to post information on the www.michigan.gov/flintwater website, especially facts sheets and fliers in Spanish, Arabic, Mandarin Chinese and other languages.
- Held a 2:30 p.m. legislative and congressional conference call involving updates from key state agencies to talk about ongoing operations and activities.
- Revised staffing needs for next two-week period to reduce number of PIOs needed. Working to have staffing for Feb. 16 – 26 by Thursday.

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Feb. 8. State agencies at the JIC included the Michigan State Police, Michigan National Guard, and Departments of Agriculture and Rural Development, Environmental Quality, Health and Human Services, and Natural Resources. The Genesee County Sheriff's Office and the American Red Cross were also present. Tasks accomplished: • Media hotline staff answered less than a dozen emails and phone calls, ranging from lead in animals to water donations and questions about water testing at the Genesee County Jail. Media inquiries were significantly down compared to previous days. • Created a morning and afternoon media monitoring report. • Updated and revised our internal talking points to better organize information. • Continued routing public information materials for approval, including a fact sheet from EPA and facts sheets about lead in animals and pets. • Continued to post information on the www.michigan.gov/flintwater website, especially facts sheets and fliers in Spanish, Arabic and other languages. • Worked with FEMA to coordinate a 2:30 p.m. legislative and congressional conference call for Tuesday, Feb. 9, 2016. • Created a tracking sheet to manage the number of foreign language documents for distribution. • Had a visit from Governor Snyder and Richard Baird. Spent approximately 20 minutes discussing the role of the JIC and what we are hearing and doing. • Drafted a news release about the team visiting homes with high copper levels. Release is routing through for final approvals before dissemination this evening. • Drafted a news release about the American Red Cross playing a crucial role coordinating volunteer efforts during the Flint water emergency. Sent to ARC for review and approval prior to dissemination.

Joint Information Center / Public Information Officer

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Feb. 5. The JIC was operational until 9 p.m. on Feb. 4.

State agencies at the JIC included the Michigan Economic Development Corporation, Michigan State Police and Departments of Agriculture and Rural Development, Environmental Quality, Health and Human Services, Licensing and Regulatory Affairs, Treasury, and Military and Veterans Affairs. The Genesee County Sheriff's Office and the American Red Cross were also present.

Tasks accomplished:

- Held a media event to encourage people to check out Flint area restaurants with the Lt. Gov. Brian Calley and Michigan Department of Agriculture and Rural Development Director Jamie Clover Adams. Nine local and statewide news media members attended the event.
- Media hotline staff answered more than 10 emails and phone calls, ranging from Legionaries disease to inquiries about the city of Flint's use of corrosion control. Calls were down compared to previous days.
- Key agency PIOs fielded multiple news inquiries throughout the day, including conducting or scheduling interviews with WDIV-TV 4 in Detroit, WILX-TV 10 in Lansing and WNEM-TV 5 in Flint.
- The Michigan Department of Agriculture and Rural Development coordinated interviews with WWJ-AM 950 in Detroit, CNN, WXYZ-TV 7 in Detroit, and Michigan Radio regarding lead and pets.
- Created a morning and afternoon media monitoring report and looked for information requiring correction.
- Updated internal talking points about the ongoing Flint water emergency.
- Continued routing public information materials for approval, including a news release about encouraging food establishments to take advantage of free water safety inspections and a news release about translated documents. Also received Spanish translations of the pregnancy flier and other materials.
- Worked with Governor's Office to post information on the www.michigan.gov/flintwater website, especially facts sheets and fliers in Spanish, Arabic and other languages.
- Drafted a news release about state of Michigan teams visiting homes with lead levels above 150 ppb.
- Issued a news release around 10 a.m. about the state of Michigan encouraging food establishments to take advantage free water safety inspections. The news release was picked up by the Associated Press and other news media outlets.

Joint Information Center / Public Information Officer

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Feb. 4. The JIC was operational until 8 p.m. on Feb. 3.
State agencies at the JIC included the Michigan Civil Rights Commission, Michigan State Police and Departments of Agriculture and Rural Development, Environmental Quality, Health and Human Services, Licensing and Regulatory Affairs, Treasury, Corrections and Military and Veterans Affairs. The Genesee County Sheriff's Office and the American Red Cross were also present.
Tasks accomplished:
• Media hotline staff answered more than 20 emails and phone calls, ranging from inquiries about current operations underway to inquiries about Edible Flint.
• Key agency PIOs fielded multiple news inquiries throughout the day, including conducting or scheduling interviews with WEYI-TV 25 in Flint to WNEM-TV 5 in Flint.
• Michigan State Police F/Lt. David Kaiser, field PIO, conducted interviews with both WEYI-TV 25 in Flint and WNEM-TV 5 in Flint about ongoing operations underway and to quash any rumors about water donations and ID requirements at water response sites.
• Created a morning and afternoon media monitoring report and looked for information requiring correction.

• Updated internal talking points about the ongoing Flint water emergency.
• Continued routing public information materials for approval, including water filter installation fact sheets, pregnant women and lead fact sheet, adult lead exposure fact sheet, and oral health FAQ. Also began submitting materials for Spanish translation.
• Worked with Governor's Office to post information on the www.michigan.gov/flintwater website.
• Issued a media advisory about federal lead for Flint water crisis Dr. Nicole Lurie to visit EPA's command post.
• Drafted and released a news release about the state of Michigan partnering with MSU student athlete to help with Flint recycling and water distribution efforts. The Flint JIC intends to issue the news release tonight.
• Drafted and released a media advisory about state and local partners hosting a tour of the restaurant water assessment process. The media advisory is currently on hold per the Flint and Genesee Chamber of Commerce.

MI-CIMS

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Feb. 1. The JIC was operational until 11 p.m. on January 31, 2016.

State agencies at the JIC included the Michigan State Police, Michigan Community Service Commission, Michigan Economic Development Corporation and Departments of Environmental Quality, Natural Resources, Transportation, Health and Human Services, and Military and Veterans Affairs. The Genesee County Sheriff's Office and the American Red Cross were also present.
Tasks accomplished:

• Media hotline staff answered more than 20 emails and phone calls ranging from questions on a meeting between DEQ and EPA officials, pets and lead, and viewing water sample testing.

• Key agency PIOs fielded multiple news inquiries throughout the day, including conducting or scheduling interviews with Michigan Radio, Lansing State Journal, Detroit Free Press, and WNEM TV 5.

• Updated internal talking points about the ongoing Flint water emergency.

• Continued routing public information materials for approval, including communications from MDHHS and MDARD.

• JIC is planning to issue a news release around 7 p.m. regarding a meeting between DEQ and EPA, and the continued interagency partnership. This news release will take the place of the nightly numbers release.

• Updated ICS-204 with new task accomplishments and update work requirements.

Joint Information Center / Public Information Officer

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Jan. 29. The JIC was operational until 8:30 p.m. on Jan. 28.

State agencies at the JIC included the Michigan State Police, Michigan State Housing Development Authority, Michigan Economic Development Corporation and Departments of Agriculture & Rural Development, Environmental Quality, Health and Human Services, Licensing and Regulatory Affairs, Technology, Management and Budget, Treasury and Military and Veterans Affairs. The Genesee County Sheriff's Office, FEMA, and the American Red Cross were also present.

Tasks accomplished:

• Media hotline staff answered more than 20 emails and phone calls ranging from identification requirements at water resource sites to bathing in Flint water.

• Key agency PIOs fielded multiple news inquiries throughout the day, including conducting or scheduling interviews with the Detroit News, Detroit Free Press, Weather Channel, ABC 12, and The 74 (the74million.org).

• Added a distress line logo to the Flint Water website.

• Sent News Release about the effort to identify the location of lead pipes and other components of Flint's water infrastructure mapping infrastructure to locate lead pipes at 3:50 p.m.

• Added infographic from Genesee County Community Health to the resources section of Flint Water website

• Created a media monitoring report and looked for information requiring correction.

• Updated internal talking points about the ongoing Flint water emergency.

• Continued routing public information materials for approval, including communications from MDE, MDHHS and MDARD.

• JIC is planning to issue the nightly activity news release around 7 p.m.

• Working on revising the water donation guidelines flyer due to overwhelming demand of water donations.

• Continued adding individuals to staff the Flint JIC for the next two weeks.

• Coordinated with Genesee County Emergency Operations Center and State Emergency Operations Center regarding concerns from undocumented workers and English as second language speakers, including fielding a phone call from the Mexican Consulate in Detroit. Efforts are underway to reach out to these communities and to translate more materials for publication.

• Worked with Snopes.com to dispel Internet rumors.

Joint Information Center / Public Information Officer

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Jan. 28. The JIC was operational until 10:30 p.m. on Jan. 27.

State agencies at the JIC included the Michigan State Police, Michigan State Housing Development Authority, Michigan Economic Development Corporation, Michigan Community Service Commission, and Departments of Environmental Quality, Health and Human Services, Licensing and Regulatory Affairs, Technology, Management and Budget, and Military and Veterans Affairs. The Genesee County Sheriff's Office and American Red Cross were also present.

Tasks accomplished:

- Media hotline staff answered more than 20 emails and phone calls ranging from recycling to Spanish-speaking operators at 2-1-1.

- Received an inquiry regarding potential scams being perpetrated on residents of Flint. This information was referred to the Attorney General's office for a possible news release and further action.

- Key agency PIOs fielded multiple news inquiries throughout the day, including conducting or scheduling interviews with the Detroit News, Snopes.com, Bloomberg BNA, FOX 2, Supertalk 1570, WDIV Channel 4, and ABC 12.

- Assisted the Governor's Office with media photo op with Flint pastors at 10:30 a.m. at Flint City Hall.

- Issued a media advisory and coordinated a press conference about recycling with Lt. Gov. Brian Calley at noon at Fire Station #1. Used social media to promote the event as it occurred.

- Coordinated a live shot at Fire Station #1 with Channel 4 in Indianapolis. Six-thousand cases of water were donated by citizens of Indianapolis, IN, and were dropped off at the Clio Rd. warehouse.

- Staff attended a 3:00 pm community partnership meeting at the Red Cross office to help dispel rumors about immigration enforcement.

- Problem solved fact sheet printing issue with State Emergency Operations Center, Genesee County Emergency Operations Center, and Genesee County Health Department.

- Created a media monitoring report and looked for information requiring correction.

• Updated internal talking points about the ongoing Flint water emergency.

• Continued routing public information materials for approval, including communications from MDHHS and MDEQ.

• Obtained a recording of the Governor's tele-town hall on 1/17/16 and will post this information on the michigan.gov/flintwater webpage and include a link in the nightly news release.

• JIC is planning to issue the nightly activity news release around 7 p.m.

• Developed a dozen social media messages for use by state agencies to support operational messaging.

MI-CIMS Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Jan. 27. The JIC was operational

until 10:30 p.m. on Jan. 26.

State agencies at the JIC included the Michigan State Police, Michigan State Housing Development Authority, and Departments of Environmental Quality, Health and Human Services, Agriculture and Rural Development, Licensing and Regulatory Affairs, Technology, Management and Budget, and Military and Veterans Affairs. The Genesee County Sheriff's Office and American Red Cross were also present.

Tasks accomplished:
- Media hotline staff answered more than 10 emails and phone calls ranging from identification requirements at water resource sites to bathing in Flint water.
- Key agency PIOs fielded multiple news inquiries throughout the day, including conducting or scheduling interviews with the Detroit News, Thinkprogress.org, CNN, ABC 12, Marketplace and Michigan Radio.
- Assisted the Governor's Office with media check-in for an 11 a.m. press conference at the University of Michigan-Flint's Northbank Center to provide an update about current actions and next steps to address about Flint water. More than 40 members of the media attended the press conference from local, state and national outlets.
- Licensing and Regulatory Affairs and Environmental Quality PIOs attended the first meeting of the Flint Water Interagency Coordinating Committee at the University of Michigan-Flint's Northbank Center.
- Created a media monitoring report and looked for information requiring correction.
- Updated internal talking points about the ongoing Flint water emergency.
- Continued routing public information materials for approval, including communications from MDE, MDHHS and MDARD.
- Issued a news release at 1:15 p.m. to inform the public and news media that bathing in Flint water is safe for children and adults.
- JIC is planning to issue the nightly activity news release around 7 p.m.
- Working on revising the water donation guidelines flyer due to overwhelming demand of water donations.
- Emailed all state agency PIOs to request assistance with staffing the Flint JIC for the next two weeks.
- Coordinated with Genesee County Emergency Operations Center and State Emergency Operations Center regarding concerns from undocumented workers and English as second language speakers, including fielding a phone call from the Mexican Consulate in Detroit. Efforts are underway to reach out to these communities and to translate more materials for publication.

Joint Information Center / Public Information Officer

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Jan. 26. The JIC was operational until 10:30 p.m. on Jan. 25. State agencies at the JIC included the Michigan State Police, Michigan Economic Development Corporation, and Departments of Environmental Quality, Health and Human Services, Agriculture and Rural Development, Transportation, and Military and Veterans Affairs. The Federal Emergency Management Agency, Genesee County Sheriff's Office and American Red Cross were also present. Tasks accomplished: • Drafted and issued social media posts about water response teams and sites. • Provided MDHHS talking points to 2-1-1 about bathing in Flint water. Will also include information in nightly activity news release. • Worked with DTMB to make digital public information products ADA compliant, including the filter replacement video and www.michigan.gov/flintwater website. ADA issues for www.helpforflint.com were forwarded to the Governor's Office. • Worked with DTMB to optimize search engine results for www.michigan.gov/flintwater on Google and Bing. • Reorganized www.michigan.gov/flintwater so citizens can find information easier. • Media hotline staff answered more than 15 emails and phone calls ranging from lead water testing to undocumented immigrant identification. • *Key agency PIOs fielded multiple news inquiries throughout the day, including conducting or scheduling interviews with the Gospel* Radio Network, MIRS, Associated Press, ABC 12 in Flint and New York Times, Detroit Free Press, WILX-TV, MLive, Al-Jazeera, Michigan Radio, and ATTN. • Coordinated with FEMA to hold a 2:30 p.m. legislative and congressional conference call. • Created a media monitoring report and looked for information requiring correction; found none. • Updated internal talking points about the ongoing Flint water emergency. • Continued routing public information materials for approval, including communications from *MDE, MDHHS* and *MDARD*. • JIC is planning to issue the nightly activity news release around 7 p.m. Will include information on bathing, recycling and checking on your neighbors.

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Jan. 25. State agencies at the JIC included the Michigan State Police and Departments of Environmental Quality, Health and Human Services, Agriculture and Rural Development, Transportation, and Military and Veterans Affairs. The Federal Emergency Management Agency, Genesee County Sheriff's Office and American Red Cross were also present. Tasks accomplished: • Held a media availability at Flint Fire Station No. 8 to provide an update on the activities and mission of the water response teams. Maj. Gen. Gregory Vadnais, Spl/F/Lt. Dave Kaiser, Genesee County Sheriff's Office and the American Red Cross participated in the event. Roughly 10 local, state and national media outlets attended. o MSP F/Lt. Dave Kaiser conducted interviews with WNEM-TV 5, ABC 12, and MLive after the briefing. Maj. General Vadnais conducted a live interview with WNEM-TV 5 during the noon newscast. • Media hotline staff answered over 10 emails and phone calls ranging from donations to updates about the water response teams. • Key agency PIOs conducted multiple news interviews throughout the day, including interviews with Michigan Radio, Flint Journal and Detroit News. • Coordinated with FEMA to arrange a Congressional/Legislative briefing for tomorrow afternoon. • Created a media monitoring report and looked for information requiring correction; found none. • Updated internal and general talking points about the ongoing Flint water emergency. • Continued routing public information materials for approval, including communications from MDE and MDARD. • JIC is planning to issue the nightly activity news release around 7 p.m.

Joint Information Center / Public Information Officer

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
The Joint Information Center (JIC) is operating from the State Emergency Operations Center on Saturday, January 23 and Sunday, January 24. Tasks accomplished: • Created a media monitoring report and looked for misinformation. Found none requiring correction. • Continued work on redesigning the Flint water website. • Pushed out social media content based on Saturday's nightly press release. • Working on adding the palm card and foreign language palm cards to the website. • Updated internal and general talking points about the ongoing Flint water emergency. • Participated in a planning call to make arrangements for a press availability on Monday with key state agencies to provide operational update. • JIC is planning on issuing the nightly activity news release.

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
The Joint Information Center (JIC) is operating from the State Emergency Operations Center on Saturday, January 23 and Sunday, January 24. Tasks accomplished: • Created a media monitoring report and looked for misinformation. A call was made to WILX to amend their article that implied that the State was not distributing water to undocumented immigrants. The news release was also sent to WILX about how the State is not requiring identification to receive water resources. • Working on redesigning the Flint water website. • Added the Governor's appeal news release to the website. • Working on adding the palm card and foreign language palm cards to the website. • Updated internal and general talking points about the ongoing Flint water emergency. • Drafted talking points for Monday's press conference with Governor Snyder, Colonel Etue, and the Mayor. • JIC is planning on issuing the nightly activity news release.

Joint Information Center / Public Information Officer

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Jan. 22.

State agencies at the JIC included the Governor's Office, Michigan State Police, Michigan Economic Development Corporation, and Departments of Environmental Quality, Health and Human Services, Agriculture and Rural Development, Licensing and Regulatory Affairs, and Military and Veterans Affairs. The Federal Emergency Management Agency, Genesee County Sheriff's Office and American Red Cross were also present.

Tasks accomplished:

- Drafted social media posts about water response operations taking place.
- Observed rumors about identification being required at water resource sites. Drafted a news release to provide clarification.
- Created a media monitoring report and looked for misinformation.
- Media hotline staff answered over 15 emails and phone calls ranging from contractor services to complaints about ID being required at water resource sites.
- Updated internal and general talking points about the ongoing Flint water emergency.
- Continued routing public information materials for approval, including communications from MDE, MDARD, MDEQ, LARA and DMVA.

• JIC is planning to issue the nightly activity news release around 6 p.m.
• MSP F/Lt. Dave Kaiser worked with the news media about ongoing water emergency efforts, conducting interviews with Fusion TV and Yahoo News. He will conduct an interview on WNEM-TV 5 tonight about ongoing to water response efforts.
• MDHHS spokesperson conducted an interview with WNEM-TV 5 about bathing in water and whether it's safe to bathe in water.

Joint Information Center / Public Information Officer

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Jan. 21. State agencies at the JIC included the Governor's Office, Michigan State Police, Michigan Economic Development Corporation, Michigan Community Service Commission and Departments of Environmental Quality, Health and Human Services, Agriculture and Rural Development, Licensing and Regulatory Affairs, Military and Veterans Affairs, and Treasury. The Federal Emergency Management Agency, Genesee County Sheriff's Office and American Red Cross were also present. Tasks accomplished:

• Finalized an Official Statement about testing bottled water for lead. Recently, there were concerns raised about the possibility of lead being in the bottled water that is being given to residents of Flint. The statement was provided to ABC12 who contacted the JIC and also to 211 to use when asked.
• Created a media monitoring report and looked for misinformation. Called to request a correction to a Detroit Free Press headline that included WRTs were completing their work; headline was amended to indicate the mission is ongoing. Several media calls on this topic were received and answered today.
• Added the following content to www.michigan.gov/flintwater: link to www.helpforflint.com; water donation drive guidelines; Disaster Distress Helpline; and photos from National Guard door-to-door teams.
• Media hotline staff answered over 30 emails and phone calls.
• Updated internal and general talking points about the ongoing Flint water emergency.
• Continued routing public information materials for approval, including communications from MDE, MDARD, MDEQ, and MDHHS.
• JIC is planning to issue the nightly activity news release with water activity map around 6 p.m.
• MSP F/Lt. Dave Kaiser is scheduled for in-studio interview with ABC 12 tonight to share tonight's activity news release. It is expected to air during 11 p.m. newscast and again during tomorrow's morning newscast.
• MSP Sgt. Bruce Payne assisted the Detroit Free Press and Fox 2 Detroit in obtaining B-roll of the water response teams. F/Lt. Kaiser did a standup with WXYZ about water response team progress.

Joint Information Center / Public Information Officer

MI CIMS

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Jan. 20.

State agencies at the JIC included the Governor's Office, Michigan State Police, and Departments of Environmental Quality, Health and Human Services, Licensing and Regulatory Affairs, Insurance and Financial Services, Agriculture and Rural Development, Military and Veterans Affairs, and Michigan Community Service Commission. The Federal Emergency Management Agency, Genesee County Sheriff's Office and American Red Cross were also present.

Tasks accomplished:

- Issued a news release with updated water resource activity at 8:30 a.m.
- Issued media advisory and news release at 11 a.m. about the Michigan National Guard's increase in support and change in mission.
- Held a media availability as National Guard members began going door-to-door. NBC 25, ABC 12, and WOOD 8 attended.
- Drafted talking points for Captain Kelenske for the 2:30 p.m. Congressional/Legislative briefing conference call.
- Created media monitoring report and looked for misinformation, especially about donations as we had heard there was incorrect information being reported. No misinformation was found.
- Media hotline staff answered over 20 emails and phone calls. Received three calls from individuals offering products or services.
- Drafted guidelines for water donation drives.
- Continued routing public information materials for approval, including communications from MDE, MDARD, MDEQ, LARA, and MDHHS.
- Asked MDCR PIO to determine if messaging is needed regarding concerns from undocumented citizens; this was an issue raised by MDCR in morning SEOC briefing. They are reviewing it internally and will contact the JIC if messaging is needed.
- Governor's Communications Office issued a news release at 2:30 p.m. regarding the federal disaster appeal letter.
- JIC is planning to issue the nightly activity news release around 6 p.m., and will include the activity map if previous issues are sorted out.
- MSP F/Lt. Dave Kaiser will do an in-studio interview with NBC 25 tonight to share tonight's activity news release. It is expected to air during 11 p.m. newscast and again during tomorrow's morning newscast.
- For situational awareness only – The JIC was made aware that Sanjay Goupta of CNN will be conducting an interview tomorrow with Dr. Mona Hanna-Attisha at the Flint Farmers Market. We are not coordinating this interview and we are unsure of the time.

Joint Information Center / Public Information Officer

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Jan. 19.

State agencies at the JIC today included the Michigan State Police, and Departments of Licensing and Regulatory Affairs, Insurance and Financial Services, Agriculture and Rural Development, Michigan Economic Development Corporation, and Michigan Community Service Commission. The Genesee County Sheriff's Office was also present.

Tasks accomplished:

- Pushed the 1/18 water activity map on social media.
- Issued news release #09 regarding donations.
- Posted social media content regarding donations.
- Worked with FEMA External Affairs to organize a congressional/legislative conference call for tomorrow at 2:30 p.m.
- Updated daily internal talking points and general talking points.
- Confirmed the water filter video is now on available on Comcast On-Demand. The public service announcement began running Monday, Jan. 18., although it may take a couple of days for all cable boxes to receive the updated content.
- Monitored news media and social media for trends and misinformation. No corrections to news stories were required.

o *Topics being covered included:*

Democratic debate mention by Hillary Clinton
Flint as Governor Snyder's Hurricane Katrina
Class-action lawsuits filed today against the state
State of the State speculation – Flint water plan
President Obama possibly meeting with Flint Mayor in D.C. today

- Drafted a news release with the nightly water activity numbers – however, a decision was made in consultation with the Governor's Communications Office that this release will be held until 8:30 a.m. tomorrow (1/20) so as not to conflict with the numbers the Governor gives during his 7 p.m. State of the State address tonight.

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
The Joint Information Center (JIC) was operational in Flint from 8 a.m. to 10 p.m. on Jan. 14. On Jan. 15, the JIC opened at 8 a.m. and anticipates operating until at least 7 p.m. State agencies at the JIC included the Governor's Office, Departments of Health and Human Services, Agriculture and Rural Development, and Technology and Management and Budget, Natural Resources, Environmental Quality, Licensing and Regulatory Affairs, Military and Veterans Affairs and Michigan State Police. The Genesee County Sheriff's Office was also present. Tasks accomplished: • Updated ongoing talking points about Flint water situation. • Answered more than 10 media inquiries about topics ranging from the Governor's Flint visit to background information on the water response teams. • Planned a 2 p.m. legislative and congressional conference call, including developing talking points. • Monitored news media for misinformation and found none. Also monitored social media. • Started drafting a news release about water response teams and items distributed to date. • Continued establishing a staffing schedule through the week and into next week. The JIC will be open this weekend and on the Martin Luther King Jr. Day holiday. • Continued to update www.michigan.gov/flintwater to add new content and make enhancements to the site. • Created a GovDelivery account for dissemination of JIC news releases and began writing procedures. • Continued pagination, editing and final approvals of "Lead in Flint Water" MDHHS fact sheet.

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
The Joint Information Center (JIC) was operational in Flint from 8 a.m. to 11 p.m. on Jan. 13. On Jan. 14, the JIC opened at 8 a.m. and anticipates operating until 9 p.m.
State agencies at the JIC included the Governor's Office, Departments of Health and Human Services, Agriculture and Rural Development, and Technology and Management and Budget, Natural Resources, Environmental Quality, Licensing and Regulatory Affairs and Michigan State Police. The Genesee County Sheriff's Office and American Red Cross were also present.
Tasks accomplished: • Issued a media advisory at 8 a.m. about the Michigan National Guard Mobilization media event that occurred at 1 p.m. in Saginaw. Twelve news outlets attended. • Updated ongoing talking points about Flint water situation. • Monitored news media for misinformation and found none. • Started drafting a news release in anticipation of the request for a presidential declaration. • Michigan Association of Broadcasters disseminated radio public service announcements to stations. • Established a staffing schedule through the week and continued arranging staffing into next week. The JIC will be open this weekend and on the Martin Luther King Jr. Day holiday. • Continued to update www.michigan.gov/flintwater to add new content and make enhancements to the site. Design improvements will continue tomorrow. • Reviewed and approved MDARD food establishment fact sheet. Documents from MDE, MSHDA, and MDHHS have been reviewed and are pending edits. • Drafted state employee volunteer solicitation email.

Joint Information Center / Public Information Officer

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
The Joint Information Center (JIC) was operational in Flint from 8 a.m. to 5 p.m. on Jan. 12. State agencies at the JIC included the Governor's Office, Health and Human Services, Michigan Department of Agriculture and Rural Development, and Department of Technology and Management and Budget, Natural Resources, and Michigan State Police. Tasks accomplished during the operational period included: • Held an 8:15 a.m. media event where media members had an opportunity to get footage and photos of the water resource teams as they go door-to-door to distribute free bottled water, water filters, water filter replacement cartridges and water testing kits to residents throughout Flint. A photographer/videographer was embedded with the team. • Collaborated on a Governor's news release about a Public Service Announcement featuring Capt. Chris Kelenske from the Michigan State Police. The PSA provided information about the resources currently available for free to all Flint residents, including water filters, replacement filters, bottled water, water testing kits, and blood testing. • Issued Web and social media content about the water resource teams. • Reached out to local and nonprofit PIOs to become active participants in the JIC. • *Finalized MDARD letter and fact sheets to food establishments.*

- Sent water filtration video to Comcast. Working to get a Dish Network contact.
- Arranged for an interview with the New York Times, including directors from DEQ and MDHHS.
- Began preparing a news release to include numbers, including teams, sites, local and American Red Cross.
- Monitored traditional and social media.
- Received 17 calls from the news media on the JIC media hotline.
- Expanded JIC staffing and roles.
- Confirmed digital billboard to encourage residents to call 211 for water resources and information.

MI-CIMS Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
The Joint Information Center (JIC) was operational from 8 a.m. to 5 p.m. on Jan. 10. State agencies at the JIC included the Governor's

Office, Health and Human Services, and Michigan State Police.

Tasks accomplished during the operational period included:
- Finished coordinating and held a media event for Sunday, Jan. 10 at Flint Fire Station No. 1.
- Sent a media advisory for the Sunday, Jan. 10, media event at Fire Station No. 1.
- Drafted and sent JIC News Release No. 3 about deploying water resource teams in the city of Flint.
- Created social media posts about the water distribution sites and the Flint water website.
- Continued development of a door hanger for the community outreach efforts beginning next week.
- Continued developing a public service announcement.
- Updated the www.michigan.gov/flintwater website.
- Staffed for the next operational period.
- Conducted a media monitoring report.

The Joint Information Center (JIC) was operational from 8 a.m. to 5 p.m. on Jan. 9. State agencies at the JIC included the Governor's Office, Departments of Licensing and Regulatory Affairs, Health and Human Services, Environmental Quality, and Michigan State Police.

Tasks accomplished during the operational period included:
- Issued JIC News Release No. 2 about the water distribution sites at select Fire Stations in the city of Flint.
- Managed inquiries on the JIC hotline about the ongoing situation, covering topics ranging from FEMA in the State Emergency Operations Center to where people or companies can submit donations.
- Began coordinating a media event for Sunday, Jan. 10, at one of the Flint Fire Station water distribution sites, including local officials.
- Drafted a media advisory for the Sunday, Jan. 10, media event, possibly at Fire Station No. 1.
- Created social media posts about the water distribution sites and the Flint water website.
- Continued development of a door hanger for the community outreach efforts beginning next week.
- Continued developing a public service announcement.
- Updated the www.michigan.gov/flintwater website.
- Staffed for the next operational period.
- Conducted a media monitoring report.

Joint Information Center / Public Information Officer

MI-CIMS Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

The Joint Information Center (JIC) was operational at 1 p.m. on Jan. 6 and operational from 8 a.m. to 5 p.m. on Jan. 7. State agencies at the JIC included the Departments of Licensing and Regulatory Affairs, Health and Human Services, Agriculture and Rural Development, Environmental Quality, and Michigan State Police.

During the 8 a.m. to 5 p.m. operational period, Gov. Rick Snyder held a press availability with Flint Mayor Karen Weaver. In addition, a round-table press briefing occurred at 1 p.m. at the 4000 Collins Road facility.

Objectives included:

- Oversaw and managed the state of Michigan public information duties due to emergency declaration.
- Held a 4 p.m. conference call with Genesee County PIO Sheriff Robert Pickell and city of Flint PIO Lead Sean Kammer.

Information Gathering
- Created media monitoring reports about the disaster as needed.
- Crafted talking points about the ongoing disaster, including a better description of the emergency declaration process.
- Crafted social media posts about state efforts underway during the disaster recovery process.
- Created graphics for social media efforts.

Information Dissemination
- Answered phones and manage media inquiries in regards to the Flint Water situation.
- Worked to establish a GovDelivery account; post link of website to sign up.
- Finalized details, media invite list and host a media roundtable.

External Affairs
- Worked on planing a conference call between command staff and affected state legislators and congressional Jan. 8, 2015.

Administrative
- Worked on filling staffing for the next operational period.

Logistics
- Worked on fixing email accounts.
- Worked to established a location with Genesee County and the city of Flint for a Unified Joint Information Center by the end of the week.
- Established a conference call line for the media roundtable.

Licensing and Regulatory Affairs (LARA)

MI-GIMS

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Back | Archive | Create PDF

EXECUTIVE SUMMARY

Participated in briefings and updated the LARA Executive Team

LARA continues to monitor DEQ's test results for Health Care, Child Care, Adult Foster Care, HHS and MDE facilities and Schools.

LARA continuing efforts to plan and schedule faucet replacements for Flint schools.

Translation services for various documents continue to be provided as needed.

Ongoing discussion regarding coverage of state regulated facilities and elimination of duplication of effort.

AGENCY INCIDENT OBJECTIVES

Current Operational Period

List 3 Major Objectives

Assess needs for licensed facilities.

Coordinate with Flint Schools to complete material lists for faucet replacements

Provide translated documents to Joint Information Center

Upcoming Operational Period

List 3 Major Objectives

Assessment of facility needs

Track DEQ test results for all health, CC, and AFC facilities as well as schools.

Coordinate with DEQ regarding water testing

CONCERNS / ISSUES

Concerns / Issues:

City of Flint has the plumbing authority, but does not have any plumbing inspectors. If piping is replaced or altered, the state may be called in to assist with inspections.

Is the agency ECC Activated?	
Agency facilities/operations impacted?

LARA's Michigan Office of New Americans is processing translation requests for Arabic, Mandarin and Hmong. LARA continues to monitor DEQ's test results for Health care Facilities, Child Care Facilities, Adult Foster Care Homes and Schools.
AGENCY INCIDENT OBJECTIVES
Current Operational Period
List 3 Major Objectives
Assess needs for licensed facilities.
Coordinate with Flint Schools to complete material lists for faucet replacements
Upcoming Operational Period
List 3 Major Objectives
Assessment of facility needs
Track DEQ test results for all health, CC, and AFC facilities as well as schools.
Coordinate with DEQ regarding water testing
CONCERNS / ISSUES
Concerns / Issues:
City of Flint has the plumbing authority, but does not have any plumbing inspectors. If piping is replaced or altered, the state may be called in to assist with inspections.

Is the agency ECC Activated?	
Agency facilities/operations impacted?

Licensing and Regulatory Affairs (LARA)

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
Updated the LARA Executive Team Joe Madziar and Andy Neuman were up in Flint assisting DEQ with mapping of the Michigan School for the Deaf (MSD). They were able to complete the two school building. Construction to replace all of the fixtures in the dormitory at the school was in process today. Because of this Joe and Andy were unable to complete the mapping for the dormitory. Water testing will be completed at MSD tomorrow (Jan. 23). Alesha Gensler, Joe, Andy and the DEQ had a conversation with MSD's principal and administrative manager regarding issues and concerns of the parents of students at the school. There is a lot of concern regarding showering due to the fact that a number of these students have medical issue that could result in water getting underneath the skin and being absorbed into the body (example: feeding tubes). MSD is having a meeting with parents on Feb. 9 to address these issues. LARA has communicated these concerns with DHHS and MDE. DHHS is working to see if there are medical issues with bathing, given these skin openings. DHHS and MDE is also coordinating to see if there can be a medical person available for the parent meeting on Feb. 9. Joe completed a materials list required to finish construction at Freeman Elementary School to replace the remaining 22 fixtures. After these materials are recieved, LARA will coordinate with the school to complete construction and then coordinate with DEQ to complete a re-testing of the water.
AGENCY INCIDENT OBJECTIVES
Current Operational Period

EXECUTIVE SUMMARY

Two bubblers that were supposed to be overnighted and delivered to a Flint area Home Depot did not arrive. Without these bubblers the Freeman School faucet replacement pilot cannot be completed; Install could possibly be finished on 1/18 if parts arrive.

LARA is currently working with DEQ to create a schedule for LARA's Plumbing Division to help DEQ with testing of additional schools in the Flint area.

LARA Bureau of Community and Health Services is in contact with licensed facilities to ensure they are receiving appropriate assistance if needed. LARA is continuing to receive information on the facilities to determine the appropriate actions needed.

AGENCY INCIDENT OBJECTIVES

Current Operational Period

List 3 Major Objectives

Receive and deploy materials for pilot project.

Continue contact with licensed facilities

Upcoming Operational Period

List 3 Major Objectives

Assist DEQ with testing water at selected sites.

CONCERNS / ISSUES

Concerns / Issues:

City of Flint has the plumbing authority, but does not have any plumbing inspectors. If piping is replaced or altered, the state may be called in to assist with inspections.

Licensing and Regulatory Affairs (LARA)

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
Two bubblers that were supposed to be overnighted and delivered to a Flint area Home Depot did not arrive. Without these bubblers the Freeman School faucet replacement pilot cannot be completed; Install could possibly be finished on 1/18 if parts arrive. LARA is currently working with DEQ to create a schedule for LARA's Plumbing Division to help DEQ with testing of additional schools in the Flint area. LARA Bureau of Community and Health Services is in contact with licensed facilities to ensure they are receiving appropriate assistance if needed. LARA is continuing to receive information on the facilities to determine the appropriate actions needed.

AGENCY INCIDENT OBJECTIVES
Current Operational Period
List 3 Major Objectives
Receive and deploy materials for pilot project.
Continue contact with licensed facilities
Upcoming Operational Period
List 3 Major Objectives
Assist DEQ with testing water at selected sites.

CONCERNS / ISSUES	
Concerns / Issues:	
City of Flint has the plumbing authority, but does not have any plumbing inspectors. If piping is replaced or altered, the state may be called in to assist with inspections.	
Is the agency ECC Activated?	
Agency facilities/operations impacted?

Licensing and Regulatory Affairs (LARA)

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

Manley School, where some DEQ testing was done today, is actually "Manley Early Childhood Center". The facility is a Head Start program and is captured under LARA's licensed Child Care Homes/Centers, it is not a school. DEQ is aware of this

Two bubblers that were supposed to be overnighted and delivered to a Flint area Home Depot today did not arrive. Without these bubblers the Freeman School faucet replacement pilot cannot be completed; all other scheduled work was completed there today. DEQ testing will not be done at Freeman tomorrow, 1/17. DEQ is aware of this. Install could possibly be finished on 1/17 if parts arrive; with testing then being done on Monday since school is not in.

LARA is currently working with DEQ to create a schedule for LARA's Plumbing Division to help DEQ with testing of additional schools in the Flint area.

Agriculture and Rural Development (MDARD)

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Back | Archive | Create PDF

EXECUTIVE SUMMARY

MDARD's field activities for 2/10/2016 included:
- 6 food establishment assessments conducted (all follow-ups) and 5 in-use water samples collected
- no water sample requests/appointments were scheduled

As of 2/10/16, MDARD has completed a total of 346 food establishment assessments (271 initial/75 follow-up). 267 establishments are verified to be in compliance (77.17%). All high and medium risk firms have had an initial assessment. 214 water samples have been collected and 160 are currently scheduled.

MDARD's Animal Industry Division has created an Incident Management Team to deal with pet testing related issues in Flint.

Provided information to the JIC and Capt. Kelenski regarding using water from Flint for growing vegetables in response to a call on the Governor's Tele-Town Hall today.

AGENCY INCIDENT OBJECTIVES

Current Operational Period

List 3 Major Objectives

Coordination / Outreach on food processing, food retail, and food service/restaurants

Coordination on Animal Health / Exposure concerns

Review of areas where we can assist with nutrition issues

Upcoming Operational Period

List 3 Major Objectives

Determining staff availability / needs for SEOC participation

Analysis of grocery / farm market information for area

Conduct follow up food establishment assessments and verification sampling

CONCERNS / ISSUES

Concerns / Issues:

Is the agency ECC Activated?	No
Agency facilities/operations impacted?	No

MI CIMS

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

MDARD's field activities for 2/10/16:
- 5 surveys completed (all follow-ups)
- 5 in use samples collected

No appointments scheduled today.
Note: MDARD staff was in mandatory training today. Will be back out in the field 2/11/16.

In the SEOC, conversations with MDE today on fixture replacement and testing in schools. Planning is ongoing.

Genesee County Emergency Management and MDARD are working on a plan to test high risk pets (e.g. service animals) using local vet tech students. MDARD would pay for testing. Final details are being worked out. Expecting a resource request in the next day or so.

EXECUTIVE SUMMARY

MDARD's field activities for 2/9/16 included:
- 2 food establishment assessments conducted (both follow-up) and 2 in use water samples collected
- 5 water sample requests/appointments were scheduled

NOTE: There was a break in the water main at the Flint Water plant, so staff were unable to collect the majority of planned water samples today.

As of 2/8/16, MDARD has completed a total of 331 food establishment assessments (263 initial/68 follow-up). 231 establishments are verified to be in compliance (70%). All high and medium risk firms have had an initial assessment. 196 water samples have been collected and 137 are currently scheduled. Data is now being auto-calculated, resulting in reduction in total assessments reported on 2/5/16, but is now a more accurate count of total assessments.

The food establishment list with assessment, sampling and test results has been combined and mapping activities are underway.

MDARD has a conference call on February 10th at 8:30 am with stakeholder groups, including MSU, MDHHS and Genesee County to provide an update on current lead testing plans for dogs and to explore funding options and other assistance to provide additional testing.

The keep your pet safe from lead poster was posted on the FlintWater website (attached). A veterinarian guidance document was finalized today and will be posted as soon as possible.

Agriculture and Rural Development (MDARD)

MI-CIMS Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

MDARD's field activities for 2/8/16 included:
- 19 assessments conducted (11 initial, 6 follow-up and 2 second follow-up)
- 18 water samples collected (12 first draw samples and 6 routine samples)
- 6 water sample requests/appointments were scheduled

As of 2/5/16, MDARD has completed initial water assessments at all food businesses in the high risk area and has conducted a total of 426 assessments (380 initial/ 46 follow-up). The compliance rate is 77%. 169 water samples have been collected and 131 are currently scheduled. MDARD has been receiving questions about how to find the list of food businesses that are in compliance mentioned in a 2/5/16 press release. The list is at: http://www.michigan.gov/flintwater/0,6092,7-345-75251_75382---,00.html

MDARD attended the USDA – Natural Resources Conservation Services (NRCS) press conference in Flint today. The Flint-Genesee County High Tunnel Initiative is a partnership led by USDA NRCS to promote healthy, locally-produced food through the use of high tunnels. NRCS is providing $300,000 in financial and technical assistance to help local growers purchase and operate high tunnels. Applications are due to Flint NRCS by May 18th.

MDARD will be meeting later this week with the Land Bank to discuss the Clean and Green program and obtain a list of community garden information to supplement the data already provided to MDARD by Edible Flint.

MDARD continues to respond to questions on service and companion animals. Informational documents for the public and veterinarians are in the final review stages.

MI-CIMS Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

MDARD issues for Sun. Feb 7
A new map with updated information has been developed for MDARD by SEOC-GIS, and will be used for additional follow up with food related businesses this week.
Concerns are being expressed about lead poisoning in service/companion animals since those might tend to be more with the functional needs population, who may be unable to afford blood testing of their animal. SEOC-OPS has requested information that could be put out publically that may be an offer of assistance, if needed, for those concerned. That information could be provided to 211 who could then assist in getting them the appropriate and available help. MDARD will connect with their partners including MSU College of Veterinary Medicine and others on this issue and report back to OPS.

Agriculture and Rural Development (MDARD)

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

MDARD's field activities for 2/5/16 included:
o 15 water samples collected (10 were "in-use samples and 5 were "Routine")
o 7 water sample requests/appointments were scheduled today
In addition, 25 water test results were received this afternoon, one found to be at a high level of 83 ppb.

As of 2/04/16, MDARD has completed initial water assessments at all food businesses in the high risk area and has conducted a total of 415 assessments (375 initial/ 40 Follow-up). 154 water samples have been collected and 124 are currently scheduled.

MDARD held a phone conference today at to clarify who has or is conducting sampling in public and private schools, The meeting generated a list of actions that have been agreed upon at this time, along with assigning the responsible parties/agencies to follow-up on those actions.

The State Veterinarian conducted four interviews regarding lead toxicity and pets.

MDARD updated its Flint Staff instructions for Just In Time Training covering SOPs for sampling, follow-up and enforcement.

MDARD staff met with MSP GIS staff to discuss/ clarify data and information needs to generate maps and lists that will facilitate sampling planning. This will help GIS fulfill a MDARD resource request.

The MDARD SITREP data summary of sampling approved for 2016_Feb 4 is attached

MI-CIMS

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

MDARD's field activities for 2/4/16 included:
o 23 SURVEYS CONDUCTED (17 were follow up assessments, 5 were initial assessments)
o 29water samples collected (27 were "n-use samples and 2 were "Routine")
o 2 water sample requests/appointments were scheduled today

We received 36 new water results this morning, 2/04/16. Several are very high:
• First Presbyterian Church (Medium risk) at 746 S Saginaw: 1,964 ppb (IN-USE WATER SAMPLE - collected by K Russell on 2/1)
• King's Market (High risk) at 1602 Oren : 465 ppb (IN USE WATER SAMPLE - collected by M Kusnier on 1/29) -
• Arrowhead Veteran's Assn (High Risk) at 402 W Water St : 11 ppb (IN USE WATER SAMPLE collected by B Benson on 1/29) – Kitchen in the hall
• Arrowhead Veteran's Assn at 402 W Water St: 5 ppb (IN USE collected by B Benson on 1/29) – Kitchen at bar

Immediate action of field visits to be conducted today for compliance assessment of the affected establishments. Note that according to the inspector's report, King's Market has previously stopped using the water for food or drink.

As of 2/03/16, MDARD has completed initial water assessments at all food businesses in the high risk area and has conducted a total of 392 initial assessments. 149 water samples have been collected.

Reminder, that the daily MDARD Water Response Report will go out at 10am (summarizing the previous day's activities), instead of 4-5pm to allow proper time for all data from the day's activities to come in and be organized.

MDARD is scheduling a phone conference tomorrow, time TBD, with MDEQ, MLARA, MDE to clarify who has or is conducting sampling in public and private schools

A tour of the Restaurant Water Assessment Process is still scheduled for tomorrow, 2/05/16 at 09:00 at Blackstone's Pub and Grill.

Agriculture and Rural Development (MDARD)

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
As of 2/2/16, MDARD completed water assessments at all 21 food businesses in the high risk area and 127 in the medium risk and 221 in other areas (numbers differ from those reported 2/1/16 due to risk reclassification of some businesses). Follow-up assessments/verification sampling was completed at 15 firms. Staff have collected 125 water samples to date, with more scheduled for this week. Results for 61 of the samples are back. 51% had elevated lead levels (over 0.01 ppb) including 4 samples with levels greater than 15 ppb. MDARD Environmental Stewardship Division staff held a conference call today with several local entities regarding how we can coordinate urban agriculture/gardening questions related to the Flint Water issue. One resource is the MSU Extension Lead Webpage: http://msue.anr.msu.edu/program/info/lead . There was a rumor that the Michigan State University Veterinary Clinic was conducting free lead testing for Flint pet owners. It was confirmed this afternoon that this is not true.

AGENCY INCIDENT OBJECTIVES
Current Operational Period
List 3 Major Objectives
Coordination / Outreach on food processing, food retail, and food service/restaurants
Coordination on Animal Health / Exposure concerns
Review of areas where we can assist with nutrition issues
Upcoming Operational Period
List 3 Major Objectives
Determining staff availability / needs for SEOC participation
Analysis of grocery / farm market information for area
Conduct follow up food establishment assessments and verification sampling

CONCERNS / ISSUES
Concerns / Issues:

Is the agency ECC Activated?	No
Agency facilities/operations impacted?	No

MI-CIMS Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
As of 2/1/16, MDARD completed water assessments at all 18 food businesses in the high risk area and 105 in the medium risk and 80 in other areas (numbers differ from those reported 1/29/16 due to risk reclassification of some businesses.) The overall assessment compliance rate is 69.8%. We also have collected 84 water samples to date, with more scheduled for this week. MDARD Environmental Stewardship Division (ESD) Staff has been working with several local entities regarding urban ag/gardening questions related to the Flint Water issue. A conference call is schedule for 2/2/16 to better understand how we can coordinate efforts. MDARD Animal Industry Division (AID) held a conference call 1/29/16 with 12 industry/academic/medical/federal partners. The call created situational awareness among partners and stakeholders interested in the pet issue related to Flint water. AID is partnering with MSU College of Veterinary Medicine (CVM) to address animal issues, developing information pieces for the public and for veterinarians (with JIC approval), testing and laboratory issues. Also, MSU CVM is working with local MSU staff to identify specific community needs. AID is working with individual veterinarians/pet owners in the area on an individual basis as needed.

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
MDARD has developed plans for the week starting tomorrow February 1 for water sampling and assessments of food businesses as well as follow up based on test results, including verification and compliance assistance. As of 1/29, MDARD completed water assessments at all 18 food businesses in the high risk area and 135 of the 156 in the medium risk area, as well as 58 in the other parts of the City. The overall assessment compliance rate is 70.1%. We also have collected 74 water samples, with more scheduled for this week.

Agriculture and Rural Development (MDARD)

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

Thursday, Jan 29th -
MDARD completed five additional assessments today and one follow up visit due to elevated water sample results. We collected 11 additional samples. Food businesses are being notified of their results with follow up inspections being planned for any results above "not detected". The 1 remaining business in the high risk area that hadn't been sampled was visited today but was closed; we will verify again next week.
MDARD organized a call on animals and pets with approximately 15 organizations/entities including MI-DHHS, MSU College of Veterinary Medicine, MSU Diagnostic Center, USDA, and local, state, and national organizations involved in animal care. Planning is underway on potential sampling and treatment steps for impacted pets. Genesee Animal Control reported that they do not need any additional water donations. Additional calls are planned for next week.
MDARD is coordinating with MSU Extension and Genesee County Conservation District on outreach and information needs to work with urban agriculture and home gardeners. FYI - Genesee County Conservation District, USDA-Natural Resources Conservation Serviced and others are planning a press conference on Monday Feb 8th at 11am at the Flint Farmers' Market about using hoop houses for growing produce.

Agriculture and Rural Development (MDARD)

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

Thursday, Jan 28th -
The first water samples from food establishments have been returned; (8 reports received-50% 'not detected' and 50% at varying levels of lead detected from 2-21 ppb). MDARD is reviewing results and will be coordinating on next steps and requirements for those firms. Assessments of food businesses are continuing.
MDARD's Animal Health & Environmental programs is working on how to get information about pets and gardening / urban agriculture to people in the areas most impacted. We will coordinate public messaging with the JIC and have to coordinate with Local Health given the sensitivity and privacy concerns of residents.
MDARD plans to participate in a conference call with DEQ, LARA, DHHS, and MDE to discuss a common message regarding interpretation of water lead test results.
Question from Civil Rights re: cottage food producers - by legislation they are not licensed and do not have to register so there are no lists; MDARD will reach out to the areas where those businesses may be selling (generally farm markets)

MI-CIMS Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
Sunday, Jan 24 - planning for next week: MDARD Food program staff will continue assessments at remaining medium level risk area food businesses and collect samples from remaining high risk area businesses and those that have requested an appointment to pick up samples. We may get results from last week's samples sometime this week; that will impact responses and priorities. We will meet on Monday to set goals for coordination with other agencies and communication needs relating to pets and other animals.

Agriculture and Rural Development (MDARD)

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
Thursday, Jan. 21 - MDARD Food Program staff have completed assessments of all 21 food businesses (including restaurants) that were located in the highest risk area. In addition, they have completed assessments at 34 food businesses in the medium risk area, and we have scheduled 28 appointments to collect water samples. Additional activities today: 1) completed Resource Request for MDARD to send two laboratory personnel to help out at the MDEQ Laboratory. 2). working on inquiry that came through OPS regarding messages for what to do if you have pets. Existing documents on the flintwater website contain guidance; we are evaluating need for a stand alone document.

Last updated on 1/22/2016 16:34:20

EXECUTIVE SUMMARY

Wednesday, Jan. 20, provided Recovery Branch Director (Brianna Briggs at EMHSD) background on possible state and federal programs related to supporting the food and agriculture system and nutrition to assist with long term recovery.

MDARD staff has been working with GIS to develop a map overlay of the restaurants in the Flint area with a list received from Genesee County.

Per MDARD Ops Chief we have asked to move water sample staging location because current location does not offer security for supplies. Requesting same location as the sample drop off location (Flint Water Plant, 4500 N Dort Hwy, 48505 (810) 787-6538)

The FDA Detroit District Office Emergency Management Coordinator Lisa Joseph has contacted MDARD asking for whatever materials, flyers, etc. that have been sent out to day care providers/schools regarding preparing food safely and mixing formula for infants. Spoke with DHHS, Education, and LARA reps. and provided the referral websites included on a draft flyer being prepared for distribution.

MDARD Veterinarian Dr. Schalow is updating the veterinary spreadsheet to include all (as many as we can find) veterinary clinics in Genesee County. She will call additional clinics to update them on AID activities and provide basic information about the Flint water situation and resources for filters and water testing. So far, we have determined only one veterinary clinic on Flint water (Eascor Animal Hospital). Dr. Schalow also contacted Genesee County Animal Control Officer Paul Wallace for an update. Per Dr. Schalow, "Director Wallace states that, to the best of his knowledge there are no doggy daycares, dog parks, pet shops, kennel licensees, animal shelters, or animal rescues in the City of Flint (that would be on Flint water) so he is not conducting any activities at this time."

Livestock -- to date we have found no livestock in Flint.

Discussion with LARA SEOC rep regarding locations for MDARD Sample Collection and questions being asked to establishments

Talked with MDEQ SEOC rep regarding disposal of any bottled water that would require disposal if it tests positive for lead.

Spoke with Michelle Kuzera working from the Genesee County EOC asking if MDARD was going to provide something to the restaurants to display after they have been assessed by MDARD. Spoke to Sandra Walker MDARD Food & Dairy Division. She indicated they have been in discussions with Genesee County Health Department to develop a list or something like that to be posted on the Flint water website to indicate those restaurants that have been assessed and found in licensing compliance. Still working on the issue of providing them something that declares them "safe." Shared that back with Michelle at Genesee County EOC.

Agriculture and Rural Development (MDARD)

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
Tuesday Jan 19, updated and planned for MDARD FDD ICS sampling team and environmental assessment of the food and food service establishments in the Flint water distribution zone. Including location of training for the team and staging area for the sampling supplies and return of collected samples collocated at the Genesee Co. EOC. MDARD FDD ICS sampling team will be starting to do evaluations Wednesday afternoon. Additionally, we may start collecting water samples Thursday morning depending upon requests for samples from Food and Food Service establishments. Resolved question about one of the locations in USA Herds with a Flint address appears to be in an area served by City water; though the premise is listed as inactive in our database, the firm was visited and found to inactive with no animals on site. Continued coordination with the FDA Detroit District office for food establishments with joint jurisdiction in the Flint water distribution area.

MI CIMS Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

Friday Jan 15th update: MDARD further developed plans for notification and water sampling at food facilities. 14 Food & Dairy staff will be trained on procedures to collect water samples and will be ready to schedule appointments to collect samples. Food & Dairy will also be contacting the food businesses in the highest impacted areas. Motor Fuel Quality/Weights & Measures will be conducting a blitz next week to personally notify every gas station of the new requirements and refer them to our 800 number to schedule an appointment.

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
Jan 14th update - 4pm: Revised notice for use of water in food businesses was approved and has been sent by US Mail today to facilities licensed by MDARD and by Genesee Co. Health Department, except for the schools that MI Dept. of Education has already contacted. MDARD has identified food facilities in the most impacted areas and will be visiting those facilities first next week.

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
Jan 13th - 1/13/16 - MDARD Activities: Food Safety: The updated guidance document for water in retail food and restaurants/food service is done and is going out via US Mail, and attached here. MDARD Food staff will start scheduling water sampling and inspections for next week. Verified that the warehouses storing water do not need MDARD Food Licenses.

MDARD's Agriculture Development Division provided background on historical grants to the Flint Farmers' Market and Food Bank of Eastern Michigan and will be contacting those organizations to ask about barriers and potential opportunities to help strengthen the food system.
